Date generale

Anexa 6

1. Certificat de inregistrare a entitatii, eliberat de Camera Inregistrarii de Stat.
   Numar de inregistrare Data inregistrarii Seria Numar
2. Capital social inregistrat de Camera Inregistrarii de Stat:
   data , suma lei, inclusiv:
   1) cota statului lei,
   2) cota detinatorilor a cel putin 20% Increase lei.
   Modificari ulterioare:
   a) , suma lei, inclusiv cota statului lei,
   b) , suma lei, inclusiv cota statului lei.
3. Entitatile, activitatea carora necesita licenta, indica:
   Licenta in vigoare:

Nr. Ord.	Numar	Data eliberarii	Termen de valabilitate	Tipul de activitate	Organul care a eliberat licenta
1					

4. Numarul mediu scriptic al personalului in perioada de gestiune 3 persoane, inclusiv pe categorii:
   1) personal administrativ persoane,
   2) muncitori persoane.
5. Numarul personalului la 31 decembrie 2019 3 persoane.
6. Remunerarea personalului entitatii in perioada de gestiune 157075 lei.
7. Remunerarea membrilor organelor de administrare, de conducere si supraveghere si alte angajamente aparute sau asumate in legatura cu pensiile membrilor actuali sau ale fostilor membri ai acestor organe, pe categorii lei.
8. Avansurile si creditele acordate membrilor organelor specificate la pct.7 lei, inclusiv rambursate lei.
9. Valoarea activelor imobilizate si circulante, inregistrate in calitate de gaj
   1) valoarea de gaj lei,
   2) valoarea contabila lei.
10. Numarul actiunilor ordinare la finele perioadei de gestiune unitati.
11. Profit net (pierdere neta) a perioadei de gestiune pentru o actiune ordinara:
    1) profit lei,
    2) pierdere lei.
12. Dividende calculate pentru o actiune ordinara pentru perioada de gestiune:
    1) platite lei,
    2) planificate pentru plata lei.
13. Valuta straina disponibila, recalculata in moneda nationala a Republicii Moldova – total lei, inclusiv (lei, denumirea si codul valutei):

Nr. Ord.	lei	denumirea	codul valutei
1			

14. Numerar legat – total lei.
    In rindurile, in care se inscriu sumele de gaj, in toate coloanele prin fractie se reflecta:
    a) la numarator – valoarea de gaj;
    b) la numitor – valoarea contabila

Addendum effective date: 1 July 2021

EC Certificate - Full Quality Assurance System

Directive 93/42/EEC on Medical Devices, Annex II excluding Section 4

No. **CE 84868**

Issued To: **Medtronic, Inc.**
710 Medtronic Parkway
Minneapolis, MN 55432
USA

In respect of:

The design, development and manufacture of sterile Endoluminal Stent Grafts, sterile Securement Devices and Delivery Systems for Endovascular Indications, sterile Vascular Introducer Sheaths, sterile Stent Graft Balloon Catheters, sterile Coronary Stents and Delivery Systems, Sterile Intravascular Catheters and sterile/non-sterile Catheter Systems for Renal Denervation.

on the basis of our examination of the quality assurance system under the requirements of Council Directive 93/42/EEC, Annex II excluding section 4. The quality assurance system meets the requirements of the directive. For the placing on the market of class III products an Annex II section 4 certificate is required.

For and on behalf of BSI, a Notified Body for the above Directive (Notified Body Number 2797):

Gary E Slack, Senior Vice President Medical Devices

First Issued: **2004-08-24** Date: **2019-08-22** Expiry Date: **2024-05-26**

Certificate No: **CE 84868**
Date: **2019-08-22**
Issued To: **Medtronic, Inc.**
710 Medtronic Parkway
Minneapolis, MN 55432
USA

Date	Reference Number	Action
24 August 2004		First Issued.
15 November 2004		Transfer of the following certificates from NSAI:- Q252.322, Q252.407, Q252.426, Q252.427, Q252.428, Q252.467, Q252.480, Q252.587, and Q252.611 D252.587 and D252.407, plus incorporation of Medtronic Vascular Ireland as a subcontract manufacturer.
02 December 2004		Carotid and Coronary Stents and Delivery Systems added to the scope (transfer) Medtronic Mexico (manufacture), and Titan Scan Systems, Nutec Corporation, Sterigenics (Queensbury), Steris Corporation-Isomedix Services (Sandy), Rocialle in Health (Mid Glamorgan UK), and EBIS Iotron added as sub-contract sterilizers.
21 December 2004		PTCA Balloon Dilatation Catheters added to the range of products manufactured (transferred from another Notified Body) and Isotron Ireland Ltd added as sub-contract sterilization site.
19 August 2005		Sterilization sub-contractor name change from Titan Scan Systems to Beam One.
03 April 2006		Addition of Sterigenics UK Ltd, as sterilization sub-contractor.
07 August 2006		Addition of AD)MEDES Schuessler GmbH as a sub-contractor for manufacture.

EC Certificate - Full Quality Assurance System Certificate History

Certificate No: **CE 84868**
Date: **2019-08-22**
Issued To: **Medtronic, Inc.**
710 Medtronic Parkway
Minneapolis, MN 55432
USA

Date	Reference Number	Action
11 January 2008	7149866	Subcontractor name change from EBIS Isotron, Harwell to Isotron Harwell. Addition of Isotron plc, Daventry as a subcontractor for E beam sterilization.
03 October 2008	7279045	Addition of Medtronic Mexico EG, Empalme as a subcontractor for manufacture.
14 April 2009	7341499	Correction of the legal name of the Medtronic Mexico facility and postcode for the Isotron PLC, Daventry facility. Addition of the activity of EU Representative for Medtronic Ireland.
13 August 2009	7432878	Certificate renewal. Addition of Accellant Inc as a manufacturing subcontractor, amendment to company name for Isotron PLC, Daventry, and Steris Corporation, Sandy, Utah. Change to address for the subcontractor, Nutek Corporation. Addition of E Beam Sterilization for Isotron Ireland. Rewording of scope for clarification purposes only.
29 July 2010	7546410	Added C.R. Bard, Inc. to the list of significant subcontractors for manufacturing. Extended the scope to include guidewires.
12 October 2011	7730209	Extension to scope to include Catheter Systems for Renal Denervation. Removal of Carotid Stents and Delivery Systems from the scope. Minor amendments to Isotron Daventry and Isotron Tullamore's addresses.

EC Certificate - Full Quality Assurance System Certificate History

Certificate No: **CE 84868**
Date: **2019-08-22**
Issued To: **Medtronic, Inc.**
710 Medtronic Parkway
Minneapolis, MN 55432
USA

Date	Reference Number	Action
26 January 2012	7792125	Amendment to significant subcontractors to reflect Isotron's name change to Synergy Health and removal of Isotron Harwell.
25 May 2012	7842435	Amendment to the address format and zip code for the significant subcontractor Medtronic Mexico (Tijuana).
19 December 2012	7915649	Addition of Medtronic B.V. The Netherlands for EU Representative Activities.
22 January 2013	7945194	Extension to scope to include Superficial Femoral Artery (SFA) and Proximal Popliteal Artery (PPA) Stents and Delivery Systems.
28 February 2013	7960715	Addition of Invatec Technology Center GmbH to the list of significant subcontractors for manufacturing activities.
28 March 2013	7943883	Extension to Scope to include Vascular Introducer Sheaths and the addition of Teleflex Medical for manufacturing activities.
16 December 2013	8082854	Addition of Plexus Manufacturing Sdn Bhd, Malaysia and Plexus Corp, UK to the list of significant subcontractors for manufacturing activities.
13 July 2014	8154862	Certificate Renewal. Various updates and changes to the list of significant subcontractors. Correction of the reference number for the reissue dated 19th December 2012 on the certificate history page.

EC Certificate - Full Quality Assurance System Certificate History

Certificate No: **CE 84868**
Date: **2019-08-22**
Issued To: **Medtronic, Inc.**
710 Medtronic Parkway
Minneapolis, MN 55432
USA

Date	Reference Number	Action
31 July 2015	8350802	Addition of SSP SiMATrix Inc. as balloon supplier for the Attain Clarity.
01 July 2016	8545838	C. R. Bard, Inc., Medtronic Ardian LLC, Nutek Corporation, Sterigenics NY and Apical Instruments Inc. were removed from the list of significant subcontractors.
09 October 2017	8696759	Certificate scope updated to add the design, development and manufacture of securement devices for endovascular indications.
01 May 2018	8895951	Specify devices covered in this certificate are sterile/non-sterile. Move 'sterile Vascular Introducer Sheaths' up in the scope after securement devices. Remove 'Renal Stents and Delivery Systems' and 'guidewires for diagnostic or interventional procedures' from scope. Correction to certificate history entry #2 from '2014' to '2004'.
06 March 2019	8786554	Traceable to NB 0086.

EC Certificate - Full Quality Assurance System Certificate History

Certificate No: **CE 84868**
Date: **2019-08-22**
Issued To: **Medtronic, Inc.**
710 Medtronic Parkway
Minneapolis, MN 55432
USA

Date	Reference Number	Action
Current	9736517	Certificate Renewal. Added product table per MDP4500 Appendix A. Clarified addresses of subcontractors to exactly align with their ISO certificate name and address. Remove "sterile Iliac Stents and Delivery Systems, sterile Superficial Femoral Artery (SFA) and Proximal Popliteal Artery (PPA) Stents and Delivery Systems" from scope as the Complete SE product (iliac and vascular indications) is no longer manufactured nor in the distribution chain. Remove Assurant Cobalt product (iliac product scope) it is no longer manufactured and the last product builds expired in April 2019. Remove subcontractors – Admedes Schuessler GmbH, Germany, Flextronics Medical, Austria, Sterigenics, Corona, CA, Synergy Health, Ireland related to removed products above. Add subcontractors - Phoenix DeVentures, CA, Sterigenics, Los Angeles, CA, SurModics, MN and Medtronic, Santa Ana, CA related to new Class IIa product Confida Expandable Sheath.

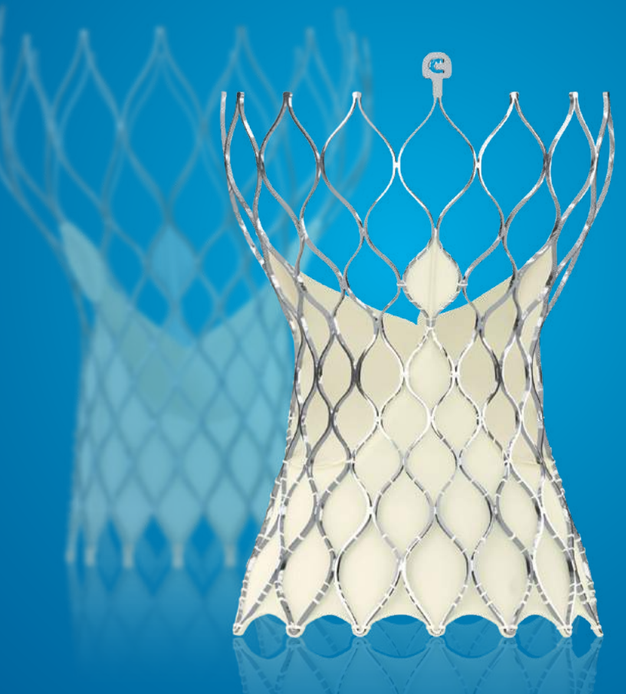
LIFE IS DIFFERENT

CoreValve™
Evolut™ R

Transcatheter Aortic Valve Replacement (TAVR) Platform

Medtronic

BUILT ON A **PROVEN FOUNDATION**



The CoreValve™ System continues to demonstrate exceptional outcomes — and we've taken what we've learned from the design of that platform and applied it to the Evolut™ R System.

Supra-annular Valve Design

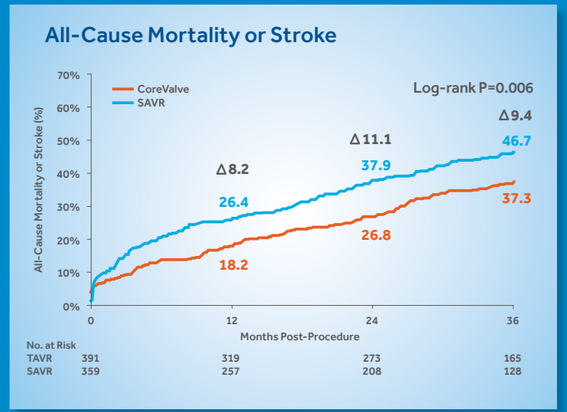
Self-expanding Nitinol Frame

Porcine Pericardial Tissue

Low Delivery Profile

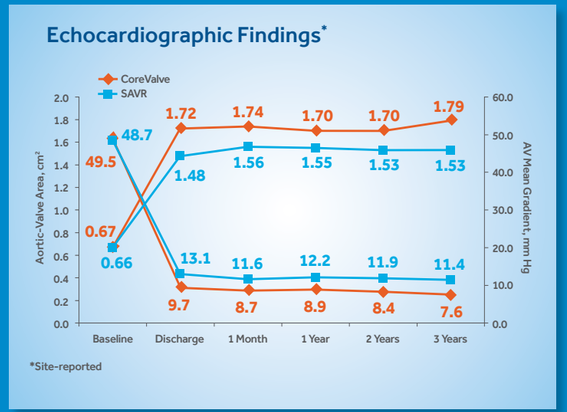
SUPERIOR LONG-TERM CLINICAL OUTCOMES

Lower Rate of Mortality or Stroke



The CoreValve™ Platform shows superior outcomes vs. surgery.[1]

Unsurpassed Sustained Hemodynamic Performance



CoreValve™ system had significantly better valve performance over SAVR at all follow-up visits (P<0.001)[1]

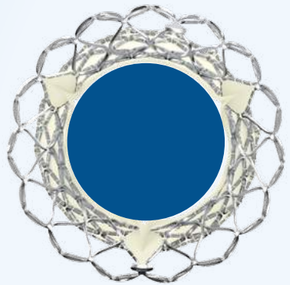
1. CoreValve™ US Pivitol High Risk Trial 3-year Outcomes Presented at ACC 2016.

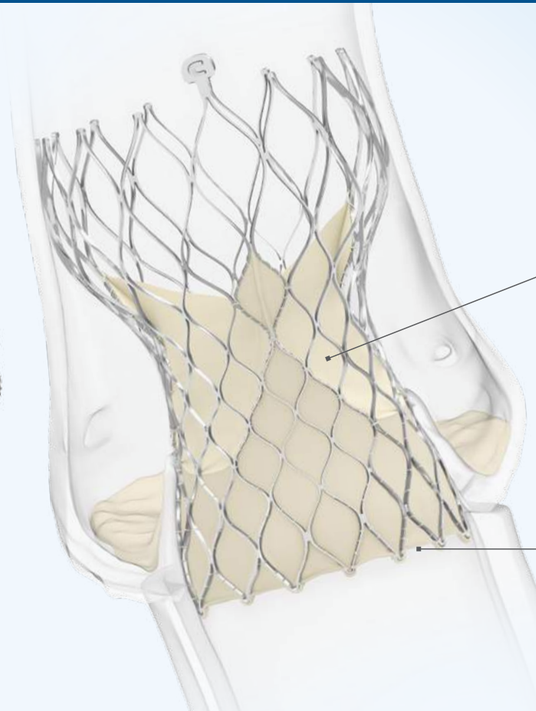
UNSURPASSED **HEMODYNAMICS**

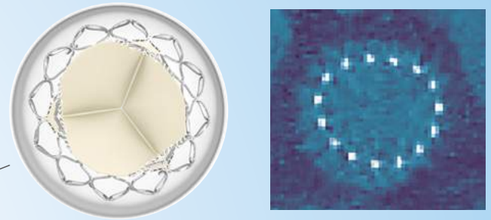
Supra-annular valve design maximizes leaflet coaptation and promotes single digit gradients and large EOA's.

7.5 mm Hg
single digit gradients

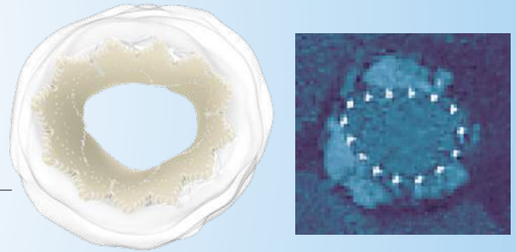
2.0 cm^2
Large EOA







Supra-annular Valve | Optimizes coaptation in non-circular anatomy with supra-annular valve position



Annulus | Conforms to the native annulus

Evolut™ R 30 Day Outcomes.
CoreValve™ Evolut™ R System Instructions for Use 2016 Rev. 1F.

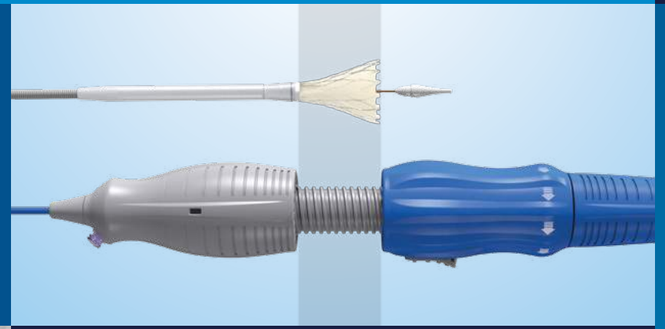
Exceptional Survival

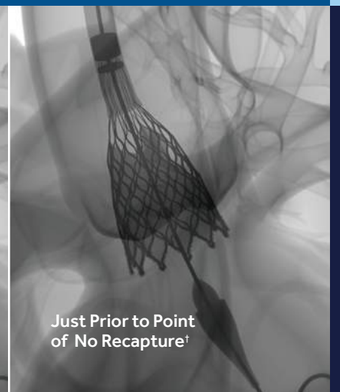
98.8%

CONTROL
DURING DEPLOYMENT

ACCURATE POSITIONING

1:1 response provides immediate feedback between the deployment knob and the movement of the capsule





RECAPTURE AND REPOSITION

EnVeo™ R provides option to recapture and reposition for accurate placement.

