

Ra K

Knitted vascular prosthesis with collagen

Crimped vascular prosthesis is made of polyester filament yarn using knitting technology and is impregnated with bovine collagen of type I.

INDICATIONS:

The knitted vascular prostheses are indicated for all types of reconstruction of arteries where application of a vascular graft of corresponding lumen is suitable.

These types of prostheses can be used in aorto-femoral, ilio-femoral regions, femoro-popliteal region above the knee joint, in the region of extra-cranial arteries and for extraanatomical bypasses.

- the prosthesis is used directly, without preparation before implantation
- the prosthesis is strong, elastic, easy to pierce, and it does not fray
- the wall is provided with a colour guiding line
- when the prostheses are bent they retain a lumen of circular shape
- the product is sterilized by irradiation
- expiration period is 3 years
