TCL

Strong Industrial Capability

Currently, TCL has 8 Production Bases in Indonesia, Brazil, Zhongshan, Hubei Base, Jiujiang and Huizhou.

17,500,000

The total production capacity of TCL Air Conditioners has reached 17.5 Million sets per year.

Zhongshan 2nd Base
(7 Million pcs of indoor units)

TCL-Rechi Compressor JV
(16 Million pcs of compressors)

Jiujiang Base (2 Million sets of air-cons)

Hubei Base (5 Million sets of air-cons)

TCL-De' Longhi JV
(1 Million pcs of portable air-cons & dehumidifiers)

Indonesian Base (1.5 Million sets of air-cons)

Brazilian Base (1 Million sets of air-cons)

IoT Connection

TCL AI Ultra-Inverter AC is Google Assistant enabled smart AC that realizes interconnection between TCL TV and AC with Voice enabled function using Google Assistant. This provides the comfort of operating voice enabled Smart AC from anywhere in the room. The TCL Smart AC now works with Alexa where user can control TCL AC through external Alexa device.

Voice Commands using Google Assistant are

Ok Google, Turn on the TCL AC

Ok Google, Change the temperature to 18°C

Ok Google, Change AC to cool mode

Ok Google, Turn off TCL AC

TCL AI Ultra-Inverter AC enables operating smart AC from anywhere across the globe with TCL Home App. This ensures cooling at your scheduled time, thereby cooling your room even before you enter.

Operations possible through TCL Home App

- ✦ Switch ON/OFF AC
- ✦ Change mode
- ✦ Change temperature
- ✦ Alter fan speed

3-in-1 Filtration Technology

Vitamin-C Filter

The dust and pollutants in air can damage the skin and make human body vulnerable to diseases. But vitamin C filter present in the indoor unit of TCL Ultra-Inverter AC enrich the air with "Vitamin C Ions" thereby providing health benefits for the user.

Silver Ion Filter*

TCL Ultra-Inverter AC with Silver Ion filter ensures that the air inside your home is free of various harmful particles such as fungi, spores, bacteria and smoke. The room air passes through the silver ion filter and gets enriched with the ions present in filter, thereby removing all the bacteria, fungi and spores present within to provide you with a breathe of cool and clean air.

Dust Filter

The PM 2.5 Dust Filter helps to eliminate dust from air and ensure clean air within the room. The filter is designed for easy handling and quick cleaning which elongates the life of your air conditioner.

*Available for iECO model Only

Up To 50% Energy Saving

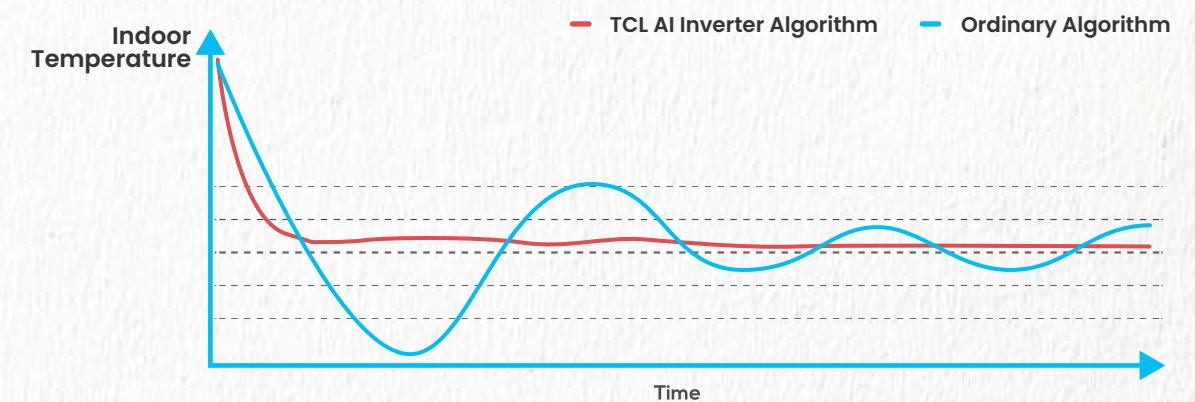

AI Ultra-Inverter Compressor designed by TCL for ultra-low frequency operation ensures up to 50% energy saving, thereby reducing power consumption.

