Choose a Monitor by Size and Resolution														

See pages 20 - 23 for a detailed list and specifications of the complete FlexScan lineup, including square and wide monitors.

Bask in Beauty.

Aesthetically Pleasing Design

The minimalist design of FlexScan monitors allows them to fit naturally in your work environment. Even with the black borders along the perimeter of the LCD there is very little distance between the display area of each screen in a multi-monitor configuration which makes for almost seamless viewing.

Tackle More with 4K

The EV4340X, EV3240X, EV2740X, and EV2740S support 4K (3840 x 2160 pixel) resolution, displaying four times the amount of information than standard Full HD (1920 x 1080 pixel) monitors. You can view more applications simultaneously on a single screen, greatly reducing the need to scroll or switch windows frequently.

Better Meeting Experience

The EV4340X displays at 4K resolution across a spacious 42.5-inch screen. The built-in 4-watt speakers provide clear audio for meeting spaces with several people. The included remote control can be used to change settings when the monitor is out of reach, such as in wall-mounted installations.

Contoured to Your Workstyle.

See Everything at a Comfortable Distance

The curved screen of the EIZO ultrawide monitors gently brings its edges in to a comfortable distance, improving visibility, focus, and immersion.

More Space, Seamless Viewing

The ultrawide screen provides an expanded workspace for flexible arrangement of multiple applications without the obtrusive bezels characteristic of multi-monitor setups.

Built-In Webcam / Mic / Speaker

The EV3450XC's webcam, microphone, and speaker are discreetly integrated into the bezel to blend in with your workspace. High quality video and audio make it easy to communicate with colleagues.

Get Connected. Get Started.

Streamlined Connection with USB Type-C

USB Type-C compatible monitors make it faster and easier to connect a laptop when moving between workstations, or when working away from the office.

Power Delivery

Power delivery via USB Type-C reliably charges laptops and small desktop PCs. This eliminates the need for a laptop's bulky power supply unit, freeing up desk space.

Directly Connect Peripherals

Laptops often have limited connectivity options for peripherals. Connecting to a USB Type-C compatible monitor gives access to a hub with multiple USB Type-A ports for easily connecting an external keyboard, mouse, web camera, or storage device.

Stable Network Connection

While many modern laptops are not equipped with a dedicated LAN port, a USB Type-C compatible monitor with a built-in LAN adapter provides users with access to the network via the monitor. This allows users to conduct conference calls or data transfers reliably and at high speed.

Compatible Models EV4340X / EV3851X / EV3450XC / EV3451X / EV3240X / EV2740X / EV2795 / EV2495 / EV2490

Protecting Network Security in Shared Workspaces

Social change has led to a diversification of workspace models and workstyles. More companies are adopting shared office spaces, conference rooms, and meeting spaces. EIZO MAC Address Clone Utility software is available to enable the convenient use of wired LAN functions in a secure environment through MAC address authentication when using EIZO LAN port monitors in such spaces. *Supports Windows OS only.*

Daisy Chain

With a daisy chain users can connect multiple monitors via a single video signal output. Connecting monitors in a daisy chain simplifies cable management, tidying up the back of the desk for an even cleaner office aesthetic.

Say Goodbye to Tired Eyes.

Glare Reduction

Anti-Glare Coating

FlexScan monitors are treated with an anti-glare coating to reduce screen reflections caused by ambient lighting. The coating scatters incoming light, reducing the amount of light reflected into your eyes.

Flicker-Free Viewing

EyeCare Dimming Mode

Due to the way brightness is controlled on LED backlights, some users may experience flicker on the screen, causing eye fatigue. FlexScan monitors use a hybrid solution to regulate brightness and eliminate perceived flicker without compromising color stability, even at low brightness settings.

FlexScan monitors are certified by TÜV Rheinland to have low blue light and be flicker-free.

Auto Brightness Control

Always the Ideal Brightness

The Auto EcoView function automatically adjusts the brightness of your monitor according to ambient lighting. This ensures your monitor is always at the optimal brightness for reducing eye fatigue.

Blue Light Reduction

Paper Mode

Do you find that your screen is often too bright to read text comfortably? FlexScan monitors are equipped with Paper Mode which reduces blue light to simulate paper, making it less straining on your eyes. When used in conjunction with the Auto EcoView function, blue light is even further reduced.

Stable Image Even at Low Brightness

Reduce Brightness to Approximately 1 cd/m²

Most FlexScan monitors can be adjusted to a brightness of approximately 1 cd/m² without negatively impacting the color or stability of the screen.

The Perfect Position.

Versatile Stand

The stands feature height adjustment, tilt, and swivel, while saving space and remaining stylish. Quickly and smoothly adjust your monitor to the perfect position.

Stand movement range varies by model. See pages 20 - 23 for specifications of all monitors.

■ EV2795

Wide Height Adjustment Range

The ergonomic stand allows you to adjust the monitor to the most comfortable position suited for the workplace or home office.

Space-Saving Positioning

For the most limited workspaces, a laptop can fit comfortably under the monitor with the stand at maximum height. This allows you to use the laptop as a second screen without taking up valuable desktop space.

Stand movement range varies by model. See pages 20 - 23 for specifications of all monitors.

