OBJECT: Warning about supply and use of counterfeit LFC554 brushes

Dear Madams, dear Sirs!

Hereby the company "Mersen France Amiens S.A.S.", confirms the reception of the results of the tender nr 21614185. We would like to draw your attention on the fact that CHINA CARBON INDUSTRY has no access or any possibility to supply MERSEN LFC554 grade. That means that the brushes which will be delivered will not be manufactured by using proper grade from our production, and that, in consequence, they have to be considered as counterfeited products.

The graphite grade LFC554 is only produced in France, by Mersen France Amiens S.A.S; but since LFC554 is a high-performance brand, copies of LFC554 brushes are often found on the market. We also warn you that the installation of such counterfeit products (electric brushes) on equipment and turbogenerators is incredibly hazardous, because this can lead to equipment breakdown and emergency situations.

Hereby the company "Mersen France Amiens S.A.S.", as manufacturer of electro-brushes, brush holders, plug set devices under the brand name Mersen, confirms that ELEVEL GROUP S.R.L. is our authorized dealer in the territory of the Republic of Moldova and is authorized to sell our products. On all delivered via the Company ELEVEL GROUP S.R.L the company's products are distributed with Mersen warranty obligations of the manufacturer of the plant in full.

Best regards
