EVIS EXERA III

TJF-Q190V Duodenoscope

Supporting Your Standard of Care

42106

TJF-Q190V

Main Features

Improved Cannulation Efficiency
Square image shape and 15° backward viewing allow for expanded field of view and better view direction, improving cannulation efficiency.

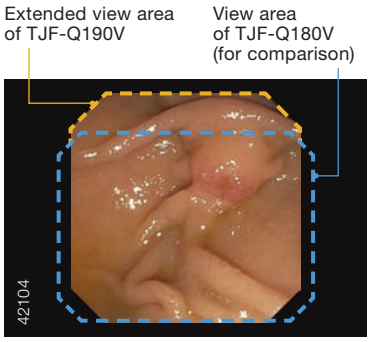

Image courtesy of Prof. Guido Costamagna

Reliable Guidewire Locking
Facilitates fast and secure short guidewire locking with dual system at the distal end.

High Force Transmission
Enables a 1:1 transfer of pushing and rotating forces to the distal end of the duodenoscope, improving ergonomics and scope responsiveness.

NBI (Narrow Band Imaging)
NBI with TJF-Q190V is significantly brighter and provides contrast, which may aid in the interpretation of mucosal and vascular patterns of the papilla.

Single-Use Distal Cover
The MAJ-2315 single-use distal cover allows better access for reprocessing accessories during manual cleaning. The cover is transparent and is destroyed during removal, preventing unintended reuse.

MAJ-2315 single-use distal cover for TJF-Q190V

Distal End Flushing Adapter
The new MAJ-2319 flushing adapter reduces the number of required flushing steps and ensures controlled distribution of detergent and disinfectant solution to the distal tip of the endoscope during manual reprocessing.

Waterproof One-Touch Connector
A new connector design reduces the effort required for setup prior to and in between cases. In addition, it is fully submersible, eliminating the need for a water-resistant cap and the associated risk of expensive repairs due to accidental immersion.

EVIS EXERA III

CF-H185L/I

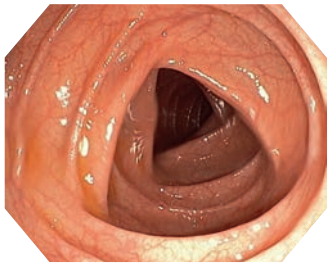
Routine colonoscopy at its best – featuring HDTV and variable stiffness.

CF-H185L/I

Main features

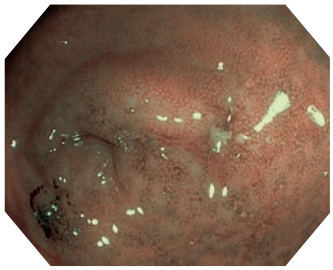
HDTV image quality

With the new EVIS EXERA III system, HDTV image quality enables observation of the mucosa and capillaries in much more detail.



NBI (Narrow Band Imaging)

NBI in EVIS EXERA III 185 series scopes provides twice the viewable distance of EVIS EXERA II 180 series scopes and offers much greater contrast between blood vessels and mucosa. The greatly improved performance of NBI opens up exciting new clinical applications and reinforces NBI's position as the standard of care for GI endoscopy.



Variable stiffness

Variable stiffness helps to prevent the endoscope from re-looping, for example at the sigmoid colon, and also allows the stiffness of the scope to be adjusted on a case-by-case basis in order to meet the unique anatomical needs of each patient or the handling preferences of the physician.

Close focus

Close focus enables you to obtain an enlarged, close-up image simply by moving the scope tip as close as 2 mm from the mucosa.

Waterproof One-touch Connector

A new connector design minimises the effort required for set-up prior to and in between cases. In addition, it is fully submersible and eliminates the need for a water-resistant cap and the associated risk of an expensive repair due to accidental immersion.

CF-EZ1500DL/I

Full Focus and High Magnification for Observational Excellence

CF-EZ1500DL/I

Full Focus and High Magnification for Observational Excellence

EDOF Technology

Our unique Extended Depth of Field (EDOF) technology combines images captured in near view with those taken in far view to generate an image with a wider depth of field that gives you greater clarity and richer detail throughout the image area, assuring superior observation with continuous wide focusing.

Full Focus

Thanks to EDOF technology, the CF-EZ1500DL/I can approach as close as 3 mm to the subject in normal focus mode, providing a clear, sharp view that may reduce the need to adjust the focus in routine use.

High Magnification with the Ease of Dual Focus

The CF-EZ1500DL/I offers high magnification* when the Near Focus mode is engaged via a simple scope switch, supporting better observation of details. The combination of high magnification and wide depth of field allows for clearer, more detailed imaging throughout the field of view, even from a tangential direction and regardless of whether the subject is moving or not. In combination with our proven NBI technology, the CF-EZ1500DL/I's advanced optics is designed to assist accurate, high-confidence optical diagnosis.

*Maximum magnification of 75x (with OEV262H) and 90x (with OEV321UH)