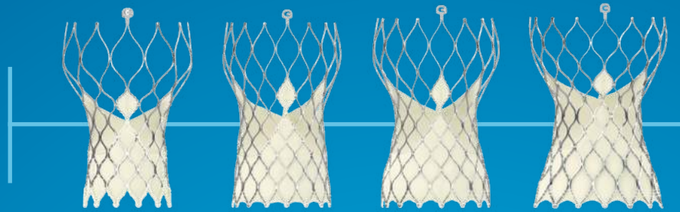
† Up to 80% deployment.

ACCESS
MORE PATIENTS

BROADEST ANNULUS RANGE ON THE MARKET**

The only TAVR platform indicated to treat annulus up to 30 mm

17/18‡



30 mm

LOWEST DELIVERY PROFILE

The only TAVR system with a vessel indication down to 5.0 mm***

** Broadest annulus range based on CT derived diameters
‡ Measurement for TAV-in-SAV only.
*** Evolut™ R 23, 26 and 29 mm valves. 34 mm valve minimum vessel indication ≥ 5.5 mm

INDICATIONS The Medtronic CoreValve and CoreValve Evolut R systems are indicated for use in patients with symptomatic heart disease due to either severe native calcific aortic stenosis or failure (stenosed, insufficient, or combined) of a surgical bioprosthetic aortic valve who are judged by a heart team, including a cardiac surgeon, to be at high or greater risk for open surgical therapy (ie, Society of Thoracic Surgeons predicted risk of operative mortality score ≥8% or at a ≥15% risk of mortality at 30 days).

CONTRAINDICATIONS The CoreValve and CoreValve Evolut R systems are contraindicated for patients presenting with any of the following conditions: known hypersensitivity or contraindication to aspirin, heparin (HIT/HITTS) and bivalirudin, ticlopidine, clopidogrel, Nitinol (Titanium or Nickel), or sensitivity to contrast media, which cannot be adequately premedicated; ongoing sepsis, including active endocarditis; preexisting mechanical heart valve in aortic position.

WARNINGS *General* Implantation of the CoreValve and CoreValve Evolut R systems should be performed only by physicians who have received Medtronic CoreValve training. This procedure should only be performed where emergency aortic valve surgery can be performed promptly. Mechanical failure of the delivery catheter system and/or accessories may result in patient complications. Transcatheter Aortic Valve (Bioprosthesis) Accelerated deterioration of the bioprosthesis may occur in patients presenting with an altered calcium metabolism.

PRECAUTIONS *General* The safety and effectiveness of the CoreValve and CoreValve Evolut R systems have not been evaluated in the pediatric population. The safety and effectiveness of the bioprosthesis for aortic valve replacement have not been evaluated in the following patient populations: patients who do not meet the criteria for symptomatic severe native aortic stenosis as defined: (1) symptomatic severe high gradient aortic stenosis – aortic valve area ≤1.0cm^2 or aortic valve area index ≤0.6 cm^2/m^2, a mean aortic valve gradient ≥40 mmHg; or a peak aortic-jet velocity ≥4.0 m/s, (2) symptomatic severe low-flow/low-gradient aortic stenosis – aortic valve area ≤1.0cm^2 or aortic valve area index ≤0.6 cm^2/m^2, a mean aortic valve gradient <40 mmHg; and a peak aortic-jet velocity <4.0 m/s ; who are at moderate or low surgical risk (predicted perioperative mortality risk of <15%); with untreated, clinically significant coronary artery disease requiring revascularization; with a preexisting prosthetic heart valve with a rigid support structure in either the mitral or pulmonic position if either the preexisting prosthetic heart valve could affect the implantation or function of the bioprosthesis or the implantation of the bioprosthesis could affect the function of the preexisting prosthetic heart valve; with cardiogenic shock manifested by low cardiac output, vasopressor dependence, or mechanical hemodynamic support. The safety and effectiveness of a CoreValve or CoreValve Evolut R bioprosthesis implanted within a failed preexisting transcatheter bioprosthesis has not been demonstrated. Implanting a CoreValve or CoreValve Evolut R bioprosthesis in a degenerated surgical bioprosthesis [transcatheter aortic valve in surgical aortic valve (TAV in SAV)] should be avoided in the following conditions. The degenerated surgical bioprosthesis presents with a: significant concomitant perivalvular leak (between the prosthesis and the native annulus), is not securely fixed in the native annulus, or is not structurally intact (eg, wireform frame fracture); partially detached leaflet that in the aortic position may obstruct a coronary ostium; stent frame with a manufacturer's labeled inner diameter <17 mm. The safety and effectiveness of the bioprosthesis for aortic valve replacement have not been evaluated in patient populations presenting with the following: blood dyscrasias as defined: leukopenia (WBC <1000 cells/mm^3), thrombocytopenia (platelet count <50,000 cells/mm^3), history of bleeding diathesis or coagulopathy, or hypercoagulable states; congenital bicuspid or unicuspid valve; mixed aortic valve disease (aortic stenosis and aortic regurgitation with predominant aortic regurgitation [3-4+]); moderate to severe (3-4+) or severe (4+) mitral or severe (4+) tricuspid regurgitation; hypertrophic obstructive cardiomyopathy; new or untreated echocardiographic evidence of intracardiac mass, thrombus, or vegetation; native aortic annulus size <18 mm or >29 mm for CoreValve and <18 mm or >30 mm for CoreValve Evolut R per the baseline diagnostic imaging or surgical bioprosthetic aortic annulus size <17 mm or >29 mm for CoreValve and <17 mm or >30 mm for CoreValve Evolut R; transarterial access not able to accommodate an 18 Fr introducer sheath or the 14 Fr equivalent EnVeo R InLine sheath when using Model ENVEOR-US or transarterial access not able to accommodate a 20 Fr introducer sheath or the 16 Fr equivalent EnVeo R InLine sheath when using Model ENVEOR-N-US;. sinus of valsalva anatomy that would prevent adequate coronary perfusion; moderate to severe mitral stenosis; severe ventricular dysfunction with left ventricular ejection fraction (LVEF) <20%; symptomatic carotid or vertebral artery disease; severe basal septal hypertrophy with an outflow gradient.

Prior to Use Exposure to glutaraldehyde may cause irritation of the skin, eyes, nose, and throat. Avoid prolonged or repeated exposure to the vapors. Damage may result from forceful handling of the catheter. Prevent kinking of the catheter when removing it from the packaging. This device was designed for single patient use only. Do not reuse, reprocess, or resterilize this product. Reuse, reprocessing, or resterilization may compromise the structural integrity of the device and/or create a risk of contamination of the device, which could result in patient injury, illness, or death. The bioprosthesis size must be appropriate to fit the patient's anatomy. Proper sizing of the device is the responsibility of the physician. Refer to Instructions for Use for available sizes. Failure to implant a device within the sizing matrix could lead to adverse effects such as those listed below. Patients must present with access vessel diameters of ≥6 mm for the CoreValve system, ≥5 mm for the CoreValve Evolut R system when using Model ENVEOR-US, or ≥5.5 mm when using Model ENVEOR-N-US, or patients must present with an ascending aortic (direct aortic) access site ≥60 mm from the basal plane for both systems. Implantation of the bioprosthesis should be avoided in patients with aortic root angulation (angle between plane of aortic valve annulus and horizontal plane/vertebrae) of >30° for right subclavian/axillary access or >70° for femoral and left subclavian/axillary access. Use caution when using the subclavian/axillary approach in patients with a patent LIMA graft or patent RIMA graft. For direct aortic access, ensure the access site and trajectory are free of patent RIMA or a preexisting patent RIMA graft.

During Use For direct aortic and subclavian access procedures, care must be exercised when using the tip-retrieval mechanism to ensure adequate clearance to avoid advancement of the catheter tip through the bioprosthesis leaflets during device closure. For direct aortic access procedures, use a separate introducer sheath; do not use the EnVeo R InLine sheath. Adequate rinsing of the bioprosthesis with sterile saline, as described in the Instructions for Use, is mandatory before implantation. During rinsing, do not touch the leaflets or squeeze the bioprosthesis. If a capsule becomes damaged during loading or the capsule fails to close, replace the entire system (bioprosthesis, catheter, and CLS). Do not use a catheter with a damaged capsule. After a bioprosthesis has been inserted into a patient, do not attempt to reload that bioprosthesis on the same or any other catheter. AccuTrak DCS Only: During implantation, if resistance to deployment is encountered (e.g., the micro knob starts clicking or is tight or stuck), apply upward pressure to the macro slider while turning the micro knob. If the bioprosthesis still does not deploy, remove it from the patient and use another system. AccuTrak DCS Only: Once deployment is initiated, retrieval of the bioprosthesis from the patient (e.g., use of the catheter) is not recommended. Retrieval of a partially deployed valve using the catheter may cause mechanical failure of the delivery catheter system, aortic root damage, coronary artery damage, myocardial damage, vascular complications, prosthetic valve dysfunction (including device malposition), embolization, stroke, and/or emergent surgery. AccuTrak DCS Only: During deployment, the bioprosthesis can be advanced or withdrawn as long as annular contact has not been made. Once annular contact is made, the bioprosthesis cannot be advanced in the retrograde direction; if necessary, and the frame has only been deployed ≤2/3 of its length, the bioprosthesis can be withdrawn (repositioned) in the antegrade direction. However, use caution when moving the bioprosthesis in the antegrade direction. EnVeo R DCS Only: If a misload is detected, unsheath the bioprosthesis and examine the bioprosthesis for damage (for example, permanent frame deformation, frayed sutures, or valve damage). Do not attempt to reload a damaged bioprosthesis. Do not load the bioprosthesis onto the catheter more than 2 times or after it has been inserted into a patient. EnVeo R DCS Only: Use the deployment knob to deploy and recapture the bioprosthesis. Do not use the trigger for deploying or recapturing because it could cause inaccurate placement of the bioprosthesis. EnVeo R DCS Only: Once the radiopaque capsule marker band reaches the distal end of the radiopaque paddle attachment (point of no recapture), retrieval of the bioprosthesis from the patient is not recommended. Retrieval after the point of no recapture may cause mechanical failure of the delivery catheter system, aortic root damage, coronary artery damage, myocardial damage, vascular complications, prosthetic valve dysfunction (including device malposition), embolization, stroke, and/or emergent surgery. EnVeo R DCS Only: During deployment, the bioprosthesis can be advanced or withdrawn as long as annular contact has not been made. Once annular contact is made, the bioprosthesis cannot be advanced in the retrograde direction; recapture until the bioprosthesis is free from annular contact, and then reposition in the retrograde direction. If necessary, and the radiopaque capsule marker band has not yet reached the distal end of the radiopaque paddle attachment, the bioprosthesis can be withdrawn (repositioned) in the antegrade direction. However, use caution when moving the bioprosthesis in the antegrade direction. While the catheter is in the patient, ensure the guidewire is extending from the tip. Do not remove the guidewire from the catheter while the catheter is inserted in the patient. Use the handle of the delivery system to reposition the bioprosthesis. Do not use the outer catheter sheath. Once deployment is complete, repositioning of the bioprosthesis (e.g., use of a snare and/or forceps) is not recommended. Repositioning of a deployed valve may cause aortic root damage, coronary artery damage, myocardial damage, vascular complications, prosthetic valve dysfunction (including device malposition), embolization, stroke, and/or emergent surgery. Do not attempt to retrieve or to recapture (EnVeo DCS only) a bioprosthesis if any one of the outflow struts is protruding from the capsule. If any one of the outflow struts has deployed from the capsule, the bioprosthesis must be released from the catheter before the catheter can be withdrawn. Ensure the capsule is closed before catheter removal. When using a separate introducer sheath, if increased resistance is encountered when removing the catheter through the introducer sheath, do not force passage. Increased resistance may indicate a problem and forced passage may result in damage to the device and/or harm to the patient. If the cause of resistance cannot be determined or corrected, remove the catheter and introducer sheath as a single unit over the guidewire, and inspect the catheter and confirm that it is complete. Clinical long-term durability has not been established for the bioprosthesis. Evaluate bioprosthesis performance as needed during patient follow-up. Postprocedure, administer appropriate antibiotic prophylaxis as needed for patients at risk for prosthetic valve infection and endocarditis. Postprocedure, administer anticoagulation and/or antiplatelet therapy per physician/clinical judgment. Excessive contrast media may cause renal failure. Preprocedure, measure the patient's creatinine level. During the procedure, monitor contrast media usage. Conduct the procedure under fluoroscopy. The safety and efficacy of a CoreValve or CoreValve Evolut R bioprosthesis implanted within a transcatheter bioprosthesis have not been demonstrated. However, in the event that a CoreValve or CoreValve Evolut R bioprosthesis must be implanted within a transcatheter bioprosthesis to improve valve function, valve size and patient anatomy must be considered before implantation of the bioprosthesis to ensure patient safety (for example, to avoid coronary obstruction). In the event that valve function or sealing is impaired due to excessive calcification or incomplete expansion, a postimplant balloon dilatation of the bioprosthesis may improve valve function and sealing. To ensure patient safety, valve size and patient anatomy must be considered when selecting the size of the balloon used for dilatation. The balloon size chosen for dilatation should not exceed the diameter of the native aortic annulus or, for surgical bioprosthetic valves, the manufacturer's labeled inner diameter. Refer to the specific balloon catheter manufacturer's labeling for proper instruction on the use of balloon catheter devices. Note: Bench testing has only been conducted to confirm compatibility with NuMED Z-MED II™* Balloon Aortic Valvuloplasty catheters where CoreValve or CoreValve Evolut R bioprosthesis device performance was maintained after dilation. Data on File.

For EnVeo R DCS: For transfemoral access, use caution in patients who present with multiplanar curvature of the aorta, acute angulation of the aortic arch, an ascending aortic aneurysm, or severe calcification in the aorta and/or vasculature. If ≥2 of these factors are present, consider an alternative access route to prevent vascular complications. There will be some resistance when the catheter is advanced through the vasculature. If there is a significant increase in resistance, stop advancement and investigate the cause of the resistance (for example, magnify the area of resistance) before proceeding. Do not force passage. Forcing passage could increase the risk of vascular complications (for example, vessel dissection or rupture). Persistent force on the catheter can cause the catheter to kink, which could increase the risk of vascular complications (for example, vessel dissection or rupture).

POTENTIAL ADVERSE EVENTS Potential risks associated with the implantation of the CoreValve or CoreValve Evolut R transcatheter aortic valve may include, but are not limited to, the following: • death • myocardial infarction, cardiac arrest, cardiogenic shock, cardiac tamponade • coronary occlusion, obstruction, or vessel spasm (including acute coronary closure) • cardiovascular injury (including rupture, perforation, tissue erosion, or dissection of vessels, ascending aorta trauma, ventricle, myocardium, or valvular structures that may require intervention) • emergent surgical or transcatheter intervention (for example, coronary artery bypass, heart valve replacement, valve explant, percutaneous coronary intervention [PCI], balloon valvuloplasty) • prosthetic valve dysfunction (regurgitation or stenosis) due to fracture; bending (out-of-round configuration) of the valve frame; underexpansion of the valve frame; calcification; pannus; leaflet wear, tear, prolapse, or retraction; poor valve coaptation; suture breaks or disruption; leaks; mal-sizing (prosthesis-patient mismatch); malposition (either too high or too low)/malplacement • prosthetic valve migration/embolization • prosthetic valve endocarditis • prosthetic valve thrombosis • delivery catheter system malfunction resulting in the need for additional re-crossing of the aortic valve and prolonged procedural time • delivery catheter system component migration/embolization • stroke (ischemic or hemorrhagic), transient ischemic attack (TIA), or other neurological deficits • heart failure • cardiac failure or low cardiac output • ancillary device embolization • individual organ (for example, cardiac, respiratory, renal [including acute kidney failure]) or multi-organ insufficiency or failure • major or minor bleeding that may require transfusion or intervention (including life-threatening or disabling bleeding) • vascular access-related complications (eg, dissection, perforation, pain, bleeding, hematoma, pseudoaneurysm, irreversible nerve injury, compartment syndrome, arteriovenous fistula, stenosis) • mitral valve regurgitation or injury • conduction system disturbances (for example, atrioventricular node block, left-bundle branch block, asystole), which may require a permanent pacemaker • infection (including septicemia) • hypotension or hypertension • hemolysis • peripheral ischemia • bowel ischemia • abnormal lab values (including electrolyte imbalance) • allergic reaction to antiplatelet agents, contrast medium, or anesthesia • exposure to radiation through fluoroscopy and angiography • permanent disability.

Please reference the CoreValve and CoreValve Evolut R Instructions for Use for more information regarding indications, warnings, precautions and potential adverse events.

CAUTION Federal law (USA) restricts this device to sale by or on the order of a physician.

Features*

Complete conformability, optimal seal

- M-shaped proximal stents provide wall apposition and a short sealing zone
- Suprarenal stent anchor pins provide secure fixation
- Limb stent and stent spacing reduce kinking

Total control, consistent precision

- Tip capture mechanism allows for precise positioning adjustments
- Back-end thumb wheel provides controlled release of the suprarenal stent and anchor pins
- Improved radiopacity provides increased visibility†
- Four proximal markers assist in accurate deployment
- E-shaped marker assists with A/P orientation

Durable build, dependable performance

- Ultra-high molecular weight polyethylene sutures are three times stronger than surgical sutures
- High-density multifilament polyester graft material provides low porosity
- Electropolished nitinol stents improve fatigue resistance

Expanded anatomical customization with Endurant™ IIs

- Endurant™ IIs complements the Endurant™ II AAA Stent Graft System

Low profile, easy access

- Low profile and hydrophilic coating enhance access and trackability
- Flexible, kink-resistant delivery system facilitates stent graft delivery

*Test data on file at Medtronic. Bench test results may not be indicative of clinical performance.

