| No. | Product name | Identification data | REF |
|-----|--|--|--------|
| 1. | Vectohep A-IgM | ELISA kit for determination of IgM to hepatitis A virus | D-0352 |
| 2. | Vectohep A-IgG | ELISA kit for quantitative and qualitative determination of IgG to hepatitis A virus | D-0362 |
| 3. | Vectohep TTV-IgG | ELISA kit for determination of IgG to TT virus | D-0802 |
| 4. | Vectohep E-IgG | ELISA kit for determination of IgG to hepatitis E virus | D-1056 |
| 5. | Vectohep E-IgM | ELISA kit for determination of IgM to hepatitis E virus | D-1058 |
| 6. | Vectohep G-IgG | ELISA kit for determination of IgG to hepatitis G virus | D-1252 |
| 7. | LymeBest-IgG | ELISA kit for determination of IgG to infectious borreliosis agents | D-1452 |
| 8. | LymeBest-IgM | ELISA kit for determination of IgM to infectious borreliosis agents | D-1454 |
| 9. | RecombBest antipallidum-IgG | ELISA kit for determination of IgG to Treponema pallidum | D-1852 |
| 10. | RecombBest antipallidum-total antibodies | ELISA kit for determination of total antibodies to Treponema pallidum | D-1856 |
| 11. | RecombBest antipallidum-IgM | ELISA kit for determination of IgM to Treponema pallidum | D-1858 |
| 12. | RecombBest antipallidum-total antibodies | ELISA kit for determination of total antibodies to Treponema pallidum | D-1857 |
| 13. | VectoHSV-1-2 - IgG | ELISA kit for determination of IgG to herpes simplex virus types 1 and 2 | D-2152 |
| 14. | VectoHSV - IgM | ELISA kit for determination of IgM to herpes simplex virus types 1 and 2 | D-2154 |
| 15. | VectoHHV-8 - IgG | ELISA kit for determination of IgG to human herpes virus type 8 | D-2160 |
| 16. | VectoHHV-8 - IgG | ELISA kit for determination of IgG to human herpes virus type 8 | D-2166 |
| 17. | Ureaplasma urealyticum - IgG-EIA-BEST | ELISA kit for determination of IgG to Ureaplasma urealyticum antigens | D-2254 |
| 18. | Ureaplasma urealyticum - IgA-EIA-BEST | ELISA kit for determination of IgA to Ureaplasma urealyticum antigens | D-2258 |
| 19. | VectoParotitis-IgG | ELISA kit for determination of IgG to parotitis virus | D-2602 |
| 20. | VectoParotitis-IgM | ELISA kit for determination of IgM to parotitis virus | D-2604 |
| 21. | Toxoana-IgG-EIA-BEST | ELISA kit for determination of IgG to toxocara antigens | D-2752 |
| 22. | Opisthorchiasis - IgG-EIA-BEST | ELISA kit for determination of IgG to opisthorchiasis antigens | D-2962 |
| 23. | Echinococcus-IgG-EIA-BEST | ELISA kit for determination of IgG to Echinococcus | D-3356 |

| | | | | |
|-----|---|---|---|--------|
| 24. | Ascariid-IgG-EIA-BEST | antigens | ELISA kit for determination of IgG to Ascaris lumbricoides | D-3452 |
| 25. | Lambliia-antibodies-EIA-BEST | Lambliia antibodies | ELISA kit for determination of IgG, IgM and IgA to Lambliia antibodies | D-3552 |
| 26. | Lambliia-IgM-EIA-BEST | Lambliia antibodies | ELISA kit for determination of IgM to Lambliia antibodies | D-3554 |
| 27. | Lambliia-antigen-EIA-BEST | Lambliia antigen | ELISA kit for determination of Lambliia antigen | D-3556 |
| 28. | Helicobacter pylori-Caga-antigen-EIA-BEST | ELISA kit for determination of total antibodies to Caga Helicobacter pylori | ELISA kit for determination of total antibodies to Caga Helicobacter pylori | D-3752 |
| 29. | TSH-EIA-BEST | thyroid-stimulating hormone | ELISA kit for determination of concentration of thyroid-stimulating hormone | X-3952 |
| 30. | T3 total-EIA-BEST | trithothyronine | ELISA kit for determination of concentration of total trithothyronine | X-3954 |
| 31. | T4 total-EIA-BEST | thyroxine | ELISA kit for determination of concentration of total thyroxine | X-3956 |
| 32. | Anti-TPO-EIA-BEST | antibody | ELISA kit for determination of antibody concentration to thyroperoxidase | X-3968 |
| 33. | PAPP-A-EIA-BEST | pregnancy-associated plasma protein A | ELISA kit for determination of concentration of pregnancy-associated plasma protein A | D-4150 |
| 34. | Mycoplasma hominis-IgG-EIA-BEST | hominis | ELISA kit for determination of IgG to Mycoplasma hominis | D-4352 |
| 35. | Mycoplasma hominis-IgA-EIA-BEST | hominis | ELISA kit for determination of IgA to Mycoplasma hominis | D-4358 |
| 36. | Mycoplasma pneumoniae-IgG-EIA-BEST | pneumoniae | ELISA kit for determination of IgG to Mycoplasma pneumoniae | D-4362 |
| 37. | Mycoplasma pneumoniae-IgM-EIA-BEST | pneumoniae | ELISA kit for determination of IgM to Mycoplasma pneumoniae | D-4366 |
| 38. | Vectorcmean - CHF - IgG | Congo hemorrhagic fever virus | ELISA kit for determination of IgG to Cirmean-Congo hemorrhagic fever virus | D-5052 |
| 39. | Vectorcmean - CHF - IgM | Congo hemorrhagic fever virus | ELISA kit for determination of IgM to Cirmean-Congo hemorrhagic fever virus | D-5054 |
| 40. | CEA-EIA-BEST | carcinoembryonic antigen | ELISA kit for determination of concentration of carcinoembryonic antigen | T-8454 |
| 41. | AFP-EIA-BEST | Alpha-Fetal Protein | ELISA kit for determination of concentration of Alpha-Fetal Protein | T-8456 |
| 42. | CA-125-EIA-BEST | oncromarker CA-125 | ELISA kit for determination of concentration of oncromarker CA-125 | T-8466 |
| 43. | CA 19-9-EIA-BEST | oncromarker CA 19-9 | ELISA kit for determination of concentration of CA 19-9 | T-8470 |
| 44. | CA 15-3-EIA-BEST | oncromarker CA 15-3 | ELISA kit for determination of concentration of oncromarker CA 15-3 | T-8472 |
| 45. | NSE-EIA-BEST | neuron specific enolase | ELISA kit for determination of concentration of neuron specific enolase | T-8476 |

| | | | | |
|-----|---------------------------|---|---|--------|
| 46. | Ferritin-EIA-BEST | ferritin | ELISA kit for determination of concentration of ferritin | T-8552 |
| 47. | IgE total-EIA-BEST | IgE | ELISA kit for determination of concentration of total IgE | A-8680 |
| 48. | IgG total-EIA-BEST | IgG | ELISA kit for determination of concentration of total IgG | A-8662 |
| 49. | IgM total-EIA-BEST | IgM | ELISA kit for determination of concentration of total IgM | A-8664 |
| 50. | IgA total-EIA-BEST | IgA | ELISA kit for determination of concentration of total IgA | A-8666 |
| 51. | Gamma-Interferon-EIA-BEST | gamma-Interferon | ELISA kit for determination of concentration of gamma-Interferon | A-8752 |
| 52. | Interleukine-4-EIA-BEST | Interleukine-4 | ELISA kit for determination of concentration of Interleukine-4 | A-8754 |
| 53. | Alpha-TNF-EIA-BEST | alpha-tumor necrosis factor | ELISA kit for determination of concentration of alpha-tumor necrosis factor | A-8756 |
| 54. | Alpha-Interferon-EIA-BEST | alpha-Interferon | ELISA kit for determination of concentration of alpha-Interferon | A-8758 |
| 55. | Interleukine-6-EIA-BEST | Interleukine-6 | ELISA kit for determination of concentration of Interleukine-6 | A-8768 |
| 56. | Interleukine-2-EIA-BEST | Interleukine-2 | ELISA kit for determination of concentration of Interleukine-2 | A-8772 |
| 57. | Procalcitonin-EIA-BEST | procalcitonin | ELISA kit for determination of concentration of procalcitonin | A-9004 |
| 58. | NTproBNP-EIA-BEST | terminal prothormone of brain natriuretic peptide | ELISA kit for determination of concentration of N-terminal prothormone of brain natriuretic peptide | A-9102 |
| 59. | Toponin I-EIA-BEST | toponin I | ELISA kit for determination of concentration of toponin I | A-9106 |

Orange County, California, January 10, 2020

IM Global Biomarketing Group - Moldova SRL,
Tighina str.65,office 607
MD-2001,Chisinau, Republic of Moldova

Commercialization Agreement

To Whom It May Concern:

We, Monobind Inc., an ISO 13485 certified company specializing in the research, development and manufacturing of in vitro diagnostic products for clinical and research application, located at 100 North Pointe Drive, Lake Forest, California 92630 USA;

Hereby authorizes and entitles IM Global Biomarketing Group from Moldova legally registered at Tighina str.65,office 607 MD-2001,Chisinau to effect clinical trials and evaluation of goods, registration of the goods at Health Ministry of Moldova, receive certificate of registration and conclude an agreement on consulting and examination of the documents needed for the registration in Moldova.

