CUTTING-EDGE TECHNOLOGY IOL

Synthesis[®] is a new acrylic monofocal intraocular lens, developed and manufactured by CUTTING EDGE, expert in IOLs design.

Cutting Edge builds experienced and dedicated teams to design, prototype and manufacture high-quality Intraocular Lenses. Our state-of-the-art facility honours the quality and process sophistication of the medical device industry.

The proximity of our Research & Development team to our manufacturing operations is truly significant for building close links and in using a results-orientated approach.

Cutting Edge masters all manufacturing stages in house, from machining to optical and mechanical tests, through to packaging and international logistics.

Synthesis was engineered by a team who fully believe that the human eye is both fragile and precious and requires the utmost in precision, “savoir-faire” and faultless industrial quality.