* The limb mates with the AUI stent graft on the ipsilateral side.
† These calculations assume the minimum 30 mm overlap between the bifurcated stent graft and the contralateral iliac limb per the Endurant™ II Stent Graft System Instructions For Use (IFU) When using the 124 mm length bifurcated stent graft, subtract 10 mm from total contralateral covered length with Bifurcated.
‡ The 3 – 5 stent overlap is available only with select limbs. Please refer to the Instructions For Use for more information. The contralateral iliac limb per the Endurant™ II Stent Graft System Instructions. For Use. When using the 124 mm length bifurcated stent graft, subtract 10 mm from total contralateral covered length with Bifurcated.

Endurant™ II/IIs

AAA Stent Graft System

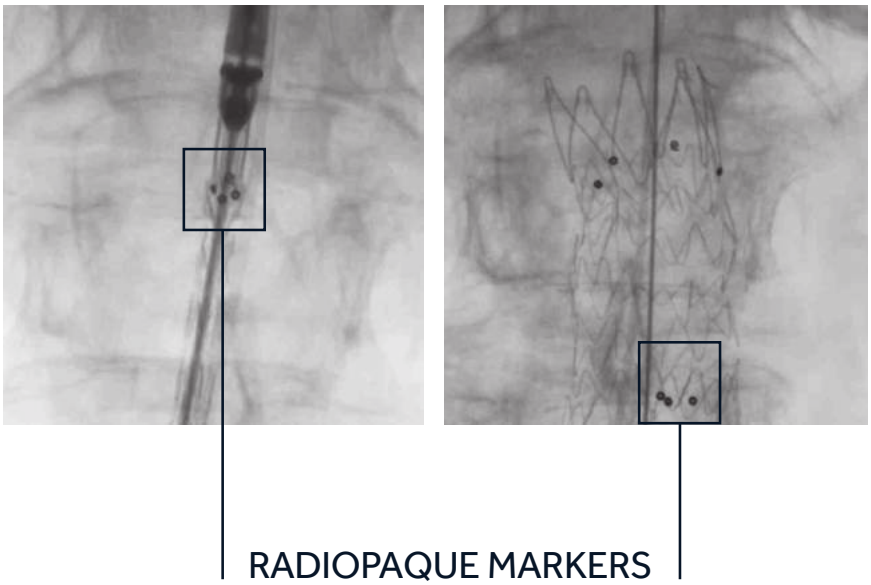
PLACEMENT AND SIZING GUIDELINES

Use the proximal radiopaque markers to position the top edge of the graft material.



For the contralateral side: The radiopaque markers at the proximal limb should be aligned with the radiopaque markers at the flow divider of the Endurant™ II or Endurant™ IIs bifurs.

For the ipsilateral side: Depending on the limb configuration used, the radiopaque markers at the proximal end of the limb should be aligned to the distal radiopaque marker on the ipsilateral leg or the flow divider marker of the Endurant™ IIs bifur.

Select limbs will allow a 3-5 stent overlap adjustment during the case.

Please refer to the Instructions for Use for more information as needed.

Endurant™ II/IIs

AAA Stent Graft System

ENDURANT™ II/IIS STENT GRAFT SIZING GUIDELINES

Proximal Aortic Diameter (mm)		Proximal Stent Graft Size
Standard EVAR*	ChEVAR†	
19 - 20	n/a	23

Talent™ Occluder

Endovascular Occluder

Occluder Stent Graft

Double spring configuration

- Securely anchors in the iliac artery to seal the lumen and to prevent retrograde blood flow

Expand your options

- The Occluder is a less invasive option to surgical ligation and is reported to have better results than coil embolization*

*Kato, et al. Use of a self-expanding vascular occluder for embolization during endovascular aortic aneurysm repair. JVIR 8:27–33, 1997.

Valiant Navion™

Thoracic Stent Graft System

AORTIC

PERIPHERAL

VENOUS

The freedom to do more

Low profile, easy-to-use delivery system designed for expanded access with smooth navigation

Features

Delivery System

- Tip Capture: for controlled delivery and deployment on both FreeFlo and CoveredSeal configurations
- Designed for simplified navigation: flexible, kink-resistant hydrophilic-coated catheter
- Shorter tapered tip designed to decrease vessel impact

Stent Graft

- Multi-filament thoracic graft material based on Endurant™ stent graft yarn designed for flexibility and superior permeability resistance
- Aligned stent peaks and valleys designed for increased flexibility throughout the stent graft
- Increased distance between stents designed to optimize migration resistance and conformability

Proven Platforms

- Leverages proven design of the Valiant™ and Endurant™ stent graft system platforms
- 100K+ thoracic and 300K abdominal patients treated*
- Over 20 years of endovascular experience with deep clinical history

* Data on file at Medtronic.

DISSECTION:
Do not oversize the stent graft more than 10% of the healthy aorta nominal diameter. The following table is provided as a guideline.

FOR ADDITIONAL SECTIONS:
When the stent graft junction is located within the aneurysmal sac or is not supported by tissue, 6 mm oversizing between the primary component and additional section is recommended. In the case when a 20 mm stent graft is used as an outside component, the diameter of the inside component should be oversized by 5 mm relative to the outside component.
When the stent graft junction is supported by tissue (e.g., dissections), the stent graft should be oversized relative to the supporting native vessel.

Features

Conformability delivered

- Sinusoidal shape and placement of nitinol springs provide flexibility and conformability
- Super-elastic nitinol springs exert active radial force to enhance seal and conformability

Confidence in control

- Tip capture provides controlled deployment and precise placement in the thoracic aorta
- Tip capture release handle provides simple turn-and-pull motion to release proximal stents

Advanced design*

- Proximal 8-Peak FreeFlo configuration evenly distributes radial force over multiple apices
- Platinum iridium Figur8 markers provide high visibility and assist deployment
- Broad selection of proximal and distal components treats a variety of patients

Optimized access

- Crossing profile is similar to or lower than other thoracic stent grafts
- Hydrophilic coating facilitates stent graft delivery
- Easy three-step deployment process

* Test data on file at Medtronic. Bench test results may not be indicative of clinical performance.

Valiant™ Captivia™

TAA Stent Graft System

Each Valiant™ Thoracic Stent Graft with Captivia™ Delivery System must be ordered in a size appropriate to fit the patient's anatomy. Proper sizing of the Valiant™ Captivia™ Thoracic Stent Graft Delivery System is the responsibility of the physician.

ANEURYSMS, PENETRATING ULCERS, AND TRAUMATIC RUPTURES:
Oversize the aortic portion of the stent graft by 3 to 5 mm as appropriate for the patient. The following table is provided as a guideline:

Native Vessel (mm)	Suggested Stent Graft Diameter (mm)	Oversizing (mm)
18	22	4
19	22	3
20	24	4
21	24	3
22	26	4
24	26	3
25	28	4
25	30	5
26	30	4
27	30	3
27	32	5

29	32	3
29	34	5
30	34	4
31	34	3
31	36	5
32	36	4
33	38	5
34	38	4
35	40	5
36	40	4
37	42	5
38	42	4
39	44	5
40	44	4
41	46	5
42	46	4

Valiant™ Captivia™

TAA Stent Graft System

DISSECTION:
Do not oversize the stent graft by more than 10% of the healthy aorta nominal diameter. The following table is provided as a guideline:

Native Vessel (mm)	Suggested Stent Graft Diameter (mm)	Oversizing (mm)
20	22	2
21	22	1
22	24	2
23	24	1
24	26	2
25	26	1
26	28	2
27	28	1
28	30	2
29	32	3
30	32	2
31	34	3
32	34	2
33	36	3
34	36	2
35	38	3
36	38	2
37	40	3
38	40	2
39	42	3
40	42	2
40	44	4
41	44	3
42	44	2
42	46	4
43	46	3
44	46	2

FOR ADDITIONAL SECTIONS:
When the stent graft junction is located within the aneurismal sac or is not supported by tissue, a 4 mm oversizing between the primary component and additional section is recommended. When the stent graft junction is supported by tissue (e.g., dissections), recommendations listed above.

VENOUS

Tailor seal and fixation in your primary and revision Tevar cases

Stability of a surgical anastomosis

- Helical EndoAnchor™ implant designed to provide the stability of a surgical anastomosis

Enhanced sealing and fixation

- Enhances the inherent sealing and fixation mechanisms of an endograft

Simplified revisions

- Simplifies revision surgery for endograft migration and Type I endoleak

Precise and accurate placement

- Steerable guide for precise and accurate EndoAnchor™ implant placement

Intuitive and controlled deployment

- Motorized, intuitive controls for precise placement of EndoAnchor™ implants

High visibility

- Excellent system and EndoAnchor™ implant radiopacity

Primary implantation of EndoAnchor™ implant with an Endurant™ bifurcated endograft in complex proximal neck anatomy.

VENOUS

EnsureSeal technology‡

- Optimal hemostasis versus competitive sheaths

Complex ready design

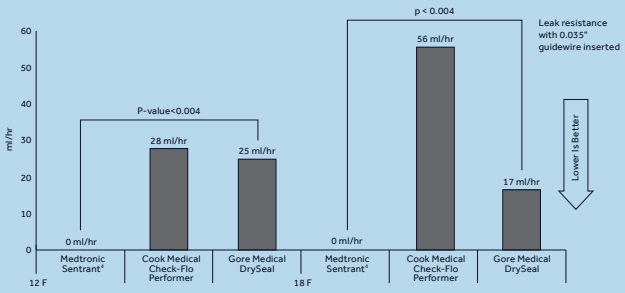
- Hydrophilic coating with flexibility for easier tracking through tortuous and calcified iliacs
- Coil reinforced for kink resistance

Improved procedural confidence

- Radiopaque marker for easy visibility
- Dilator locking feature secures desired position

‡Bench Test Data on file at Medtronic. Test data not indicative of clinical performance. Bench Test compared Cook Check-Flo™* Performer™* and Gore DrySeal 12F and 18F to Sentrant™ 12F and 18F.

Superior leak resistance versus Cook Check-Flo® Performer® and Gore Dryseal†



*Bench Test Data on file at Medtronic, Test data not indicative of clinical performance Bench Test compared Cook Check-Flo Performer and Gore DrySeal 12 F and 18 F to Sentrant™ 12 F and 18 F.

†Medtronic Sheath had zero leakage on 0.035" guidewire.

Stent Graft Balloon Catheter

AORTIC

PERIPHERAL

VENOUS

Multiple purposes, single solution

Versatile design

- Widest range of inflation diameters in a single low profile balloon able to treat thoracic to iliacs (10 mm–46 mm)[2]
- Compatible with 12 F sheath

Reliable performance

- Consistent inflation and deflation time
- Stable expansion with minimum balloon overhang to reduce risk of vessel trauma
- Dependable expansion even after multiple inflations and deflations[3]

Improved conformability

- Expands kinks and smooths creases from the graft material
- Compliant balloon expansion

Clinical uses include:

- For use in thoracic, abdominal and iliac endograft procedures
- Endograft molding
- Apposition of endografts in seal zones
- Temporary aortic occlusion

[2] Reliant™ Stent Graft Balloon Catheter Instructions For Use, Cook Coda™* Balloon Catheter Instructions For Use, Gore Tri-Lobe™* Instructions For Use.

[3] Data on file Medtronic. Maximum of 20 inflations, deflations.

BALLOON INFLATION TABLE*

46 MM BALLOON

Diameter (mm)	Volume (cc)
10	3
20	9
30	19
40	41
46*	60

* CAUTION: This table is only a guide. Balloon expansion should be carefully monitored under fluoroscopy. Do not exceed maximum inflation diameter (46 mm). Rupture of balloon may occur.

Steerable Sheath

AORTIC

PERIPHERAL

VENOUS

Dilator and tip†

- Facilitates sheath trackability, enabling the TourGuide™ Sheath to advance through indicated anatomy

Advanced catheter technology

- Provides the strength and conformability needed for delivering various interventional devices

Curve retention†

- Maintains desired deflection angle, providing a stable platform for delivering devices to the desired destination

Radiopaque tip†

- Provides excellent visualization during positioning, enabling accurate vessel access and potentially less manipulation

Hemostatic seal and flush port

- Maintains hemostasis and allows for manual fluid injection

Safety in mind†

- May reduce overall procedure time by minimizing multiple exchanges associated with different catheter selections

180° tip deflection†

- Physician-directed to deliver diagnostic and therapeutic devices to a wide variety of vessel take offs and difficult anatomical areas

Three working lengths

- Designed to access indicated areas to perform interventions

Inner diameter compatibility

- For use with interventional devices

Dilator

- With French size and guidewire indicator†

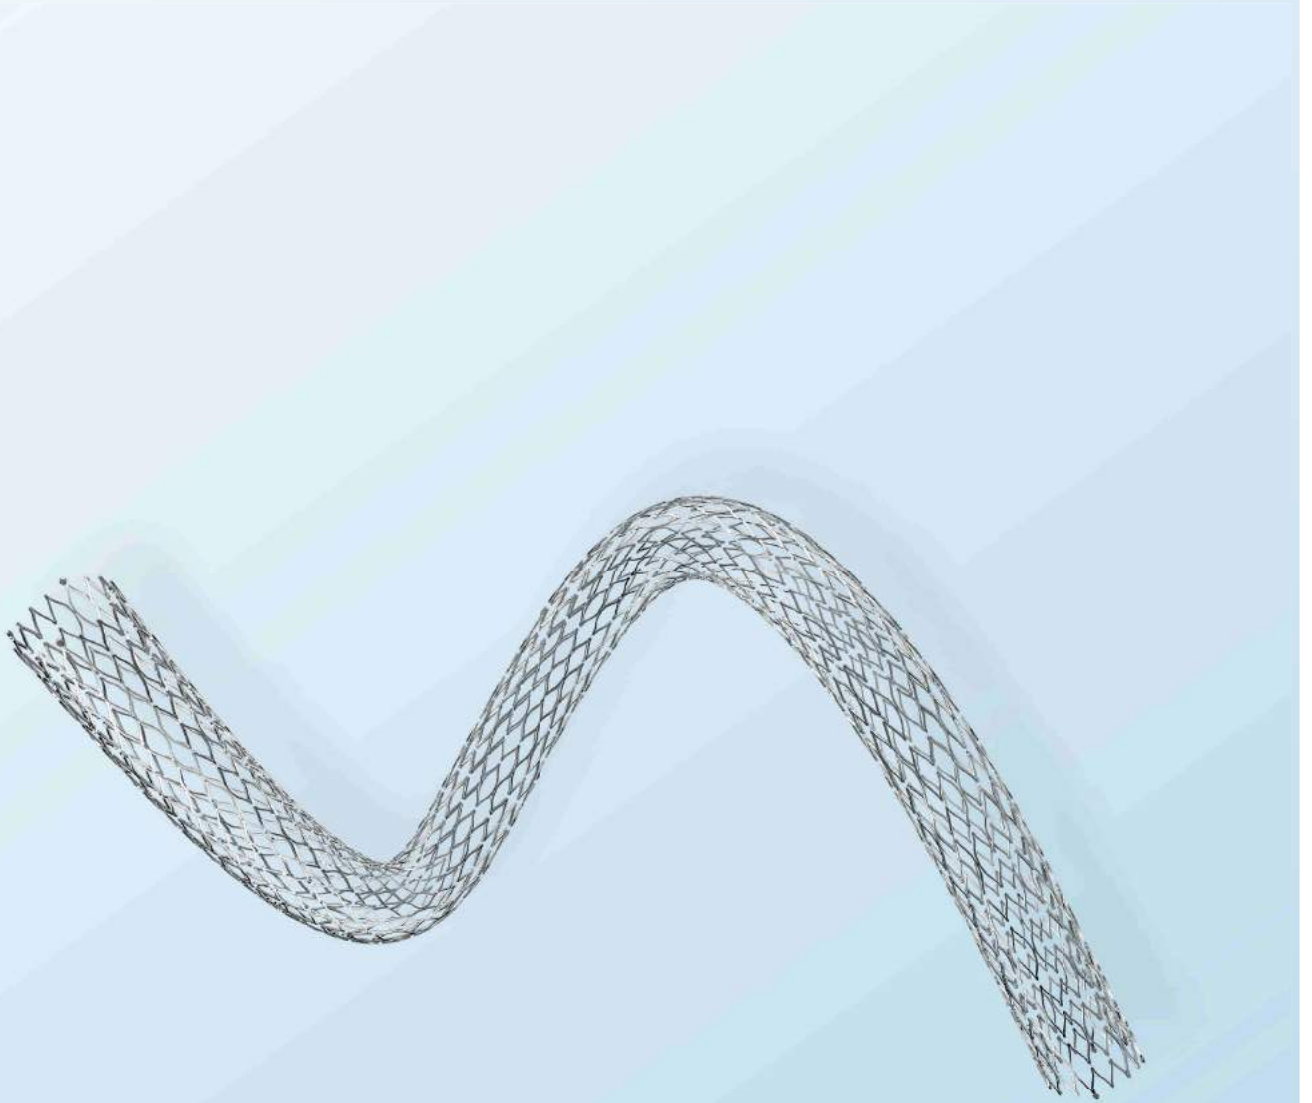
STENT SYSTEMS



Protégé™ Rx™

Carotid Self-Expanding Stent System

AORTIC

PERIPHERAL

VENOUS

The Protégé™ RX™ stent is the next generation stent designed for the anatomy of the carotid artery.

Protégé™ RX™ provides control and accurate placement for carotid interventions.

Predictable Deployment

- Proprietary EX.P.R.T.™ release technology essentially eliminates premature deployment or jumping
- No stent shortening
- Unique anatomically designed tapered stent for better fit in the carotid bifurcation
- 0.014" rapid exchange catheter with 6 F low crossing profile and flexible atraumatic tip
- Radiopaque marker on catheter clearly indicates tapered location for precise positioning

Visible Results

- Tantalum GPS™ markers enhance visibility for precise positioning and result confirmation
- Cell design produces expansion force that resists compression while providing excellent wall apposition
- Straight and tapered options for customized fit in carotid vessels

Protégé RX 6 Fr/0.014" Catheter Length 135cm

Each system includes:

One stent and delivery catheter system

INDICATIONS: The Protégé™ RX™ is indicated for use in the iliac or subclavian arteries in the palliative treatment of malignant neoplasms in the biliary tree. It is also indicated for treatment of stenoses of the common carotid artery (CCA), internal carotid artery (ICA) and carotid bifurcation.

