UV mini lamps

Supplier: UVP ULTRA VIOLET PRODUCTS LTD

These lamps are excellent for quick field inspection or fluorescence applications.

- For field use and fluorescence work
- Longwave, shortwave, and combination options available
- Four-watt intensity
- Impact-resistant plastic

Mini UV Lamps feature four-watt intensity and are powered by four AA batteries (not included). Each lamp housing is made of impact-resistant plastic that resists fading or cracking. The lamps are lightweight and small enough to fit into a pocket. A nylon strap is attached for easy handling. The lamps are available in three configurations: longwave, shortwave, or a multi-band longwave/shortwave combination.

Ordering information: Model UVL-4F includes a flashlight and a longwave UV.

ORDER
