GT174-100 Ice Bandage

Ice wrap is a cold bandage which uses a revolutionarily new technique for treating injuries, muscle pain and strains.

This bandage reduces recovery time from injuries by combining both the cooling and compressing process in an easy-to-use way.

A specially formulated solution is infused into the elastic bandage that begins to evaporate upon contacting skin, thereby causes cooling of the applied area. Icewrap reduces swelling and provides sufficient cooling to make it a very effective treatment.
