

Dear Business Partner!

REACH is an European Regulation (EC No. 1907/2006), which aims to protect human health and preserves the Environment.

It concerns directly manufacturers and suppliers of chemicals made or used on the European market. Its implementation began on 01/06/2007 and is planned for several years.

There are requirements in REACH for substances of very high concern (SVHC). We regularly monitor the amendments of the Candidate list for Substances of Very High Concern and in the Annex XIV of the Regulation.

Papiroti d.o.o. requests requests from all suppliers to ensure that all chemicals they use in their preparations are registered. We hereby, confirm that our products are composed with the last valid version of:

- the Candidate List (updated the 25/06/2020)
- the appendix XIV "Authorization List" (updated on 07/02/2020)
- the appendix XVII "Restriction List" (updated on 11/06/2019)

Based on information from our suppliers we state that no SVHC substances listed in the "Candidate List of Substances of Very High Concern" from the European Chemicals Agency are present in concentrations above 0.1% in our products.

Candidate list on website <http://echa.europa.eu/home>

In the case of any change we will contact you immediately.

Best Regards,

Senovo, 01.01.2021