AI Ultra-Inverter Algorithm

Self-optimization | Faster | Smoother

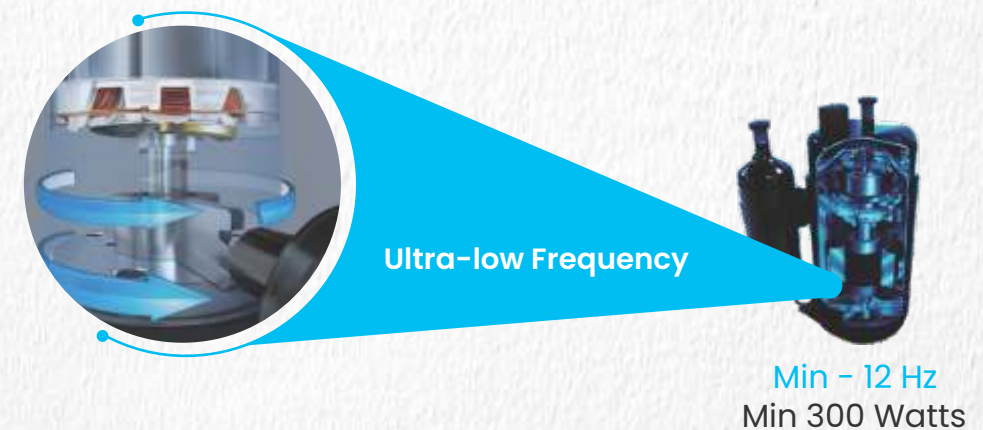

TCL AI Ultra-Inverter AC applies AI Ultra-Inverter algorithm

- To reach the set temperature quicker
- To operate more accurately
- To cool faster
- To provide smoother operation

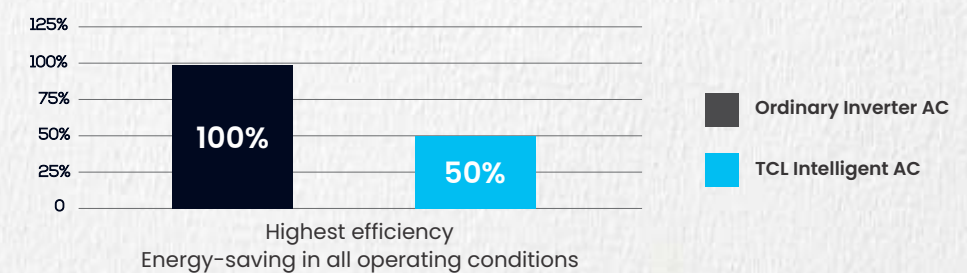

Ultra-low Frequency Operation

When the set temperature is reached and the compressor is under light load, it can operate at an ultra-low frequency to save energy while maintaining a constant, comfortable temperature in the room.

Energy-saving operation

Power consumption comparison

30 Sec Fast Cooling

TCL AI Ultra-Inverter AC ensures rapid cool air by bringing down outlet air temperature from 27°C to 18°C in just 30 seconds. Turn ON your fast cooling AC to enjoy quicker cooling.