This is also to confirm that IM Global Biomarketing Group is the exclusive distributor our AccuBind® ELISA and AccuLite® CLIA products and accessories in Moldova. IM Global Biomarketing Group is authorized to promote and supply our products, to contract for their delivery and take part in tenders with our products.

This authorization is valid until January 1, 2021.

On behalf of the Monobind Inc.

Alicia Jerome Volkov
Marketing Director
Monobind Inc.

DECLARATION OF CONFORMITY

1) **Manufacturer (Name, department):** Monobind Inc.
 Address: 100 North Pointe, LAKE FOREST, CA 92630, UNITED STATES

2) **European authorized representative:** CEpartner4U BV,
 Address: ESDOORNLAAN 13, 3951DB MAARN, THE NETHERLANDS;
 (on product labels printed as:
 CEpartner4U, ESDOORNLAAN 13, 3951DB MAARN, THE NETHERLANDS. www.cepartner4u.eu)

3) **Product(s)** (name, type or model/batch number, etc.):

Immunoassay products;
 ELISA,
 CLIA,
 Control,
 Instruments
 (see appendix)

4) **The product(s) described above is in conformity with:**

Title **Document No.**
 In vitro Diagnostic Medical Devices Directive 98/79/EC

5) **Additional information** (Conformity procedure, Notified Body, CE certificate, Registration, etc.):

Conformity assessment procedure for CE marking: In vitro Diagnostic Medical Device Directive,
 Annex III

Registration nr. : NL- CA002-22758 and NL- CA002-22762

AUTHORIZATION LETTER

TO WHOM IT MAY CONCERN:

MEDICA CORPORATION, having facilities at 5 Oak Park Drive, Bedford, MA 01730, USA, do hereby authorize the company:

GBG-MLD SRL
65 Tighina Site
Office 607
Chisinau, MD-2001
Republic of Moldova

to be our **DISTRIBUTOR** for the **EasyLyte®**, **EasyElectrolytes™**, **EasyBloodGas™** and **EasyStat®** analyzers as well as associated reagents and consumables in **Moldova**.

GBG-MLD SRL is authorized by **MEDICA CORPORATION** to enter tenders and quote for all aforementioned products.

GBG-MLD SRL is authorized by **MEDICA CORPORATION** to present offers on our behalf to tenders placed by the government and other institutions for Medica products and consumables

GBG-MLD SRL responsibilities include sales of the **EasyLyte®**, **EasyElectrolytes™**, **EasyBloodGas™** and **EasyStat®** analyzers and providing service as well as maintaining a supply of reagents and replacement parts.

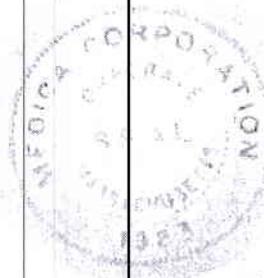

GBG-MLD SRL is also authorized to provide warranty service for the **Medica EasyLyte®**, **EasyElectrolytes™**, **EasyBloodGas™** and **EasyStat®** analyzers.

This authorization is effective immediately and is valid until December 31, 2022, unless revoked earlier in writing by Medica Corporation.

Letter of Authorization

Avantor Performance Materials Poland S.A., reg. No. 0000010108 who is an established manufacturer of Hematology- Reagents, Stains, Controls and Calibrators and products for Histology located at:

Sowińskiego 11
44-101 Gliwice
Poland

herewith confirms that:

I.M Global Biomarketing Group Moldova S.R.L
Republic of Moldova
MD-2001, Chisinau
Tighina str. 65, 607 office
Tel (373 22) 549 120, 549 121
Fax (373 22) 547 373

is authorized to act as our distributor for our hematology/histology reagents and controls (Products) in Moldova

We declare that we will supply the Products for the needs of tenders.
We declare that we will supply the Products for tenders with warranty as per the Avantor General Conditions of Sale.

Furthermore I.M Global Biomarketing Group is duly entitled to:

- Register, promote, offer, negotiate prices and sell our Products in Moldova;
- carry out the required product training of the medical and technical personnel who will use these products.

