High-Definition, wide angle

Autoclavable, max.134°C/2,3bar/5min

Medici Endoscope-line consists of high quality telescopes wich have been developed according to the most modern thecnology and production standards. A new generation optic system assures a unique color, contrast and highly defined details reproduction, both in the center of the image and at the edges. A particular true color reproduction and a markable depth of focus guarantee a natural picture. Distal and proximal sapphire windows provide an extremely high level of scratches resistance.

Fiber Light Cables

Fiber Light Cables, Xenon Safe, Led White Light

Medici Optical Fiber Cable is made to resist and to shield against very high thermic energies especially in the use of **Xenon** light sources due to the fusion of light fiber in the cable itself.

This guarantees **20%** light more in the operating field.

New High Performances White Line-LED Light Cables

New «WhiteLine» LED series Optical Fibers Light Cables have been designed and made up to be used with cutting edge LED Light Sources. By enhancing the transmission effectiveness of an already well-established and first-choice optical fibers light cable, light output and illumination, when operating with a LED light source together with a modern HD telescope, can be visibly and considerably increased.
