To whom it may concern

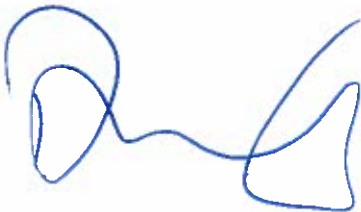

I confirm that the PrioCHECK™ FMDV NS Antibody ELISA Kit (7610440) has been validated for routine use in our laboratory. In our laboratory, this test is accredited to international standards (ISO 17025) for the detection of FMDV-specific antibodies.

Data describing the use of the PrioCHECK™ FMDV NS Antibody ELISA Kit has been presented in several peer-reviewed publications:

1. Comparative evaluation of six ELISAs for the detection of antibodies to the non-structural proteins of foot-and-mouth disease virus // E. Brocchi [et al.]. - Vaccine – 2006.- Vol.6216.- P. – 14.
2. Investigations into the Cause of Foot-and-Mouth Disease Virus Seropositive Small Ruminants in Cyprus During 2007 D. J. Paton [et al.] – Transboundary and Emerging Diseases
3. Clinical and laboratory investigations of the outbreaks of foot-and-mouth disease in southern England in 2007 Ceditest FMDV type O (Cedi-O) (Prionics) Ryan [et al.]
Veterinary Record

If you have any questions regarding the performance of this ELISA, please do not hesitate to contact me.

Regards