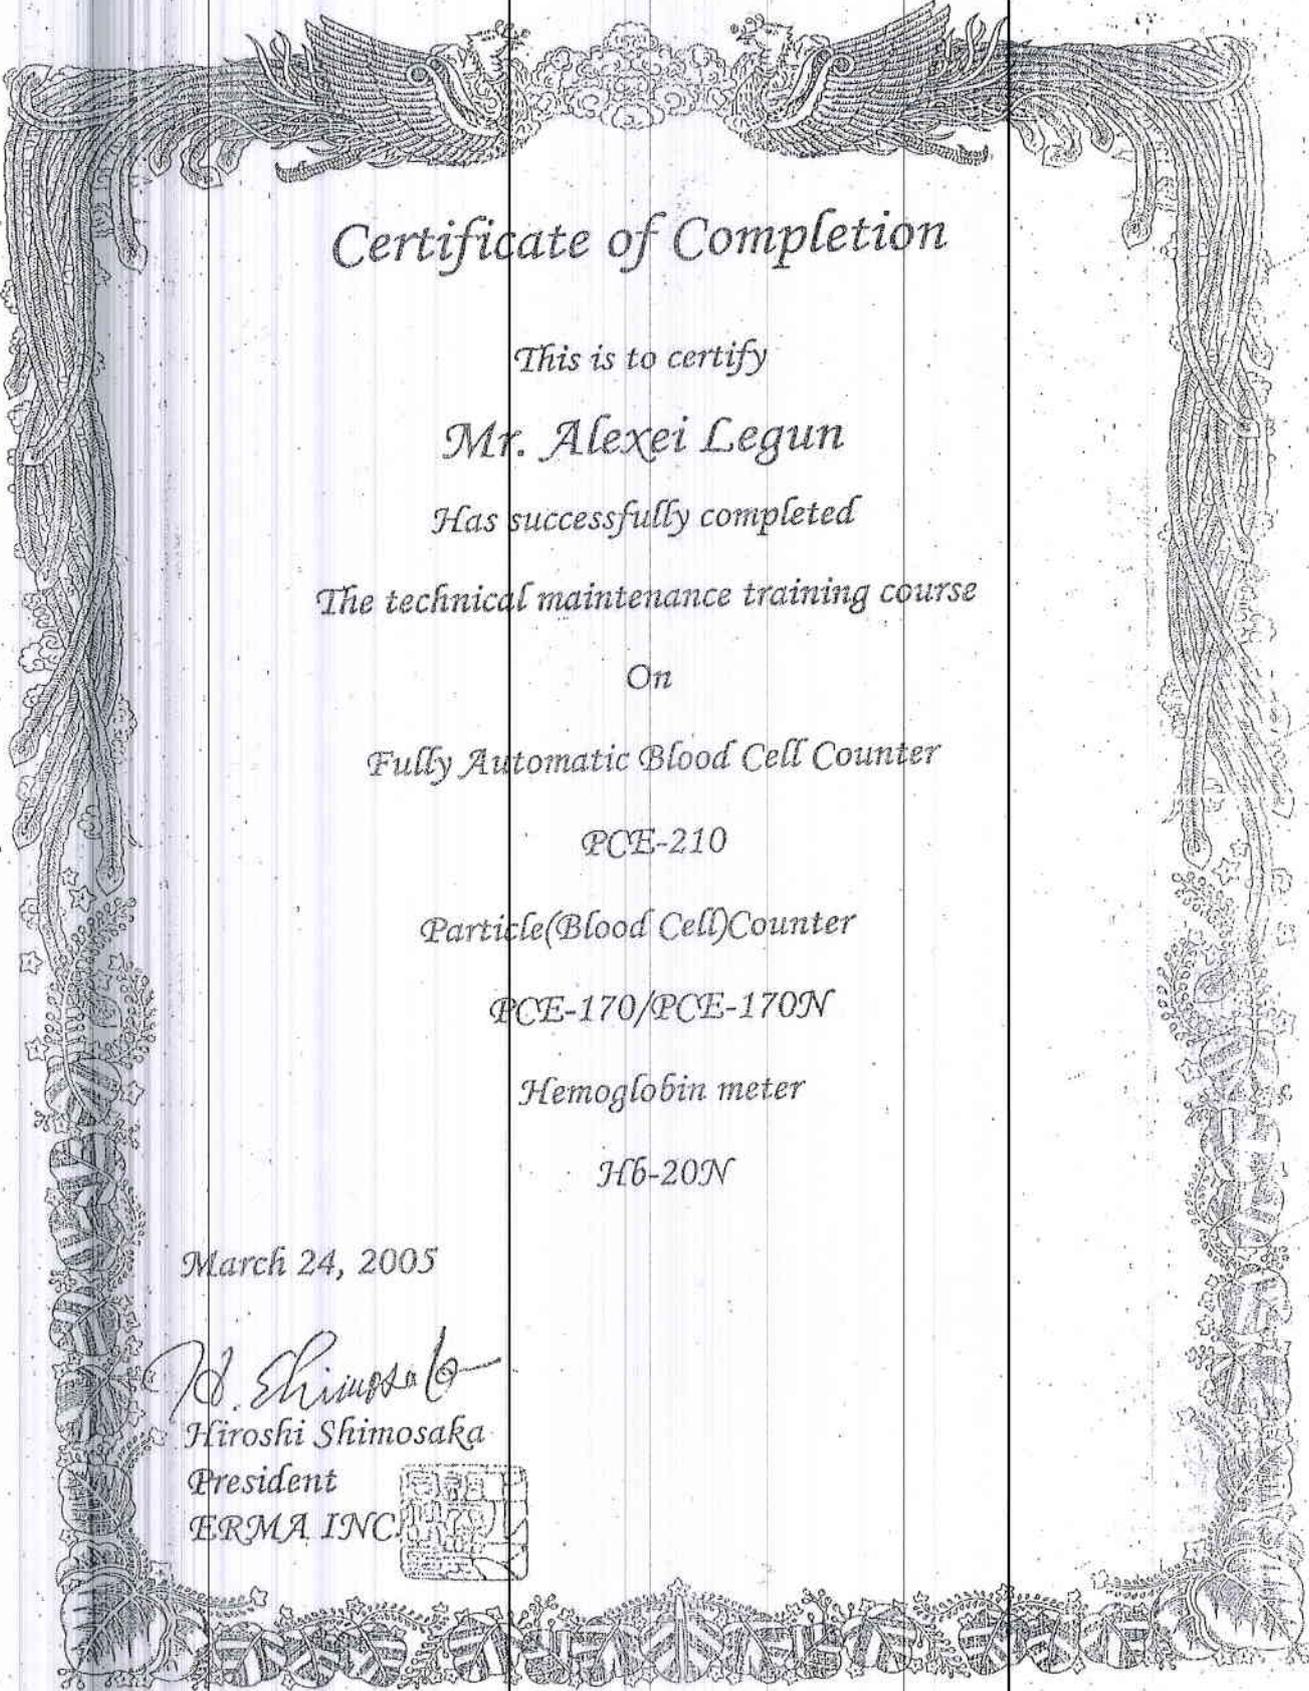

The product specialists of I.M Global Biomarketing Group have been duly trained and are qualified for providing all services in regards to consulting, sales, maintenance and training.

In all the above activities I.M Global Biomarketing Group is acting in its own name and on its own account.

This authorization letter is valid until about 1 year after date.

Diluid* Erma

Intended use

Diluid* Erma is a specially filtered, non-sterile blood diluting fluid for use in cell counting and sizing.

The reagent is designed for automated instrumentation, capable to monitor a three-part WBC differential, based on the aperture impedance principle and electronically adjusted to operate at an osmolality of 330 ± 20 mOsm/kg. Diluid* Erma should be used in combination with CyMet* ERMA III Diff and Lyzerglobin* PCE.

Summary and principle

The reagent is used to dilute whole blood prior to counting and sizing of RBC, PLT and WBC. Content of the reagent maintains stability of RBC, PLT and WBC during counting.

Content: Diluid* Erma is water based and contains:

NaCl, Na₂SO₄, procaine HCl and preservatives in an inorganic buffer compound.

Warning and precautions

Harmful if swallowed. Avoid contact with eyes, skin and clothing.

Storage and stability: Diluid* Erma is stable for three years at 18-30°C.

Indications of deterioration

There are no visible deteriorations; otherwise the reagent shouldn't give optimised performance. The reagent can be used through out shelf life, giving optimised performance. No guarantees to reagent performance are given after the expiry date.

Instructions for use

Diluid* Erma should be used undiluted according to instrument manufacturer's instructions for use and should be connected as listed in the Operators manual. Reagent may be used with Hypochlorite 0.5% or Proclean* as a cleaning agent. Furthermore reagent may be used with next lysing reagents: with CyMet* ERMA III Diff and Lyzerglobin* PCE.

CyMet* Erma III Diff

Intended use

CyMet* Erma III Diff is a specially filtered, non-sterile blood lysing reagent fluid for use in cell counting and sizing.

The reagent is designed for automated instrumentation, capable to monitor a three-part WBC differential, based on the aperture impedance principle. CyMet* Erma III Diff is also used to analyse Hemoglobin by optical measurement. CyMet* Erma III Diff should be used in combination with Diluid* ERMA.

Summary and principle

The reagent is used prior to counting and sizing of WBC. The reagent stromatolysis RBC to release Hemoglobin prior to analyse it by optical measurement and modifies WBC for counting and sizing.

Content: CyMet* Erma III Diff is water based and contains: Quaternary ammonium compounds and KCN (<0.1%).

Warning and precautions

Harmful if swallowed. Avoid contact with eyes, skin and clothing.

Storage and stability: CyMet* Erma III Diff is stable for two years at 18-30°C.

Indications of deterioration

There are no visible deteriorations; otherwise the reagent shouldn't give optimised performance. The reagent can be used through out shelf life, giving optimised performance. No guarantees to reagent performance are given after the expiry date.

Instructions for use

CyMet* Erma III Diff should be used undiluted according to instrument manufacturer's instructions for use and should be connected as listed in the Operators manual.

Reagent may be used with Proclean* And Hypochlorite 0.5% as a cleaning agent. Furthermore reagent may be used with Diluid* ERMA.

ProClean*

Intended use

ProClean* is a specially filtered, non-sterile cleaning fluid for use in cleaning of cell counters.

The product is designed for semi-automated and automated instrumentation, capable to clean blood diluting parts of the instrument.

Summary and principle

The reagent is used to clean blood diluting parts prior to remove cell fragments from the instrument.

Content

ProClean* is water based and contains:

Proteolytic enzym, poly-oxy-ethylene-alkyl-alcohol, NaCl, Na₂SO₄ and preservatives in an inorganic buffer compound. ProClean Contains a purple inert dye.

Warning and precautions

Harmful if swallowed. Avoid contact with eyes, skin and clothing.

Storage and stability

ProClean* is stable for two years at 18-30°C.

Indications of deterioration

There are no visible deteriorations; otherwise the reagent shouldn't give optimised performance. The reagent can be used through out shelf life, giving optimised performance. No guarantees to reagent performance are given after the expiry date.

Instructions for use

ProClean* should be used undiluted according to instrument manufacturer's instructions for use and should be connected as listed in the Operators manual.

Reagent may be used with all kinds of Diluids* and CyMet's*.

Pack size

Hypochlorite 0.5%

Intended use

Hypochlorite 0.5% is a specially filtered, non-sterile cleaning fluid for use in cleaning of cell counters.

The reagent is designed for semi-automated and automated instrumentation, capable to clean blood diluting parts of the instrument.

Summary and principle

The reagent is used to clean blood diluting parts prior to remove cell fragments from the instrument.

Content

Hypochlorite 0.5% is water based and contains:

Sodium hypochlorite (0.5% active chlorine) and poly-oxy-ethylene-alkyl-alcohol.

Warning and precautions

Harmful if swallowed. Avoid contact with eyes, skin and clothing.

Storage and stability

Hypochlorite 0.5 % is stable for one year at 18-30°C.

Indications of deterioration

There are no visible deteriorations; otherwise the reagent shouldn't give optimised performance. The reagent can be used through out shelf life, giving optimised performance. No guarantees to reagent performance are given after the expiry date.

Instructions for use

Hypochlorite 0.5% should be used undiluted according to instrument manufacturer's instructions for use and should be connected as listed in the Operators manual.