18°C

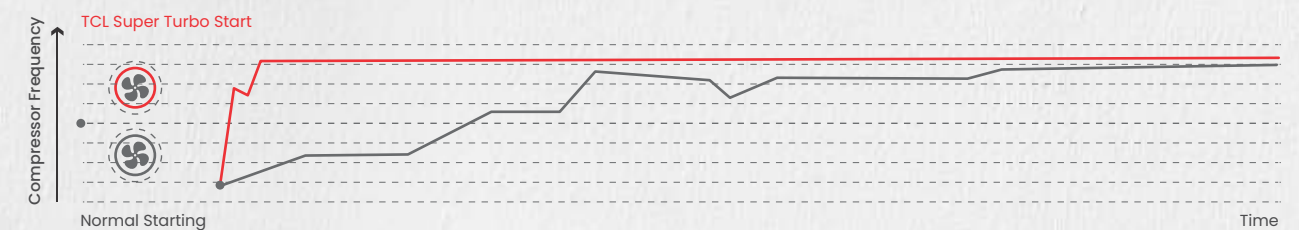

Cool wind blows in

Outlet Temperature Decreased
From 27°C to 18°C in 30 Sec

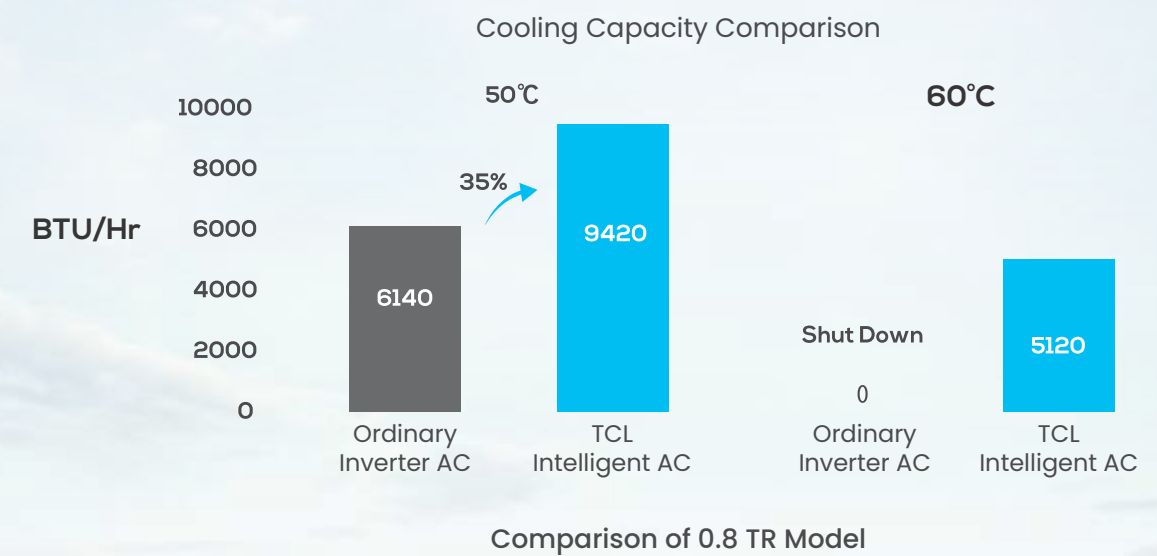

Operation Status Comparison

Up To 60°C High Ambient Cooling

TCL AI Ultra-Inverter Ocarina Series AC applies air-cooled electric control box technology to effectively cool down the temperature of PCB in the outdoor unit. Therefore no cooling capacity decline at 50°C ambient temperature and non-stop cooling till 60°C ambient temperature*.

*Applicable on selected models only.

Titan Gold Evaporator & Condenser

Titan Gold is TCL coating technology on a high-efficiency heat exchanger that reduces the rate of corrosion of evaporator and condenser fins to enhance durability of air conditioner.

