Project: Development Bizon 360 CRM

Position under the project: QA engineer / Tester

Project description:

A CRM application is a software product designed to automate the sales processes of a certain company. It manages a company's interaction with current and potential customers It uses data analysis about customers' history with a company to improve business relationships with customers, specifically focusing on customer retention and ultimately driving sales growth.

Main technologies: NET Core, MVC, C#, JQuery, Razor View Engine, SQL Server.

Project: Development a Cryptocurrency App with a fully-customizable interface and real-time data update

Position under the project: QA engineer / Tester

Implementation period: February 2020 – September 2020

Project description:

Our customer was looking for a reliable software development provider that would build a cryptocurrency web and mobile application for them. Their goal was to help millions of people safely manage their multi-crypto wallets and generate an additional source of regular side income.

Basic functionalities:
- Buy/Sell cryptocurrencies;
- Easy and fast registration;
- Personal trading dashboard;
- Referral program - earn money by recommending the app;
- Mobile app: Android and iOS.

Main technologies: Xamarin.Forms, ASP.NET Core, MvvmCross, ReactiveUI, MVC, Razor, jQuery, Bootstrap, DateTables.

Project: Development UP CRM

Position under the project: QA engineer / Tester

Implementation period: August 2020 – October 2020

Project description:

UP CRM (customer relationship management) is a tool that helps managing all your company's relationships and interactions with customers and potential customers. The main objective of the CRM tool was to gives everyone — sales, customer service, business development, marketing — a better way to identify sales opportunities, record service issues, and manage marketing campaigns, all in one central location.

Main technologies: ASP .NET, MVC, C#, JQuery, SQL Server.

Project: Development of intranet system for report generation "SES Eaux"

Position under the project: QA engineer / Tester

Implementation period: January 2019 – June 2019

Project description:

SES Eaux is an organization that monitors the water usage/production for Luxembourg's south region. It includes communes that adhered to it and has 2 big Elevation stations (Koerich + Dondelange) and 1 Reservoir (Rebierg)

The system is used to generate the annual report. The actual report is contained from many statistical parts, that will be entered by the Beneficiary during the whole year. Afterwards, the actual report is generated from the 'selected' parts and exported as a PDF / presented as a separate web-page.

Main technologies: PHP7, Drupal8, Jquery, Twig, MySQL.