Reagent may be used with all kinds of Diluids* and CyMet's*.

Declaration of conformity:

Avantor Performance Materials Poland S.A. who is an established manufacturer of reagents and products for diagnostic in vitro located at:

Sowińskiego 11 Street
 44-101, Gliwice
 Poland

Herewith declares the following:
 Reagents mentioned in attached list are labeled with J.T.Baker label, comply with the In Vitro Diagnostic Medical Devices Directive 98/79/EC and the requirements of ISO 13485 Standard.
 This declaration is the basis for CE marking of the In Vitro Diagnostic Medical Devices.
 The products are not part of List A and List B of Annex II of the IVD Directive 98/79/EC but are subject to self registration.
 This declaration is valid for all the IVD medical devices described above and which are placed on the market by ourselves on or after the date hereof and which bear the CE marking

CERTIFICAT CERTIFICATE

N° A 3001

Nous certifions par la présente que le Système de Management de la Qualité de la société :
We hereby certify that the Quality Management System of the company:

**BIOLABO
LES HAUTES RIVES
02160 Maizy - France**

est conforme aux exigences de la norme suivante :
is in compliance with the requirements of the following standard:

ISO 9001 : 2015

Le domaine d'application du Système de Management de la Qualité est le suivant :
The scope of the Quality Management System is:

**CONCEPTION, FABRICATION ET VENTE DE DISPOSITIFS
MÉDICAUX DE DIAGNOSTIC IN VITRO. SUPPORT
TECHNIQUE ET SERVICE D'ASSISTANCE.**

*DESIGN, MANUFACTURING AND SALE OF IN VITRO DIAGNOSTIC MEDICAL DEVICES.
TECHNICAL SUPPORT AND SUPPORT SERVICES.*

Ce certificat demeurera en vigueur jusqu'à sa fin de validité à moins d'avis contraire, à condition que la mise en place et la conformité du Système de Management de la Qualité soient jugées satisfaisantes lors des audits de surveillance et que les conditions du contrat de AB Certification soient observées.

This certificate is valid until its expiry date unless further notice, provided that the compliance and implementation of the Quality Management System are found to be satisfactory at follow-up audits and that AB Certification contract rules are fulfilled.

Fait à PARIS, le 24 décembre 2018

DECLARATION DE CONFORMITE CE
DECLARATION OF EUROPEAN CONFORMITY

REACTIFS & INSTRUMENTS DE LABORATOIRE
LABORATORY REAGENTS & INSTRUMENTS

Je soussigné, Isabelle Oget, Directrice des Affaires Réglementaires de BIOLABO S.A.S., certifie par la présente que nos Réactifs Code HS 3822.00.00 et Instruments sont fabriqués par la société BIOLABO S.A.S sur le site de Maizy (F-02160) pour une distribution mondiale incluant l'Union Européenne.

I, the undersigned, Mrs Oget Isabelle, Regulatory Affairs Director of BIOLABO S.A.S., certify that our Reagents HS Code 3822.00.00 and Instruments are manufactured by BIOLABO S.A.S in its Maizy facilities (Les Hautes Rives, F-02160, France) for a world-wide distribution including European Union (EU).

1) La procédure de déclaration de conformité suivie est conforme aux indications de l'Annexe III de la Directive Européenne DMDIV 98/79/CE.

The conformity assessment procedure being followed is Annex III of the IVD Directive 98/79/EC

2) Les Produits désignés (CONFORMEMENT A L' ANNEXE, 6 PAGES) sont classés comme suit :
Autres dispositifs (tous dispositifs, sauf Annexe II et autotests)

These products (ACCORDING TO ATTACHED LIST, 6 PAGES) are classified as follows:
Other devices (all devices, except Annex II and self testing devices)

3) Ces produits remplissent toutes les exigences essentielles (Annexe I) de la Directive Européenne DMDIV 98/79/CE.

These products fulfil the essential requirements (Annexe I) of European Directive IVDMD 98/79/EC.

4) Ces exigences sont documentées à l'aide de dossiers techniques incluant les informations suivantes :

Essential requirements are reviewed by checking the technical files, including the following information:

- Dossier de revue de conformité aux Exigences Essentielles.
File for checking Essential Requirements of above mentioned European Directive.
- Dossier de conception
File for device's design
- Dossier Performances (spécifications techniques)
File for performance (technical specifications).
- Description des Processus dans le Système Qualité

• Process management (BIOLABO Standard Operating Procedures)

• Référentiel d'étiquetage, Référentiel des notices

• Labelling instructions and references, Package inserts instructions and references.

• Dossiers de suivi des lots et retour d'information des utilisateurs.

File for batches Traceability including customer's information

• Dossier d'analyse des risques, basé sur le référentiel EN ISO 14971.

Risk Analysis, based on EN ISO 14971.

5) Le référentiel qualité de BIOLABO S.A.S. est certifié ISO 9001:2015 et ISO 13485:2016 sous le N°A3001 par AB Certification (Organisme accrédité COFRAC).

BIOLABO S.A.S Quality System Management is ISO 9001:2015 certified and ISO 13485:2016 certified under N°A3001, by AB Certification (Accredited Body by COFRAC).

6) Je déclare exactes et sincères les informations de la présente déclaration, certifiant que les produits désignés ci-dessus sont conformes aux exigences de la directive européenne 98/79/CE, lesquelles exigences sont intégralement remplies et documentées

I declare that the above information is true and sincere, certifying the product mentioned above fully comply with European Directive 98/79/CE

7) Je m'engage à mettre à la disposition des autorités compétentes de la République Française tout élément d'information qui me serait demandé, y compris dans le cadre de vérifications requises par leurs homologues étrangers.

I commit myself to provide to competent French Republic authorities any information which would be requested related to this product, whatever is the origin of such request which may come from their foreign homologues.

La présente déclaration est établie à Maizy, France, le 15 novembre 2019 et pour valoir ce que de droit
This Declaration is issued at Maizy, France, on 15 November 2019.

 Fax : (33) 03 23 25 6 256

IN VITRO DIAGNOSTIC USE

CLINICAL SIGNIFICANCE (1) (6) (7)

The Prothrombin time (PT) is a useful basic coagulation screening test to evaluate the extrinsic coagulation pathway. PT (in sec.) converted into PT (%) allows the evaluation of the prothrombinic activity, referring to a normal plasma (100 %).

- A deficient prothrombinic activity has been observed in the following clinical states :
- Hemorrhagic disease of the newborn.
 - Liver failure (cirrhosis, hepatitis, ...)
 - Vitamin K deficiency or treatment with vitamin K antagonists.
 - Congenital deficiencies in one of the factors associated with the prothrombinic complex, (factor prothrombin (factor II), proaccelerin (factor V), proconvertin (factor VII) and Stuart's factor (factor X)).
 - Circulating anticoagulants.
 - Fibrinolysis.
 - DIC (disseminated intravascular coagulation).

Monitoring of treatment with vitamin K antagonists :
 The PT (in sec.) may be converted into INR (International Normalised Ratio). In that case, the origin of the thromboplastin has no incidence on the determination of the expected values. An international standardisation about INR reference intervals has been established for the treatment and pro-phylaxis of venal and arterial thromboembolisms.

Avoid results in INR in the case of pre-operative check-up or investigations for liver diseases.

PRINCIPLE (4)

Quick and at method. Principle as follows :
 The clotting time is measured at 37°C in the presence of tissue thromboplastin and calcium. The PT (in sec.) so measured is then converted into PT (%) or INR.

REAGENTS

Vial R1 THROMBOPLASTIN

Freeze-dried Thromboplastin (Rabbit cerebral tissue)

Vial R2 RECONSTITUTION BUFFER

HEPES Buffer

Stabilizer

SAFETY CAUTIONS

BIOLABO reagents are designated for professional, in vitro diagnostic use.

- Use adequate protections (overalls, gloves, glasses).
- Do not pipette by mouth.
- Avoid contact with skin and suit.
- If spill, thoroughly wash affected areas with plenty of water.
- Reagents contain sodium azide (decoloration = 0,1%) which may be toxic with copper and heat, surrounding flush with plenty of water when disposing.
- For further information, visit our Safety Data Sheet is available upon request.
- Waste disposal : Respect legislation in force in the country.
- All specimens or reagents from unknown origin should be handled as potentially infectious in accordance with good laboratory practices using appropriate precautions. Respect legislation in force in the country.

REAGENTS PREPARATION

- Thromboplastin (Vial R1).
 Use a non-sharp instrument to remove aluminium cap from the vial.
- Reconstitution buffer (Vial R2).
 Once opened, add promptly the contents of the vial R1 to the amount of dilution buffer (Vial R2) stated on the label. Mix gently until complete dissolution before using reagent (approximately 30 min).
- OWREN KOLLER Buffer (REF 13883 (ready for use)).
 To establish the Thivolle line (results in %).

