To whom it may concern

I am writing to recommend PNA Software for their work in developing an innovative open-source IT tool aimed at disclosing the beneficiaries of subsidies in agriculture. CAPC has had the opportunity of witnessing firsthand the dedication, expertise, and impact that PNA Software has demonstrated throughout the development and implementation of this tool.

PNA Software has consistently displayed a deep understanding of the challenges faced within the agricultural sector regarding transparency and accountability in subsidy distribution. Their commitment to addressing these challenges through technological solutions is commendable. By leveraging open-source principles, PNA Software has not only created a valuable tool but has also contributed significantly to promoting transparency and fostering trust within the key stakeholders.

The IT tool developed by PNA Software stands out for its user-friendly interface and its ability to provide comprehensive and accurate information about subsidy beneficiaries. The tool's accessibility and transparency have empowered stakeholders, including farmers, policymakers, and the general public, to make informed decisions and hold accountable those responsible for subsidy allocation.

Moreover, PNA Software has demonstrated exceptional professionalism and collaboration throughout our engagement. They have been responsive to feedback, adaptable to evolving needs, and have consistently delivered high-quality results within agreed timelines.

Based on their exemplary performance and the significant positive impact of their work, I wholeheartedly recommend PNA Software for any future projects or collaborations aimed at enhancing transparency and accountability, particularly within the public sector. Their expertise, dedication, and innovative approach make them a valuable asset to any initiative seeking to promote openness and integrity.

Should you require any further information or assistance, please do not hesitate to contact me.

Sincerely,

Galina Bostan
President
Centre for Analysis and Prevention of Corruption
