

OPERATING TABLES

A close-up, low-angle shot of a surgical operating table, specifically the Vivax model by Infimed. The table is dark-colored with multiple adjustable sections. The metal frame and adjustment mechanisms are visible, including a prominent vertical rod and various knobs and levers. The background is a deep blue, and the overall lighting is dramatic, highlighting the mechanical details of the table. The text 'OPERATING TABLES VIVAX' is overlaid in the upper left, and 'PRECISION PERFORMANCE POSSIBILITY' is in the lower right. The 'INFIMED' logo is visible on a panel near the base of the table.

OPERATING TABLES **VIVAX**

PRECISION
PERFORMANCE
POSSIBILITY

Highlights

Founded in 2013 in Żywiec, Poland, INFIMED Sp. z o.o. is a manufacturer of high-quality medical equipment, specializing in operating tables, surgical lamps, and complementary hospital infrastructure. From our origins as a locally recognized brand, INFIMED has evolved into a globally trusted partner for healthcare providers around the world.

The Vivax Series offers a versatile range of electro-hydraulic operating tables designed to meet the demands of every surgical environment - from general procedures to bariatric operations and advanced imaging. Crafted for reliability, engineered for precision.

The range includes the following versions:

VIVAX CORE

Essential performance for general surgical needs, with **manually operated tabletop**.

VIVAX MAX

Bariatric-ready design with **motorized (electrohydraulically) operated tabletop**.

VIVAX PRO

Enhanced versatility with **motorized (electro-hydraulically) operated tabletop**.

VIVAX CORE+

Designed for situations requiring a greater height range, featuring extended height adjustment and a **manually operated tabletop**.

VIVAX PRO+

Ultimate adaptability in the OR, featuring extended height adjustment and a **motorized (electro-hydraulically) operated tabletop**.

VIVAX IMAGE

Optimized for imaging procedures, featuring a **carbon fiber tabletop** for full radiolucent compatibility.

VIVAX ORT

Specialized for orthopedic and shoulder surgeries, featuring a tabletop with **detachable shoulder sections**.

Design

The Vivax operating tables combine durability with functionality. All key components — tabletop sections, base, and column covers — are made of **matt-polished stainless steel**, ensuring smooth, hygienic surfaces that are **impact resistant, easy to clean, and sealed against fluid ingress**, thereby minimizing the risk of infection.

Operating table **VIVAX** with optional **Super Mobile** base

Operating table **VIVAX** with standard **T** base

Bases

Standard “T” Base – Equipped with five antistatic castors (four rear castors arranged in two pairs and one directional castor in the front). Operated via a foot-controlled central brake, with the option of an **electro-hydraulic brake**.

“Super Mobile” Base – Designed for enhanced maneuverability and improved access to the operating field, featuring four **Ø125 mm antistatic castors**. Includes a driving system with a foot-operated central brake and directional castor.

Table Tops

4-Section Tabletop – Headrest, backrest, seat rest, and two footrest sections.

5-Section Tabletop – Headrest, divided backrest with kidney bridge, seat rest, and two footrest sections.

In all tabletops the headrest and footrest sections are interchangeable.

5 section
table top

4 section
table top

Mattresses

Standard Mattress – High-quality, ergonomically profiled, 50 mm polyurethane foam, antistatic, seamless, with antibacterial protection. Easily removable for maximum hygiene and effective cross-contamination prevention.

Optional Premium Mattress – Upholstered in antistatic faux leather, 80 mm thick, fixed to table top on Velcro, constructed in three layers:

- Bottom: 5 mm EPDM foam
- Middle: 25 mm T40 foam
- Top: 50 mm memory foam

This multi-layer system provides superior comfort and pressure relief during long procedures.

OPERATING TABLES **VIVAX**

IMAGING
FLEXIBILITY

Imaging Flexibility

Superior imaging is ensured by full length X-ray cassette tunnel (except foot sections), with possibility of inserting the cassette from both sides, headrest and footrests interchange and longitudinal slide (350 mm).

Table top moved to the head side, interchanged head and foot sections

Table top moved to the foot side

Schemes description

 X-ray cassette tunnel and access to C-arm

 Access to C-arm only

 Table column - no access to C-arm

Table top moved to the head side

Features and controls

- **Battery powered system** with integrated charger located in the base.
- **Advanced software** ensuring smooth, precise, and reliable table movements.
- **High-performance electro-hydraulic system**, developed with technical solutions from a world-leading micro-hydraulics provider.

Controls

Standard “T” Base – Equipped with five antistatic castors (four rear castors arranged in two pairs and one directional castor in the front). Operated via a foot-controlled central brake, with the option of an **electro-hydraulic brake**.

