

2020 ETHICON Product catalogue

The image features a white background with a large, abstract geometric shape in the lower right. This shape is filled with a light green color and contains a pattern of fine, parallel white lines. On the left side of this green area, there is a solid red triangle pointing towards the center. The word "LIGATION" is printed in a bold, red, sans-serif font within the green hatched area.

The background features a white space with a large green hatched area in the bottom right. A red triangle is partially visible on the left side, overlapping the green area.

SURGICAL STAPLING

SURGICAL STAPLING - PVS

**ECHELON FLEX
Powered Vascular
Stapler with Advanced
Placement Tip**

Product code	Description	Items in box
PVE35A	35mm Standard Articulating Endoscopic linear Cutter,• 320mm	3

**ECHELON FLEX
Vascular White
Reload for Advanced
Placement Tip -
35mm**

Product code	Reload color	Staple rows	Tissue thickness	Items in box
VASECR35	White	4	Vascular/thin	12

SURGICAL STAPLING – GST & Powered Plus

**ECHELON FLEX™
Powered Plus**
Powered 45mm Stapler

Product code	Description	Items in box
PLEE45A	45mm, 44cm long, 45° articulating endoscopic linear stapler	3
PSEE45A	45mm, 34cm long, 45° articulating endoscopic linear stapler	3
PCEE45A	45mm, 28cm long, 45° articulating endoscopic linear stapler	3

**ECHELON GST 45mm
Reloads**
To use with all ECHELON
45mm staplers

Product code	Reload color	Staple rows	Tissue thickness	Items per box
GST45W	White	6	Vascular / thin	12
GST45B	Blue	6	Regular	12
GST45D	Gold	6	Regular / thick	12
GST45G	Green	6	Thick	12
GST45T	Black	6	Very thick	12

GST – Gripping Surface Technology – better tissue control before and during the firing

SURGICAL STAPLING – GST & Powered Plus

**ECHELON FLEX™
Powered Plus**
Powered 60mm Stapler

Product code	Description	Items in box
PLEE60A	60mm, 44cm long articulating endoscopic linear stapler	3
PSEE60A	60mm, 34cm long articulating endoscopic linear stapler	3
PCEE60A	60mm, 28cm long articulating endoscopic linear stapler	3

**ECHELON GST 60mm
Reloads**
To use with all ECHELON
60mm staplers

Product code	Reload color	Staple rows	Tissue thickness	Items in box
GST60W	White	6	Vascular / thin	12
GST60B	Blue	6	Regular	12
GST60D	Gold	6	Regular / thick	12
GST60G	Green	6	Thick	12
GST60T	Black	6	Very thick	12

GST – Gripping Surface Technology – better tissue control before and during the firing

Controlled compression for a strong anastomosis^{1,2*}

ETHICON™ Circular Stapler

Adjustable tissue compression

- The ETHICON Circular Stapler with its controlled Tissue Compression and Adjustable Height Staple Technology is designed to deliver the desired compression needed for a strong anastomosis and effective perfusion.^{1,2*}
- Ethicon Circular Staplers delivered significantly less unacceptable tissue damage than Medtronic fixed compression circular staplers.^{3#}

Up to 35% reduced cutting force to break through the washer^{4†}

Compared to previous Ethicon™ Circular Stapler

- The Ethicon Circular Stapler, with up to 35% reduced force to break through the washer compared to the previous circular stapler, enabled users to more easily complete the firing sequence.^{4†}

Less tension on tissue during closure and opening^{5‡}

Compared to Medtronic DST Series™ EEA™

- The ETHICON™ Circular Stapler with its continuously smooth anvil shaft created 88% less tissue movement during anvil closure.^{5‡}
- Fixed anvil design caused 73% less tissue strain during opening.^{5§}

More device feedback when firing^{6¶}

Compared to Medtronic DST Series™ EEA™

- Breakaway washer created more audible and tactile feedback.^{6¶}

*In a porcine model maximum intraluminal pressure of an anastomosis correlated most strongly with the compression of the tissue involved in the anastomosis. #In-vitro collagen tissue model with Ethicon Circular Staplers, 19 out of 232 collagen tissues exhibited unacceptable tissue damage with adjustable compression (CDH29A), vs. 29 out of 88 with Medtronic fixed compression (EEA28 with green cartridge). Unacceptable injury was defined as cases where the damage exceeded half of the collagen thickness. †Benchtop testing of force to fire of Ethicon 25mm devices, comparing means of 70.92 in*lb for CDH25B (n=32) to 111.28 in*lb for CDH25A (n=32), p<0.05. ‡Benchtop testing on porcine colon, comparing means of 1.214mm for Ethicon CDH29B (n=23) to 10.240mm for Medtronic EEA28 (n=23), p<0.001 for tissue displacement, resulting in 8.4 times less longitudinal displacement during closure for CDH29B, and comparing means of 0.022 for Ethicon CDH29B (n=23) to 0.081 for Medtronic EEA28 (n=23), p=0.0016 for tissue strain, resulting in 3.4 times less circumferential strain during opening for CDH29B. §Benchtop testing on porcine colon, comparing means of 1.214mm for Ethicon CDH29B (n=23) to 10.240mm for Medtronic EEA28 (n=23), p<0.001. ¶Benchtop testing on porcine colon, comparing means of 0.022 for Ethicon CDH29B (n=23) to 0.081 for Medtronic EEA28 (n=23), resulting in 3.7 times less circumferential strain during opening for CDH29B (p=0.0016). ¶For use with updated codes (B codes): Benchtop testing comparing average vibration measured as mean vectorial acceleration during firing, ECS29B 11762mm/s² vs EEA28 3707mm/s², (p<0.001, 95% CI for difference = 6788mm/s², 9322 mm/s²). Benchtop testing comparing mean peak sound intensity during firing, ECS29B 100.46dB (linear) vs EEA28 96.32dB (linear), (p=0.003, 95% CI for difference = 1.57, 6.71).

ETHICON™ Circular Stapler, XL Sealed

CODE	DIAMETER	# OF STAPLES	OPEN STAPLE LEG LENGTH	CLOSED STAPLE HEIGHT	SHAFT LENGTH	QUANTITY PER BOX
