

Vortex Mixer XH-D

Product Description

The vortex mixer is a laboratory instrument that ingeniously combines oscillation and vortex, which can be applied to a variety of mixing and vortex oscillation operations, making the experiment more convenient and faster

Operating Features

- excellent mixing capability can make full 50ml containers mix within 3 seconds
- Perfect dynamic balance design can eliminate any movement in mixing
- Various applications with different interchangeable attachments
- Brushless DC motor and sturdy iron/aluminum casting base
- Wide speed range of 0-28000rpm
- Orbital diameter of 5mm

Product Specifications

Product Name	Vortex Mixer
Model	XH-D
Motion type	Orbital
Clamp type	rubber head, Flat rubber, bowl rubber
Speed range	Start up~3000rpm
Amplitude size	5mm
Voltage	110V 60Hz / 220V 50Hz
Dimension(mm)	170x120x170
Package(mm)	240x180x220
G.W./N.W.	4kg/3.5kg