“Super Mobile” Base – Designed for enhanced maneuverability and improved access to the operating field, featuring four **Ø125 mm antistatic castors**. Includes a driving system with a foot-operated central brake and directional castor.

Wired controller
(standard)

Wired or wireless controller

Wall-mounted control panel -
OPERA system (optional)

VIVAX CORE / PRO

Application

General surgical procedures, with the option to perform more specialized interventions using additional accessories.

Design

Standard "T" base and standard column.

VIVAX CORE

Adjustment	VIVAX CORE	VIVAX PRO
Height adjustment	Motorized	Motorized
Lateral tilts	Motorized	Motorized
Trendelenburg and Rev- Trendelenburg tilts	Motorized	Motorized
Back rest	Gas spring supported	Motorized
Kidney bridge	Manual	Motorized
Longitudinal slide	Manual	Motorized
Central brake	Foot operated	Foot operated (optionally motorized)
Foot rest	Gas spring supported	Gas spring supported
Head rest	Gas spring supported	Gas spring supported

VIVAX CORE+ / PRO+

Application

General surgical procedures, designed for situations requiring a greater height range, with the option to perform more specialized interventions using additional equipment.v

Design

Modified "T" base and column, enabling an extended height adjustment range.

Adjustment	VIVAX CORE+	VIVAX PRO+
Height adjustment	Motorized	Motorized
Lateral tilts	Motorized	Motorized
Trendelenburg and Rev- Trendelenburg tilts	Motorized	Motorized
Back rest	Gas spring supported	Motorized
Kidney bridge	Manual	Motorized
Longitudinal slide	Manual	Motorized
Central brake	Foot operated	Foot operated (optionally motorized)
Foot rest	Gas spring supported	Gas spring supported
Head rest	Gas spring supported	Gas spring supported

VIVAX MAX

Application

Bariatric procedures for patients weighing up to 450 kg.

Design

Standard "T" base and column, with a widened tabletop and special extensions to safely support heavier patients

VIVAX CORE / PRO / MAX

Adjustment

VIVAX MAX

Height adjustment	Motorized
Lateral tilts	Motorized
Trendelenburg and Rev- Trendelenburg tilts	Motorized
Back rest	Motorized
Kidney bridge	Motorized
Longitudinal slide	Motorized
Central brake	Motorized
Foot rest	Gas spring supported
Head rest	Gas spring supported

VIVAX IMAGE

Application

Procedures requiring radiolucency of the operating field, including intraoperative radiology, vangiography, and cardiac or vascular surgeries.

Design

Standard “T” base and column, with a **single-section carbon fiber tabletop** ensuring maximum X-ray transparency and unrestricted access for C-arm imaging

Controls

- standard wired controller
- joystick (optionally)

Adjustment	VIVAX IMAGE	VIVAX IMAGE+
Height adjustment	Motorized	Motorized
Lateral tilts	Motorized	Motorized
Trendelenburg and Rev- Trendelenburg tilts	Motorized	Motorized
Longitudinal slide	Motorized (optionally without)	Motorized
Lateral slide	Motorized (optionally without)	Motorized
Central brake	Foot operated	Foot operated

VIVAX ORT Core / ORT Pro

Application

Orthopedic, traumatology, and shoulder surgeries.

Design

Standard "T" base and column, with a tabletop featuring **fully detachable shoulder sections** and a horseshoe headrest for unrestricted surgical access. Additional orthopedic attachments can replace the footrest sections as required.

VIVAX IMAGE / ORT

Adjustment	VIVAX ORT CORE	VIVAX ORT PRO
Height adjustment	Motorized	Motorized
Lateral tilts	Motorized	Motorized
Trendelenburg and Rev- Trendelenburg tilts	Motorized	Motorized
Back rest	Gas spring supported	Motorized
Longitudinal slide	Not available	Motorized
Central brake	Foot operated	Foot operated
Foot rest	Gas spring supported	Gas spring supported
Head rest	Manual	Manual

OPERATING TABLES **FENIX**

FENIX

Application

General surgical procedures, with the option to perform more specialized interventions using additional equipment.

Design

- Standard “T” base and standard column (optional “Super Mobile” Base)
- Powered by a hydraulic system, operated via foot position selector and foot levers for precise, hands-free control.

FENIX OPERATING TABLES

Adjustment

	FENIX
Height adjustment	Foot operated
Lateral tilts	Foot operated
Trendelenburg and Rev- Trendelenburg tilts	Foot operated
Back rest	Gas spring supported
Kidney bridge	Manual
Longitudinal slide	Manual (optionally)
Central brake	Foot operated
Foot rest	Gas spring supported
Head rest	Gas spring supported
