

B12

A High-end City Bus Compliant with Euro-V Standard

The B12 is designed for European high-end market, manufactured with high quality components and parts from the world.

With three-doors, low-floor, and large area side windows design, B12 looks simple, modern and charming.

1. Dynamic headlights and large windshields, brevity makes the beauty.
2. Simple and modern appearance always looks charming.
3. The rear door with low floor is convenient for boarding/alighting.

Interior

With large through-type glass side window and spacious interior, you can enjoy the marvelous view.

Driving Area

The modern, fashionable and ergonomical style driver cabin makes everything under control and gives the driver more confidence.
