

# CHEMISEPT GEL

## Alcoholic hand disinfectant gel

**Chemisept Gel** is rapid ethanol-based hand disinfection gel for hygienic and surgical hand disinfection. It is developed for professional use and is suitable for any situations with high hygiene requirements. It does not contain colourants and fragrance, which makes it especially suitable for people with sensitive skin. **Chemisept Gel** is an effective solution for quick disinfection of the hands.

---

**Chemisept Gel** is an ideal solution as an alternative to liquid hand disinfectants. User friendly gel formulation is easier to use and compared to liquids suits better for non-drip application. It evaporates quickly and leaves hands feeling soft – not sticky.

**Chemisept Gel** has a broad spectrum of bactericidal (incl. MRSA, VRE), mycobactericidal (incl. Mycobacterium avium and Mycobacterium terrae) and yeasticidal activity. The product is also active against viruses (incl. all enveloped viruses, Adeno and Noro)

**Chemisept Gel** has been dermatologically tested to be suitable for both normal and sensitive skin. It contains emollients for skin-care, such as glycerine and panthenol, which help rapidly restored the normal microflora, moisture balance and protective functions of the skin. It is compatible with all washing lotions.

---

### APPLICATION AREAS:

**Chemisept Gel** is alcohol-based hand rub for hygienic and surgical hand disinfection. Perfect product in higher hygiene requirements, where hand antisepsis is the most important preventive measure to avoid infection.

### Main areas of usage:

- Hospitals and other medical institutions
- Operating theatres and procedure rooms
- Intensive care unit
- In accident and emergency departments
- Dialysis departments

- Family doctor offices, first-aid stations
- Ambulances
- Laboratories and diagnostics.
- Dentist's offices
- For home care of patient
- Food industry and food processing areas
- Pharmaceutical and cosmetics industry

#### USAGE:

**Chemisept Gel** is rubbed undiluted onto dry hands. Hands must be completely covered during the application time. Keep special attention to fingertips and thumbs.

- **Hygienic hand disinfection acc. to EN 1500:**

Apply 3 ml of **Chemisept Gel** onto previously washed and dried hands and rub until the hands are dry. Contact time is 30 seconds.

- **Surgical hand disinfection acc. to EN 12791:**

Rub at least 3 ml of **Chemisept Gel** onto hands and forearms twice. (It is important that the entire area to be disinfected is covered with the solution).

Contact time is 1,5 minutes ( 45 seconds twice ). Both hands and forearms should be disinfected.

#### MICROBIOLOGY EFFICACY:

Efficacy	Test method	Contact time
Hygienic hand disinfection	EN1500	30 sec
Surgical hand disinfection	EN12791	90 sec
Bactericidal (incl. MRSA, VRE)	EN13727	15 sec
Yeasticidal	EN13624	15 sec
Mycobactericidal	EN14348	30 sec
All enveloped viruses	EN14476	15 sec
Norovirus	EN14476	30 sec
Adenovirus	EN14476	30 sec
Poliovirus	EN14476	60 sec
