Additional Information:

This product was manufactured aseptically according to the requirements of ISO:9001 using a validated sterile filtration method and tested where appropriate using USP/EP methodology or approved alternative methods. This product is intended for research use only. It is the end user's responsibility to ensure that the final product meets the requirements of the application for which it is to be used. Test results are determined using Lonza's currently approved protocols. If animal origin materials are used, these materials are sourced from suppliers considered low risk according to the "Note for Guidance on minimizing the risk of transmitting animal spongiform encephalopathy agents via human and veterinary medicinal products" (EMEA/410/01) as put in force by directive 1999/82/EC.