STABILITY AND STORAGE

- Store at 2-8°C.
- Prior to reconstitution :
 - Stable until expiry date stated on the label.

- Once opened :
 - Vial R1 (once reconstituted) at least for 8 hours at room temperature and 5 days at 2-8°C.
- Vial R2 : at least for 6 months when free from contamination.
- REF 13883 : free from contamination at least for 3 months (reject any cloudy reagent).
- Discard any reagent which control values are out of the range.

SPECIMEN COLLECTION AND HANDLING (2) (6)

- **Careful venipuncture.**
 • Blood/anticoagulant ratio : 4,5 mL of blood for 0,5 mL of sodium citrate 2 H₂O 0,109 M. Avoid blood drawing with a syringe that could result in the formation of micro-clots. Centrifuge for 5 minutes at 2590 g.
- Run the assay within 4 hours after collection, storing plasma at room temperature (15-25°C).
- Collection on citrate Heparin tube increases the specimen stability up to 8 hours.

INTERFERENCES (2) (3)

The presence of an heparin inhibitor in the reagent, allows to perform the test without influence of this factor.
 Due to activation of factor VII by cold, long storage of plasma at 2-8°C may shorten the result of PT (in sec.).
 Contamination by Thromboplastin or hemolysed specimens may also shorten the result of PT (in sec.).
 Apply the above mentioned Blood/anticoagulant ratio to adjust the volume of anticoagulant in case of very abnormal hemolysis.
 For a more comprehensive list of all factors affecting this assay, refer to the publication of Young D.S.

Version : AT 13880 01 06 2007

MATERIAL REQUIRED BUT NOT PROVIDED

1. Basic medical analysis laboratory equipment.
2. Deionnized water for reagent preparation.
3. Owren Koller buffer to establish the Thivolle line (results in %) is not provided with REF 13885, 13890, 13891, 13891, 13891, 13893.
4. Normal and pathological Control plasmas.
5. Graph paper

CALIBRATION

Reference plasma
 Prepare a pool of at least 5 freshly drawn normal plasmas for patient specimen. This pool of plasmas will be used as reference plasma (100 %).
 Alternatively use a reference plasma with a 100 % PT.
 Use Calculation board

Dilute the pool of plasmas or the reference plasma at 25 % in Owren Koller Buffer (REF 13883) as follows :

| Plasma | 100 % | 25 % |
|---------------------|-------|---------|
| Owren-Koller Buffer | 1 mL | 0,25 mL |

Do not use diluent such as saline solution that modifies the concentration of anticoagulant.
 5 mL plastic tubes are suggested for dilution (according to the above board).

QUALITY CONTROL

| REF 13881 | Normal Control Plasma | 6 x 1 mL |
|-----------|----------------------------------|----------|
| REF 13992 | Pathological High Control Plasma | 6 x 1 mL |
| REF 13993 | Pathological Low Control Plasma | 6 x 1 mL |

- Or other assayed control plasmas referring to the same method.
- External quality control program.
- It is recommended to control in the following cases :
 - At least once a turn.
 - After maintenance operation on the instrument.
 - When changing vial of reagent.

- If control is out of range, apply following actions :
 1. Repeat the test with the same control plasma.
 2. If control is still out of range, prepare a fresh control plasma and repeat the test.
 3. If control is still out of range, calibrate with a new vial of reagent.
 4. If control is still out of range, use a new vial of reference plasma and repeat the test.
 5. If control is still out of range, please contact BIOLABO technical support or your local Agent.

PERFORMANCE CHARACTERISTICS

| Vitamin K level | Normal level | | Pathol. level | |
|-----------------|--------------|------|---------------|------|
| | Mean | S.D. | Mean | S.D. |
| 12,3 (sec) | 0,15 | 23,1 | 3,83 | 0,12 |
| 102 (sec) | 1,06 | 2,24 | 2,19 | 0,21 |

EXPECTED VALUES (2) (6)

- Normal PT (in sec.) :
 - Usually between 11 and 15 seconds (depending on the origin of the thromboplastin).
- Newborn : prolonged by 2-3 sec.
- Premature : prolonged by 3-5 sec.
- PT (in sec.) reaches adult level by day 3 or 4.
- Normal PT (in %).
- Ranging between 70 to 100 %.
- Values over 100 % have no significance.

Oral anticoagulant therapy (OAT).

Prepare a pool of at least 5 freshly drawn normal plasmas for patient specimen. This pool of plasmas will be used as reference plasma (100 %).
 Alternatively use a reference plasma with a 100 % PT.
 Use Calculation board

| Preparation and cutting surgery | Target INR range | Reich (thrombolysis) | PT (in %) |
|---------------------------------|------------------|----------------------|-----------|
| High surgery | 2,5 - 3,0 | 40 - 50 | 35 % |
| Medium surgery | 2,0 - 2,5 | 30 - 40 | 30 % |
| Low surgery | 1,5 - 2,0 | 20 - 30 | 27 % |
| Very low surgery | 1,0 - 1,5 | 10 - 20 | 25 % |

PROCEDURE

Manual procedure
 PT (sec.) measurement in test tubes at 37°C. Mix gently the reagent before pipetting.

| Plasma | 0,1 mL |
|--|--------|
| Inubate for 2 minutes at 37°C. | |
| 37°C prewarmed (at least 15 minutes) Jitteromediatic : | 0,2 mL |
| Simultaneously start a timer and record the clotting time. | |

Assay each plasma in duplicate (preferable for calibration curve).
 Adding thromboplastin, gently tilt back and forth near to horizontal position, until a solid gel did appear. Operate under sufficient lighting.

Automated instrument procedure

The sedimentation characteristics and the optical quality of this thromboplastin are suitable for mechanical or optical detection systems. Refer to the instrument manufacturer's instructions.

CALCULATION (6)

With enclosed calculation board :
 Refer to the "anticoagulant" column (including 15) values corresponding to the current batch number to calculate PT (%) and INR.
 Section 1 : Select the column corresponding to the measured time (Identify the patient's PT (sec.) in this column).
 Section 2 : On the same line, refer to the corresponding PT (%) or INR.
 With Thivolle line « PT in % » (see § CALIBRATION) :
 Plot the clotting time measured for the patient on the Thivolle line and then read on the Y-axis the reciprocal dilution corresponding. Reverse and multiply by 100 to obtain the PT (in sec.) for patient.
 Patients under OAT : INR values are recommended for a better determination of the therapeutic ranges.
 INR calculation as follows :

$$INR = \frac{\text{Patient's value}}{\text{Mean normal time}}$$

Авторизационное письмо

Настоящим, мы, компания «HELENA LABORATORIES (UK) Ltd», торгующая как «HELENA BIOSCIENCES EUROPE», с центральным офисом по адресу: Queensway South, Team Valley Trading Estate, Gateshead, Tyne & Wear, NE11 OSD, Великобритания, подтверждает, что:

Компания "GBG-MLD" SRL, республика Молдова, г. Кишинёв, MD-2001, улица Chisinau Tighina, дом 65, офис 607 являются уполномоченными дистрибьюторами всей продукции компании «HELENA BIOSCIENCES EUROPE» на территории Республики Молдова и авторизована принимать участие во всех тендерах.

Компании "GBG-MLD" SRL имеет право импорта, продвижения и продажи выше перечисленной продукции на территории Республики Молдова.

Настоящее письмо действительно до 31 декабря 2020 года.

PRINCIPLE AND INTENDED USE

This Control Plasma is intended for use to monitor the reproducibility and accuracy of methods and techniques performed with BIOLABO kits for the following analysis:

- REF 13702, 13704 and 13712: BIO-TP LI
- REF 13885, 13880 and 13881: BIO-TP
- REF 13980: BIO-TT
- REF 13560 and 13570: BIO-CK
- REF 13660 and 13670: BIO-SIL
- REF 13450 and 13451: BIO-FIBRI

BIOLABO control plasmas are for use on manual procedure or on automated instruments.

REAGENTS

REF 13961: Freeze-dried, human citrated plasmas.

SAFETY CAUTIONS ⁽¹⁾⁽²⁾

BIOLABO reagents are designated for professional, in vitro diagnostic use.

- Verify the integrity of the contents before use.
- Use adequate protections (overall, gloves, glasses).
- Do not pipette by mouth.
- In case of contact with skin and eyes, thoroughly wash affected areas with plenty of water and seek medical advice.
- Material Safety Data Sheet is available upon request.
- Waste disposal: Respect legislation in force in the country.
- Each donor unit used to manufacture this product was tested and found non-reactive for HbsAg, antibody to Hepatitis C and antibody to HIV-1/HIV-2. However, no test method can offer complete assurance that infectious agents are absent.

