SINGLE-USE PROCTOSCOPE

For a reliable diagnosis of the rectum MICRO-TECH offers different proctoscopes in disposable variations. The proctoscopes are made of high quality clear acrylic, which ensures a clear view of the intestinal wall and avoids cold sensation for patients during insertion. The proctoscope's smooth surface prevents potential injuries while facilitating the examination.

EMBRELLA

During endoscopies, folds in the intestinal wall obstruct visibility and impede the detection of polyps. The design of the EMBRELLA cap tightens the intestinal wall and gently evens it out while also centering the endoscope and stabilizing its position. The cap can be easily and quickly attached to the endoscope tip.