Strong Hydrophilic

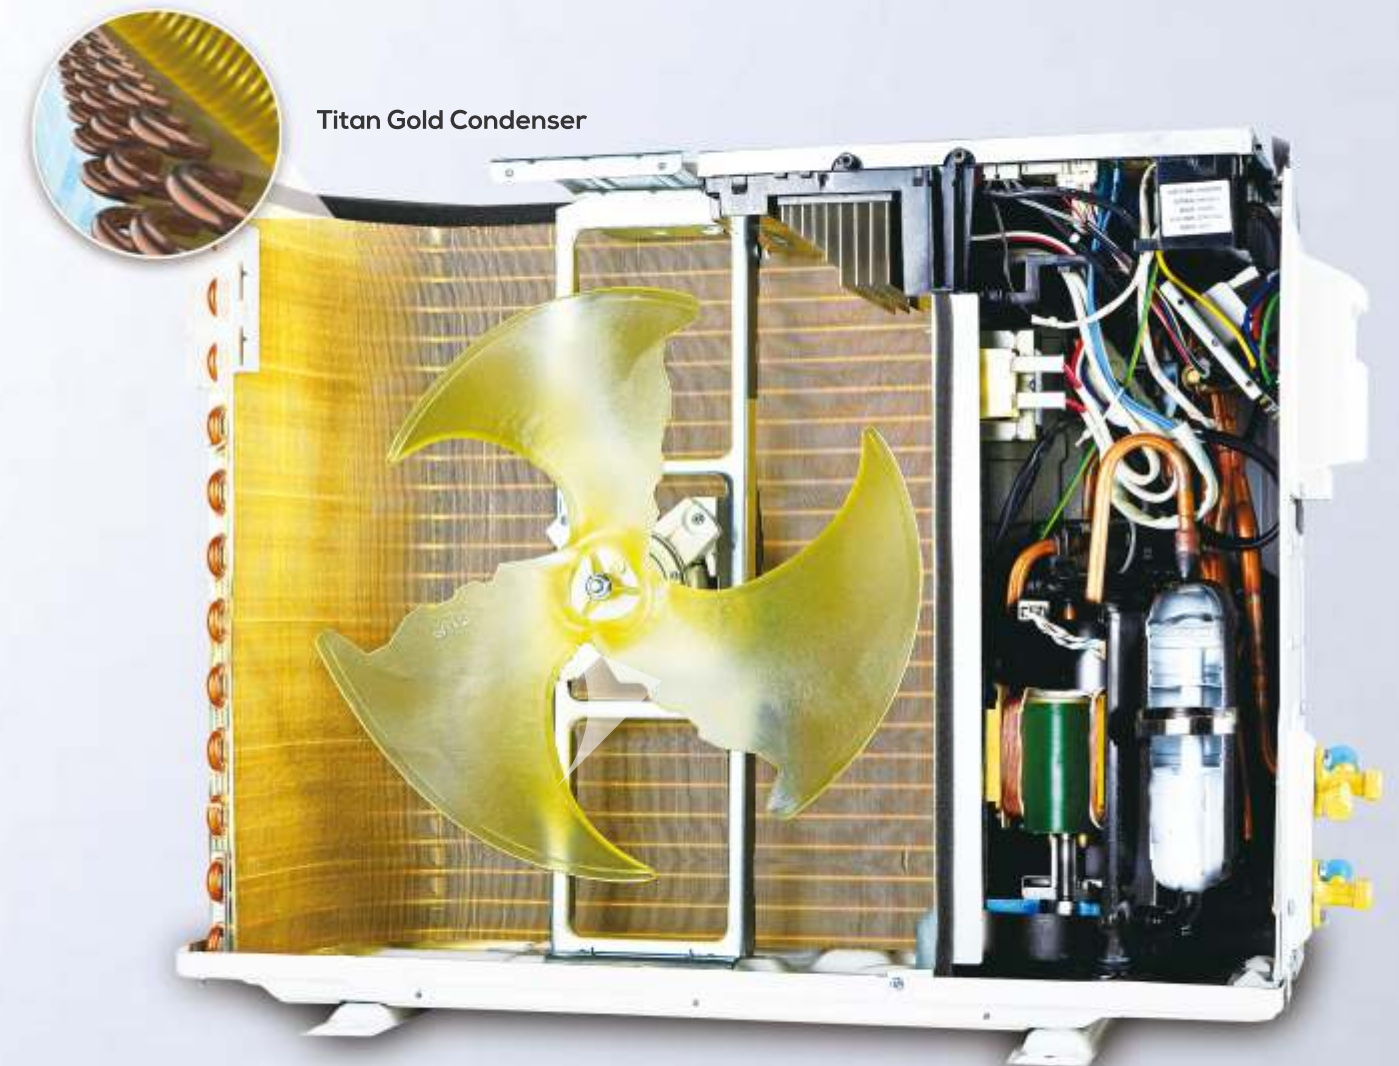

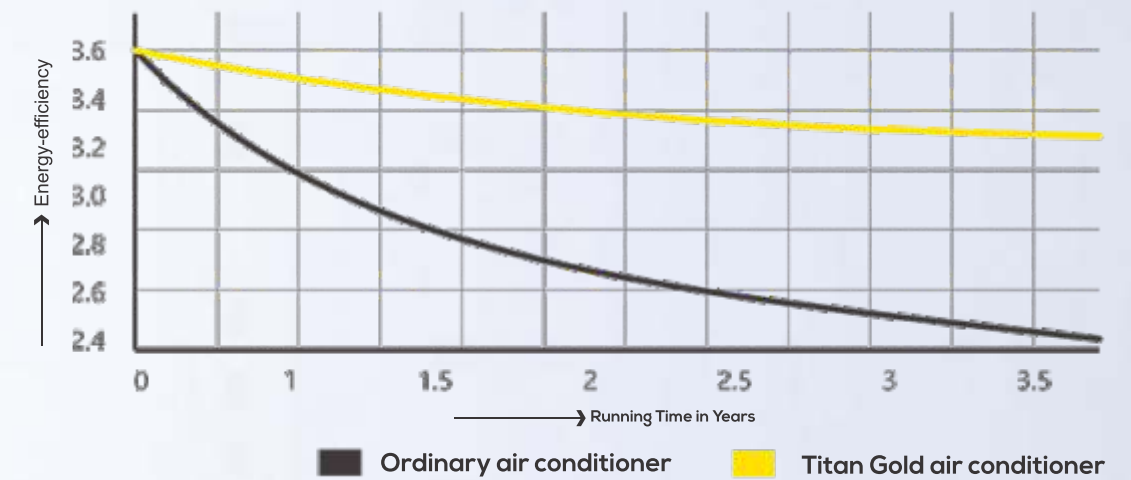

Condensate water will not be retained on the fins of both the evaporator and condenser.

Self-cleaning

No accumulation of dust, dirt and bacteria on the surface.

Sterilizing

Free from extraneous odour for a longer period.

Eco-Friendly R32 Refrigerant

More efficient
and less cost to
operate

Global
Warming
Potential is
roughly 30% lower
than that of
R410A

R32 systems
use up to 20%
less refrigerant
than R410A

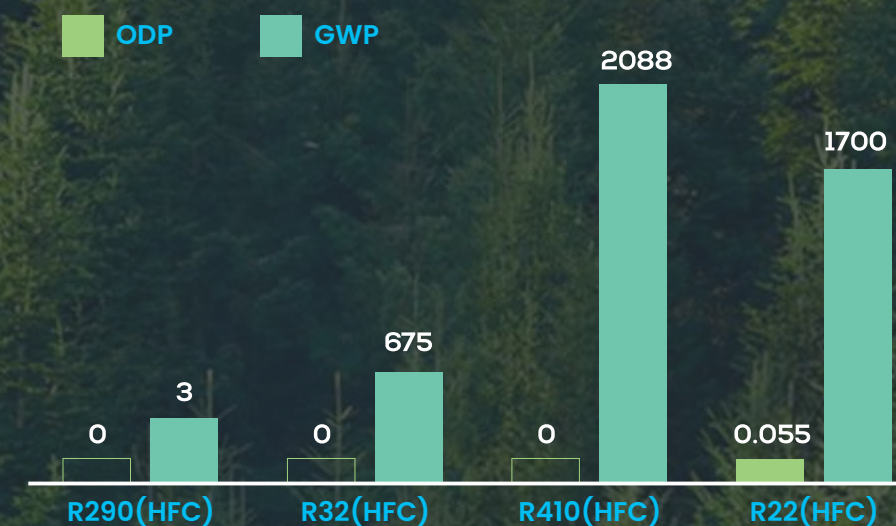

Ozone
Depletion
Potential of 0

Easier to recycle
than R410A, as R32
is a single
component
refrigerant

TCL AC uses R32 refrigerant
for above reasons

Environmental Friendly R32

A new refrigerant can convey heat efficiently, it has much lower GWP compared to R-22 and R-410, and is remarkable for its low environmental impact.

