

Axia 3

Proiectat pentru performanță,
conceput pentru experiența clientului

În designul conceptului nostru innovator, feedback-ul clientului a jucat un rol esențial în dezvoltarea Axia 3. Aceasta reprezintă mai mult decât un aparat de iluminat, este o platformă care oferă durabilitate, cost-eficiență și experiență pentru clienți, în timp ce sprijină platforme de orașe inteligente. Bazându-se pe experiența a sute de mii de aparate de iluminat Axia instalate în întreaga lume, acest capat de iluminat din a treia generație împinge granițele cu inovații fotometrice, ușurință și viteză în instalare și conectivitate FutureProof.

Disponibil în trei dimensiuni, Axia 3 permite orașelor să maximizeze eficiența atunci când iluminează numeroase tipuri de aplicații, de la trasee de biciclete, piețe și parcări la străzi rezidențiale, autostrăzi, drumuri urbane și bulevarduri mari.

Această gamă de aparate de iluminat ușoare și compacte combină iluminatul de calitate cu o amprentă minimă de carbon. Permite o instalare ușoară și întreținere fără griji, reducând costurile de operare.

Concept

Axia 3 este un aparat de iluminat robust și compact, proiectat cu accent pe miniaturizare și eficiență superioară. Compus din aluminiu turnat sub presiune, precum și materiale composite, Axia 3 este disponibil în trei dimensiuni. Datorită greutății reduse, acest aparat de iluminat este ușor de manevrat în timpul instalării.

Axia 3.1, poate fi echipat cu până la 16 LED-uri, se potrivește perfect aplicațiilor cu înălțime redusă, în timp ce Axia 3.2 și Axia 3.3, cu până la 32 sau 64 de LED-uri, sunt ideale pentru iluminarea drumurilor largi, a autostrăzilor și a bulevardelor.

Gama Axia 3 este echipată cu motoare fotometrice ProFlex™, oferind cea mai mare eficiență datorită capacitatei lor de a maximiza fluxul luminos emis și de a furniza distribuții luminoase foarte extinse.

Axia 3 este livrat cu cablu de alimentare, deci nu este nevoie să fie deschis pentru montaj. Gama completă este disponibilă cu o piesă de fixare universală integrată, adaptată pentru montaj în vârf de stâlp și montaj pe braț pentru diferite diametre (Ø32mm cu adaptor, Ø42-48mm, Ø60mm și Ø76mm). Unghiul de înclinare poate fi ajustat la fața locului atât pentru configurațiile de montaj în vârf de stâlp (-5 ° / +15 °) cât și pentru montaj pe brat lateral (-10 ° / +10 °), ceea ce permite optimizarea distribuțiilor luminoase, reducerea consumului de energie și controlul poluării luminoase.

Acest aparat de iluminat extrem de eficient, pregătit pentru interconectare, oferă comunităților locale soluția ideală pentru a îmbunătăți nivelurile de iluminare, pentru a genera economii de energie, a spori siguranța și a reduce amprenta ecologică. Axia 3 este instrumentul ideal pentru a oferi încă 25 de ani de eficiență, sustenabilitate și siguranță.

Tipuri de aplicații

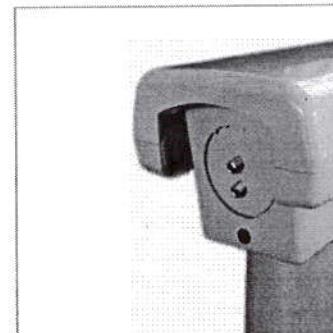

- DRUMURI ȘI AUTOSTRĂZI
- STRĂZI URBANE ȘI REZIDENTIALE
- PISTE DE BICICLETE ȘI PIETONALE
- PIEȚE ȘI ZONE PIETONALE
- PARCĂRI AUTO
- PODURI
- ZONE EXTINSE
- STAȚII DE TRAMVAI ȘI METROURI

Avantaje Cheie

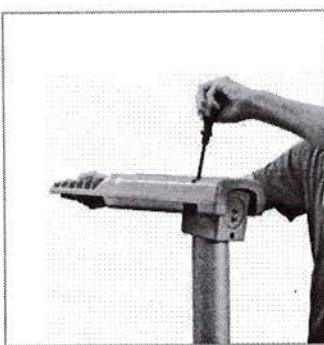

- Maximizează economiile de energie și de costuri de întreținere
- Motoare fotometrice ProFlex™, care oferă un iluminat de calitate, confort și siguranță ridicat
- 3 dimensiuni pentru a oferi soluția necesară pentru numeroase aplicații rutiere și urbane
- Instalare ușoară: pre-cablat și echipat cu piesă de fixare universală, adaptată pentru montare laterală și în vârf de stâlp
- Înclinare reglabilă, pentru distribuții luminoase și uniformități optime
- Pregătit pentru interconectare

Motorul fotometric ProFlex™ oferă eficiență maximă.

Gama Axia 3 are o piesă de fixare universală pentru ștuțuri de la Ø32 la Ø76mm.

Înclinarea este reglabilă la fața locului, pentru a optimiza distribuția fotometrică și pentru a obține economii suplimentare de energie.

Axia 3 este pregătit pentru interconectare și poate funcționa cu diferiți senzori și sisteme de control.

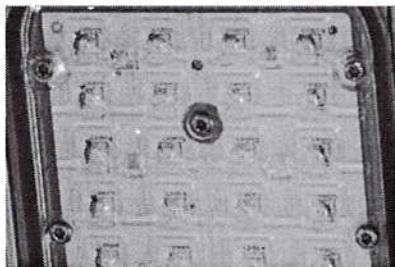

C.Dh.

ProFlex™

Motorul fotometric ProFlex™ integrează lentilele într-un protector din policarbonat. Această integrare maximizează fluxul luminos emis de aparatul de iluminat și reduce reflexia din interiorul unității optice. Policarbonatul utilizat pentru motorul fotometric ProFlex™ oferă caracteristici esențiale, cum ar fi o claritate optică ridicată pentru o transmisie superioară a luminii, o rezistență mai bună la impact în comparație cu sticla și o durată lungă de viață, datorită tratamentului de stabilizare UV. Conceptul ProFlex™ permite un design compact, cu un compartiment optic subțire. Oferă astfel distribuții luminoase extinse, astfel încât distanța dintre aparatelor de iluminat poate fi mărită.

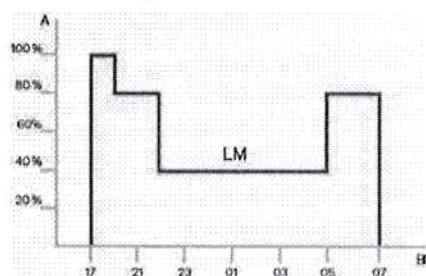

Profil personalizat pentru reducerea fluxului luminos

Balasturile electronice inteligente pot fi programate din fabrică, cu profiliuri complexe de reducere a fluxului luminos. Sunt posibile până la 5 combinații între perioadele de timp și nivelurile de intensitate luminoasă dorite. Această funcționalitate nu necesită legături electrice suplimentare.

Intervalul de timp dintre momentul de pornire și cel de oprire este folosit pentru activarea profilului presetat. Sistemul personalizat de reducere a fluxului generează economii de energie suplimentare, respectând nivelurile de iluminat și uniformitatea iluminatului, pentru toată perioada nopții.