VisiPro™

Balloon-Expandable Peripheral Stent System

- Broad offering of 6 Fr-compatible 0.035" balloon-expandable stent with radiopaque marker technology for optimized visibility.
- Low crossing profile.
- Minimal shortening for placement confidence.

VisiPro™ catheter lengths
80 cm and 135 cm

Each system includes:

One stent and delivery catheter system

Specifications Nominal
Balloon Expandable Peripheral Stent System is indicated for use in the iliac, renal or subclavian arteries, as well as malignant biliary use.

Protégé™ GPS™

Self-Expanding Stent System

The Protégé™ GPS™ stent system gives control for precise stent placement avoiding jumping of the stent through the EX.P.R.T.™ retention system.

Compact delivery

- Diameters up to 14 mm
- Full line is 6 F compatible

Precision

- Propietary EX.P.R.T.™ deployment system secures the stent to eliminate premature deployment or "jumping"
- Tantalum GPS markers enhance visibility for easier, precise positioning

Radial strength and flexibility

- Designed for radial strength without sacrificing flexibility

Each system includes:

One stent and delivery catheter system

Protégé GPS catheter lengths 80 cm and 120 cm

Specifications Nominal
INDICATIONS: The Protégé™ GPS™ stent is indicated for use in the iliac or subclavian arteries and malignant biliary use.

Indications, contraindications, warnings and instructions for use can be found in the product labeling supplied with each device.
Protected under one or more of the following: US Patent 6,814,746; 6,749,627; 6,623,518; 6,623,491; 6,558,415; 6,358,274; 6,132,460; D458,679. Non-US Patent pending.
Product availability and/or specifications subject to change.

EverFlex™

Self-Expanding Stent System

The EverFlex™ self-expanding peripheral stent system is a self-expanding nitinol stent system.

The spiral-cell interconnecting design significantly improves flexibility and vessel conformability, without sacrificing radial strength. Excellent wall apposition and compression resistance is provided by the three-wave peak design.

Spiral cell connection

- Peak-to-peak connection nodes to disperse force uniformly

Flexible design

- Improves fracture resistance and restores vessel patency

Three-wave peak design

- Designed to resist compression and provide wall apposition

EverFlex™ catheter lengths:80 cm and 120 cm

INDICATIONS: The EverFlex™ self-expanding peripheral stent system is indicated for use in common iliac, external iliac, superficial fermoral, proximal popliteal, and subclavian arteries.

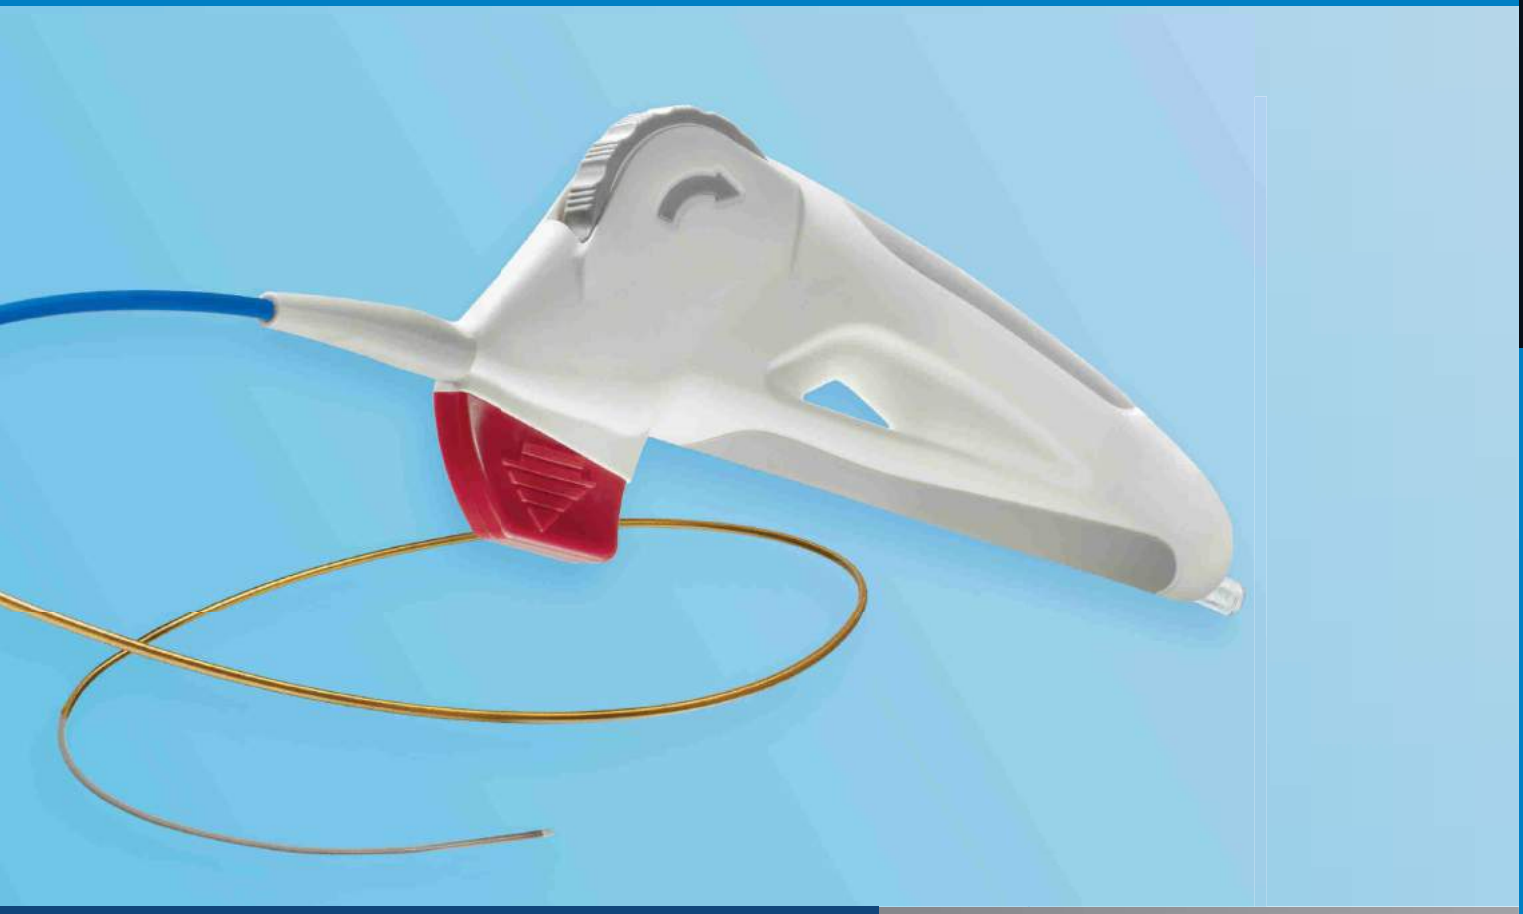
EverFlex™ with Entrust™ Delivery System

Self-Expanding Stent System

AORTIC

PERIPHERAL

VENOUS



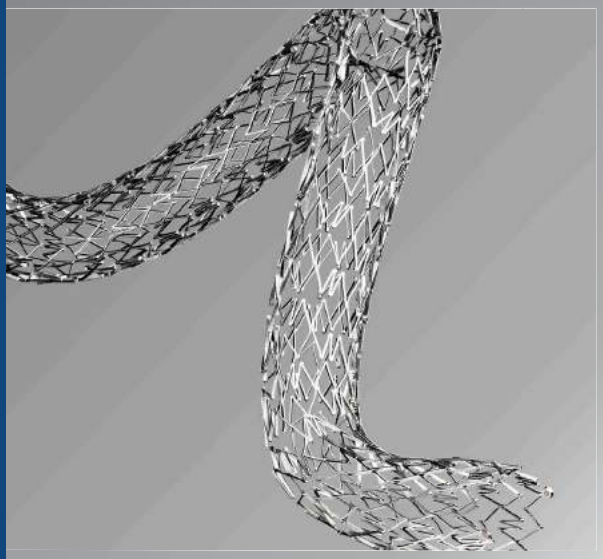
The Entrust™ delivery system is a one-handed, triaxialstent delivery system with a low 5 F profile.

This low profile was achieved without compromising the design of the EverFlex™ stent or the 0.035" guidewire compatibility.

The device was engineered specifically for control and accuracy based on physician feedback provided during extensive interviews and procedural observations.

EverFlex™ stent: The DURABILITY II study proves strong stent performance with a 60% primary patency at 3 years.

EverFlex™ Entrust™ catheter lengths: 80 cm, 120 cm, 150 cm.



EverFlex™ with Entrust™ Delivery System

Self-Expanding Stent System

INDICATIONS: The stent is indicated for use in occlusions, lesions at high risk for abrupt closure or threatened closure following percutaneous transluminal angioplasty (PTA); or lesions believed to be at high risk for restenosis following PTA in the common iliac, external iliac, superficial femoral, proximal popliteal, or subclavian arteries.
Stenting is intended to improve and maintain artery luminal diameter.

Paramount Mini™ GPS™

Balloon-Expandable Peripheral Stent System

AORTIC

PERIPHERAL

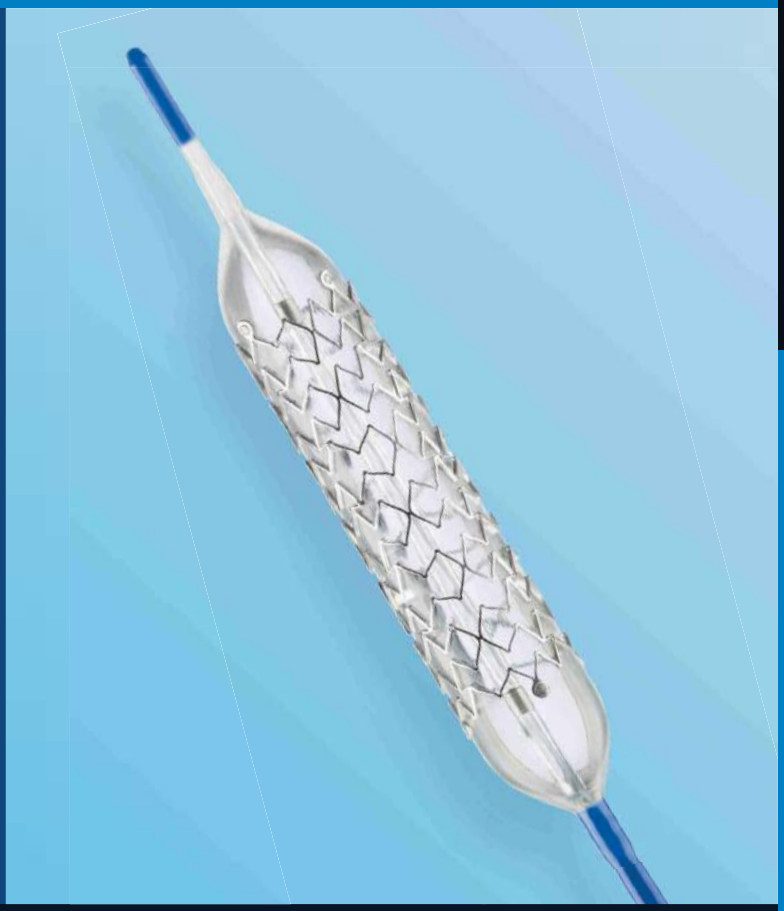
VENOUS

The Paramount Mini™ GPS™ is a pre-mounted renal stent line with tantalum markers on a balloon catheter delivery system. The devices are compatible with 5 and 6 F introducers and 0.014" and 0.018" Guidewires.

Each kit includes:

One stent and delivery catheter system

Paramount mini catheter length 80cm



COMPLIANCE CHART

IntraStent™ LD

Large Diameter Stents

AORTIC

PERIPHERAL

VENOUS

The IntraStent™ LD stent family of large-lumen stainless steel stents has been designed to supply a larger diameter device with the flexibility, strength, coverage, and profile normally associated with smaller diameter stents.

Three models are available:

InstraStent™ DoubleStrut™ LD peripheral stent

- Four-cell design for balanced radial strength and flexibility
- Low profile, 8 F introducer sheath
- Best choice for flexibility

InstraStent™ Mega™ LD peripheral stent

- Five-cell design for increased radial strength over the DoubleStrut LD Stent
- 9 F sheath compatibility
- Best choice for strength and flexibility

InstraStent™ Max™ LD peripheral stent

- Six-cell design for maximum strength and coverage
- 11 F sheath compatibility
- Best for strength

More choices

- The LD series of stents is available in a variety of designs to accommodate the unique needs of your patients

Innovative design

- Flexibility, strength and coverage delivered in ways not found in other large lumen stents
- Minimal shortening after expansion up to 12 mm
- Rounded edges minimize potential for lumen trauma

EverCross™

OTW PTA Dilatation Catheter 0.035"

EverCross™ 0.035" PTA balloon is an over-the-wire, 0.035" balloon catheter that features a bevel 360° tip for smooth tip to wire tracking. EverCross™ nylon folds, extending the length of the balloon, were engineered for superior rewrap, facilitating multiple inflations and insertions. Each system includes: One PTA balloon catheter and one compliance chart.

TECHNICAL SPECIFICATIONS

Catheter design	Over-the-wire
Useable catheteer lengths	40, 80 and 135cm
Introducer sheath compatibility	5, 6 F
Guidewire compatibility	0.035"

INDICATIONS: The EverCross™ 0.035" over-the-wire PTA dilatation catheter is intended to dilate stenoses in the iliac, femoral, ilio-femoral, popliteal, infra-popliteal, renal arteries and for the treatment of obstructive lesions of native or synthetic arteriovenous dialysis fistulae. This device is also indicated for stent post-dilatation in the peripheral vasculature.

Fortrex™

PTA Balloon Catheter OTW 0.035"

AORTIC

PERIPHERAL

VENOUS

Predictable high-pressure treatment for AV access lesions

The high-pressure Fortrex™ PTA Balloon is the next-generation solution for deliverability, predictability, and procedural efficiency.

Deliverability

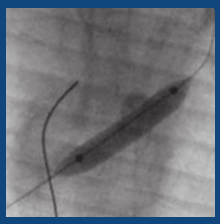
- Low tip entry profile enables tight tracking on the wire
- Robust, flexible shaft design facilitates successful navigation in tortuous vessels

Procedural efficiency

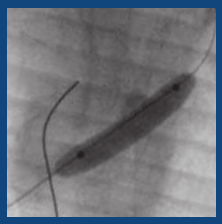
- Rapid deflation time contributes to reduced procedure length
- Balloon material and wall thickness permit reliable balloon rewrap into the sheath

Predictability

- Balloon material and design allow for shape retention at higher pressure
- Focal pressure is exerted on the lesion for controlled, targeted treatment



Fortrex™ Balloon
Pressure is directed toward the lesion



Competitive Design
Pressure is lost longitudinally

Pacific™ Plus

PTA Balloon Catheter OTW 0.018"

AORTIC

PERIPHERAL

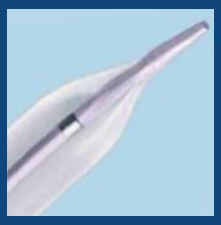
VENOUS

Versatility for everyday and beyond

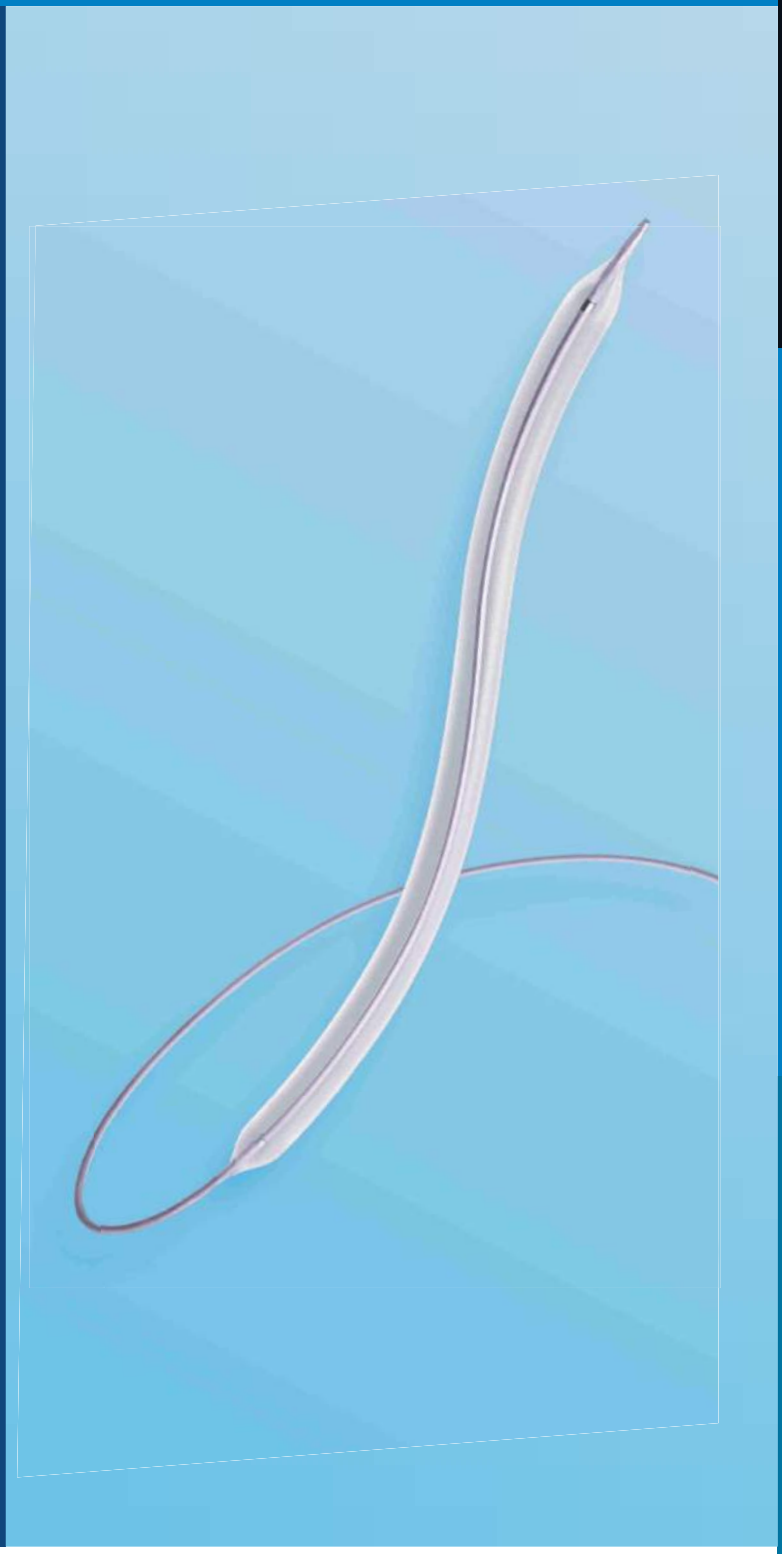
- Versatile shaft lengths and guidewire compatibility for more access options
- Proprietary balloon technology allows for great crossability*
- Improved shaft design for faster deflation*

TECHNICAL SPECIFICATIONS

Catheter design	Over-the-wire
Balloon coating	Hydrophilic
Balloon marker	2 swaged, platinum iridium
Shaft diameter	4.0 F
Usable shaft lengths	90, 130 and 180 cm
Introducer sheath compatility	4.0 F
Guidewire compatibility	0.018"



Tapered tip



* Six samples of each brand tested, 5 mm x 40 mm. Medtronic data on file. Bench test results may not be indicative of clinical performance.