100% Copper Tubing

TCL AI Ultra-Inverter AC provides 100% copper tubing in the indoor and outdoor unit with high heat transfer co-efficient.

Advantages

Increases the heat transfer capability

Ensures easy reparability

Enhances the durability of the product

Protect condenser against corrosion

Anti-rust

4 Way Air Flow

TCL AI Ultra-Inverter AC has horizontal and vertical louvres equipped with modulating motors ensuring 4 Way Air Flow to provide uniform cooling.

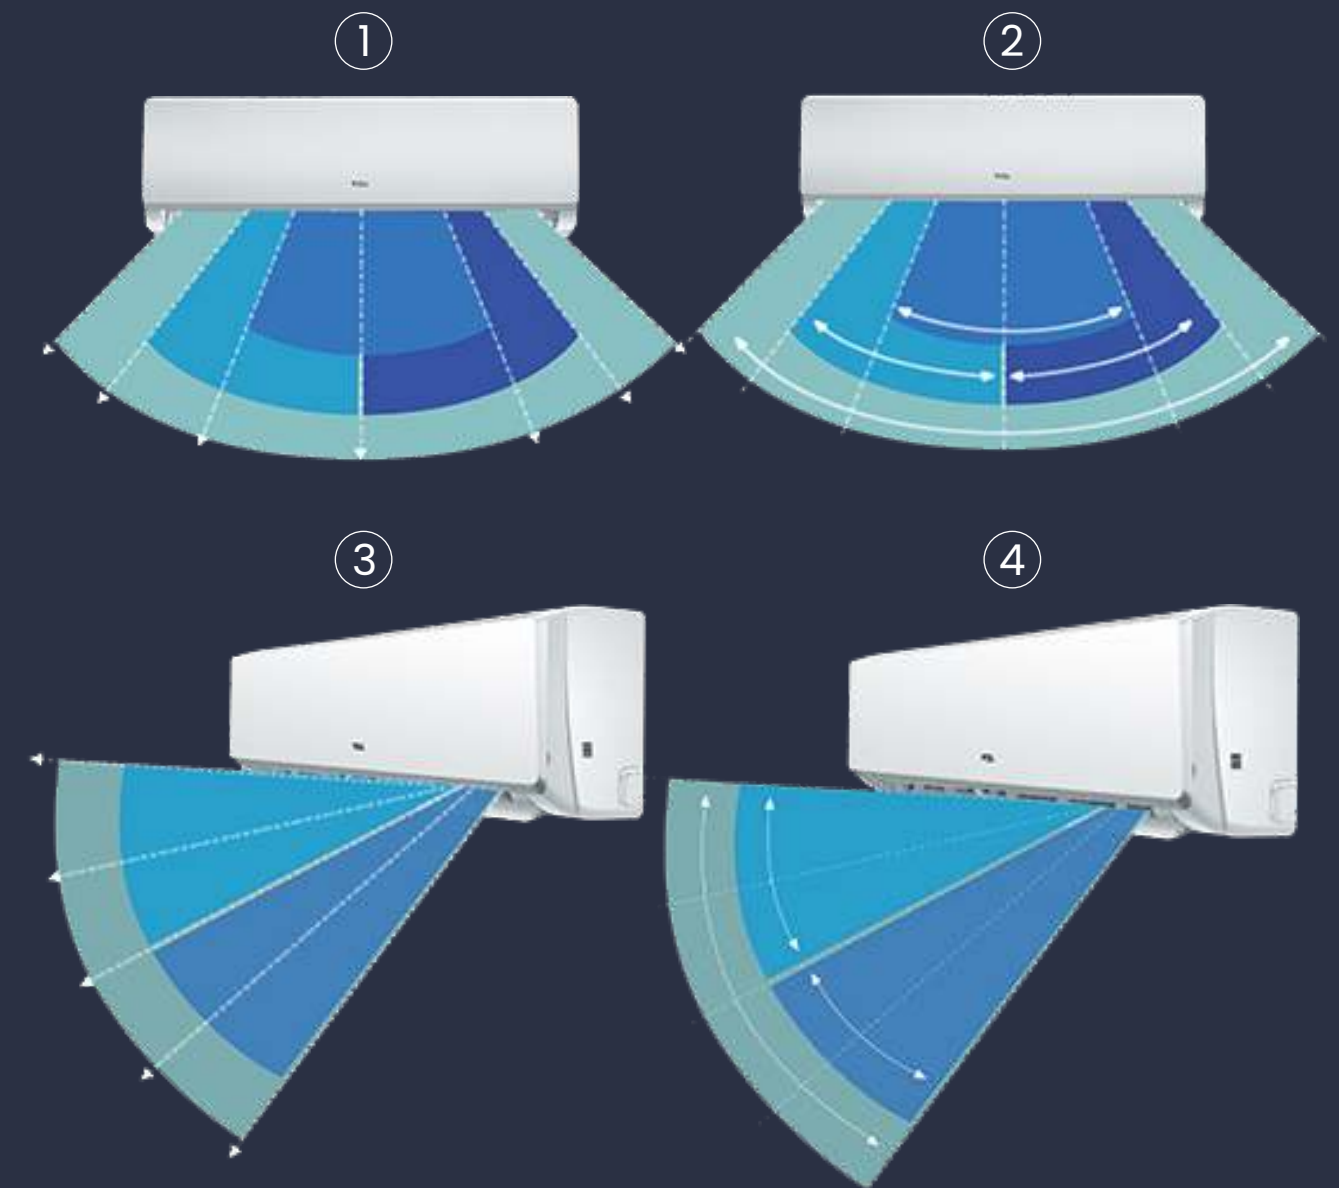

Vertical Louvre

The vertical louvre moves in left and right fashion with the help of modulating motors and distributes the air in entire width of the room.

Horizontal Louvre

The horizontal louvre moves in up and down fashion with the help of modulating motors and distributes the air in entire length of the room.

Therefore 4 Way Air Flow will help to distribute the air uniformly in the entire room and maintain equal cooling.

Safety First Design

TCL AI Ultra-Inverter AC has safety-centric build, with a fireproof control box and outdoor valve cover to ensure long-term performance.

Valve Cover

Sleep Mode

TCL AI Ultra-Inverter AC once activated with Sleep Mode runs at lower capacity, thereby maintaining a narrow temperature gap. Temperature slowly increases by 2° C during the period of operation ensuring performance tailored for sleep duration. This ensures energy-efficient performance through-out the night with a quiet, pleasant and undisturbed sleep.

Activation of Sleep Mode

- Step 1: Press Power button to turn ON.
- Step 2: Press Sleep button to set the desired number of hours.
- Step 3: Sleep Mode will operate the fan at low frequency.
- Step 4: Unit Switches OFF automatically after the set time.

Advantages

- Low frequency operation
- Energy-efficient
- Cost Saving
- Comfortable undisturbed sleep

Mute Mode

Press the mute mode button for hushed operation that ensures you concentrate on important things.

The TCL AC in Mute Mode works at less than 30 db which is less than the average desk fan noise.

Activation of Mute Mode

- Step 1: Press power button to turn ON the AC.
