

Sidra

Y-Connector & Inflation Device

Easy manipulation Absolute hemostasis with maximum efficiency

Sidra is the highest level hemostatic valve with a large inner lumen to allow safe insertion of various interventional devices, enabling one-hand, one-touch control and absolute operational success.

One-hand & One-Touch

- The valve head manipulated with a single touch
- The valve is opened by pushing up and closed by pulling down.
- With stable hemostasis valve keep the blood inside, where it should be.
- Successfully resistant up to 500psi for absolute hemostasis valve

Large Enough to Take All

- Remarkably large inner lumen allows for safe insertion of various interventional devices
- Crystal clear body for perfect visualization
- Side port with extension line for sound connection with other accessories.

Sidra

Inflation Device

Comfy in hand Effortless Inflation, Successful Operation

Heedfully designed to inflate the balloon with the desired fluid, monitor the pressure during the procedure and deflate the balloon when procedure is completed Sidra Balloon Inflation Device is for **easy manipulation** from beginning to end.

Effort-Free Error-Free

- One-hand use for easy and quick inflation and deflation
- The rotating handle and ergonomic device body is particular for comfortable grip and handling
- Features a 30 ATM pressure rating with a 30 mL syringe volume.
- The pressure gauge is available with 35 ATM option.

Accurate Inflation Precise Deflation

- High pressures is achievable with only 3 easy rotations
- 30 mL barrel is for quick deflation even with large volume balloons
- Crystal clear barrel allows for perfect observation
- High pressure stopcock ensures leak-free operation

Handle with Ease

3 rotations to go 30
ATM

Response with
every rotation

Safe and Quick Deflation

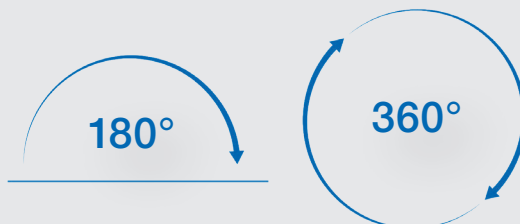

One touch to deflate
effectively

Maximum functionality
for every balloon sizes

Compatible with Accessories

3-Way Stopcock
for leak-free
operation

High Pressure
Braided
Extension Tubing:
25cm

Sidra

Inflation Device & Y Connector

Available in one pack or individually, our maximum-efficiency devices offers you excellent solutions.

Each combination kit comes with **individually-packaged sterile components** offering you the freedom to use both products at the time of procedure or save one sterile component for a later point in time.

Save from time and space
Maximize your gain

- Easier to use and dispose
- Simple and cost-effective storage
- Saves from time and space with environmental packaging