All specimens or reagents from biological origin should be handled as potentially infectious, in accordance with good laboratory practices using appropriate precautions. Respect legislation in force in the country.

MATERIAL REQUIRED BUT NOT PROVIDED

1. Basic medical analysis laboratory equipment.
2. Reagents, other controls REF 13962 and 13963 and calibrators

PROCEDURE

Run in accordance with the package insert enclosed with the reagent. Control plasmas should be assayed as patient specimens. It is recommended to include at least one control plasma:

- Once a run.
- Once within 24 hours.
- After each calibration.

REAGENTS PREPARATION

- Open the vial carefully and add exactly the volume of demineralised water stated on the label (usually 1 mL).
- Recap and let stand for 10 to 20 minutes at room temperature.
- Gently invert the vial several times to ensure homogeneity before use (avoid the formation of foam).

WARNING: DO NOT SHAKE. STORE AWAY FROM LIGHT.

STABILITY AND STORAGE

Before reconstitution, store lyophilisate at 2-8°C or -20°C, well cap in the original vial

- Unopened, lyophilisate are stable until expiry date stated in the label of the kit when stored and used as described in the insert.
- Once reconstituted, plasma is stable for 3 hours at room temperature. Do not store at 2-8°C, do not freeze.
- Don't use reconstituted plasma after expiry date stated on the label of the Kit.

INTERFERENCES

Factors which may interfere with the result are:

- Bacterial contamination.
- The volume measured to reconstitute the plasma.
- The setting of the instrument.
- Temperatures

Discard any plasma if cloudy. If control values are out of range, refer to § Quality Control of the package insert enclosed with the reagent.

Thrombin Time

Istruzioni per l'uso

SCOPO PREVISTO

Il kit Thrombin Time è concepito per l'esecuzione di dosaggi di coagulazione basati sulla presenza di fibrinogeno.

Il reagente per la determinazione del Thrombin Time contiene fibrinogeno bovino. Questo reagente può essere utilizzato immediatamente o con strumenti elettromeccanici e automatici. Il test viene comunemente realizzato con il Thrombin Time quale essere convenzionale come misurazione qualitativa di livelli anormali di fibrinogeno (alti o bassi) oppure della presenza di sostanze interferenti come il FDP o l'eparina. La valutazione quantitativa della possibile causa di un Thrombin Time prolungato deve essere eseguita solo con il kit di dosaggio con metodo Clauss. Le determinazioni degli FDP, il monitoraggio dell'eparina con fibrinogeno con metodo Clauss, le determinazioni degli FDP, il monitoraggio dell'eparina con fibrinogeno con metodo Clauss o polimerico, gli studi sulla mutazione di fibrinogeno normale o il dosaggio della fibrinogeno, per distinguere la fibrinogenemia acquisita e l'effetto degli FDP.

AVVERTENZE E PRECAUZIONI

I reagenti contenuti in questo kit sono destinati esclusivamente alla diagnostica in vitro - NON INFERIRE. Indossare un'adeguata protezione protettiva personale durante la manipolazione di tutti i componenti del kit. La confezione è sterile e sigillata. Dopo l'uso, la fiala parafarmacia, fare riferimento alle istruzioni sulla dichiarazione di sterilità del prodotto. Sterilizzare i componenti separatamente alle normative locali vigenti.

COMPOSIZIONE

| Componente | Contiene | Descrizione | Preparazione |
|---------------|-----------------------|--|---|
| Thrombin Time | 10 x 1 mL (REF 5392H) | Ogni fiala contiene una preparazione liofilizzata di fibrinogeno bovino con il 100% di stabilizzatori. Il reagente è costituito da 100 mg di fibrinogeno, 10 mg di NaOH, 10 mg di NaCl e 10 mg di acqua. | Ricostruire il reagente con il volume raccomandato di acqua distillata. 1 mL - REF 5392H 2 mL - REF 5392 3 mL - REF 5392 |

Ogni kit contiene un foglio procedurale.

MATERIALI NECESSARI, MA NON IN DOTAZIONE

È possibile utilizzare qualsiasi strumento di coagulazione meccanico, elettromeccanico o fotografico di alta qualità in grado di eseguire il test del Thrombin Time.

CONSERVAZIONE, VITA UTILE E STABILITÀ

I reagenti non aperti sono stabili fino alla data di scadenza indicata sui contenitori nelle condizioni riportate sul foglio o sul retro della confezione.

Thrombin Time 14 giorni oppure a 20°C per 3 mesi.
Il reagente ricostituito può essere liofilizzato conservato nel frigorifero Syntex CA1500 per non più di 30 giorni.

RACCOLTA E PREPARAZIONE DEI CAMPIONI

Il sangue dell'arteria prelevata è necessario utilizzare plastica o vetro silicizzato. Il sangue (8 parti) deve essere raccolto in un tubo euboico al 3,2% di citrato di calcio (1 parte). Separare il plasma in seguito a centrifugazione a 1500 g per 10 minuti. Il plasma deve essere conservato a 2-8°C o a -20°C. Il test deve essere eseguito entro 4 ore dalla raccolta del campione. Il plasma può essere conservato congelato a -20°C per 2 settimane o a -70°C per 6 mesi. Decomporre rapidamente a 37°C prima di eseguire i test. Non conservare a 37°C per oltre 5 minuti.

PROCEDURA

- Raccogliete e preparate il campione di sangue conformemente alle istruzioni riportate nel paragrafo "Raccolta del campione e preparazione".
 - Ricostruite il plasma di controllo seguendo le indicazioni fornite nell'inserto contenuto nella confezione di ciascun controllo.
 - Preparare il reagente da utilizzare nella procedura conformemente alle istruzioni di ricostruzione riportate nel paragrafo "Composizione".
 - Eseguire tutti i test per 2 volte. Calcolare il tempo di coagulazione medio per le ripetizioni dei test con un'approssimazione a 0,1 secondi. Il tempo medio deve essere riferito in una tolleranza di ±5% rispetto al valore medio.
- Metodo Manuale**
- Pipettare 0,2 mL di plasma del paziente o il plasma di controllo in una provetta di reazione.
 - Iniettare a 37°C per 3 minuti.
 - Pipettare 0,1 mL di reagente per la determinazione del Thrombin Time nella provetta di reazione contenente il plasma del paziente o il plasma di controllo, agitando contemporaneamente un tubo.
 - Risultare il tempo di formazione del coagulo con un'approssimazione a 0,1 secondi.

Metodo Automatico

Fare riferimento al manuale utente dello strumento appropriato per istruzioni dettagliate oppure contattare Helma Biosciences Europe per le note applicative specifiche dello strumento.

INTERPRETAZIONE DEI RISULTATI

I risultati relativi al test del Thrombin Time devono essere indicati con un'approssimazione a 0,1 secondi. Il range normale (solamente per gli usi medici e diagnostici) devono essere stabilito da ogni singolo laboratorio. I risultati che hanno deviazioni dalla norma devono essere considerati come anormali. Si raccomanda pertanto di eseguire i test di follow-up.

LIMITAZIONI

I valori previsti per il test di determinazione del Thrombin Time possono variare da un laboratorio all'altro in funzione della tecnica utilizzata, il metodo di raccolta del coagulo, la temperatura, il pH, la tecnica di raccolta, il tipo di anticoagulante, il tempo e il metodo di centrifugazione dei campioni sono elementi di estrema importanza. La raccolta dei campioni in flaconi in cui la confezione di conservazione dev'essere essere sterilizzata e controllata con particolare attenzione. I risultati invariabili devono essere confermati eseguendo ulteriori test.
Data alla causa dei tempi di fibrinogeno prolungati, possono un rapporto molto positivo, infatti da anomalie sistemiche con conseguente alterazione possono provocare un valore elevato, che può essere prolungato il Thrombin Time. Inoltre, i livelli anormali di alcuni possono eliminare completamente la coagulazione nel test del Thrombin Time, valutando la neutralizzazione con protrombina solida o polimerica dovrebbe correggere il Thrombin Time.

CONTROLLO QUALITÀ

Ogni laboratorio deve definire un programma di controllo qualità. Il plasma di controllo normale e anormali devono essere testati prima di ogni lotto di campioni. Per garantire un livello predefinito di qualità, il sistema di controllo qualità deve essere verificato con i reagenti di controllo non funzionano come previsto, i risultati relativi al plasma di controllo devono essere confermati con ulteriori test. Helma Biosciences Europe mette a disposizione i seguenti controlli utilizzabili con questo prodotto.

| | |
|----------|------------------|
| REF 5186 | Helma Control H |
| REF 5187 | Helma Control A |
| REF 5183 | Helma Control SA |

VALORI DI RIFERIMENTO

Per la sicurezza del paziente, è necessario che il sistema sia monitorato continuamente da un operatore qualificato. Per tale motivo ciascun laboratorio deve elaborare i propri range di riferimento.