A. Performanță | B. Timp

Senzor PIR: detectia mișcării

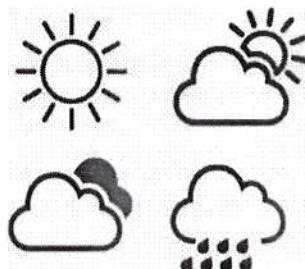

În zonele cu activitate nocturnă scăzută, fluxul luminos poate fi redus la minimum, în cea mai mare parte a nopții. Prin utilizarea unui senzor PIR, nivelul de iluminare poate fi crescut de îndată ce în zonă se detectează un pieton sau un vehicul lent. Cantitatea de flux luminos emis de fiecare aparat de iluminat poate fi configurată individual, în funcție de mai mulți parametri, precum: flux luminos minim sau maxim, interval de reacție, durată de timp de menținere pentru stările minim, maxim pornit sau opri. Senzorii PIR pot fi folosiți într-o rețea autonomă sau interoperabilă.

Fotocelula / senzor de lumină naturală

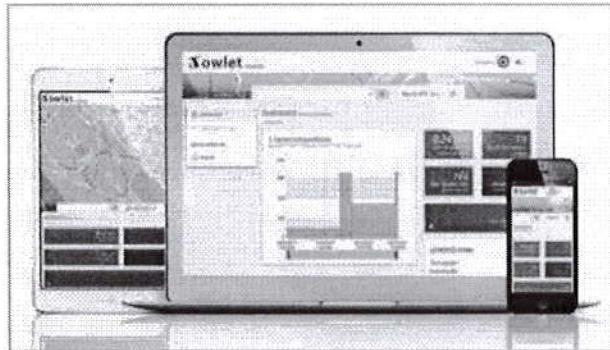

Fotocelula (sau senzorul de lumină naturală) pornește aparatul de iluminat, de îndată ce iluminatul natural scade sub un anumit nivel.

Aceasta poate fi programată să pornească pe timpul unei furtuni, în zilele înnorate (în zone de importanță ridicată) sau doar pe timpul nopții, astfel încât iluminatul să ofere siguranță și confort în spațiile publice.

Owlet IoT

Owlet IoT controlează de la distanță aparatelor de iluminat din rețea, facilitând sporirea eficienței, obținerea de date în timp real și economii de energie de până la 85%.

TOTUL ÎNTR-UN SINGUR DISPOZITIV

Dispozitivul de control LUCO P7 CM dispune de cele mai avansate funcții pentru administrarea rețelei. De asemenea, include o fotocelulă și funcționează cu ajutorul unui ceas astronomic, pentru adaptarea sezonieră a profilului de reducere a fluxului luminos.

UȘOR DE INSTALAT

Datorită comunicării fără fir (wireless), nu sunt necesare legături electrice suplimentare. Deasemenea, nu există constrângeri sau limitări în legătură cu rețeaua de alimentare. Astfel, sistemul de iluminat interconectat poate fi extins oricând, fără restricții, de la o singură unitate de control și până la o rețea extrem de complexă.

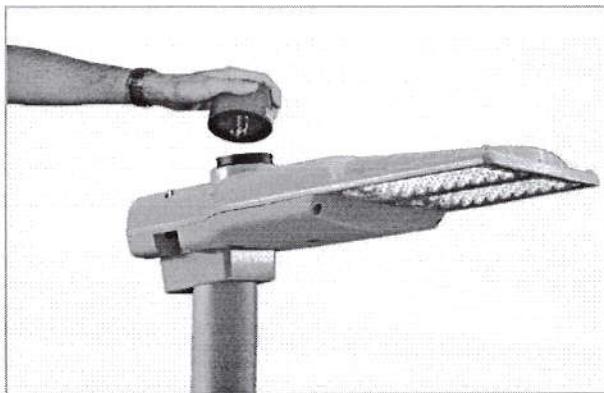

Pentru că dispune de funcții de geolocalizare în timp real și de detectare automată a tipului și funcțiilor aparatului de iluminat pe care se montează, autoconfigurarea modulului de control se face rapid și ușor.

INTERFAȚĂ PRIETENOASĂ

De îndată ce un dispozitiv de control este instalat pe aparatul de iluminat, coordonatele GPS ale aparatului apar în interfața utilizator a aplicației, pe o hartă online, în mod automat. Un panou de bord ușor de utilizat permite fiecărui utilizator să-și organizeze și să-și personalizeze ferestrele de lucru, statisticile și rapoartele. Utilizatorii pot accesa informații relevante, în timp real.

Aplicația online Owlet IoT poate fi accesată în orice moment, din orice locație de pe mapamond, printr-un dispozitiv care permite navigarea web, conectat la Internet. Aplicația se adaptează la acesta, oferind o experiență intuitivă și prietenoasă pentru utilizatori.

Notificările în timp real pot fi pre-programate, astfel încât să monitorizeze cele mai importante elemente ale sistemului de iluminat.

SIGUR

Sistemul Owlet IoT utilizează la nivel local o rețea de comunicații fără fir de tip plasă (meshnet), pentru a obține o reacție instantanee a aparatelor de iluminat, in-situ, la senzori integrati în sistem. Acest nivel de comunicație este combinat cu un sistem de control de la distanță, care se folosește de cloud, pentru a asigura transferul de date spre și dinspre sistemul central de management.

Sistemul utilizează comunicări criptate IPV6 pentru a proteja transmisia de date în ambele direcții. Folosind un APN securizat, Owlet IoT asigură un nivel ridicat de protecție.

În cazul excepțional al unei erori de comunicație, ceasul astronomic integrat și fotocelula vor controla pornirea și de oprire a aparatelor de iluminat, iar profilul de funcționare stocat la nivel local va fi urmat, evitându-se, astfel, funcționarea defectuoasă, pe timpul nopții.

EFICIENT

Datorită senzorilor și/ sau a programărilor efectuate în avans, scenariile de iluminat pot fi adaptate cu ușurință, în funcție de evenimentele desfășurate în zonă, oferind, astfel, nivelurile de iluminat necesare, în momentul potrivit și în locul potrivit.

Contorul de energie integrat oferă cel mai înalt grad de acuratețe disponibil pe piață în acest moment, ajutând la luarea de decizii bazate pe cifre reale.

Răspunsul precis, în timp real, precum și rapoartele clare, asigură funcționarea eficientă a rețelei și optimizarea operațiunilor de întreținere.

La pornirea aparatelor de iluminat cu LED-uri, curentul de pornire absorbit de acestea poate cauza evenimente în rețeaua electrică. Owlet IoT încorporează o tehnologie care protejează rețeaua de acești curenti de pornire.

DESCHIS

Dispozitivul de control LUCO P7 CM poate fi montat prin intermediul unui conector standard tip NEMA 7 pini și controlează aparatul de iluminat prin protocol DALI sau prin protocol 1-10V.

Owlet IoT are la bază protocolul IPv6. Această metodă de adresare a dispozitivelor poate genera un număr impresionant de combinații unice, pentru a conecta la internet sau la o rețea de calculatoare diverse echipamente.

