Guider™ XF Softip™

Guide Catheters

Excellent Support

Developed to facilitate the introduction of interventional devices into the neurovasculature, Guider™ XF Softip™ guide catheters incorporate advanced shaft construction technology for excellent support.

DuraForm™ Shaft Construction

Extruded in multiple durometers, Duraform shaft construction transitions gradually to offer proximal support with distal softness and flexibility. In addition, DuraForm shaft construction offers consistent shape retention and stable handling characteristics.

Pre-formed Tip Shapes

Guider XF Softip catheters are offered in Multipurpose, 40° angle, and straight pre-formed tip shapes to accommodate case-to-case variation.

Atraumatic Tip

A soft, unbraided tip was designed to reduce the risk of trauma during catheter advancement and anatomic selection.*

7cm Extra-Flexible Distal Segment

Guider XF Softip catheters feature a long, extra-flexible distal segment designed specifically for neurovascular access.

PTFE Inner Lumen

Lubricious PTFE inner lumen facilitates passage of interventional devices.*

2-over-2 Braid Design

Guider XF Softip guide catheters are reinforced with a dense, 2-over-2 stainless-steel braid design for enhanced torque response and lumen integrity.*

Order information

Guider™ XF Softip™: 90 cm Usable Length†

Product Number	Catheter Description	Catheter OD	Distal ID (F)	Distal ID (in.)
