X-Ray Protective Visor – Designs BRV500 & BRV501

Especially designed for the protection of medical professionals during radiological procedures. Protection of the eye lens against scattered X-rays. The visors provide a high reduction in radiation exposure to the eyes and most of the facial area (see table).

The quality features of our visors make them ideal for the use in the medical environment:

- Certified according to 89/686/EWG Personal Protective Equipment, Category III
- Adjustable to fit different head sizes
- Multiple adjustments to conform to individual facial features
- Easy to set up for fitting the head of the wearer by simply pressing and turning the pivoting mechanism to prevent slipping
- Comfortable, exchangeable, and washable pads
- Curved lead acrylic glass with Pb 0.10 mm
- Low allergy risk due to carefully chosen materials

X-Ray Tube Voltage	Attenuation scattered radiation
50 kV	96,9 %
60 kV	94,4 %
80 kV	86,3 %
100 kV	80,0 %
120 kV	75,0 %
