

nebulizer mask

with tubing sterile

features:

- made of transparent, non-toxic PVC
- adjustable nose metal plate and rubber fastening
- equipped with a 210 cm (+/- 5%) long tube with universal connectors
- tube with star cross-section resistant to bending
- 8 ml nebulizer (graduated every 1 ml)
- average size of the molecule at a flow of 6 l / min - 3.23 μ m
- single-use
- latex-free
- EO sterilized
- individual packaging: paper-foil

indication:

- producing aerosol containing a comminuted drug, which can be delivered to the respiratory system as the patient breathes

non-rebreather mask

with tubing sterile

features:

- made of transparent, non-toxic PVC
- adjustable nose metal plate and rubber fastening
- equipped with a 210 cm (+/- 5%) long tube with universal connectors
- tube with star cross-section resistant to bending
- 1000 ml oxygen reservoir
- revolving connector that allows adjusting to the patient's position
- silicone valves on the connector and ventilation openings
- single-use
- latex-free
- EO sterilized
- individual packaging: paper-foil

indication:

- oxygen delivery with precise regulation of concentration
- for high oxygen concentration

multi-vent mask

with tubing sterile

features:

- made of transparent, non-toxic PVC
- adjustable nose metal plate and rubber fastening
- equipped with a 210 cm (+/-5%) long tube with universal connectors
- tube with star cross-section, resistant to bending
- equipped with 2 jets - white to set mid flow concentration (35%, 40% and 50%) and green to set low concentration (24%, 28% and 30%)
- single-use
- latex-free
- EO sterilized
- individual packaging: paper-foil

indication:

- oxygen delivery with precise regulation of concentration, regardless of way of patient's breathing

MTDV-XL	210 cm +/- 5%	XL	100 pcs

nasal oxygen cannula

sterile

features:

- made of medical PVC
- very soft tips with smooth edges
- fastening under the chin with a soft, sliding adjustment ring
- various spacing of the nasal part of the cannula depending on the size
- universal connector compatible with any source of oxygen
- tube with star cross-section, resistant to bending
- available in 3 sized: for adults, for children and for infants with 140 cm, 200 cm, 300 cm and 500 cm tubes
- latex-free
- EO sterilized
- individual packaging: foil

indication:

- oxygen delivery through the nose

BESTSELLER

surgical suction cannula

yankauer sterile

features:

- ergonomically-shaped suction cannula consists of a plastic handle and suction tip
- transparent handle and suction tip allow for observation of secretion being removed
- light handle to minimize hand fatigue
- four side holes and one central opening
- bent in two points at a slight angle
- available with or without suction control
- smooth inner surface prevents secretions and body fluids from blocking the cannula
- universal stepped connector ensures tight connection with a wide range of suction connecting tubes
- single-use
- EO sterilized
- double packaging: internal - foil, external - paper-foil

indication:

- to evacuate secretions and body fluids from the operating field

KO-00214	CH 21	with suction control	50 pcs / PE bag	4 x 50 pcs

surgical suction set

sterile

features:

- set components:
 - suction cannula: CH 21 bent in two points at a slight angle, available with or without suction control
 - 210 cm long suction connecting tube: CH 24 (outer diameter: 8.0 mm, inner diameter: 5.6 mm)
- tube made of soft and flexible PVC of optimal thickness for easy operating and to prevent the tube from collapsing
- universal funnel-type connectors at both tips of the suction connecting tube can be fitted to all types of suction devices at one end and suction cannulas at the other (suction cannula can be replaced during surgical procedures)
- grooves on both connectors prevent them from bending
- grooves on the surface of the tube prevent it from bending, twisting and collapsing
- smooth inner surface prevents secretions and body fluids from sticking to the walls of the tube and ensures correct and optimal flow
- single-use
- EO sterilized
- double packaging: internal - foil, external - paper-foil

indication:

- to evacuate secretions and body fluids from the operating field
