

MaisSafe™

Safety I.V. Cannula with Injection Port and Wings

Description: Safety I.V. Cannula has been designed innovative with the safety feature which eliminate the risk of accidental needle injuries to the healthcare provider. It is very user friendly due to its sleek & smaller design. Very low penetration force (Low penetration force means lesser pain to patient - which means our Safety IVC is very patient friendly).

1. NEEDLE
2. CATHETER
3. WING BODY
4. PORT CAP
5. SAFETY DEVICE
6. NEEDLE HUB
7. FLASHBACK CHAMBER
8. LUER LOCK

Packing

Unit Pack	Inner Box	Outer Box	Container	
			20'	40' HQ
Single Hard Blister	50units	500units	5,00,000units	11,95,000units

Specifications

Size	Colour Code	Ext. Dia. mm	Catheter Length mm	Flow Rate ml./min
14G	Orange	2.1	45	300
16G	Grey	1.7	45	200
17G	White	1.5	45	140
18G	Green	1.3	45	95
20G	Pink	1.1	32	62
22G	Blue	0.9	25	33
24G	Yellow	0.7	19	20
26G	Violet	0.6	19	15

Technical Features

1. Polyurethane cannula, 3-4 radio opaque lines, biocompatible material which tends to long indwelling time, thermoelastic, thrombogenic
2. Different cannula lengths
3. The internal cannula lumen with minimal obstruction
4. Injection Port with color coding for size identification
5. Lateral Port with silicone valve
6. Instant flashback needle
7. Transparent flashback chamber for easy visual confirmation of venipuncture
8. 100% Safety needle activation, which is very smooth & consistent
9. Flexible wing for easy fixation
10. Sterile, individually packed in peel open blister pack
11. EC Full Quality Assurance certification
12. ISO 13485 certification
