“Esempla Systems” SRL

November 7, 2024

As the Financial Sector Transparency Activity (FSTA) in Moldova closes down operations, I want to thank you and your team for your dedicated work and valuable contributions throughout the Retail Platform project.

Esempla did a perfect job of designing, developing and implementing the IT Retail Platform to sell government securities in Moldova. This was no small feat, given the tight schedule, numerous requirements and various challenges encountered along the way. The successful launch of the first government subscription was a clear reflection of the strong teamwork, expertise and commitment of everyone involved. As you know, thousands of citizens have signed on for future subscriptions, which is due to everyone's efforts.

Your flexibility to go the extra mile, by adding and adjusting technical features to make the platform more functional, played a critical role in the implementation and success of the Retail Platform.