Pacific™ Plus

Pacific™ Xtreme™

PTA Balloon Catheter OTW 0.018"

AORTIC

PERIPHERAL

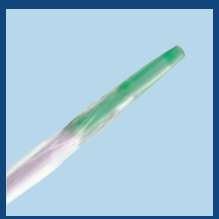
VENOUS

Versatility for everyday and beyond

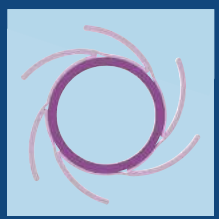
- Balloons from 150-300 mm for treating long femoropopliteal lesions
- Strong pushability and kink resistance combined with excellent flexibility*
- Low profile introducer sheath compatibility for less possible puncture trauma**

TECHNICAL SPECIFICATIONS

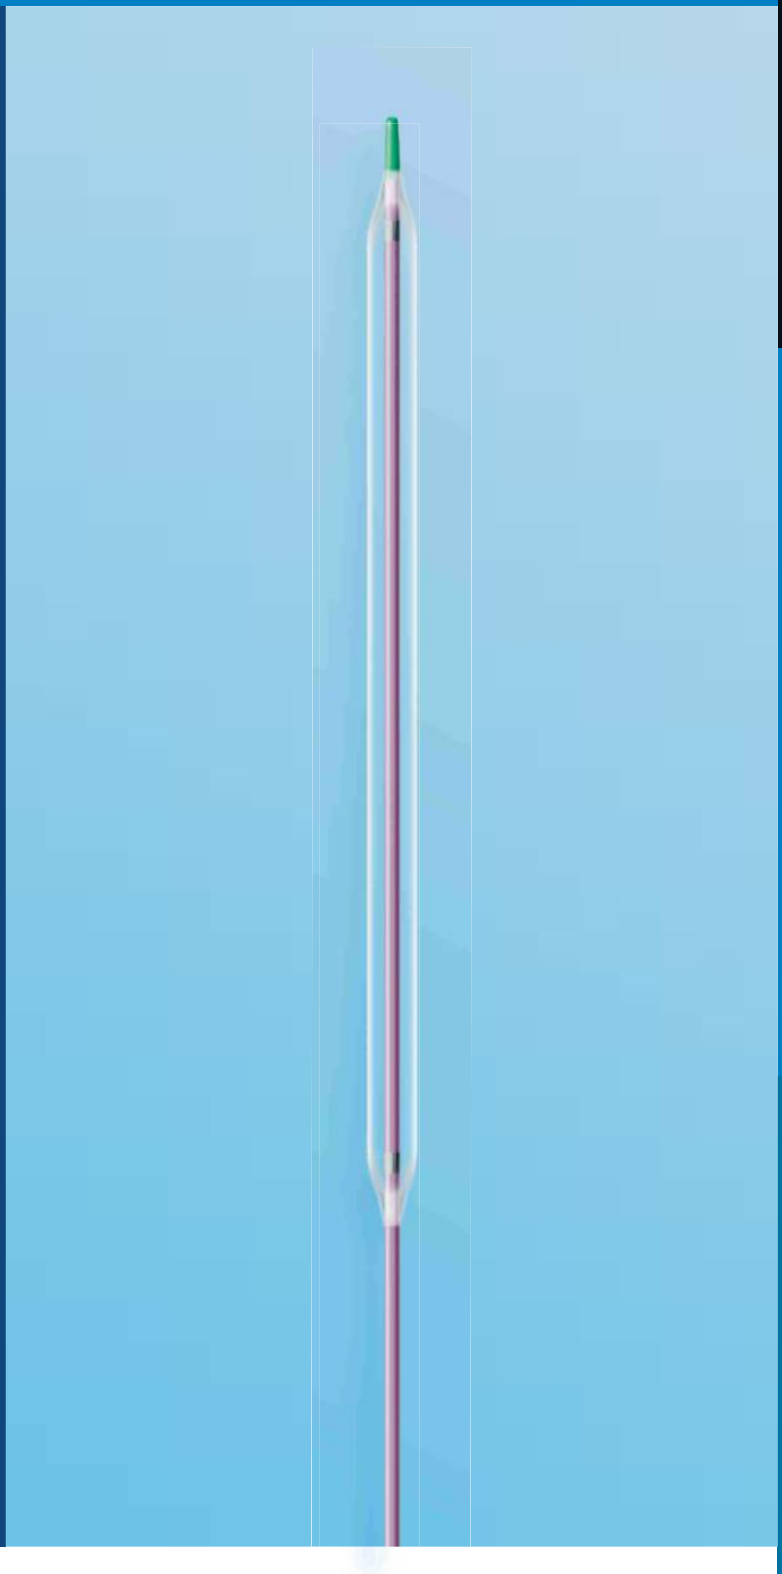
Catheter design	Over-the-wire, Coaxial Shaft
Balloon coating	Hydrophilic
Balloon marker	2 swaged, platinum iridium
Shaft diameter	3.9 – 4.2 F
Usable shaft lengths	90, 130 and 180 cm
Introducer sheath compatility	4,5 F
Guidewire compatibility	0.018"



Tapered tip



Six-fold balloon



* Bench test data on file at Medtronic, Inc. Test data not indicative of clinical performance.
** 4F/5F depending on diameter and length.

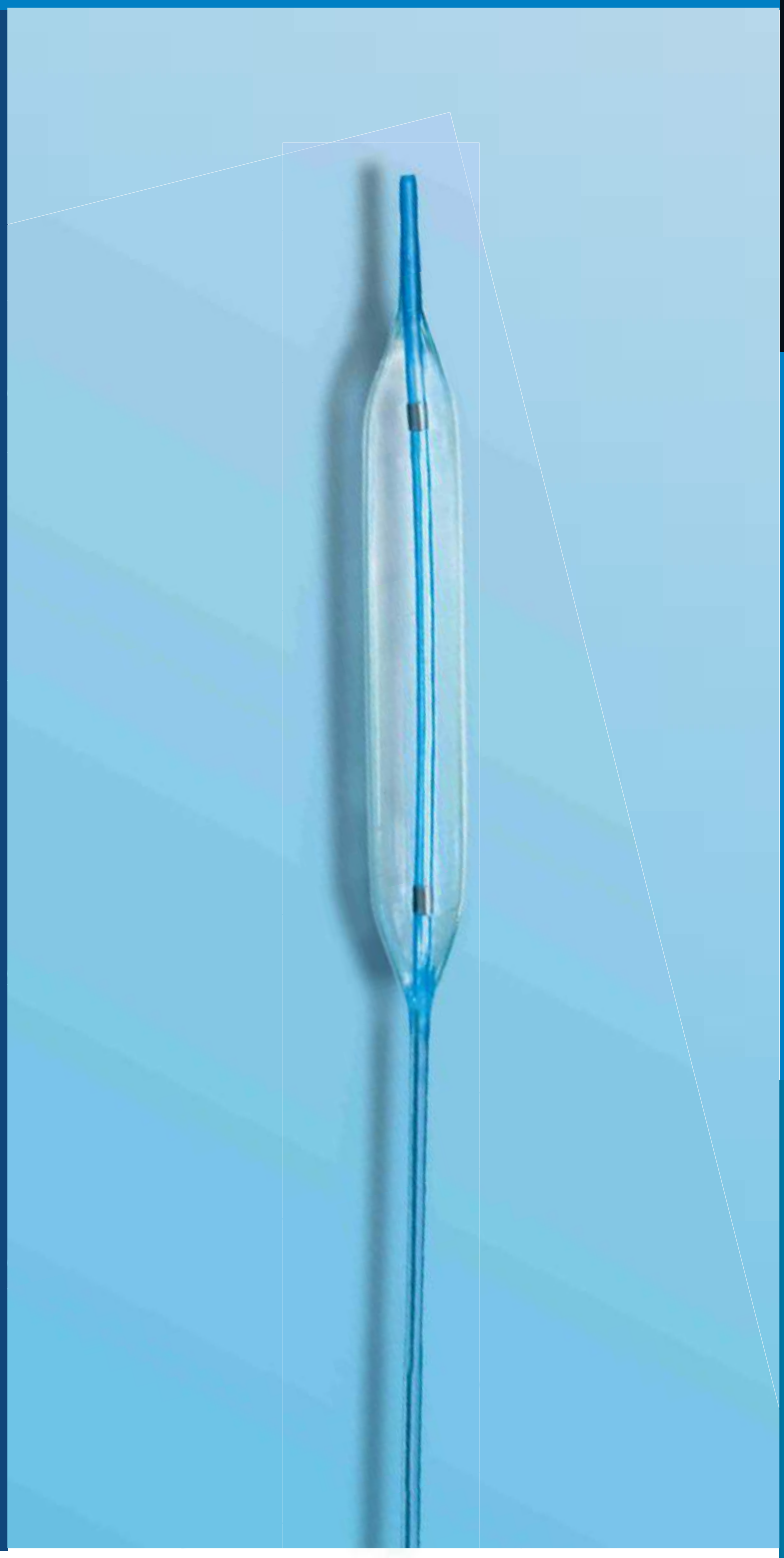
Submarine™ Rapido

PTA Balloon Catheter RX 0.018"

AORTIC

PERIPHERAL

VENOUS



Low profile with strength and control

Low profile

Compatible with 6F guiding catheter***

- Swaged "zero profile" markers enable easy penetration of the target lesion
- Special 3-folded balloon minimizes the re-wrap profile
- 0.021" tip entry profile to enhance crossability of subocclusive lesions

Strength and control

For carotid** and renal interventions, a delicate and high performance PTA is required

- Flexitec LP material allows for a wide working range from nominal pressure of 7 bar up to 17 bar RBP
- Controlled balloon compliance for exact sizing and reliable balloon performance

Shaft design

- Push transmission by homogeneous RX transition and adequate flexibility of the distal part
- Hydrophilic coating for swift and easy navigation

Size mix

- Broad size mix (including diameters up to 7 mm) makes this catheter appropriate for carotid* and renal interventions

TECHNICAL SPECIFICATIONS

Catheter design	Rapid exchange (RX)
Balloon coating	Hydrophilic
Balloon marker	2 swaged, Platinum Iridium
Shaft diameter	Proximal 2.3 F Distal 3.0 – 3.5 F
Usable shaft lengths	135 cm
Introducer sheath compatility	6,7 F
Guidewire compatibility	0.018"
Nominal pressure	7 atm

* Bench test data on file at Medtronic. Test data not indicative of actual performance.
** All codes with balloon lengths up to 40mm are certified for Carotid application.
*** Up to 6mm balloon diameter.

The Submarine Rapido PTA catheter is indicated for PTA in patients with obstructive disease in peripheral arteries (i.e. carotid, supraaortic, ilio-femoral, popliteal, infrapopliteal, and renal arteries).

Amphirion™ Deep

Infrapopliteal PTA Balloon Catheter OTW 0.014"

AORTIC

PERIPHERAL

VENOUS

Easy access to the extremities*

- Tip profile (0.017")
- LFC hydrophilic coating
- Three-step shaft design to optimize tracking through distal vessels
- Reinforced proximal shaft design for strong pushability
- 4 F compatible in all sizes

Balloon sizes to accommodate your needs*

- Size range 1.5–4.0 mm in diameter and 20–210 mm in length
- Long balloons (up to 210 mm) are suited for treatment of extremely diffuse lesions

Conformable balloon material*

- Proprietary polymer blend provides wonderful conformability

Tapered balloon*

- The 210 mm balloon tapers by 0.5 mm to respect the arterial anatomy

NanoCross™ Elite

OTW PTA Dilatation Catheter 0.014"

NanoCross™ Elite, the next generation 0.014" PTA balloon, with its 360° beveled tip provides smooth transition from wire to tip.
The SlimTec™ balloon-folding process is designed to provide the lowest 0.014" crossing profile.

TECHNICAL SPECIFICATIONS

Catheter design	Over-the-wire
Useable catheter lengths	90 and 150 cm
Introducer sheath compatibility	4 F
Guidewire compatibility	0.014"

INDICATIONS: The NanoCross™ Elite 0.014" Over-the-Wire PTA Dilation Catheter is intended to dilate stenoses in the iliac, femoral, ilio-femoral, popliteal, infra-popliteal, and renal arteries and for the treatment of obstructive lesions of native or synthetic arteriovenous dialysis fistulae.

Each system includes: One PTA balloon catheter, one compliance chart and one balloon folding tool.

RapidCross™

PTA Balloon Dilatation Catheter RX 0.014"

RapidCross™ 0.014 PTA Balloon Catheter was developed exclusively for below the knee treatment. Every detail, from the 0.017" tip entry profile to the Rapid Exchange Port construction was thoughtfully designed for exceptional performance.

Low profile
- For ease in crossing

Dual middle marker bands*
- For enhanced visualization and accuracy

Tapered long balloon**
- Tailored to distal tibial and pedal anatomy

Maximum inner lumen
- For 2-3 times faster deflation

Proprietary balloon coating
- Ensures sustained lubricity for crossing challenging lesions

* Dual middle marker bands available on 150 mm and 210 mm balloon lengths
** Tapered balloon available in 210 mm balloon length

INDICATIONS: The RapidCross™ rapid exchange PTA balloon dilatation catheter is intended to dilate stenoses in the iliac, femoral, iliofemoral, popliteal, infrapopliteal, and renal arteries, and for the treatment of obstructive lesions of native or synthetic arteriovenous dialysis fistulae.

Chocolate™

PTA Balloon

Minimize vessel trauma, dissections and the need for bailout stenting above or below the knee with the Chocolate™ PTA balloon. The balloon's unique nitinol constraining structure creates pillows and grooves that provide a predictable, uniform and atraumatic dilatation.

- Minimize vessel trauma
- Reduce dissections
- Decrease bailout stenting

TECHNICAL SPECIFICATIONS

Catheter design	Over-the-wire
Useable catheteer lengths	120, 135 and 150 cm
Introducer sheath compatibility	5, 6 F
Guidewire compatibility	0,014" and 0,018"

Chocolate™

PTA Balloon

Braided Catheter Shaft

- Designed to provide robust pushability to reach and cross lesions

Grooves

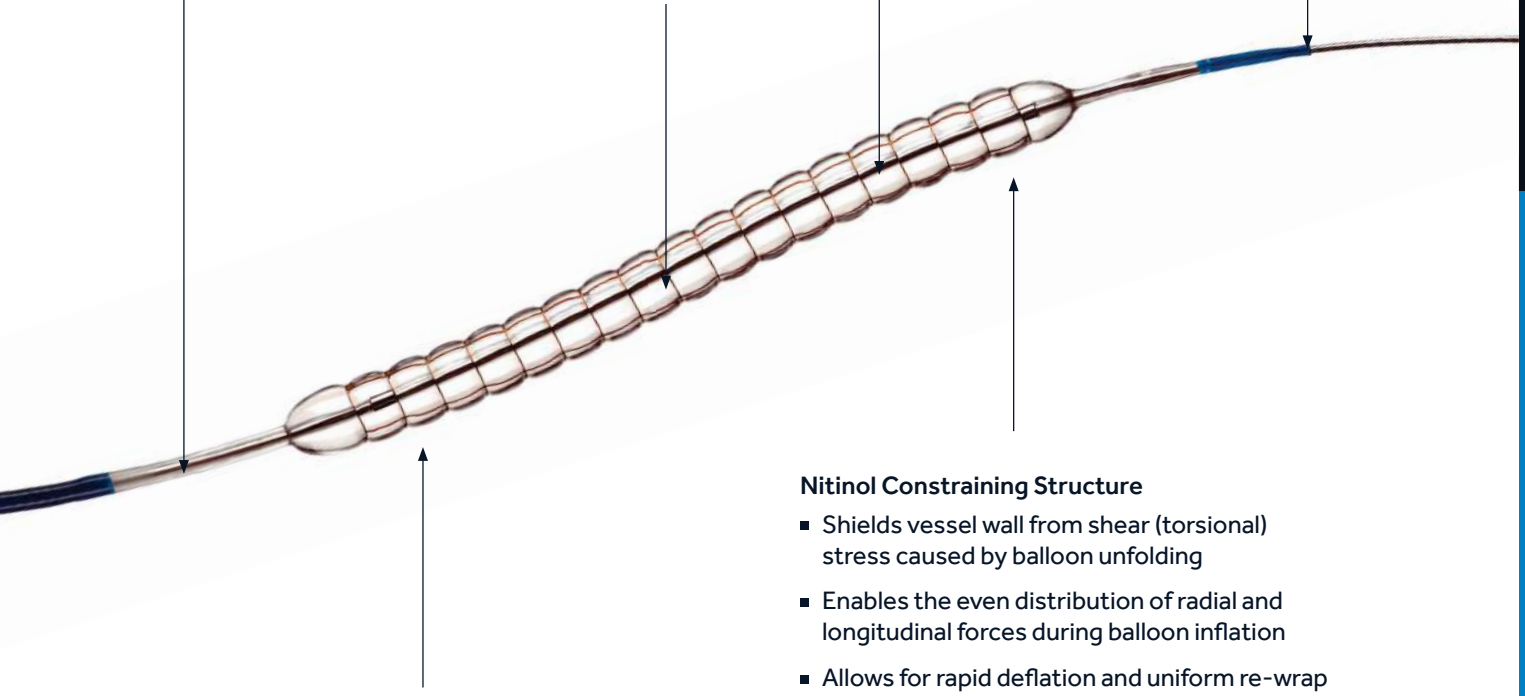
- Allow for plaque release, minimizing traumatic angioplasty effect

Pillows

- Provide predictable vessel dilation without cutting or scoring

Tapered Tip

- Enables lower entry profile for optimal lesion access



Nitinol Constraining Structure

- Shields vessel wall from shear (torsional) stress caused by balloon unfolding
- Enables the even distribution of radial and longitudinal forces during balloon inflation
- Allows for rapid deflation and uniform re-wrap

Nylon, Semi-Compliant Balloon

- Allows for optimal balloon pillow formation

Important Information: Indications, contraindications, warnings and instructions for use can be found in the product labeling supplied with each device.
Indications for Use: The Chocolate™ PTA Balloon Catheter is intended for balloon dilatation of lesions in the peripheral vasculature, including the iliac, femoral, ilio-femoral, popliteal, infra-popliteal, and renal arteries.
CAUTION: Federal (USA) law restricts these products for sale by or on the order of a physician.

