## LETTER OF RECOMMENDATION

By virtue of this letter, we are pleased to recommend and endorse QSystems to you.

Korea Financial Telecommunications & Clearings Institute (KFTC) worked in partnership with QSystems in 2017 on a national project to successfully develop and implement the Armenian Remittances Unified Systems (ARUS) for the Central Bank of Armenia.

Our project was successfully implemented thanks to joining forces with professional experts from QSystems. The company has established itself as a reliable KFTC partner, working strictly according to the contractual terms, fulfilling the work on time, and providing a high-quality software product.

It is essential for KFTC and our reputation that the end client is satisfied with our work, the final product and desired impact on the business. In this context, we prioritize the experience and qualifications of the entire team of specialists in such partnerships. The industry and business expertise of QSystems when combined with their ability to solve problems in the work and development process is their strong point of differentiation that separates them from their competitors.

The company distinguished itself with employees of high competence, vast experience, and dozens of successful implementations. We also note that most specialists have worked for this company for over ten years. As dedicated and knowledgeable managers and talented developers, they will be a beneficial addition to your organization or project.

It was a successful alliance and fruitful bilateral cooperation. We therefore strongly recommend QSystems services. If you need more information or specific details, please do not hesitate to contact us.

Sincerely Yours,

**Hae Rok KO**

Head of International Cooperation Center