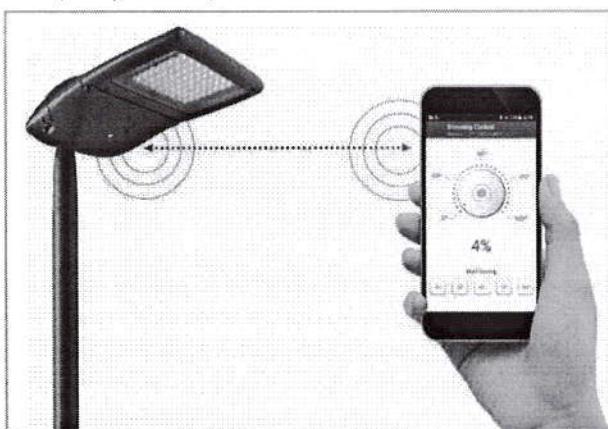

Folosindu-se de API-uri deschise, Owlet IoT poate fi integrat într-o manieră simplă, în sisteme de management globale, existente sau viitoare.

Soluția Schréder Bluetooth este compusă din 3 componente principale:

Un emițător Bluetooth conectat la driverul modular al aparatului de iluminat (transmițător BLE)

- O antenă Bluetooth montată pe aparatul de iluminat
- O aplicație smartphone numită Sirius BLE

Ușor de folosit

Soluția Bluetooth de la Schréder este ideală pentru configurația individuală, in situ, a aparatelor de iluminat care utilizează Bluetooth. De la sol, utilizatorul poate să pornească sau să oprească aparatul de iluminat, să adapteze curba de reducere fluxului luminos, să citească datele de diagnoză și multe altele. O aplicație ușor de utilizat, numită Sirius BLE, oferă un acces facil și sigur la funcțiile de control și configurație.

Indiferent dacă trebuie gestionată o rețea de iluminat într-o zonă urbană sau într-o zonă rezidențială, această soluție permite controlul facil al aparatelor de iluminat, din vecinătatea stâlpilor pe care sunt montate, fără a urca la acestea.

Împerechere rapidă și ușoară

Descărcați aplicația Sirius de la Schréder. Accesați meniul. Apăsați butonul "SCAN DEVICE (START)" pentru a căuta modulele BLE din jur. Ele vor fi afișate cu un grafic de bare (intensitatea semnalului) pentru a indica cel mai apropiat și cel mai îndepărtat modul la care vă puteți conecta din locația respectivă.

Apăsați pe pictograma aferentă dispozitivului la care doriti să vă conectați și introduceți cheia de acces personal pentru a controla aparatul de iluminat.

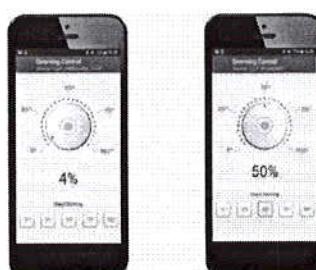

Definirea setărilor

Odată ce sunteți conectat la un aparat de iluminat, puteți ajusta diferiți parametri, cum ar fi curentul maxim de ieșire, nivelul minim de reducere fluxului luminos și profilul personalizat pentru reducerea fluxului luminos pentru anumite intervale de timp.

Control manual de reducere a fluxului luminos

Aplicația vă permite să efectuați o suprascrisere manuală pentru a adapta instantaneu nivelurile de reducere al fluxului luminos. Este suficient să atingeți butonul "Dimming" din meniul principal și să reglați nivelul dorit folosind discul de control și butonul aferent. Pot fi utilizate imediat și niveluri deja predefinite. Valoarea corespunzătoare este afișată pe discul de control. Acest lucru vă permite să testați funcționalitățile de pornire/oprire și de reducere a fluxului luminos ale aparatului de iluminat împerecheat cu telefonul.

Diagnostic la fața locului

Atunci când un aparat de iluminat este împerecheat cu telefonul mobil, puteți accesa diverse informații de diagnoză: numărul total de porniri, timpul de funcționare al modulului LED și al balastului, consumul de energie total al driverului... etc. Puteți, de asemenea, să vizualizați evenimentele apărute în timpul funcționării (scurtcircuit, acționare protecție termică, supratensiuni, etc). Valorile afișate se pot referi la starea curentă sau pot fi valori cumulate până la momentul interogării.

INFORMAȚII GENERALE

Înălțime de instalare recomandată	4m până la 12m
Balast electronic inclus	Da
Marcă CE	Da
Certificat ENEC	Da
Conformitate ROHS	Da
Standard de testare	LM 79-08 (toate măsurările s-au efectuat în laborator acreditat ISO17025)

CARCASA SI FINISAJE

Carcasa	Aluminiu
Optic	Policarbonat stabilizat UV
Difuzor	Policarbonat (cu lentile integrate)
Finisaje carcăsă	Vopsit în câmp electrostatic
Culori Standard	RAL 9005 Jet black RAL 7040 light grey
Grad de etanșeitate	IP 66
Rezistență la impact	IK 10
Test vibratii	Conform cu standardul modificat IEC 68-2-6 (0.5G)

CONDIȚII DE FUNCȚIONARE

Temperaturi de funcționare (Ta)	-35 °C pana la +45 °C
---------------------------------	-----------------------

• În funcție de configurația aparatului de iluminat. Pentru mai multe detalii, vă rugăm să ne contactați.

INFORMAȚII ELECTRICE

Clasa Electrică	Clasa I EU
Tensiune nominală	220-240V – 50-60Hz
Factor de putere (la putere maximă)	0.9
Protectie la supratensiuni (kV)	10
Compatibilitate electromagnetică (EMC)	EN 55015 / EN 61000-3-2 / EN 61000-4-5 / EN 61547
Protocol de control	Bluetooth, DALI
Opțiuni control	Reducere personalizată a fluxului luminos, fotocelulă sau control de la distanță
Opțiuni priza(e)	Conector de joasă tensiune (optional) NEMA 3-pin (optional) NEMA 6-pin (optional) NEMA 7-pin (optional)
Sisteme de control asociate	Sirius BLE Owlet IoT
Senzor	PIR (optional)

UNITATE OPTICĂ

Temperatură de culoare LED-uri	3000K (Alb Cald) 4000K (Alb Neutru)
Indice de redare a culorilor (CRI)	>70 (Alb Cald) >70 (Alb Neutru)
Indice de emisie luminoasă în emisfera superioară (ULOR)	0%