CARATTERISTICHE PRESTAZIONALI

Le seguenti caratteristiche prestazionali sono state determinate da Helma Biosciences Europe o dai suoi rappresentanti:

| Precisione | Precisione intra-assay | | Precisione inter-assay | | |
|------------|----------------------------------|--------|----------------------------------|--------|------|
| | Formazione del coagulo (secondi) | CV (%) | Formazione del coagulo (secondi) | CV (%) | |
| Normale | 10 | 12,5 | 1,4 | 12,5 | 1,29 |

Thrombin Time

instrucciones de uso

USO PREVISTO

El uso previsto del kit Thrombin Time es realizar ensayos de hemostasia basados en la coagulación.

El reactivo de Thrombin Time contiene fibrinogeno bovino. Este reactivo puede usarse inmediatamente o en instrumentos electromecánicos o automatizados. La prueba se aplica con frecuencia para detectar niveles anormales de fibrinogeno (altos o bajos) o la presencia de sustancias que interfieren como el FDP o la heparina. La evaluación cuantitativa de la posible causa de un Thrombin Time prolongado debe realizarse solo con el kit de dosificación con método Clauss. Las determinaciones de los FDP, el monitoreo de la heparina con fibrinogeno con método Clauss, las determinaciones de los FDP, el monitoreo de la heparina con fibrinogeno con método Clauss o polimerico, los estudios de la mutación de fibrinogeno normal o el ensayo de la fibrinogenemia, para distinguir entre la fibrinogenemia y los efectos de los FDP.

ADVERTENCIAS Y PRECAUCIONES

Los reactivos que contiene este kit son solo para uso de diagnóstico in vitro - NO INGERIR. Lleve el equipo de protección personal adecuado cuando utilice todos los componentes del kit. Consulte la declaración de seguridad del producto para saber más sobre las indicaciones adecuadas de advertencia y riesgo. Deshacer los componentes de conformidad con las normativas locales.

COMPOSICIÓN

| Componente | Contiene | Descripción | Preparación |
|---------------|-----------------------|--|--|
| Thrombin Time | 10 x 1 mL (REF 5392H) | Cada vial contiene un preparado liofilizado de fibrinogeno bovino con tampones y estabilizadores. El reactivo está constituido por 100 unidades de N/100 mL de fibrinogeno. El reactivo debe ser un tubo liofilizado blanco. | Reconstituya el reactivo con el volumen recomendado de agua destilada. 1 mL - REF 5392H 2 mL - REF 5392 3 mL - REF 5392 |

Cada vial contiene instrucciones de uso.

ARTÍCULOS NECESARIOS NO SUMINISTRADOS

Puede usarse cualquier instrumento de coagulación mecánico, electro-mecánico o foto-óptico capaz de realizar pruebas de Thrombin Time.

ALMACENAMIENTO, CADUCIDAD Y ESTABILIDAD

Los reactivos no abiertos son estables hasta la fecha de caducidad indicada cuando se conservan en las condiciones indicadas en el VSD o en el folio de datos.

Thrombin Time 14 días a 20°C o durante 3 meses.
El reactivo reconstituido debe almacenarse a 2-8°C y se mantiene estable durante 14 días a 20°C durante 3 meses.

RECOPIDA Y PREPARACIÓN DE LAS MUESTRAS

Debe usarse siempre plástico o vidrio silicizado. Debe recogerse sangre (8 partes) en el anticoagulante citrato de calcio al 3,2% o al 3,8% (1 parte). Separar el plasma después de la centrifugación a 1500 g durante 10 minutos. El plasma debe conservarse a 2-8°C o a -20°C. Las pruebas deben ser realizadas en 4 horas desde la recogida de las muestras o el plasma puede conservarse congelado a -20°C durante 2 semanas o a -70°C durante 6 meses. Descongelar rápidamente a 37°C antes de realizar la prueba. No conservar a 37°C durante más de 5 minutos.

PROCEDIMIENTO

- Recopie y prepare la muestra de sangre de acuerdo con las instrucciones suministradas en "Recogida y preparación de muestras".
 - Reconstituya el plasma control de acuerdo con el prospecto incluido con cada control.
 - Prepore el reactivo para su uso en el procedimiento de acuerdo con las instrucciones de reconstitución en la sección "Composición".
 - Realice todos los ensayos por duplicado. Calcule el tiempo de coagulación medio de las determinaciones duplicadas hasta una exactitud de 0,1 segundos. Los valores individuales deben estar dentro de ±5% del valor medio.
- Metodo Manual**
- Pipete 0,2 mL del plasma del paciente o el plasma control en un tubo de reacción.
 - Incuba a 37°C durante 3 minutos.
 - Prepore 0,1 mL de reactivo de Thrombin Time en el tubo de reacción que contiene plasma del paciente o control mezclando su parte en marcha simultáneamente un temporizador.
 - Registre el tiempo hasta la formación del coagulo procurando mirar en la óptica de segundo más pronto.

Método Automatizado

Consulte el manual del usuario del instrumento adecuado para instrucciones detalladas o póngase en contacto con Helma Biosciences Europe para notas de aplicación específicas del instrumento.

INTERPRETACIÓN DE LOS RESULTADOS

Los resultados de la prueba de Thrombin Time deben contarse en los 0,1 segundos más próximos. Cada laboratorio debe establecer el intervalo normal. Inusualmente, la media de deviaziones estándar. Los resultados fuera del intervalo normal deben considerarse anormales y deben realizarse pruebas de seguimiento.

LIMITACIONES

Los valores esperados para la prueba del Thrombin Time varían de un laboratorio a otro dependiendo de la técnica utilizada. El método de coagulación de las muestras, la temperatura, el pH, la técnica de recolección, el tipo de anticoagulante y el tiempo y el método de almacenamiento de las muestras son factores muy importantes. Las condiciones de recolección y conservación de las muestras de plasma deben estandarizarse y controlarse cuidadosamente. Los resultados esperados deben confirmarse mediante pruebas adicionales.
Además de la causa de alargamiento de los tiempos de coagulación de la muestra indicada, un informe no sugiere que ciertos patrones con anticóagulos sistémicos con complicaciones de sangrado pueden tener un inhibidor circulante que prolonga el Thrombin Time. Además, los niveles anormales de algunos pueden eliminar completamente la coagulación en el ensayo del Thrombin Time, evaluando la neutralización con protrombina solida o polimerica debería corregir el Thrombin Time.

CONTROL DE CALIDAD

Cada laboratorio debe establecer un programa de control de calidad. Los controles normales y anormales deben establecerse antes de cada lote de muestras del paciente para asegurar un funcionamiento adecuado del instrumento y el operador. Si los controles no se realizan como se esperaba, los resultados del paciente deben considerarse invariables.
Helma Biosciences Europe suministra los siguientes controles disponibles para usar con este producto.

| | |
|----------|------------------|
| REF 5186 | Helma Control H |
| REF 5187 | Helma Control A |
| REF 5183 | Helma Control SA |

VALORES DE REFERENCIA

Los valores de referencia pueden variar entre los laboratorios dependiendo de las técnicas y sistemas usados. Por esa razón, cada laboratorio debe establecer sus propios intervalos de referencia.

CARACTERÍSTICAS FUNCIONALES

Las siguientes características de rendimiento han sido determinadas por Helma Biosciences Europe o sus representantes:

| Precisión | Precisión intra-ensayo | | Precisión inter-ensayo | | |
|-----------|------------------------|----------------------------------|------------------------|----------------------------------|--------|
| | Muestra n | Formación del coagulo (segundos) | CV (%) | Formación del coagulo (segundos) | CV (%) |
| Normales | 10 | 12,5 | 1,4 | 12,5 | 1,29 |

Test-sistema "Тромбиновое время"

инструкция

НАЗНАЧЕНИЕ

Комплект «Тромбиновое время» предназначен для выполнения анализа гемостаза в лаборатории.

