Mammut | Pressure blasting unit with inlet-outlet valve

9522.XXX

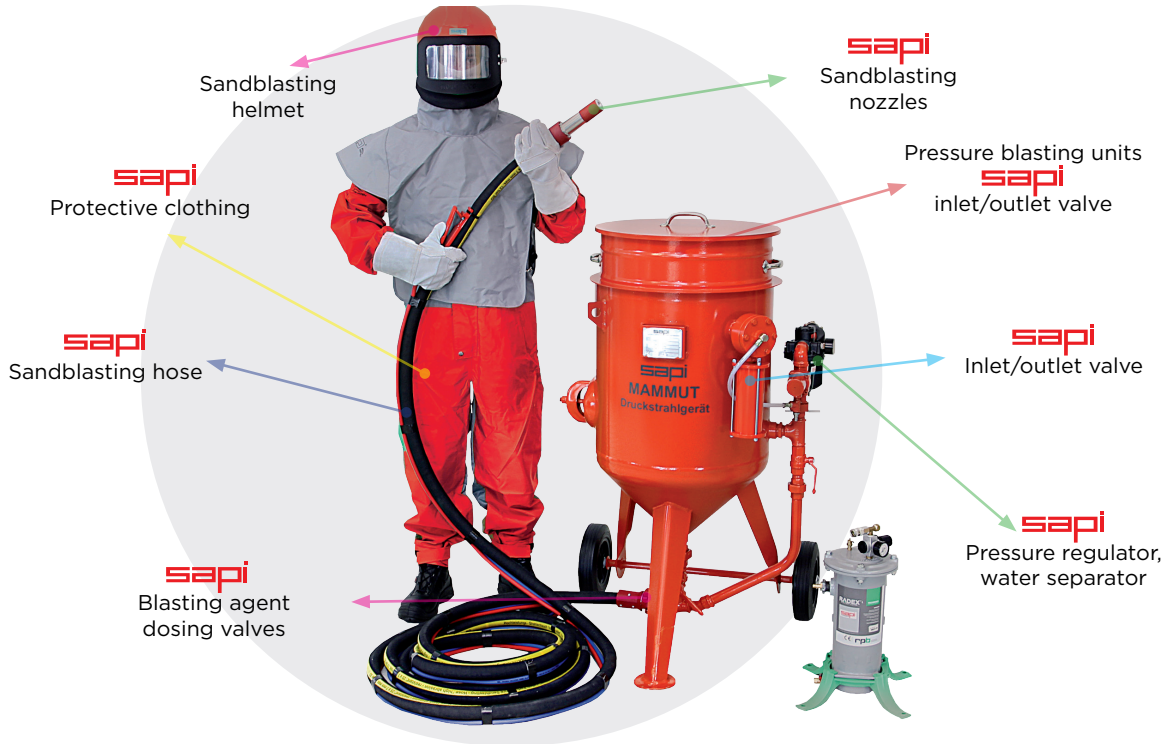

The SAPI pressure blasting unit is equipped with a two-part pneumatic safety immediate shutdown system (inlet and outlet valve). The shutdown ensures fast activation and deactivation times.

This device is a high-performance unit suitable for all types of blasting work.

All commercially available blasting media, such as slag, hard cast, steel grit, corundum, glass beads, etc., can be used as blasting media.

The SAPI blasting unit is suitable for almost all blasting work and is particularly good for rust removal, descaling, paint stripping, roughening, and compacting stainless steel surfaces.

With this technique, environmentally harmful chemicals can often be avoided, thereby actively contributing to environmental protection.

Quick information			
	60	100	200
Capacity	60 Liter	100 Liter	200 Liter
Total height	1.130 mm	1.130 mm	1.420 mm
Boiler diameter	360 mm	490 mm	600 mm
Total diameter	700 mm	900 mm	1.000 mm
Total weight	ca. 60 kg	75 kg	140 kg
Piping	1"	1"	1 1/4"
