

SK 104 - Double Swing

The installation should be formed by connecting a total of 4 bearing clamps with chains, 2 for each swing, to a 300 cm-long Ø114 mm minimum 2.5 mm pipe connected by pipes with a minimum wall thickness of Ø 114 mm and 2.5 mm pipes that pass into each other on both sides. The distance between the bottom surface of the swing seat and the Decking surface should be at least 40cm (+/-10cm). The connecting chains will be used as hot-dipped galvanized, with a minimum of 25 microns against rust. 6 mm caliber and double row chain should be used to prevent finger jamming. Polyethylene accessories that conceal the detail can be used optionally in the swing struts combinations.

- The mother's lap swing seat should be closed on the 4 side of the child's seat, and the seat where the mother will sit should be produced in such a way that there are fine lines to prevent slipping. Reclining Seats should be single. A Shock-absorbing rubber bumper should be used on the front surface of the swing seat to prevent collisions. The swing seat width and length should be manufactured to be 116.5x55 cm with a minimum height of 36 cm. The width of the seating area where the child will sit is min. it should be 33 cm, a Mother's lap swing seat should weigh at least 10 kg.

- The swing seat should consist of polyethylene material with a front protection belt for 3-side closed safety. Reclining seats should be single person, there should be a protection belt with a mother and child figure. The unobstructed swing seat should be manufactured in such a way that its width and length are 59x71 cm and its height is at least 87.5 cm. The width of the seating area should be at least 50 cm, the bracket must weigh a minimum of 10 kg along with the swing railing. A Shock-absorbing rubber bumper should be provided against bumps in the front part of the unobstructed seat.

CHAIN SWING SEAT

- The swing seat must be enclosed on three sides and have a front safety belt for protection.
- The chains must be 6 mm caliber, dip-galvanized. The swing seat and chains must comply with TSE safety standards.
- The swing seat and railing must be made of self-colored polyethylene material, double-walled.
- The seats must be single-person and have an animal-shaped safety belt.
- The swing seat must be manufactured with dimensions of 48.5x42 cm in width and length, and a minimum height of 32.5 cm.
- The seating area width must be a minimum of 35 cm.
- The swing seat must have impact-absorbing rubber on the front for safety against impacts.
- The swing, including the railing, must weigh a minimum of 3.5 kg.
- The term "POLYETHYLENE" must be present as per TS EN 1176-2 / 04.02.2010.
- The dyes used for coloring must comply with child health and food regulations.

IP-301 TECHNICAL SPECIFICATIONS

- The supporting pipes will be made of metal material with a minimum diameter of 114mm and a wall thickness of 2.5mm.
- The roof, panels, and slides are made of polyethylene material.
- The platform and stairs are made of 2mm sheet metal coated with PVC plastisol.
- The metals in the product are sandblasted and painted with electrostatic powder paint.
- The product does not have any sharp edges or surfaces that could harm the user.
- The screws on the product are covered with screw and bearing concealments.
- The product is manufactured in accordance with EN1176 standards.