Test-sistema "Тромбиновое время" содержит fibrinogeno bovino. Questo reagente può essere utilizzato immediatamente o con strumenti elettromeccanici e automatici. La prova si applica con frequenza per rilevare livelli anormali di fibrinogeno (alti o bassi) o la presenza di sostanze che interferiscono come il FDP o l'eparina. La valutazione quantitativa della possibile causa di un Thrombin Time prolungato deve essere eseguita solo con il kit di dosaggio con metodo Clauss. Le determinazioni degli FDP, il monitoraggio dell'eparina con fibrinogeno con metodo Clauss, le determinazioni degli FDP, il monitoraggio dell'eparina con fibrinogeno con metodo Clauss o polimerico, gli studi sulla mutazione di fibrinogeno normale o il dosaggio della fibrinogenemia, per distinguere la fibrinogenemia acquisita e l'effetto degli FDP.

ПРЕДУПРЕЖДЕНИЯ И МЕРЫ ПРЕДОСТОРОЖНОСТИ

Содержимое в данном наборе является предназначен только для in vitro диагностики - НЕ ПРИНИМАТЬ ВНУТРИ! При работе со всеми компонентами набора использовать соответствующую защиту индивидуальной гигиены. В случае необходимости использовать соответствующую защиту для предотвращения с соответствующими компонентами набора взаимодействия и следствия в меру осторожности. Удаление компонентов в отходы производить в соответствии с местными правилами.

СОСТАВ

| Состав | Содержимое набора | Описание | Применение |
|----------------------------------|-----------------------|--|---|
| Test-sistema "Тромбиновое время" | 10 x 1 mL (REF 5392H) | Каждая фiala содержит лиофилизированный препарат из бычьего фибриногена с буферными и стабилизирующими компонентами. Реактив должен быть восстановлен с помощью дистиллированной воды. | Восстановление реактива с соответствующим объемом чистой дистиллированной воды. |

Одним набором является инструкция по применению.
Каждый набор содержит инструкцию по применению.
Каждый набор содержит инструкцию по применению.
Каждый набор содержит инструкцию по применению.

НЕОБХОДИМЫЕ КОМПОНЕНТЫ, НЕ ВКЛЮЧЕННЫЕ В КОМПЛЕКТ ПОСТАВКИ

Можно использовать любой инструмент механический, электромеханический или фотооптический, способный выполнять измерения скорости свертывания.

ХРАНЕНИЕ, СРОК ГОДНОСТИ И УСТОЙЧИВОСТЬ

Масштабные тесты должны проводиться в соответствии с инструкциями производителя. Не использовать после истечения срока годности.

Thrombin Time 14 дней при температуре от 2-8°C или в течение 3 месяцев при температуре 20°C.

Восстановленный реактив должен храниться при температуре от 2-8°C и оставаться стабильным в течение 14 дней при температуре от 2-8°C и в течение 3 месяцев при температуре 20°C.

ОТБОР И ПОДГОТОВКА ОБРАЗЦОВ

Для работы с образцами использовать только силицированный или силицированный материал. Собирайте кровь (8 частей) в антикоагулянт цитрат кальция 3,2% или 3,8% (1 часть). Разделите плазму после центрифугирования при 1500 g в течение 10 минут. Плазму следует хранить при температуре от 2-8°C или -20°C. Исследования должны быть выполнены в течение 4 часов после забора образца. Плазму можно хранить замороженной при -20°C и размораживать при -70°C. Не размораживать повторно при 37°C перед проведением исследования. Не хранить более 5 минут при температуре 37°C.

ПРОЦЕДУРА

- Проведите забор и подготовку проб крови в соответствии с указанными инструкциями.
 - Восстановите контрольный плазму в соответствии с инструкциями производителя.
 - Проведите анализ и подготовку образца в соответствии с инструкциями по использованию и разделом СОСТАВ.
 - Проведите анализ исследования дважды. Рассчитайте среднее время свертывания как минимум двух дублирующих исследований образца до получения среднего значения. Индивидуальные значения должны быть в пределах ±5% от среднего значения.
- Метод Метод**
- С помощью пипетки поместите 0,2 мл плазмы пациента или контрольной плазмы в реакционную камеру.
 - Инкубируйте в течение 3 минут при температуре 37°C.
 - С помощью пипетки поместите 0,1 мл реактива «Тромбиновое время» в реакционную камеру, одновременно включая таймер.
 - Зачислите время, потребовавшееся на формирование тромба до ближайшей 0,1 секунды.

Автоматизированный Метод

Смодельте с соответствующей инструкцией по эксплуатации прибора за подробной информацией или обратитесь к менеджеру Helma Biosciences Europe за подробными инструкциями по применению и информации о конкретном приборе.

ИНТЕРПРЕТАЦИЯ РЕЗУЛЬТАТОВ

Результаты теста должны быть указаны в секундах с округлением до ближайших 0,1 секунды. Каждое лабораторное значение должно быть подтверждено повторными измерениями.

ОГРАНИЧЕНИЯ

Следует использовать только силицированный материал. Собирайте кровь (8 частей) в антикоагулянт цитрат кальция 3,2% или 3,8% (1 часть). Разделите плазму после центрифугирования при 1500 g в течение 10 минут. Плазму следует хранить при температуре от 2-8°C или -20°C. Исследования должны быть выполнены в течение 4 часов после забора образца. Плазму можно хранить замороженной при -20°C и размораживать при -70°C. Не размораживать повторно при 37°C перед проведением исследования. Не хранить более 5 минут при температуре 37°C.

КОНТРОЛЬ КАЧЕСТВА

Каждое лабораторное значение должно быть подтверждено повторными измерениями. Каждое лабораторное значение должно быть подтверждено повторными измерениями.

Каждое лабораторное значение должно быть подтверждено повторными измерениями. Каждое лабораторное значение должно быть подтверждено повторными измерениями.

НОРМАЛЬНЫЕ ПОКАЗАТЕЛИ

Каждое лабораторное значение должно быть подтверждено повторными измерениями. Каждое лабораторное значение должно быть подтверждено повторными измерениями.

ЭКСПЛУАТАЦИОННЫЕ ХАРАКТЕРИСТИКИ

Содержимое данного набора предназначено только для in vitro диагностики - НЕ ПРИНИМАТЬ ВНУТРИ! При работе со всеми компонентами набора использовать соответствующую защиту индивидуальной гигиены.

Изучение полноты

| Образец | Число образцов | Внутриматриксальная однородность | CV (%) | Внутрилабораторная однородность | CV (%) |
|------------|----------------|----------------------------------|--------|---------------------------------|--------|
| Нормальный | 10 | 12,5 | 1,4 | 12,5 | 1,29 |

ПАСПОРТ – СЕРТИФИКАТ ПРОИЗВОДИТЕЛЯ
на «Набор реагентов для определения групп крови человека систем
ABO, Резус и Келл» по ТУ-9398-101-51203590-2009
(ЦОЛИКЛОНЫ Анти-А, Анти-В и Анти-AB)
Регистрационное удостоверение № ФСР 2009/06043 от 05 ноября 2009 г

Наименование: Цоликлон Анти-А во флаконах по 10 мл с красными крышками

Серия: 096111

Единица: 100 мл

Изготовлен: 05.11.2019

Количество единиц: 40

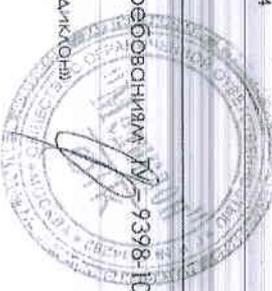

Годен до: 05.11.2021

Объем серии: 10000 мл

Паспорт: А096111 от 05.11.2019

| Наименование показателя | Норма по ТУ | Результаты испытания |
|--------------------------------------|--|---|
| 1. Внешний вид | | |
| 1.1 Цоликлон анти-А | Прозрачная жидкость красного цвета. | Соответствует |
| 1.2 Цоликлон анти-В | Прозрачная жидкость синего цвета. | |
| 1.3 Цоликлон анти-AB | Прозрачная бесцветная жидкость. | |
| 2. Серологические свойства | | |
| 2.1 Специфичность | Цоликлон анти-А не должен давать агглютинации с эритроцитами групп В(III) и O(I) Цоликлон анти-В не должен давать агглютинации с эритроцитами групп А(III) и O(I) Цоликлон анти-AB не должен давать агглютинации с эритроцитами группы O(II) | Соответствует Соответствует Соответствует |
| 2.1.1 Гемагглютинирующая способность | Агглютинирует на титрности эритроцитов А1 и В соответственно Цоликлонами должна появиться не позднее 10 сек. после смешивания | Соответствует 10 секунд |
| 2.3 Титр | Титр Цоликлона анти-А в реакции агглютинации на титрности с эритроцитами группы А(III) 1:32 - 1:64 Титр Цоликлона анти-В в реакции агглютинации на титрности с эритроцитами группы В(III) 1:64 | Соответствует 1:32 - 1:64 Соответствует 1:64 |

Цоликлон соответствует требованиям ТУ-9398-101-51203590-2009