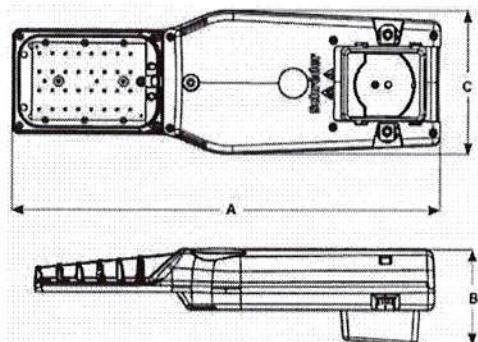

DURATA DE VIAȚĂ A LEDURILOR @TQ25°C

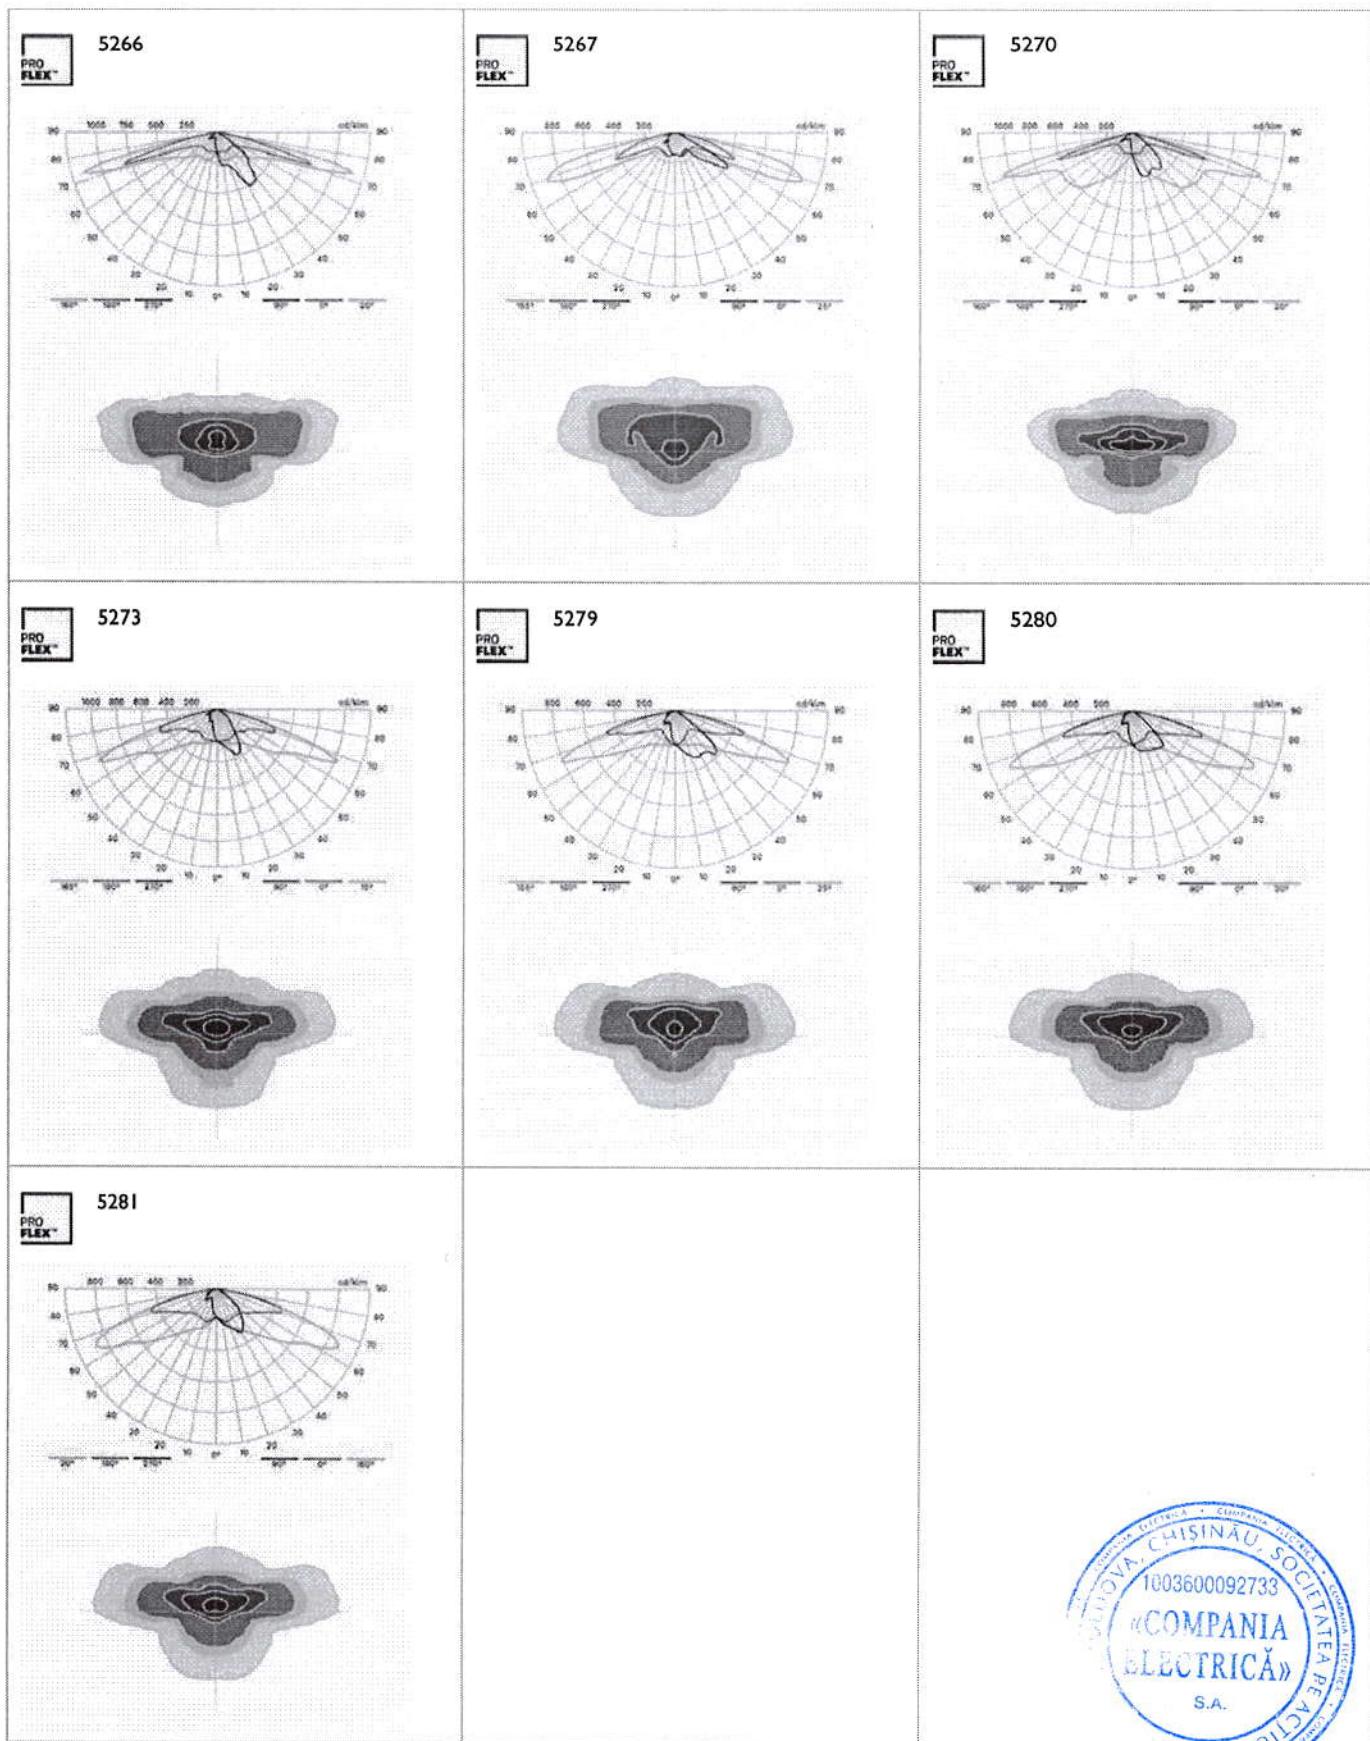

Toate configurațiile 100,000h - L90

Supplementary information:
¹⁾ Provided evidence ensures the agreed level of compliance. See OD-CB2039.
The codes above have the following meaning:
A - The component is replaceable with another one, also certified, with equivalent characteristics
B - The component is replaceable if authorised by the test house
C - Integrated component tested together with the appliance
D - Alternative component