DIRECTIONAL ATHERECTOMY

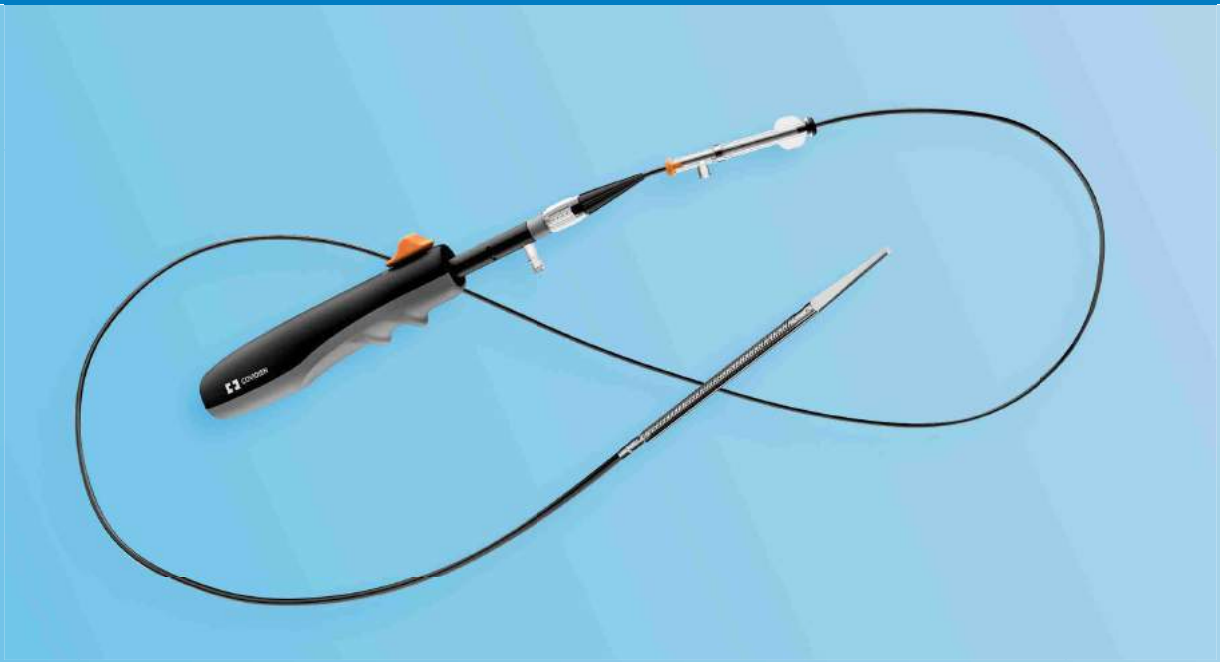
HawkOne™

Directional Atherectomy System

AORTIC

PERIPHERAL

VENOUS



One device for above and below the knee available in 6 F and 7 F sizes

Just as the name implies, the all-new HawkOne™ Directional Atherectomy System is one device that treats all morphologies[1], including severe calcium, and offers procedural efficiency with enhanced cutting, crossing, and cleaning capabilities.*

One device that:

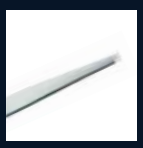
- Treats all morphologies
- Offers procedural efficiency
- Restores blood flow in PAD patients

CUTTING BLADE
Four contoured cutting blades engage and treat all atherosclerotic morphologies.

DRIVE SHAFT
A four layered, counter-wound design efficiently transmits power, offering a **25%** improvement* in torsional performance.

JOG
Optimized* for improved engagement in calcified lesions with no increase in cut depth.

CUTTER DRIVER
Ergonomically redesigned to effectively treat all atheroscletoric plaque.



DISTAL TIP
A tapered, radiopaque distal tip provides enhanced* deliverability and visualization under angiography.

* Comparison and claims in reference to the TurboHawk™ High Efficiency Cutter.

[1] HawkOne™ Bench Performance Verfication Testing (RE-PV13728); Calcified Cutting Efficiency Bench Validation Data (RE-PV13729)

HawkOne™

Directional Atherectomy System

Unlike orbital, laser, or rotational atherectomy, the HawkOne™ Directional Atherectomy System, with its directional cutting design, offers the greatest versatility when treating PAD. Whether your atherectomy goal is to maximize luminal gain[2], to create in-line flow, or to target eccentric circumferential disease, the HawkOne™ is your go-to choice.

TurboHawk™

Peripheral Plaque Excision System

AORTIC

PERIPHERAL

VENOUS

Key features of the TurboHawk™ device

Cutter selection

The TurboHawk™ device has two cutter options to choose from depending on the procedural need and lesion morphology.

- High-efficiency cutter – tackles soft-to-moderately calcified lesions
- Smooth cutter – treats soft-to-mild calcification

Drive shaft

The counter-wound drive shaft transmits power more efficiently to the cutting blade.

Micro Efficient Compression (MEC)™ technology

Tiny, laser-drilled holes in the nose cone allow excess fluid to escape so physicians are able to capture more plaque with each pass of the cutting blade, potentially reducing the number of insertions and procedure time.

- 45% increase in tissue collection capacity with MEC technology

Dual catheter jog

The bend in the catheter enhances contact between the cutting blade and lesion, collecting more plaque with each pass.

Distal flush tool

The distal flush tool effectively cleans and flushes plaque from the device with increased pressure.

Tapered tip

The low-profile tip of the TurboHawk™ small-vessel catheter allows the device to maneuver through tortuous anatomies and challenging lesions with greater ease.

Catheter alignment marker

This feature easily aligns the nose cone with the distal flush tool for faster cleaning.

TurboHawk™

Peripheral Plaque Excision System

Cutter driver FG02550 needs to be ordered with each TurboHawk™ device

INDICATIONS: The TurboHawk™ Peripheral Plaque Excision System is intended for use in atherectomy of the peripheral vasculature. The TurboHawk™ Catheter is not intended for use in the coronary, carotid, iliac or renal vasculature.

SilverHawk™

Peripheral Plaque Excision System

Our first-generation SilverHawk™ device treats PAD by removing soft-to-mild plaque buildup in leg arteries.

SilverHawk™ technology uses a directional cutting blade to shave plaque from the vessel—maximizing luminal gain. The plaque is captured in the nose cone of the device and safely removed from the vessel.

The SilverHawk™ device is backed by the landmark DEFINITIVE LE Clinical Study.

SilverHawk™

Peripheral Plaque Excision System

Full-time protection and control

Guide-catheter technology

- Provides excellent trackability, support and stability for ease of lesion crossing and accurate stent deployment

Working channel exit port distal to CCA balloon

- Provides lesion access and effective, efficient aspiration of debris*

Radiopaque markers

- Centrally located in each balloon for precise positioning and orientation

Optimal device selection

- Wires, stents and balloons

High-capture efficiency

- Removal of all sizes of debris**

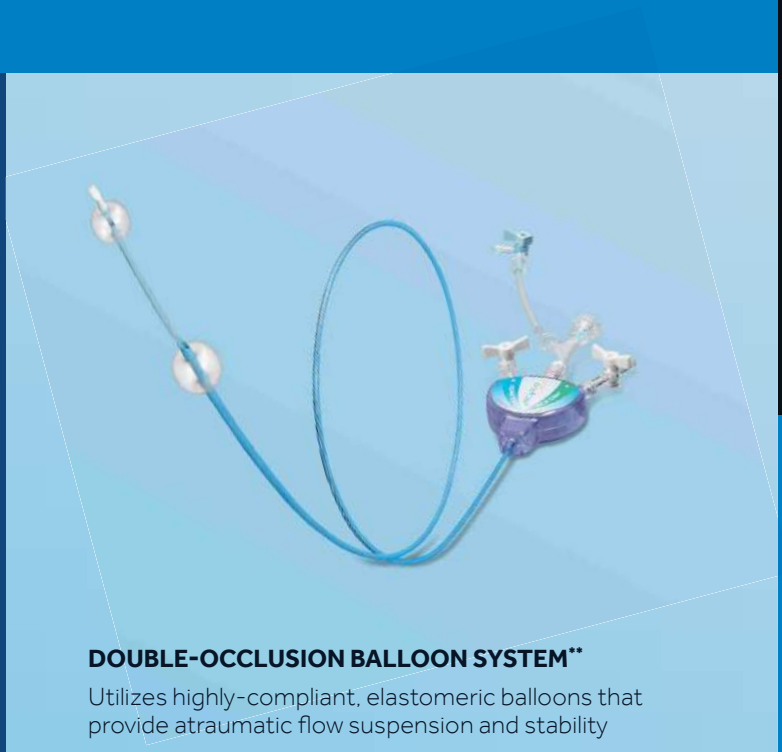
TECHNICAL SPECIFICATIONS

Balloon material	Compliant elastomeric rubber
Balloon marker distance	6 cm*
Distal shaft profile	5 F*
Recommended guidewire	0.035" (0.89 mm)
Balloon occlusion range	Up to 13 mm (CCA prox. balloon) Up to 6 mm* (ECA dist. balloon)

All sizes of debris are captured

* Double-Occlusion Balloon System only

**Bench test data on file at Medtronic, Inc. Test data not indicative of clinical performance.



DOUBLE-OCCLUSION BALLOON SYSTEM**

Utilizes highly-compliant, elastomeric balloons that provide atraumatic flow suspension and stability

MONO-OCCLUSION BALLOON SYSTEM

In case of occlusion of the external carotid artery (ECA), the system utilizes one highly-compliant, elastomeric balloon in the common carotid artery (CCA), that provides atraumatic flow suspension and stability.

SpiderFX™

Embolic Protection System

AORTIC

PERIPHERAL

VENOUS

The SpiderFX™ System is the only embolic protection device that works with any 0.014"or 0.018"guidewire of choice to cross the most challenging lesions.

The device offers enhanced visibility due to the nitinol frame with gold / tungsten marker. The extensive product portfolio permits treatment within a range of vessel sizes from 2 mm to 7 mm. The SpiderFX™ System is compatible with a guide catheter / sheath minimum ID of 0.066" (typically a 6 F guide catheter or 5 F access / long sheath). Check catheter manufacturer information for size compatibility.

The use of the SpiderFX™ device is strongly associated with:

- Lower costs
- Shorter inpatient hospital stays
- Lower ICU utilization rate
- Shorter OR times

Basket design

- The unique braided nitinol filter conforms to the vessel wall and maintains full-wall apposition during the intervention. Flow is directed into the filter's conical design, effectively capturing debris while maintaining blood flow

Visible markers

- A gold tungsten loop around the mouth of the filter, along with radiopaque markers, allows for precise positioning and verification of apposition before proceeding with the intervention

Wire movement

- The capture wire (available in 190 cm and 320 cm lengths) rotates and moves longitudinally, independent of the filter, for enhanced stability during the procedure
- The SpiderFX™ device is available in a variety of sizes (3 – 7 mm) for optimal fit and apposition in a range of vessels

SpiderFX™

Embolic Protection System

CROSSING CATHETERS

TrailBlazer™

Support Catheter

TrailBlazer™ support catheter is a single lumen over the wire support catheter with a low-profile, tapered tip.

Three platinum / iridium markers are embedded between the two layers of this seamless catheter.

TrailBlazer™ is designed for increased pushability for crossing tight stenoses and occlusions.

Each box includes:

Five catheters in single sterile pouches.

