

PARAFILM® ROLLS AND CUTTER

Laboratory container sealing film, semitransparent and flexible, is mainly composed of polyolefins and paraffin waxes. It offers reliable protection against evaporation, leaks, and contamination. Adaptable to any container, it has a stretch power of 200% and adheres even to edges and irregular surfaces. The cutter, available separately, is designed to keep Parafilm® film clean and organized, and can accommodate rolls of both 50 mm and 100 mm width.

Cod.	Description	DIM.	TDS
10901	Roll	100 mm x 38 mt	-
10902	Roll	50 mm x 75 mt	-
10950	Cutter	-	-
