To whom it might concern,

We strongly recommend IM "Enterprise Business Solutions" SRL (further as EBS Integrator), for project management, digital provisioning and business consultancy services, based on our former collaboration.

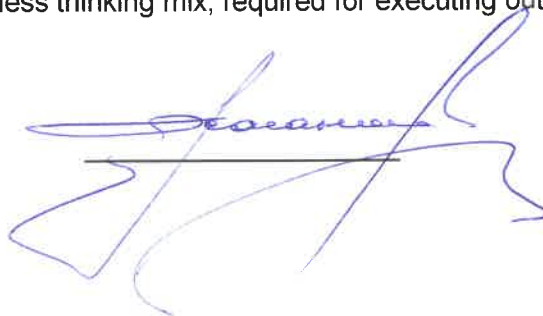

Our initial product concept required outstanding detail focus, contingency analysis (including risk prevention) and process comprehension skills. As soon as we started working with EBS Integrator's team, all of our expectations have been exceeded, specifically at the consultancy phase, where EBS Integrator managed to not only grasp our complex requirements but deliver lucrative strategies that optimized our current user experience, as well as platform management flows.

This, however, does not mean they lack the tech talent required to execute complex web software. Much to our surprise, the team did not only behave as any business flow expert would, but also gave us priceless development strategies that power our solution to date.

Following-up on the above, we can only confirm that working with EBS Integrator delivers the perfect technical and business thinking mix, required for executing outstanding digital solutions.