FORM L-54 Edition 01 – Revision 00 - Date: 14/06/2018

Electrical measurements

General information

Subject : AXIA 3.3 - 64 LEDs Osram 165W driver

Asked by : THIJS Marcel

Created on : 11/12/2018

Validated on : 15/01/2019

Test number : D180888

Sample(s) : E180688

Folder : P-F18067

Test conditions

Luminaire : AXIA 3.3

Operator : MESPOUILLE Loic

Number of LED : 64

LED : Osram OSLON SQUARE GIANT

Driver : Optotronic OT165/170-240/1A0 4DIM LT2 E / 00-14-563

Driver current (mA) : 880

SPD : Vossloh Lighting Solutions SPC3 230/10 K

Measurements devices :

Fluke Norma 4000 - HF Powermeter - (E110) : Electrical measurements

Power supply :

APT 300XAC AC power supply (E113)

Supply voltages: 230 V 50 Hz

Conclusion

Informative

PF : 0,99

Efficiency : 93,0%

THD : 6,3%

OK according to IEC 61000-3-2, Class C, > 25 W

Validated by :

GHYSENS Gilles

EMC test

General information

Subject : AXIA 3.3 - 64 led's Xi FP 165 W driver class I

Asked by : THIJS Marcel

Created on : 14/05/2019

Test number : D190382

Reference norm : EN 55015 - EN 61547 + IEC 61000-3-2

Standards

Sample(s) : E180686

Folder : P-F18067

Test conditions

Luminaire : AXIA 3.3

Operator : External Lab

Description :

64 led's

Electrical class : Class I EU

Driver : Xitanium FP 165W 0.3-1.0A SNLDAE 230V C170 sXt / 00-25-842

Current setting (mA) : 880

Dimming protocol : DALI

Oversupply protection : VS Lighting Solutions SPC3

Testing facility : External - EMC-ULg

External test report reference : 190507/1455/AAAN0500A

Conclusion

Success

AXIA 3.3 - 64 led's class I with Philips 165 W driver complies with EN 55015 & EN 61547 Standards.

Features

Engineered for performance, designed for the customer experience

- Maximised savings in energy and maintenance costs
- ProFlex™ photometric engines offering high efficiency lighting, comfort and safety
- 3 sizes to provide the most accurate solutions for numerous road and urban applications
- Easy installation: pre-cabled and equipped with universal fixation adapted for side-entry and post-top mounting
- Adjustable inclination for optimised photometry and uniformity
- Connected-ready

Types of application

- Square and park
- Bridge
- Park
- Large area
- Roundabout
- Car park
- Road and highway
- Residential road
- Bike path
- Urban road

Summary

Axia 3 is a robust yet compact luminaire, designed with a focus on miniaturisation and superior efficiency. Composed of high-pressure die-cast aluminium, as well as composite materials, Axia 3 is available in three sizes. Thanks to its reduced weight, this road luminaire is easy to handle during installation. The Axia 3.1, which can be fitted with up to 16 LEDs, is perfectly suited to low-height applications, whereas Axia 3.2 and 3.3, with up to 32 or 64 LEDs, are ideal for lighting urban and large roads, carriageways and avenues. The Axia 3 range is equipped with ProFlex™ photometric engines, providing the highest efficiency thanks to their ability to maximise the lumen output and to provide very extensive light distributions.

Axia 3 comes pre-cabled, hence there is no need to open the luminaire. The complete range is available with an integrated universal fixation part adapted for post-top and side-entry mounting on various spigots (Ø32mm with adapter, Ø42-48mm, Ø60mm and Ø76mm). The inclination angle can be adjusted on-site for both post-top (-5°/+15°) and side-entry (-10°/+10°) configurations to optimise lighting, reduce power consumption and control light pollution.

This highly efficient, cost-effective and connected-ready luminaire, offers towns and cities the ideal solution to improve lighting levels, increase safety, generate energy savings and reduce their ecological footprint. Axia 3 is the ideal tool to provide another 25 years of efficiency, sustainability and safety.

