TR Band®

Radial Artery Compression Device

TR Band® is a compression device to assist patent haemostasis of the radial artery after transradial procedure. TR Band® assists in maintaining radial artery patency at the time of haemostasis, in order to prevent future radial artery occlusion (RAO).¹

Product Characteristics

- Selective compression of the radial artery to allow blood return and preserve patency¹
- Transparent structure for visual control of the puncture site
- Velcro² straps make application fast and simple
- Two band lengths available for a precise fit and optimal patient comfort¹

¹ Rathore S et al. Catheter Cardiovasc Interv 2010;76:660-667

² Velcro® is a registered trademark of Velcro Industries B.V.

General specifications

Maximum air injection volume	18 ml