- Step 2: Press fan button until it shows the mute mode symbol.
- Step 3: Mute mode will operate the fan at low frequency.

I Feel

I Feel mode by TCL enables environmental temperature to be taken directly via a sensor built into the remote. Relax in more comfort, with high precision in-room temperature readings and air delivery.

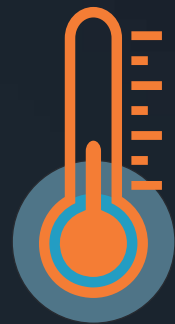

TCL AC has two temperature sensors

- Sensor in indoor unit
- Sensor in remote

On activation of the iFeel function, the sensor in the remote senses the temperature in the room where the remote is placed and sends the message to compressor, when to reduce its speed. Therefore providing the required cooling.

Advantages

- Accurate sensing of temperature in the room
- Providing the required cooling without wasting electricity

Self-Diagnosis

In case TCL AC malfunctions, an internal micro-controller automatically runs Self Diagnosis function, which displays the error code on the indoor unit and the user is able to identify the problem by referring to the user’s manual trouble shooting table and inform the problem

IDU display	Description
E0	IDU & ODU Communication failure
E1	IDU Room temperature sensor failure
E2	IDU Coil temperature sensor failure
E3	ODU Coil temperature sensor failure
E4	AC Cooling system abnormal (gas leakage)
E6	IDU PG Fan motor / DC fan motor works abnormal
E7	ODU Ambient Temperature sensor failure
E8	ODU Discharge Temperature sensor failure.
E9	IPM / Compressor driving control abnormal.
EA	The Current Test circuit failure
Eb	The Communication abnormal of Main PCB and Display board
EC	The Communication abnormal of ODU PCB modules
EE	ODU EEPROM failure.
EF	ODU DC fan motor failure
EU	ODU Voltage Test circuit abnormal.
P0	IPM module protection
P1	Over / under voltage protection
P2	Over current protection
P4	ODU Discharge pipe Overtemperature protection
P5	Subcooling protection on Cooling mode
P6	Overheating protection on Cooling mode
P7	Overheating protection on Heating mode
P8	Outdoor Overtemperature/Undertemperature protection
P9	Compressor driving protection (Load abnormal)
PA	Communication failure for TOP flow unit/ Preset mode coflict.

