- Our 120 Liter Packaging Waste Container product has been selected so that the raw material used is resistant to direct sunlight, heat and cold and has been manufactured all of them. Our product, which has been tested against various difficulties that may be encountered, has passed all the tests successfully. The raw material used is a raw material in accordance with TSE Standards. This raw material is used in all parts of our product.

With 10 different color alternatives, it helps you when you can use it as a design, and it can add general color to your spaces that seem colorless.

It has 2 wheels and pedals.

The measurements given below are approximate and there may be +/- 5% deviation in the measurements.

According to the customers' requests, magnetic locks can be added to the container lids, allowing the lids to be opened easily. They can also make it easier to open the covers by putting a pedal system on the product with our own will.
