

DC04-S PANAMERA DIALYSIS AND CHEMOTHERAPY CHAIR 4 MOTORS

The dialysis chair consists of 3 main parts: the backrest, the seat, and the leg section. With its 4 DC motors controlled by a hand remote, it is capable of performing backrest up/down, height adjustment, leg section up/down, and Trendelenburg/reverse Trendelenburg movements. It features a detachable and adjustable cramp step and head section. The cramp step can be pulled inward up to 10 cm to prevent cramps that may occur during dialysis and can be adjusted according to the patient's height.