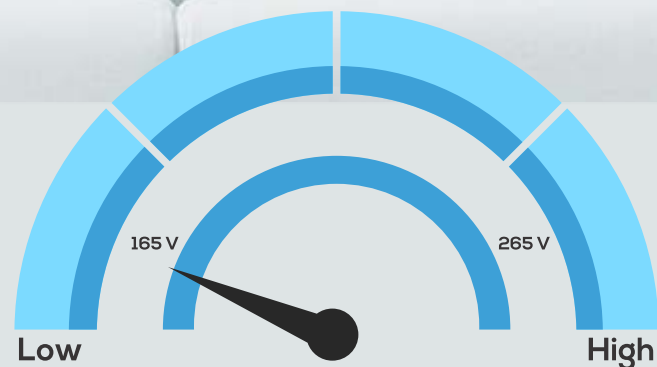

Stabilizer Free Operation

TCL AI Ultra-Inverter AC provides Stabilizer Free Operation by protecting its internal components even during voltage fluctuations and thereby providing seamlessly never-ending smooth operation. TCL Ac's provide non-stop operation guaranteed between the voltage fluctuation of 165 V-265 V.

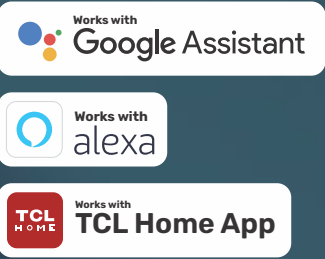

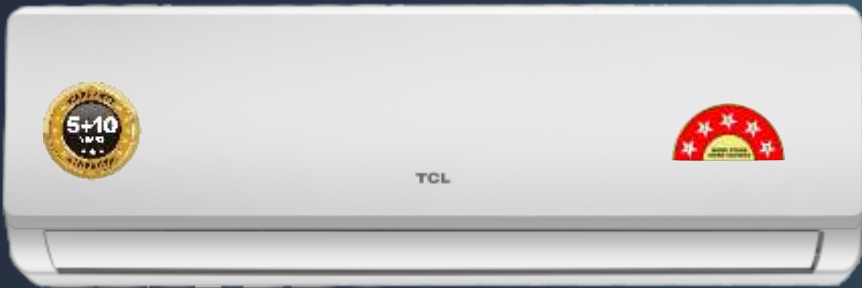

Advantages of Stabilizer Free Operation

- Internal components are safe from damage due to voltage fluctuations.
- Saves space.
- No extra cost involved.
- Economical in the long run.

TCL Happy Service

Customers are considered the first and most important for TCL and so is their satisfaction. Keeping this in mind TCL has designed its service plan along with its group of well-trained service personnel that will provide 100% satisfaction to its customers.

On-Demand Two Free Services

Just call us at our Toll-Free No. 1800-419-0622 for your TCL AC's free service. What's more! You can get two services absolutely free with the first 12 months from the date of purchase of your AC at your convenience.

On-the-Spot Solution

Our in-house call centre works 10am - 10pm (Monday to Sunday) to ensure prompt action on your requests given through the Help line Numbers. This also removes any third party involvement in the process and gives you direct access to our team of experts.

Nationwide Network

Our network covers almost every city in the country. You can also choose a service centre close to your place, by simply logging on to our website www.tcl.com

Product Warranty

1 year complete warranty on Turbo Air, Smart Air and iECO Air AC's under conditions mentioned in the warranty card, 5 Years on PCB for both Smart and iECO Air and 10 Years warranty on compressor. Extended Warranty options are available on TCL website.

Hassle-Free Installation

Just to make sure that your TCL AC delivers flawless performance for a long time, we recommend that you get it installed only by our Authorised TCL service centre.