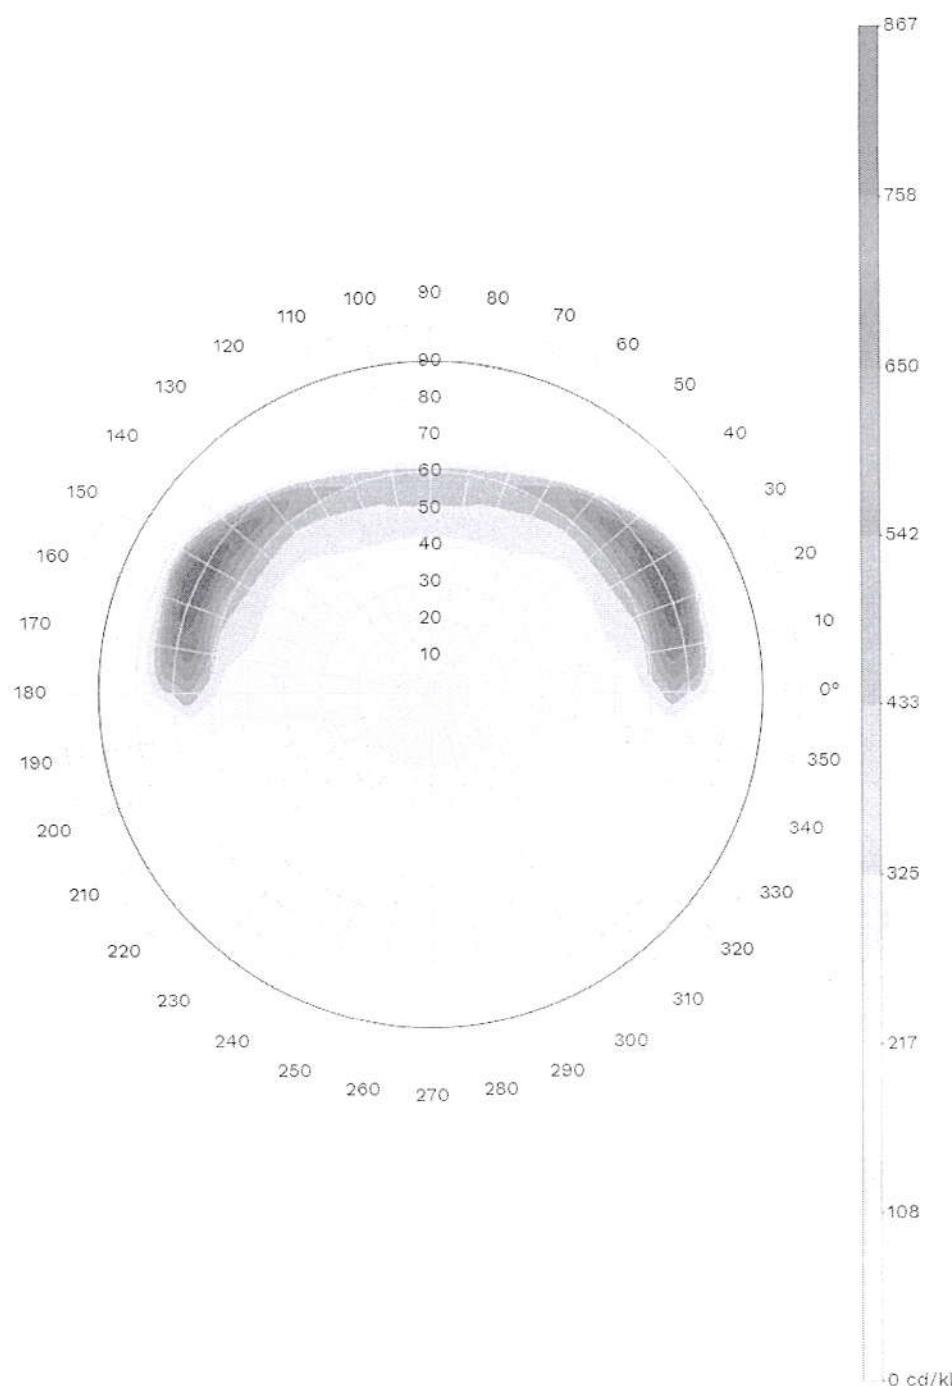

A handwritten signature in blue ink, appearing to read "Oleg" or a similar name, is written across the bottom right of the stamp.

