Protective coveralls (high protection for ATI wards)

Description

Protective overalls (high protection for ATI wards) 2311L

Technical Specifications

1.Main Material: laminated non-woven, total overall density/weight (non-woven + external lamination material) min 60g/m2. 2.Protective tape along the entire length of the seams. 3. Boots integral part of the overalls, provided with elastic at the ankle. 4.The hood should be with elastic and with a sewn-in flap or with a flap that comes as an integral part of the overalls hood for closure at the chin. The closure of the hood flap should be by fastening with adhesive tape. 5.To be closed with a zipper, the zipper slider provided with a fixing pad, to avoid accidental opening. The zipper must be covered with a plate with adhesive tape fastening on the distal portion of the plate, along the entire length of the zipper, to protect against the penetration of infectious agents through the zipper material. 6. The sleeve shall be secured with a loop for fixing on the finger to avoid the sleeve slipping out of the gloves. 7. A pair of additional booties made of laminated spond bond material, for additional protection of the foot. 8. The coverall must provide protection according to AAMI PB 70 performance level 4, or (EN 14126-B) and EN 14605, or equivalent. 9. Ensure freedom of movement. 10. Individual packaging with the inscription of the size and model of the coverall. Disposable product. Size L - STANDARD EUROPEAN SIZE