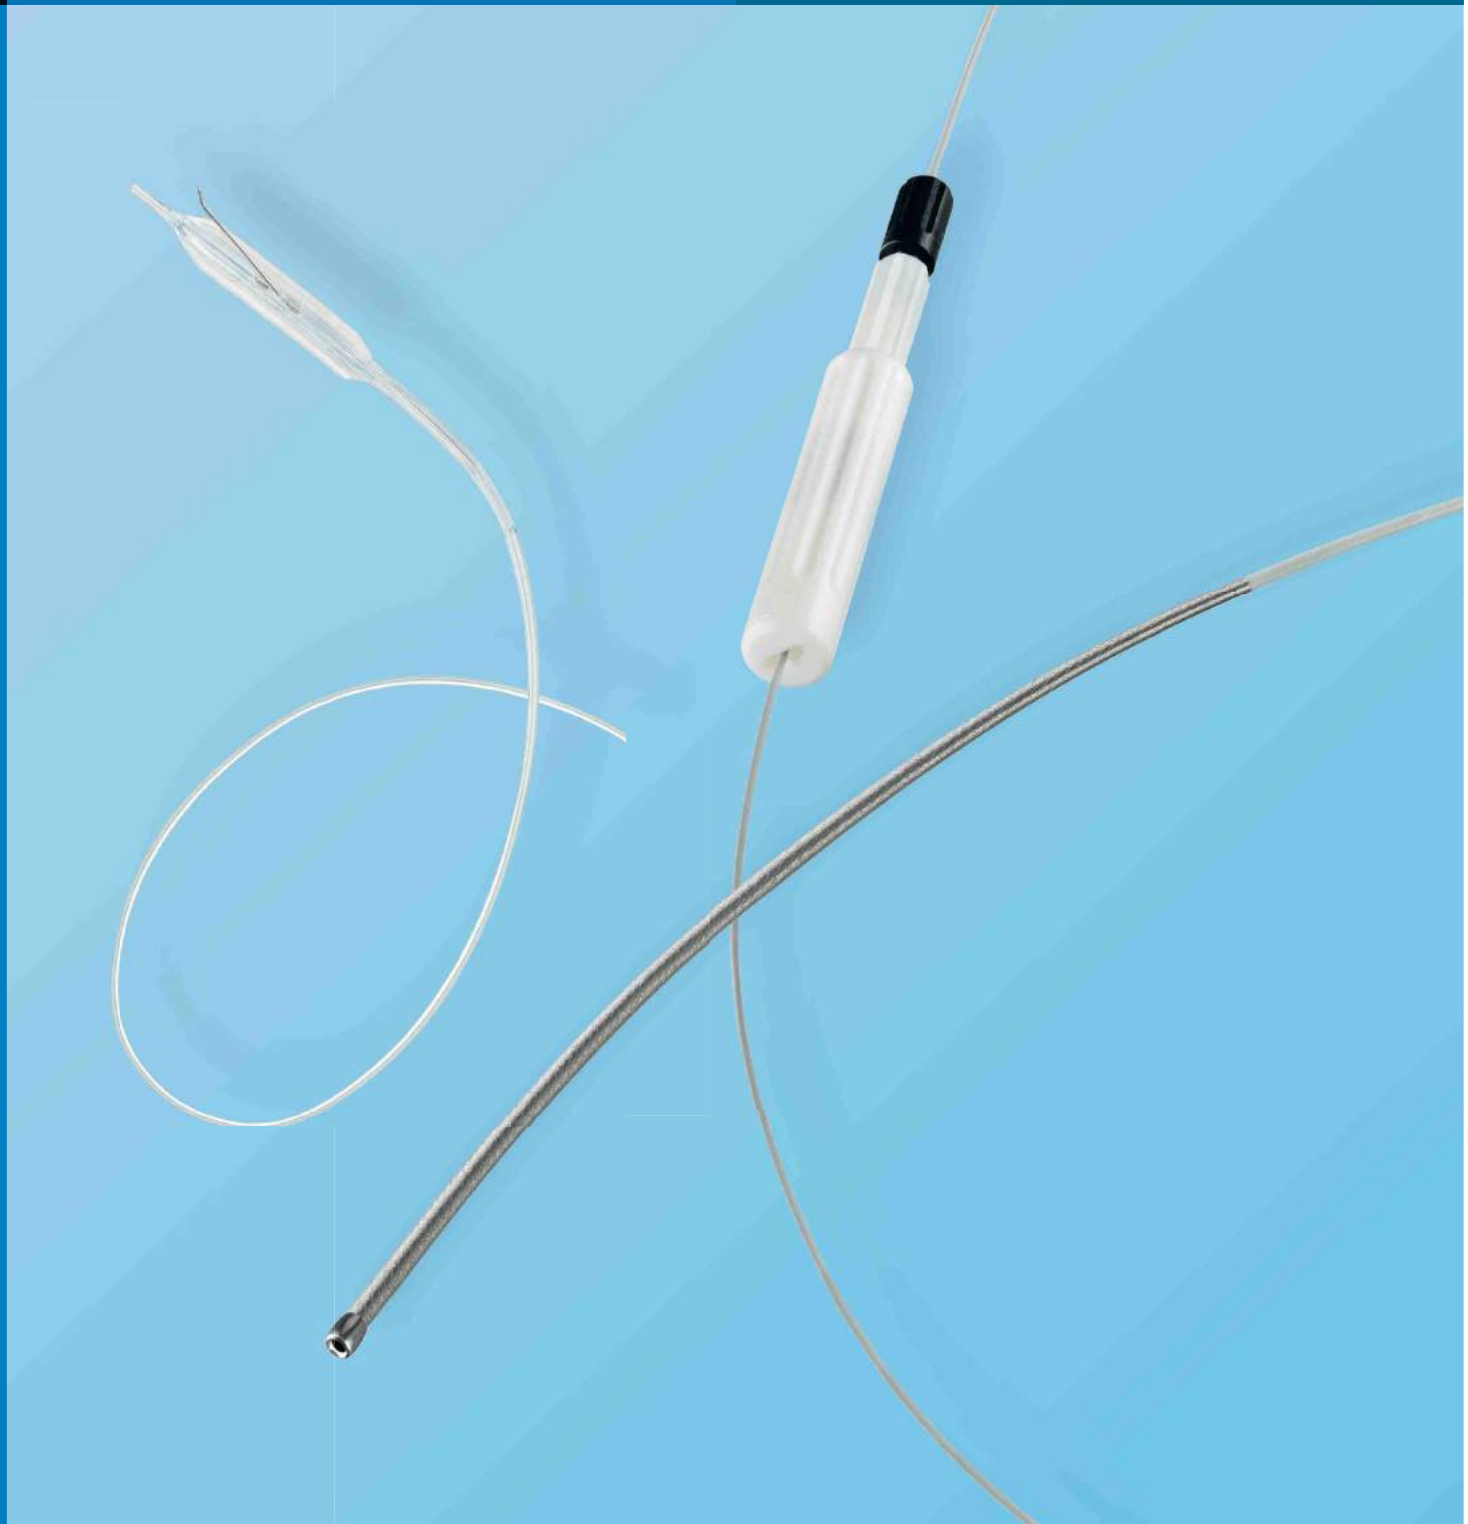
CTO DEVICES



Viance™

Crossing Catheter

A precision instrument designed to quickly and safely deliver a guidewire via the true lumen, the Viance™ crossing catheter puts the control of crossing where it belongs: in your hands.

Providing an effective frontline option for CTOs, the Viance™ crossing catheter enables you to utilize a proactive technique to cross total occlusions via the true lumen.

Low profile atraumatic tip

Designed for smooth crossing and minimizes risk of perforation.

Multi-coiled wire shaft

Provides 1:1 torque.

Fast-spin torque handle

Allows for tactile, self-controlled spinning motion enabling the Viance™ catheter tip to find its way through the lesion.

Enteer™

Re-Entry Catheter

AORTIC

PERIPHERAL

VENOUS

The Enteer re-entry system, consisting of the catheter and guidewire, gives you intuitive control to reliably target the true lumen from the subintimal channel above or below the knee.

The system requires no capital equipment. It's designed to be nothing less than a precise extension of your own expert hand.

Flat shaped self-orienting balloon

The Enteer™ catheter's unique balloon design self-orients towards the true lumen within the subintimal space when inflated.

180° and offset exit ports

Offset exit ports are located on each side of the device allowing the Enteer™ guidewire to re-enter the correct port into the true lumen.

OTW 0.014" & 0.018" guidewire compatible

Allows for flexibility during your case and minimizes guidewire exchanges.

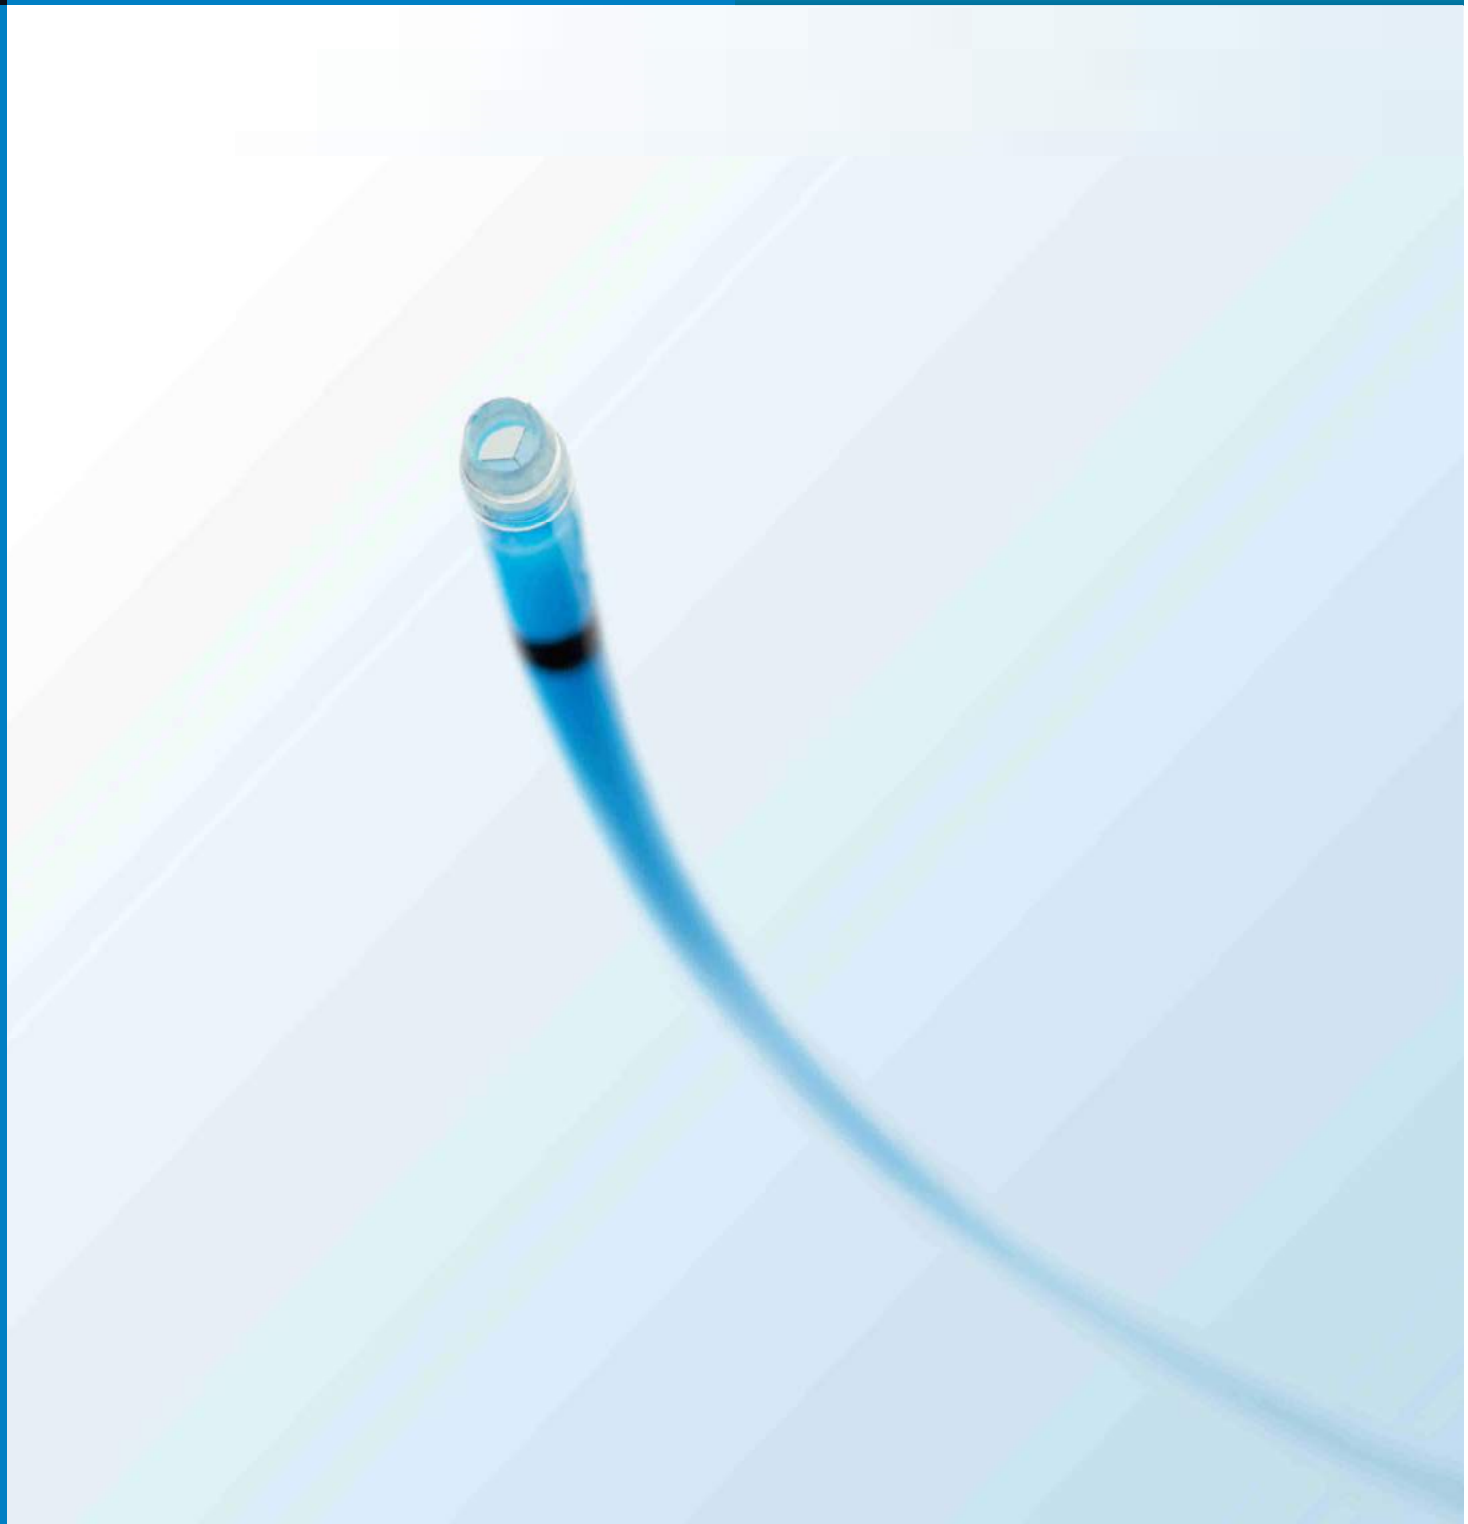
THROMBUS MANAGEMENT



Cragg-McNamara™

Valved Infusion Catheters

AORTIC

PERIPHERAL

VENOUS

The Cragg-McNamara™ Valved Infusion Catheter is a single lumen infusion catheter with a valved tip that allows infusion without the need of a tip-occluding guidewire.

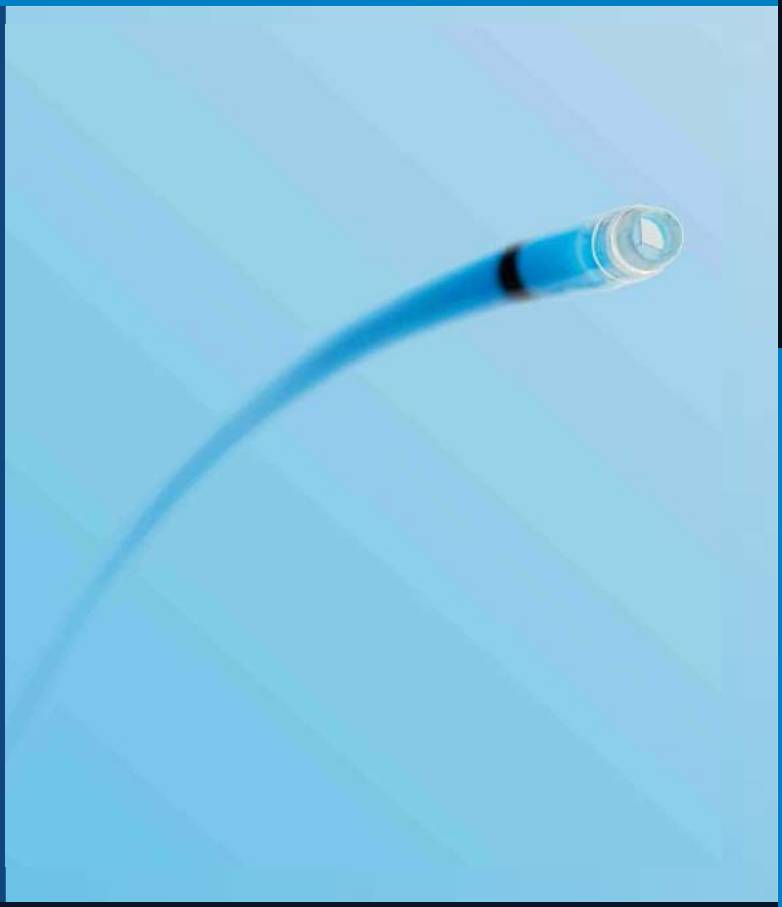
Large infusion lumen

Only 5 F Cragg-McNamara™ catheters give you the option to infuse without a guidewire in place, nearly doubling the infusion lumen area.

Streamlined patient care

Infuse overnight, without a guidewire in place which eliminates the risk of guidewire movement for simplified patient care.

Treat without a tip-occluding guidewire and sidearm adapter, which may contribute to cost savings.



Cragg-McNamara™

Valved Infusion Catheters

ProStream™

Multiple Sidehole Infusion Wires

The ProStream™ multiple sidehole infusion wires are constructed with an integral core wire, stainless steel coil and an outer Teflon™ layer.

The wires are available in a wide variety of sidehole infusion lengths.

The ProStream™ multiple sidehole infusion wires can be used coaxially through 5 F infusion catheters.

Unique Core Wire Design

- Radiopaque markers
- Eliminates the need for a separate core wire
- Provides torqueability for added control
- Is small enough to reach distal vessels alone or when used inside a 5 F coaxial system
- Enhances visualization and permits precise placement proximal and distal to the infusion length

