# **nShield Connect HSMs**

Certified appliances that deliver scalable and highly available cryptographic key services across networks

## **nShield Connect HSMs**

### Feature Overview

nShield Connect HSMs are FIPS 140-2 and Common Criteria EAL4+ (EN 419 221-5) certified appliances that deliver cryptographic services to applications across the network. These tamper-resistant platforms perform such functions as encryption, digital signing and key generation and protection over an extensive range of applications, including certificate authorities, code signing, custom software and more.

The nShield Connect series includes nShield Connect+ and the high-performance nShield Connect XC.

#### HIGHLY FLEXIBLE ARCHITECTURE

nCipher's unique Security World architecture lets you combine nShield HSM models to build a mixed estate that delivers flexible scalability and seamless failover and load balancing.

#### PROCESS MORE DATA FASTER

nShield Connect HSMs support high transaction rates, making them ideal for enterprise, retail, IoT and other environments where throughput is critical.

#### PROTECT YOUR PROPRIETARY APPLICATIONS

The CodeSafe option provides a secure environment for running sensitive applications within nShield boundaries.