Easy Registration and Tracking

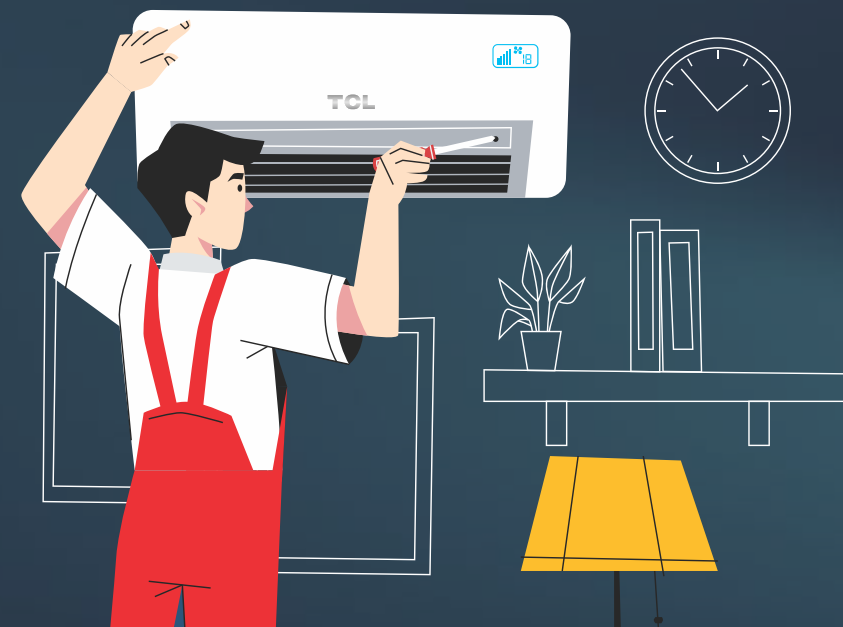

Our online registration and tracking facility makes it amazingly simple for you to register your complaints and then track them easily on www.tcl.com as well as through TCL Home App.

In-House Service Engineers

We have approximately 1400+ in-house service engineers who have expertise in all our products, which helps us in decreasing our overall response time and adds efficiency to our services.

Dedicated TCL Home Mobile App

Now register service request in less than 10 Seconds and enjoy the convenience of various other features with our dedicated TCL Home App.

Why choose TCL AC?

TCL AI Ultra-Inverter AC's has ample advantages over the other AC's. The below are the reasons why you need to buy TCL AC?

IoT Connection

TCL AC's come equipped with wifi connectivity module where AC can be connected with TCL Home App, TCL Smart TV, Google Assistant and Alexa Device. You can operate your TCL smart AC with each of these devices with voice control.

Up To 50% Energy Saving

TCL Ultra-Inverter compressor uses advanced algorithm to ensure that the set temperature is reached faster and reduces its frequency to ensure energy savings in a long run.

30 Sec Fast Cooling

TCL Compressor starts with high frequency and runs at maximum RPM to bring down the outlet temperature from 27°C to 18°C in 30 Seconds

Up to 60°C High Ambient Cooling

Advanced PCB cooling technology by TCL ensures strong cooling till 60°C ambient temperature.

Titan Gold Evaporator & Condenser

Titan Gold is patented coating technology on a high-efficiency heat exchanger that reduces the rate of corrosion of evaporator and condenser to enhance durability of air conditioner.

100% Copper Tubing

TCL provides 100% copper tubing to ensure easy reparability and increases the durability of the Air Conditioner.

3-in-1 Filtration Technology

Combination of Vitamin C Filter, Silver Ion Filter and Dust Filter results in cool, clean and ion rich air inside the room.

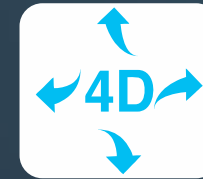

Stabilizer Free Operation

TCL AC's provides stabilizer free operation to provide protection from power fluctuations.

R32 Refrigerant

TCL AC's use R32 Refrigerant which has zero ODP and lower GWP compared to other refrigerants.

4 Way Air Flow

TCL AC's has horizontal and vertical louver equipped with modulating motor to ensure 4 Way Air Flow providing uniform cooling in the entire room

Why choose TCL AC?

Digital Temperature Display

TCL AC's provide Digital Temperature Display which ensures clear and intelligible temperature display.

Safety First Design

TCL AI Ultra-Inverter AC's has safety centric build with fireproof control box to ensure your safety from electric mishaps.

Advanced Remote Sensor With IFEEL Technology

I Feel mode provided by TCL AC's enables environmental temperature to be taken directly via a sensor built into remote ensuring high precision in sensing the room temperature.

10 Year Warranty On Compressor

With TCL 10 year compressor warranty you can be assured of machine durability for a longer period of time.

Self Diagnosis

TCL AC self diagnosis will feedback error code on the display for immediate diagnosis.

Valve Cover

TCL AC's provide valve cover in outdoor units which ensures protection for the piping connection.

50 Feet Air Flow

TCL AC's provide 50 feet air flow to ensure uniform cooling to the entire stretch of your room.

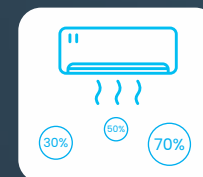

Sleep Mode

TCL AC's once activated with sleep mode runs at lower capacity maintaining a narrow temperature gap and ensures energy-efficient performance throughout the night.

Mute Mode

Press mute mode button by TCL AC's for a hushed operation which ensures you to concentrate on important things.

Gen Mode*

Gen Mode allows you to choose the capacity at which you want to run your Air Conditioner. Through remote control you can choose to control your AC at 30%, 50%, 70% or 100% of the maximum cooling capacity.

*Available in selected models only.
