## THE CORPORATION

---

The **BAMBAS FROST** corporation's activities are expanding in the manufacturing of professional refrigerators and stainless steel equipment area since 1998, in the Kozani main facilities, in the Western Macedonian region.

The company has been founded by **Mr. Konstantinos Vamvas**, a businessman with a long-time experience in the professional equipment industry. The company's human resources are experienced and highly qualified, with a solid know-how in professional equipment manufacturing areas. The **BAMBAS FROST** corporation is capable of satisfying any requirement of its customers. With the contribution of its selected collaborators, **BAMBAS FROST** handles the equipment of professional facilities such as restaurants, hotels, food service spaces, cafeterias, bakeries etc. in Greece and abroad as well. Its high-quality products comply with the European standards and certification requirements. Due to the perfect quality of its products, its prompt service, the development of innovative products and its participation in core international exhibitions abroad, the

**BAMBAS FROST** corporation has become widely famous in the professional equipment industry.

The human resources, the cutting-edge concepts, the ultra-modern CNC technology machinery along with the **BAMBAS FROST** know-how in the freezing area assure the complete structuring of professional spaces by means of reliable equipment. The high-quality equipment manufacturing, such as stainless steel professional refrigerators, food-service equipment such as glass baskets, working benches, ventilation pipes and various other similar items, has built up the company's high-level reputation in the domestic as well as the global market and has highlighted **BAMBAS FROST** as one of the best manufacturers of professional equipment in Greece.

**BAMBAS FROST** privately owned facilities include modern buildings of 11,000 square meters, located at the third kilometer of the Kozani-Thessaloniki national road, in the Kalsla industrial area.

The company's large warehouse enables it

# QUALITY

**BAMBAS FROST** core principle and commitment as well as the philosophy of every company's manager consists in providing products and services which respond entirely to its customer requirements and expectations within the scheduled delivery deadlines, in complying with the legal and regulatory requirements of the products and achieving its own quality aims.

**To achieve the above mentioned goals, BAMBAS FROST:**

- Uses AISI 18/10 304 type stainless steel in all the equipment and refrigerators of its product range thus providing high-quality and reliable products
  - All refrigerators and freezers have a tropical type operation mode (T) which can afford ambient temperatures of +43°C
  - All electronic systems, the refrigerator motors and product components are manufactured by well-established brands acknowledged for their quality
  - Its products are manufactured according to the CE complying statement
  - Is ISO 9001 certified and applies this quality management system
- Checks and improves continuously its product features wherever it's possible
  - Implements the incorporation of the most advanced technology whilst it strives to assure the efficiency of its production processes and consequently that of the entire quality management system, aiming to its continuous improvement
  - Always allocates the required resources to assure the appropriate and efficient operation of every corporate department in order to consolidate its leading market position through a continuously developing product range
  - Keeps its customers updated about the safe use and maintenance of its products and implements the required improvements on the basis of its customer feedback

By adopting the principle of continuous improvement, achieved through the collective contribution, involvement and updating, BAMBAS FROST uses its long-time experience and invests in its device quality, the respect of its customers and their entire satisfaction.

## NEW REFRIGERANT R290 GAS

Our first concern is to produce products that meet the international standards and they follow the new trends and technology requirements.

We redesigned our products to provide in market improved refrigerant units, which is ecological friendly and customized in new technologies. To achieve these goals, we have moved on some changes one of them is to use the new refrigerant R290.

The advantages of a refrigerant unit that uses refrigerant R290 are the following:

- Reduced energy consumption
- Higher efficiency of the cooling circuit
- Reduced device sound
- Higher energy class

## ENLARGED INSULATION FOR LESS CONSUMPTION

Beside the change of the refrigerant gas, a very significant factor for the energy saving is the thickness of the insulation. Having this under consideration, we enlarged the thickness of the insulation for the cabinets, both refrigerators and freezers, 7cm thickness on the body and 8cm on the bottom. Always using new technology insulation materials, that are friendly to the environment.

## NEW TEMPERATURE CONTROLLER

In cooperation with the Italian house DIXELL, we have created a new electronic temperature controller, which provides the latest technological innovations of DIXELL such as:

- Waterproof panel IP67
- Night function for energy saving
- Pioneering design and bigger digital display.
- Special covering plate for humidity protection

Furthermore, the electronic temperature controller comes with an easy changing button for fast replacement without expertise knowledge.

## EVAPORATOR WITH ANTICORROSIVE PROTECTION

All the cooling appliances are equipped with evaporators that are covered with a special paint with anti-corrosive protection. This means that we achieve longer lifespan and endurance in hard work conditions, such as storage of food in high salt content, dairy and cheese products.

## NEW INNOVATIVE COOLING SYSTEM, SMART COOL WITH THREE ZONES

With the new cooling system SMART COOL the temperature is evenly distributing even if the external temperature is high. The new cooling system in combination with the renewed evaporator provides uniform temperature and the airflow is distributed in three levels in the cabinet. With this functional cooling system, the temperature deviations are insignificant.

The manufacturer reserves the right to make changes on design, specification, terms and conditions governing new products, sales, and prices. This catalogue cancels all previous and prices are Ex-works and delivery costs are not included. Prices are subject to alteration at any time without notice or obligation. While every effort is made to ensure accuracy, no responsibility can be accepted by BAMBAS FROST or any of its Authorized Agents for errors, omissions or alternations.

**DRY AGE**

Dry Aged meat cabinets have the proper conditions to mature meat, the air humidity, air circulation and temperature are controlled.

This process provides to meat intense and deep flavor and a grate smooth texture where has nothing to do with the raw meat.

The meat is done tender because of the natural enzymes which they "separate" the protein cells where contained in muscle tissue.

The difference between raw meat and dry aged meat is that the second one is noticeably tender and tasty than the raw meat.

To achieve the best aged meat more than the regular, a piece of meat in "dry environment " needs space (many liters of air round the meat), in a space that the temperature and humidity are observed all the time.

## CUSTOM MADE CONSTRUCTIONS

Adjust the products to the needs of the space and the needs of each business!!!

Our company, using the experience and the technical knowledge of many years, commit to carry through even with the hardest works. By developing a department of experts, in the field of the tailor made constructions, we offer special constructions with the well-known BAMBAS frost quality in unbeatable prices.

For any request or order of custom made products, we need the following :

1. A linear drawing of the product with the dimensions.
2. Contact by phone for details clarification.

Finally, only by scanning the following QR code with your mobile phone, you can visit our database of tailor made constructions, that we have already produced and choose the one that is suitable for your needs. We update frequently this file with new designs.
