

Ureteral stent kit

Adaptation

Used for temporary internal drainage from the ureteropelvic junction to the bladder. X-ray - proof polyurethane Ureteral Stent Sets have been employed to relieve obstruction in a variety of benign, malignant, and post-traumatic conditions. These stents may be placed using endoscopic, percutaneous, or open surgical techniques.

Features

- Variable length designed to accommodate various ureteral lengths.
- The Hydrophilic Coating increases the lubricity of stent.
- Biocompatible material designed for up to a 30-day indwelling time.

Product set include

Ureteral stent, pusher, hydrophilic guidewire, stent clip (the guidewire and clip are optional)

Ordering Information