SAFETY INSTRUCTIONS The light source contained in this luminaire shall only be replaced by the manufacturer or his service agent or a similar qualified person.	ISTRUZIONI DI SICUREZZA La sorgente di luce contenuta in questo sistema di illuminazione dovrà essere sostituita solo dal produttore, dal suo agente di servizio o da una persona con qualifica simile.	VEILIGHEIDSINSTRUCTIES De lichtbron in deze armatuur dient uitsluitend door de fabrikant, diens onderhoudsvergunninghouder of een persoon met vergelijkbare kwalificaties te worden vervangen.	BEZTONSÁGI ÜTMUTATÓ A lámpatestben található fényforrást kizárolag a gyártó, szervizképviselője vagy hivatalos szakszerviz szakembere cserélheti ki.	
Always switch off the power prior to installation, maintenance or repair activities.	Staccare sempre il filo della corrente prima di iniziare operazioni di installazione, manutenzione o riparazione.	Schakel altijd de stroom uit voordat u aan installatie, onderhoud of reparaties begint.	A szereles karbantartás és javítás előtt minden esetben végezzen áramtalansítást.	
RISK GROUP 2 – CAUTION! Hazardous optical radiation may be emitted from this product. Do not stare at the luminaire when operating as it may be harmful to the eyes. The luminaire should be positioned so that prolonged staring at the luminaire at a distance of less than 0.44m is not expected.	GRUPPO DI RISCHIO 2 – ATTENZIONE! Questo prodotto può emettere radiazioni ottiche pericolose. Non fissare la sorgente accesa. Potrebbe essere dannoso per gli occhi. L'operazione dovrebbe essere posizionata in modo da non permettere di fissare a lungo l'apparecchio a una distanza inferiore di 0,44m.	RISICOGROEP 2 - LET OP! Bij dit product kan eventueel gevaarlijke optische straling voorkomen. Staat niet in de brandende lamp. Dit kan schadelijk zijn voor de ogen. Het apparaat moet worden geplaatst zodat staaren in het apparaat op een afstand kleiner dan 0,44meter niet verwacht wordt.	KOCKÁZATI CSOPORT 2 - VIGYÁZAT! A berendezés veszélyes optikai sugárzást bocsát ki. Ne nézzen bele a bekapcsolt lámpatestbe! Szemét károsító hatás lephet fel. A lámpatestet úgy állítsa el pozícióban, hogy rálátás esetén a lámpatest ne legyen 0,44m-nél közelébb!	
ENG	ITA	NLD	HUN	
In case of PVC insulated mains cable, the installer MUST ensure that the WHOLE cable is protected against climatic conditions, especially UV rays and rain, by making sure that the cable is contained inside the luminaire and pole.	In caso di cavo di alimentazione isolato in PVC, l'installatore DEVE garantire che il TUTTO cavo sia protetto dalle condizioni climatiche, particolarmente dai raggi UV e dalla pioggia, assicurandosi che il cavo sia contenuto all'interno del corpo illuminante e del palo.	In het geval van PVC-geïsoleerde voedingskabels MOET de installateur ervoor zorgen dat de GEHELE kabel wordt beschermd tegen klimaatomstandigheden, met name UV-stralen en regen; door ervoor te zorgen dat de kabel zich in het apparaat en de paal bevindt.	PVC szigetelével ellátott táplálébel esetén a telepítőnek biztosítania kell, hogy a TELJES kábel védelmet legyen az eghajlati viszonyoktól, különösen az UV sugárzástól és az esőtől, ügyelve arra, hogy a kábel a lámpatest és az oszlop belsőjében legyen.	
Y-connection: In case of damage to the wire, it has to be replaced only by the manufacturer, distributor or by an expert, to avoid risks.	Collegamento Y: In caso di danneggiamento, il cavo deve essere sostituito esclusivamente dal costruttore, dal distributore o da un tecnico esperto per evitare rischi.	V-verbinding: in geval van schade aan de draad dient deze te worden vervangen door de fabrikant, de distributeur of door een expert, om risico's te vermijden.	Y-csatlakozó: A sérült vezetéket kizárolag a gyártó, forgalmazó vagy szakember cserélheti ki a kockázatok elkerülése végett.	
SICHERHEITSHINWEISE Die Leuchte in dieser Leuchte darf nur vom Hersteller bzw. von dessen Kundendienst oder einer ähnlich qualifizierten Person ausgetauscht werden.	INSTRUKCJA BEZPIECZEŃSTWA Prodzień rozwój, zamontowana w tej oprawie może być wymieniana wyłącznie przez producenta, pracownika serwisu lub inną wykwalifikowaną osobę.	ИНСТРУКЦИЯ БЕЗОПАСНОСТИ Замена источника света для этого светильника должна выполняться только при водитель, сервисный агент производителя или специалист с аналогичной квалификацией.	ІНСТРУКЦІЯ БЕЗПЕКИ Докеро світла, що міститься у цьому світильнику, повинна замінити лише виробник, його сервісний агент чи кваліфікована особа.	
Schalten Sie die Stromversorgung vor Installations-, Wartungs- und Reparaturarbeiten stets ab.	Przed rozpoczęciem instalacji, konserwacji lub naprawy należy bezwzględnie odłączyć zasilanie elektryczne.	Перед проведением установки, сервисного обслуживания или ремонта всегда отключите питание электроустановки.	Завжди вимкніть живлення перед встановленням, доглядом чи ремонтом.	
RISIKOGROEP 2 – VORSICHT! Von diesem Produkt kann möglicherweise gefährliche optische Strahlung ausgehen. Es ist darauf zu achten, dass man im eingeschalteten Zustand die Leuchte nicht innerhalb einer Distanz von 0,44m direkt in die Leuchte schaut. Dies könnte schädlich für Ihre Augen sein.	GRUPPA RYZYKA 2 – OSTRZEŻENIE! Produkt może emitować niebezpieczną strzelą optyczną podczas użycia. W przypadku zainicjowania strzelą optyczną skierującą się do oczu. Nie należy patrzeć bezpośrednio na placzące źródło światła. Oprawa powinna być tak zamontowana, aby jej długotrwała obserwacja była możliwa z odległości nie mniejszej niż 0,44m.	ГРУППА РИСКА 2 - ВНИМАНИЕ! Возможна опасная оптическая излучение от этого изделия. Не смотрите на источник света. Может быть временно для глаз. Светильник должна быть расположена таким образом, чтобы было невозможно смотреть на него с расстояния менее 0,44м.	ГРУПА РИЗИКУ 2 – УВАГА! Можливість надзвичайної оптическої видомінливості від цього проекту. Уникніте пряму зору від джерела світла. Може бути задріз для очей. Світильник має бути розташовано так, щоб учаснику його приватного споглядання зі відстані більше, ніж 0,44м.	
Bei Verwendung eines PVC-isolierten Netzkabels MUSS der Installateur sicherstellen, dass der gesamte Kabel von klimatischen Bedingungen -Infrarotstrahlen, UV-Strahlen und Regen- geschützt ist. Indem sichergestellt wird, dass das Kabel in der Leuchte und dem Mast verschlossen ist.	W przypadku kabla sieciowego izolowanego PCV instalator MUΣI upewnić się, że kabel CALY jest chroniony przed warunkami klimatycznymi, w szczególności przed promieniowaniem UV i dziesięciem, upewniając się, że kabel znajduje się we wszystkich oprawach i stupa.	При передаче сигнала питания с ПВХ изоляцией, монтажник ДОЛЖЕН обеспечить защиту ВСЕГО кабеля от воздействия климатических условий, особенно от ультрафиолетовых лучей и дождя, убедившись, что кабель находится внутри светильника.	Випадку кабелю живлення зі ПВХ ізоляцією, монтажник ПОВИНЕН забезпечити захист ВСІХ кабелів від впливів кліматичних умов, особливо від ультрафіолетових лучів та дощу, перевіривши, що кабель знаходиться всередині світильника та опора.	
Y-Verbindung: Falls die Leitung beschädigt ist, darf diese nur vom Hersteller, dem Händler oder einem Experten ersetzt werden, um Risiken zu vermeiden.	Polaczonie Y — Y węzłów ochrony bezpieczeństwa uszkodzony przewód powinien zostać wymieniony wyłącznie przez producenta, dystrybutora lub wykwalifikowanego elektryka.	Подключение Y — в случае повреждения кабеля его замена производится только производителем, дистрибутором или инженером.	У підключені Y, в разі пошкодження дроту його має замінити лише виробник, дистрибутор чи експерт, щоб запобігти ризику.	
INSTRUCTIONS DE SECURITE La source lumineuse contenue dans ce luminaire doit être uniquement remplacée par le fabricant, son agent de maintenance ou une autre personne disposant des qualifications appropriées.	INSTRUCCIONES DE SEGURIDAD Salvo el fabricante, un agente del servicio técnico o persona con cualificación similar puede sustituir la fuente de luz de este sistema de iluminación.	INSTRUÇÕES DE SEGURANÇA A fonte de luz no interior desta candeeiro deve ser substituída apenas pelo seu técnico de assistência ou por uma pessoa com qualificação equivalente.	PUTUFSTVA Izvor svetla u ovom rasvetnom telu može da zamjeni samo proizvođač, njegov servisni agent ili na slijep način kvalifikovana osoba.	
Mettez toujours l'appareil hors tension avant toute opération d'installation, d'entretien ou de réparation.	Apague siempre el interruptor de alimentación antes de realizar tareas de instalación, mantenimiento ni reparación.	Desligue sempre a alimentação antes de proceder a actividades de instalação, manutenção ou reparação.	Uvodjaci napajanje pre instalacija, održavanja ili popravke.	
RISQUE GROUPE 2 – ATTENTION! Ce produit émet potentiellement des rayons dangereux pour la vue. Regarder directement la source lumineuse et de manière continue pourrait causer des lésions aux yeux. Le luminaire doit être installé de façon à ne pas pouvoir regarder la source lumineuse directement de manière continue à moins de 0,44m.	GRUPO DE RISCO 2 – PRECUCIÓN! Puede haber radiación óptica posiblemente peligrosa emitida por este producto. No mire a la lámpara en funcionamiento. Puede ser perjudicial para los ojos. El sistema de iluminación debe instalarse de modo que la mirada fija prolongada a la luminaire, a una distancia menor de 0,44m no se espere.	GRUPO DE RISCO 2 – ATENÇÃO! Posível risco óptico por radiação emitida a partir deste produto. Não olhar para a lámpa em funcionamento. Pode ser prejudicial para os olhos. A luminaire deve ser posicionada de modo a que não seja expectável um olhar prolongado para a luminaire em funcionamento a uma distância inferior a 0,44m.	GRUPA RYZYKA 2 – PAŹNIJAJ! Produkt może emmittare istotno optyczko zrażenie. Izбегавати визуелни контакт са светлинским извором dok je radi. Moguće ošteteње vida. Svetiljku treba pozicionirati tako da se ne očekuje duži vizuelni kontakt sa izvorom sa razdaljinje manje od 0,44m.	
Dans le cas d'un câble secteur isolé en PVC, l'installateur DOIT s'assurer que le câble ENTIER est protégé contre les conditions climatiques, en particulier les rayons UV et la pluie, en s'assurant que le câble est contenu à l'intérieur du luminaire et du poteau.	En el caso de un cable aislado de PVC, el instalador DEBE asegurarse de que todo el cable esté protegido contra las condiciones climáticas, especialmente los rayos UV y la lluvia, asegurándose de que el cable esté dentro de la luminaire y el poste.	No caso de cabo de alimentação com isolamento em PVC, o instalador DEVE assegurar que TODO o cabo é protegido das condições climáticas, especialmente raios UV e chuva, certificando-se que o cabo este contido dentro da luminaire e da coluna.	U slučaju napajaju kabela sa PVC izolacijom, izvođač mora obveziti zaštitu CELOG kabla od klimatskih uslova, posebno UV zračenja i kiše, tako što će osigurati da se kabel natari unutar svjetiljke i stube.	
Connexion Y: si le câble est endommagé, il ne peut être remplacé que par le fabricant, par le distributeur ou par un expert, afin d'éviter tout risque.	Connexion Y: si el cable se daña, solo debe reemplazarlo el fabricante, un distribuidor o un experto para evitar riesgos.	Ligação Y: em caso de danos no fio, este tem de ser substituído apenas pelo fabricante, distribuidor ou por um técnico especializado, para evitar riscos.	Y-vezeték: utalásra észlelhető zárlatot mura dobni iskúljuk a gyártót, distributort illi strukturát, kiképítve, hogy ne törölje a rizikót.	
INSTRUCȚII DE EXPLODARE IN SIGURANȚĂ AL PRODUCĂTORULUI Sursa de lumină din acest corp de iluminat trebuie înlocuită numai de producător sau de reprezentantul său de service sau o persoană cu calificări similare.	安全守則	SIKKERHEDSINSTRUKTIONER	SÄKERHETSINSTRUKTIONER	
Opriti întotdeauna alimentarea electrică înainte de lucrările de instalare, întreținere sau reparare.	该机构内的光缆只可由制造商或其服务代理或具有类似资质的人员进行更换。	lysildene i dette armatur må kun udskiftes af producenten, af en vedligeholdelsesvirksomhed udpeget af producenten eller af en tilsvarende kvalificeret virksomhed.	lysildene i detta armatur får endast tas ut av en Schröder-anställd eller annan kvalificerad person.	
GRUP RISC 2 – ATENȚIE! Este posibil ca acest produs să emite radiații optice periculoase. Nu priviți direct în lampa aflată în stare de funcționare. Acest lucru poate fi posibil doar la apărătoare. Apărătoarele trebuie să fie poziționate astfel încât să nu se poată, în mod normal, privi direct în lampa, la o distanță mai mică de 0,44m.	RISICO 2 – ATENÇÃO! Există perigo de radiação óptica perigosa emitida por este produto. Não olhe para a lâmpada quando estiver acesa. Isto pode ser perigoso para os olhos. A luminária deve ser colocada de modo a que não seja possível olhar diretamente para a lâmpada quando estiver acesa, a uma distância menor de 0,44m.	lysildene i denne armatur skal ikke udskiftes af andre end producenten, tekniker fra producenten eller tekniker med tilsvarende kvalifikation.	Stäng altid av strömmen före installation, underhåll eller reparation.	
RON	CHI	DAN	SWE	
În cazul cablului de alimentare cu izolație din PVC, instalatorul TREBUIE să se asigure că TOT cablu este protejat împotriva condițiilor climatice, mai ales împotriva razelor UV și a plouei, asigurându-se că acest cablu este plasat în interiorul aparatului de iluminat și în stâlpuri.	如果对PVC主电源线，必须确保整个电源被保护，特别是不能损害绝缘层。尤其是要外护套和雨水，而且要确保电源线和灯杆在0.44米内被更换。	lysildene i dette armatur må kun udskiftes af andre end producenten, tekniker fra producenten eller tekniker med tilsvarende kvalifikation.	Om den externe strömkabel är ledningen på denna armatur är obdukt, måste den bytas ut av tillverkaren, eller av en servicepartner till tillverkaren, eller motsvarande kvalificerad person, för att undgå skador.	
Connexiune Y: în caz de deteriorare a firului, acesta trebuie înlocuit numai de către producător, distribuitor sau un expert, pentru evitarea riscurilor.	V-接线：如果由于电源线损坏，必须由制造商或其服务代理或具有类似资质的人员更换。	Type Y montering: Hvis det eksterne kabel eller ledning på dette armatur er skadet, må det kun udskiftes af producenten eller af en servicemedarbejder til producenten, eller tilsvarende kvalificeret person, for at undgå skader.	Vid PVC-isolerad kabel måste nästa ledning på detta armatur tas ut av tillverkaren, eller av en servicepartner till tillverkaren, eller motsvarande kvalificerad person, för att undvika skador.