■ EV2480

Free Up Your Workspace

VESA-compliant stand brackets let you easily mount a client terminal such as a thin client or mini PC to the back of the monitor. The space the client terminal previously occupied is now freed up so you can make better use of your desktop. Even with the client terminal attached you can adjust the monitor's stand freely.

Please check EIZO website for supported models.

Case Studies: See how EIZO is used in a variety of environments

Intelligent Software to Work Better.

SCREEN INSTYLE

EIZO's free Screen InStyle software streamlines screen management of single and multi-monitor environments for a better working experience.

Available on both Windows and macOS operating systems.
See pages 20 - 23 for compatible monitors.

Automatically Change the Color Mode for Each Application

Auto Color Mode

FlexScan monitors have multiple color modes designed for different uses. Use the Auto Color Mode to assign a color mode to turn on when using specific applications such as those for writing documents, photo viewing, creating illustrations or watching movies. When an application is opened the screen will automatically switch to the assigned color mode, making manual switching unnecessary.

Color Briefcase

Effortlessly maintain your personalized screen preferences wherever you go. Color mode and display settings are automatically applied when you connect your laptop to a monitor supported by Screen InStyle, making it ideal for hot-desking and shared workspaces.

Organize Your Desktop to Increase Work Efficiency

Screen Layout

This function allows you to divide your desktop and arrange each program's window neatly across the screen, helping you work smarter and more efficiently.

Easily Switch Between Inputs / Color Modes

Assign Hotkeys for Switching Input Signals and Color Modes

With the hotkey function, you can assign keyboard shortcuts to instantly switch between color modes or input signals from two PCs connected to your monitor.

Multi-Monitor Convenience

Synchronize Screen Adjustments

When using multiple monitors, save time by synchronizing all the monitors with each other. If you change the color mode, brightness or color temperature of one monitor, the rest will automatically change to the same.

On/Off All at Once

When one monitor's power is turned off, all other monitors will also turn off. Save energy by easily turning off all monitors at once.

Available on Windows operating systems only.

Screen InStyle Server

Effectively Monitor Asset Management

Screen InStyle Server is available on Windows operating systems only.

Automatically Receive Monitor or PC Information

With Screen InStyle Server receive information such as the model name and serial number of any monitor connected to your network. Additionally, see information from the computer that each monitor is connected to, such as the OS, IP address and computer name.

Control Settings on Multiple Monitors at Once

Easily manage multiple monitors by remotely controlling settings like color mode, brightness, and eco functions. You can centrally configure power settings for both networked monitors and PCs, including options to turn them off or enter sleep mode after a predefined period of inactivity. This contributes to meaningful energy savings across your organization.

Care for the Environment.

Leading the Way in Sustainability

EIZO is committed to environmentally conscious product development, from the manufacturing process to the user experience. FlexScan monitors are at the forefront of these efforts, supporting users and organizations concerned with sustainable procurement.

Certified Sustainable

FlexScan monitors are certified by worldwide comprehensive sustainability standards such as TCO Certified, ENERGY STAR®, and EPEAT.

Certification varies by model. See website for more details.

Low Environmental Impact Materials

The FlexScan lineup includes models that are made of more than 80% recycled plastic. This reduces the amount of plastic waste entering the environment, conserves resources, and promotes the reuse of materials to preserve the natural ecosystem.

Energy Efficiency

Cut power consumption by as much as 60% using EcoView technologies. The Auto EcoView function automatically adjusts the screen's brightness according to changes in ambient light, while the EcoView Optimizer 2 function fine-tunes the balance between brightness and gain according to the content displayed on the screen, contributing to a smaller carbon footprint.

[Visit Our Website](#)

["How Green is Your Monitor?" Eco Calculator](#)

Eco-Conscious Packaging

Most monitors are safely packed using molded pulp made from recycled cardboard and newspaper. Their cables are also wrapped in paper instead of plastic bags.

Collective Packaging Options

Collective packaging options are available to support corporate sustainability. Multiple monitors are packaged in a single box, while the stands are packaged separately or excluded entirely, improving loading efficiency and streamlining installation.

Eco-Consciousness and Workstyle Innovation

FlexScan reflects EIZO's sustainability focus through eco-conscious design, including the use of recycled materials, low-impact components, and energy efficiency. Additionally, user-focused features support diverse workstyles, enabling more comfortable and productive work. These efforts contribute to EIZO's broader commitment to the Sustainable Development Goals (SDGs).

Warranty of Trust, Powered by Our Confidence in Quality

In June 2026, we introduced the world's first¹ 7-year monitor warranty² for select models in the FlexScan EV series. This extended warranty reflects our commitment to high-quality, highly reliable product design, backed by rigorous quality control.

¹ According to EIZO's research as of June 2026.

² Usage time is limited to 30,000 hours.

See pages 20 - 23 for warranty periods of all monitors.

Integrated Approach

Through complete in-house control of development, manufacturing, and quality assurance, EIZO maintains consistent quality and long-term reliability. This integrated approach enables EIZO to confidently offer a 7-year warranty.

With current LCD technology, a panel may contain a limited number of missing or flickering pixels. If the monitor is left on continuously over a long period of time, dark smudges or burn-in may appear.

To maximize the life of the monitor, we recommend the monitor be turned off periodically.

¹ Usage time is limited to 30,000 hours. ² 6 months from the date of purchase.