CONFORMITY STATEMENT

Measurement fulfil Standards:

NBN-EN 13032-1
 NBN-EN 13032-4
 NBN-EN 17025:2005
 CIE 121-1996
 LM79-08
 CIE S 025

Measurement quantities measured:

Light distribution in relative or absolute photometry
 Led alone cold lumen package
 Led CCT and CRI
 Power consumption of the fitting
 Lm/watt

Electrical measurement, if not specified:

Primary values are AC with 50Hz frequency
 Secondary values on SSL are DC

CCT, CRI and chromaticity coordinates: are measured in Ulbricht sphere.
 If specified Main test report refer to sphere extra test report.

Light distribution are measured on gonia. If not otherwise specified, measurement is done at 50 Hz

Number of hours operated prior to measurement: if not otherwise specified, 0 hours (no aging).

Stabilization time: If not otherwise specified, a minimal stabilization time of 0.5 hour is applied; and measurement will start when it exists no more variation above 0.5% in 15 minutes

Total operating time of the product including stabilization:

45 minutes have to be added by measurement.

Minimal operating time is 75 minutes

Luminous intensity distribution: available on electronic file with
 .mat format (internal Schréder format)
 .ldt format (European standard)
 .jes format (American standard)

Statement of uncertainties (K=2, 95% of confidence level):
 Uncertainties calculated based on a typical Schréder fitting and PCBA

Intensity measurement: +/- 3%

Angle: +/- 0.5°

Flux: +/- 2.5%

Electrical DC

Power: +/- 0.25%

Voltage: +/- 0.15%

Current: +/- 0.15%

Electrical AC

Power: +/- 0.15%

Voltage: +/- 0.3%

Current: +/- 0.3%

Temperature: +/- 0.65%

ISP2000	JETI
CCT:	+/- 5%
CRI:	+/- 2%
x/y:	+/- 2%

+/- 7.5%
+/- 2.75%
+/- 4.6%

Im/Watt: +/- 3.5%

Measuring instruments in use:

Gonio 1

Type C with Moving mirror

Manufacturer: LMT Lichtmesstechnik GmbH Berlin, Helmholtzstrasse 9 10587 Berlin, Germany

Type: GO-DS 2000

Calibration: traceable to PTB (Physikalisch-Technische Bundesanstalt D-Braunschweig) and METAS (Federal Institute of Metrology, CH-Bern)

Photometric test distance: By default 10 meter, on request 30 meter.

Gonio 2

Type C

Manufacturer: Technoteam Bildverarbeitung, Werner-von-Siemens-Strasse 5 98693 Ilmenau, Germany

Calibration: traceable to BIPM (Bureau International des Poids et Mesures F-Sèvres)

Photometric test distance: Near Field

Sphere n°1

4p geometry

Manufacturer: LMT Lichtmesstechnik GmbH, Helmholtzstrasse 9 10587 Berlin, Germany

Type: UL2000 + U1000 V-Lambda photometer

Calibration: traceable to BIPM (Bureau International des Poids et Mesures F-Sèvres)

Sphere n°2

4p geometry

Manufacturer: Instrument Systems GmbH, Neumarkter Str. 83, 81673 Muenchen, Germany

Type ISP2000 + Spectroradiometer CAS120 and CAS140

Calibration: traceable to NIST

Colorimetric portable spectroradiometer

Manufacturer: JETI Technische Instrumente GmbH, Tatzendpromenade 2 07745 Jena

Type: SPECBOS 1201

Calibration: traceable to NIST

Multimeters

Manufacturer: Agilent

Type: 34401A

Calibration: traceable to BIPM (Bureau International des Poids et Mesures F-Sèvres)

Wattmeters

Manufacturer: Yokogawa

Type: WT210 and WT310

Calibration: traceable to BIPM (Bureau International des Poids et Mesures F-Sèvres)

Thermometers

Amarell Precision

Type: Liquid in glass N63833

Calibration: traceable to LBT (Laboratoire Belge de Thermométrie)