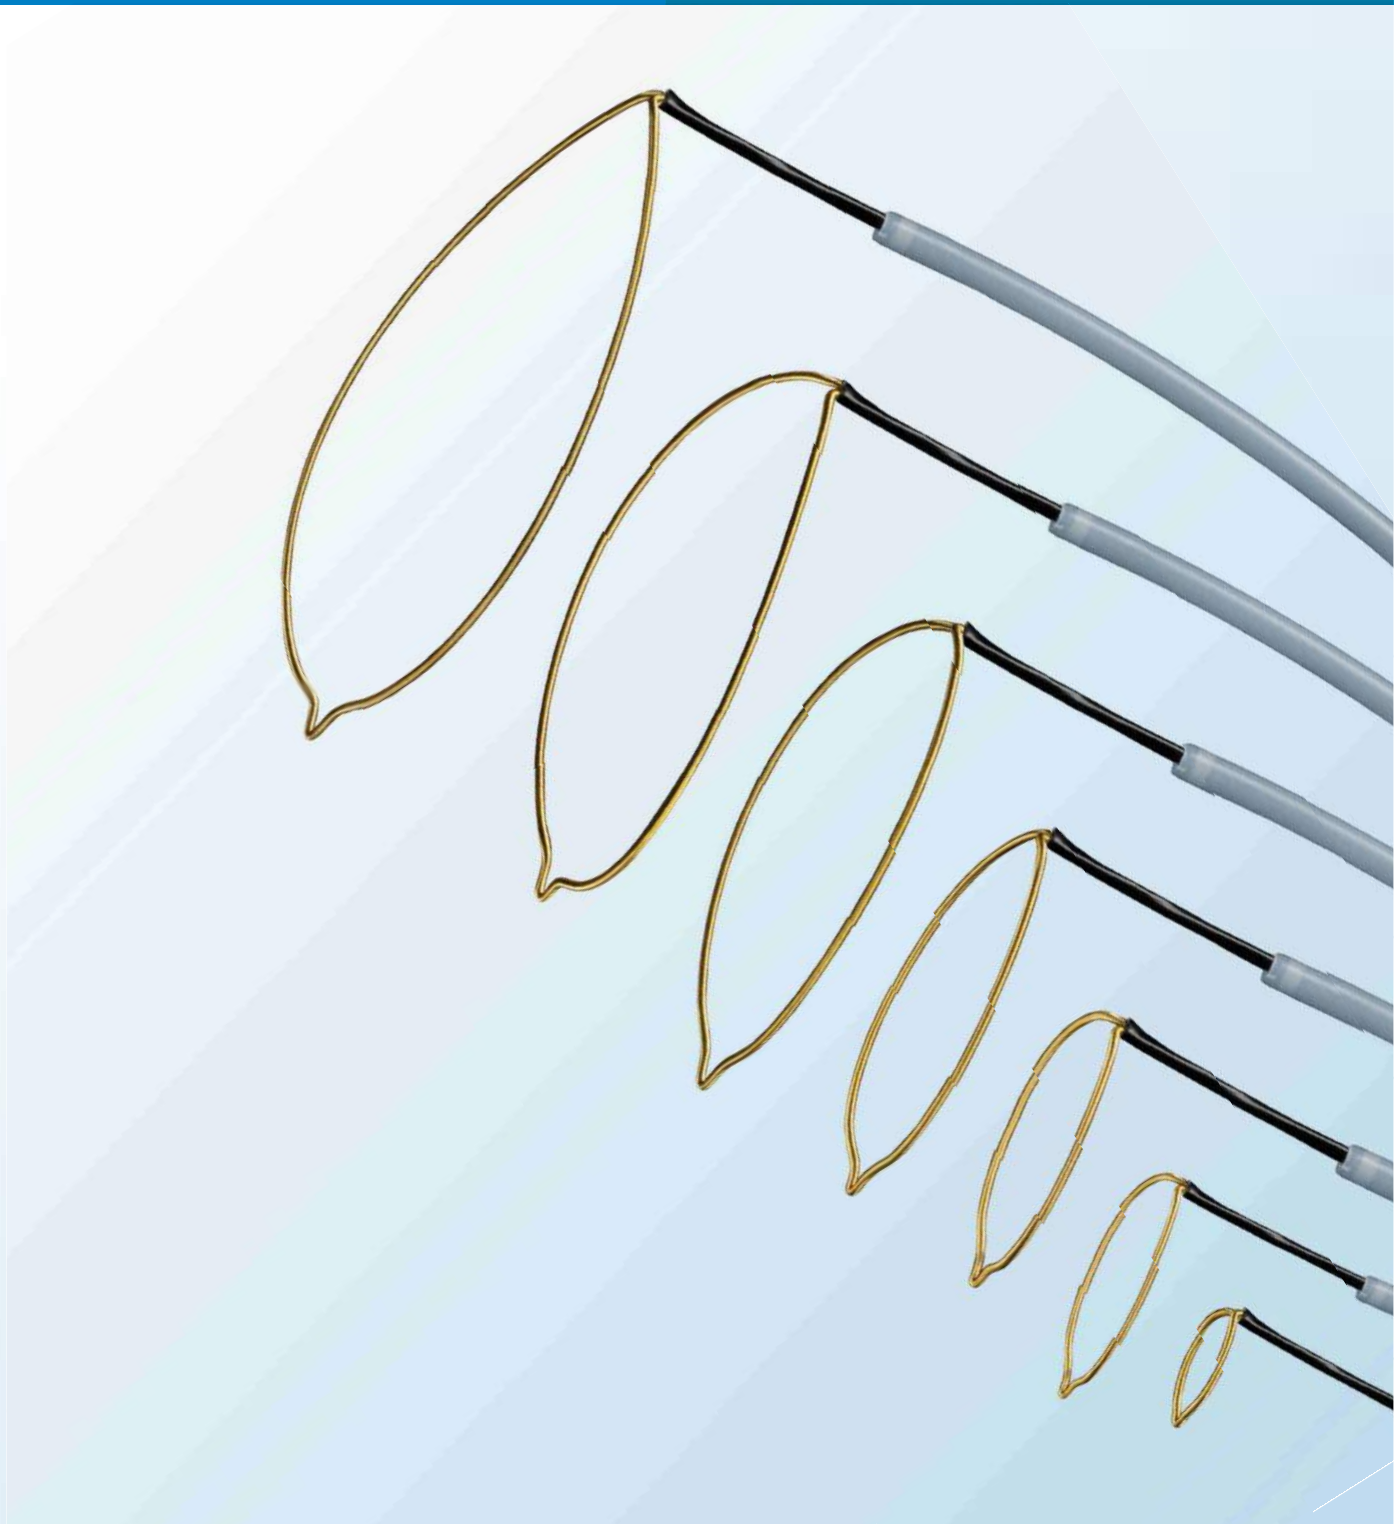
SNARES



Amplatz GooseNeck™

Snare Kit

Engineered for precise retrieval and manipulation, the Amplatz GooseNeck™ Snares and Microsnares (for small vessel applications) feature a highly radiopaque snare loop that is 90° to shaft of the snare. Other features include a nitinol shaft for kink resistance and gold tungsten loop for enhanced visualization.

Each kit includes:
One snare, one snare catheter, one introducer and one torque device.

INDICATIONS: The Onyx™ Mixer facilitates proper suspension of the Onyx™ tantalum for better visualization prior to use.
The proximal end of the Onyx™ Syringe Catheter Interface Adapter incorporates a standard ISO, female luer design to facilitate connection to the syringe.
The distal end is designed specifically to fit the hub of the 1.5 F UltraFlow™ HPC / Marathon™ 1.5 F and Apollo™ microcatheter.

Concerto™ Helix/3D

Detachable Coil System

AORTIC

PERIPHERAL

VENOUS

The Concerto™ Detachable Coil System is a stretch-resistant, detachable coil that can be repositioned easily prior to detachment and uses enlaced microfilament technology called LatticeFX™.

Softness with smooth navigation

- Soft coils track easily through tortuous anatomy to access distal locations*
- Soft distal pusher reduces microcatheter kickback during deployment*

Reliable deployment

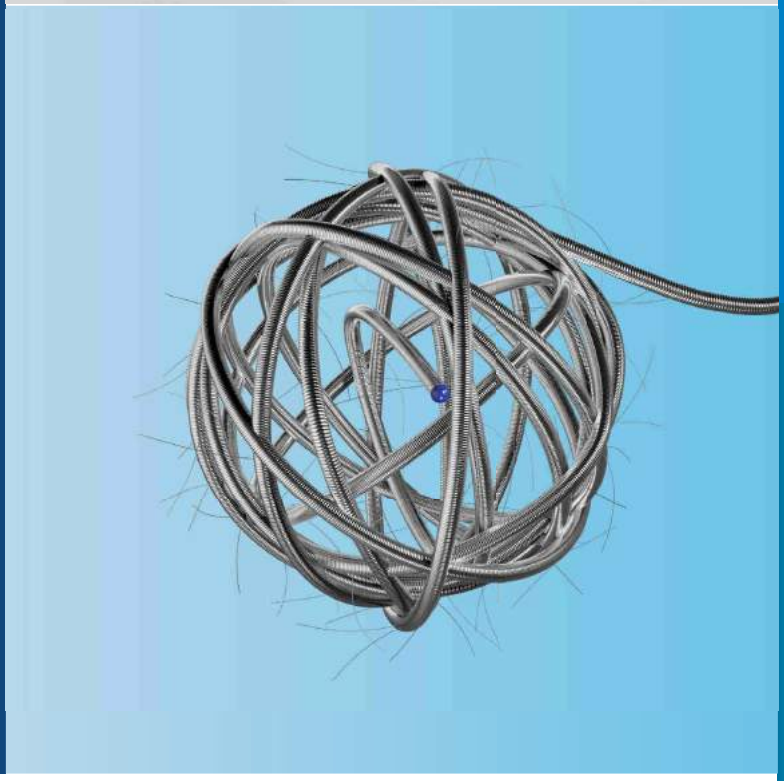
- Fully resheathable, after complete or partial deployment, and easily repositionable*
- Coil detaches instantaneously with proven reliability*

Optimal framing

- Conformable 3D shape with excellent stability*
- Designed to create a complex frame for filling*

Enhanced thrombogenicity

- Fibers increase thrombogenicity of the coil compared to bare metal equivalents†
- Nylon and PGLA fiber system features the unique LatticeFX™ technology which promotes thrombosis response†



*Internal data on file

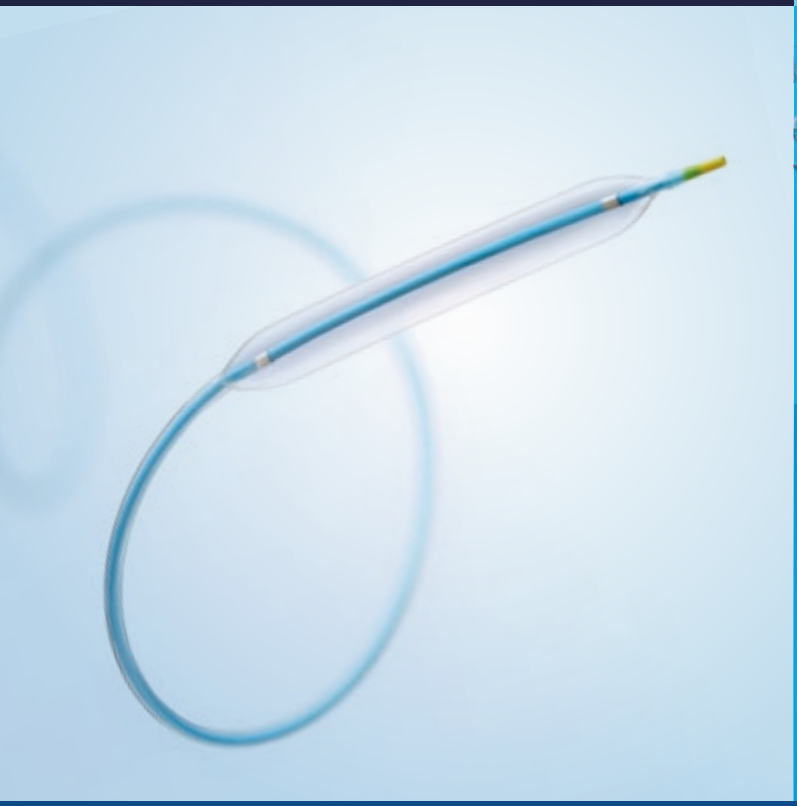
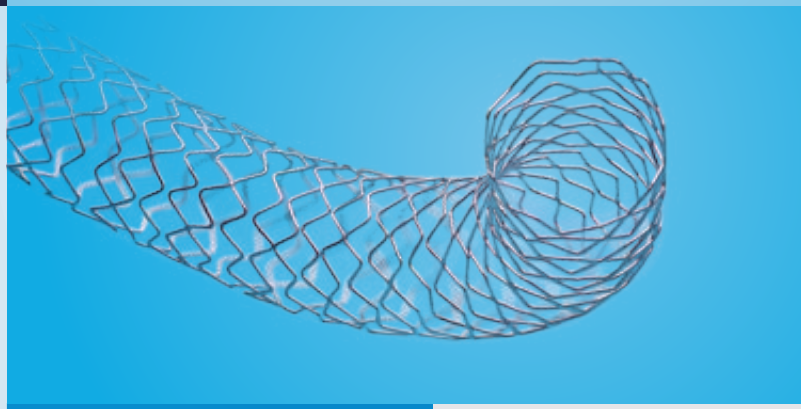
CORONARY VASCULAR AND RENAL DENERVATION PRODUCT CATALOGUE





Medtronic

Further, Together

INTRODUCTION

GOING "FURTHER, TOGETHER"

As a global leader in medical technology, services and solutions, Medtronic improves the health and lives of millions of people each year. We believe our deep clinical, therapeutic, and economic expertise can help address the complex challenges — such as rising costs, aging populations, and the burden of chronic disease — faced by families and healthcare systems today. But no one can do it alone. That's why we're committed to partnering in new ways and developing powerful solutions that deliver better patient outcomes.

We call this new approach **"Further,Together."** "Further," because we will continue to drive progress in innovation, and devise powerful solutions with proven clinical and economic value as the basis of our offerings and value proposition. And "Together." because we will forge new, different, and stronger partnerships to help our customers achieve their goal of delivering more seamless, integrated care across the healthcare continuum.

The main tenets of "Further, Together." focus on developing **meaningful innovations** at the therapy, procedural, and system levels; leveraging our capabilities and expertise to align value among the various stakeholders in the healthcare system; and expanding global access to healthcare — all while developing new partnerships with those who are committed to transforming healthcare.

Founded in 1949 as a medical repair company, we're now among the world's largest medical technology, services and solutions companies, employing more than 85,000 people worldwide, serving physicians, hospitals and patients in more than 155 countries. Join us in our commitment to take healthcare Further, Together. Learn more at **Medtronic.com**.

2. Do not expand to a diameter beyond 0.5 mm of its nominal diameter

CORONARY STENTS

Resolute Integrity™
Drug-Eluting Stent System. Everyday Performance

GENERAL CHARACTERISTICS

• Supplied sterile. • Items per box: 1 • Label color: White

PRODUCT DESCRIPTION

The Resolute Integrity zotarolimus-eluting rapid exchange coronary stent system effectively combines the superior deliverability[1] of the Integrity stent platform utilizing continuous sinusoid technology and offers key performance attributes with the proven long-term safety and efficacy of Resolute DES.[2]

2. Do not postdilate the 2.25–2.75-mm stents to greater than 3.50 mm.
   Do not postdilate the 3.00–4.00-mm stents to greater than 4.75 mm.

CORONARY STENTS

Resolute Onyx™ Drug-Eluting Stent System. Advanced Workhorse

GENERAL CHARACTERISTICS

• Supplied sterile. • Items per box: 1 • Label color: White

PRODUCT DESCRIPTION

Resolute Onyx zotarolimus-eluting coronary stent builds on the Integrity™ platform's acute procedural success[1] utilizing Continuous Sinusoid Technology and introduces Core Wire Technology for increased radiopacity, deliverability[2] and performance, the broadest size matrix to optimize treatment of complex clinical scenarios and the proven long-term safety and efficacy shown in the Global RESOLUTE Program

Lubricious hydrophilic coating for reduced drag

0.69 mm (2.1 F) proximal shaft

PowerTrac™ technology enhances deliverability

Resilient hypotube for high shaft column strength

Enhanced balloon material improves flexibility and trackability

0.91 mm (2.7 F) distal shaft 4.50–5.00 mm: 1.07 mm (3.2 F)

Platinum iridium marker bands enhance visibility

Reduced catheter profile under the stent enables lower crossing profiles

BARE METAL STENTS

CORONARY STENTS

Integrity™
Bare-Metal Rapid Exchange Coronary Stent System

GENERAL CHARACTERISTICS

• Supplied sterile • Items per box: 1

PRODUCT DESCRIPTION

The Integrity™ Bare-Metal Rapid Exchange Coronary Stent System is a low-profile advanced cobalt alloy stent manufactured using Continuous Sinusoid Technology and mounted on the extended-pressure, semi-compliant, rapid exchange MicroTrac delivery system with a low-profile exchange joint for 6 F KBT and 7 F KST* compatibility and an enhanced tip design.

BALLOON DILATATION CATHETERS

NC Euphora™
Noncompliant Balloon Dilatation Catheter

GENERAL CHARACTERISTICS

• Supplied sterile • Items per box: 1

PRODUCT DESCRIPTION

From material to design every NC Euphora™ balloon component was developed to provide superior growth profile and deliverability, excellent recross and high-pressure capability

FEATURES

- Strong, durable and flexible LIGHT™ (Low Inflation Growth, High Track) balloon material
- Low profile platinum iridium marker bands
- Optimized tapered tip
- PowerTrac™ shaft technology
- Low-profile inner/outer shaft

BALLOON DILATATION CATHETERS

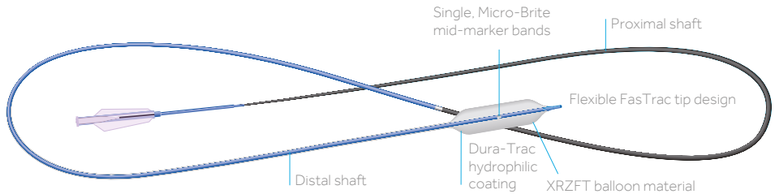
Sprinter Legend™ RX 1.25 mm
Semicompliant Rapid Exchange Balloon Dilatation Catheter

GENERAL CHARACTERISTICS

- Supplied sterile
- Items per box: 1

PRODUCT DESCRIPTION

The Sprinter Legend™ RX 1.25 mm semicompliant rapid exchange balloon dilatation catheter, with its SuperCrosser Zerofold Technology, (no balloon wrap or shoulders) helps provide your best chance at crossing even the most difficult lesions



FEATURES

- Lesion entry profile: 0.41 mm (0.016")
- Crossing profile: 0.5 mm (0.020")
- Profile over mid-marker: 0.6 mm (0.024")
- No wrapped material allows for ultra-low catheter profile. Expands from a straight tube into a balloon
- No balloon shoulders,[1] Facilitates balloon passage through the lesion

▪ Compatible with 6 F kissing balloon technique.

▪ Any combination of two Sprinter Legend rapid exchange balloon models (1.25 - 3.50 mm) can be used for the Kissing Balloon Technique within a 6 F (MGCID 0.070") guide catheter. Test data on file at Medtronic, Inc.

BALLOON DILATATION CATHETERS

Sprinter Legend™ 1.25 OTW
Semi-compliant Balloon Dilatation Catheter

GENERAL CHARACTERISTICS

▪ Supplied sterile ▪ Items per box: 1

PRODUCT DESCRIPTION

Sprinter Legend™ 1.25 OTW semicompliant balloon is designed to maximise your chances for a successful outcome on highly complex, challenging and tightly occluded lesions.

FEATURES

- Superb push and track—for easier lesion access
- Ultralow crossing profiles—for advanced lesion crossing
- Excellent postinflation profile—for smooth recross
- 152-cm catheter length—to facilitate extended vasculature

Nominal pressure[1] | Rated burst pressure[2]

1. Nominal pressure: the pressure at which the balloon approximates its labeled diameter
2. Rated burst pressure: the maximum pressure to which a balloon is designed to be inflated – do not exceed.

TECHNICAL INFORMATION

Catheter length	138 cm
Gold-swaged marker bands	
1.5mm	Single
2.00 – 4.00mm	Double
Coating	Dura-Trac selective
Balloon material	Falcrum™
MiniWrap	
1.5mm	2 folds
2.00 – 3.75mm	3 folds
4.00 – 5.00mm	5 folds
Shaft dimensions for 1.5 – 3.5mm	
Proximal	3.2 F
Distal	2.4 F / 2.6 F
Shaft dimensions for 3.75 – 4.0mm	
Proximal	3.2 F
Distal	2.5 F
MGCID	1.42 mm/0.056"

BALLOON DILATATION CATHETERS

NC Sprinter™
Noncompliant Rapid Exchange Balloon Dilatation Catheter

GENERAL CHARACTERISTICS

• Supplied sterile • Items per box: 1

PRODUCT DESCRIPTION

The NC Sprinter™ noncompliant rapid exchange balloon dilatation catheter combines proven Sprinter technology with the high-pressure capability and controlled expansion of a noncompliant balloon-performance for optimal stenting results.

DRUG ELUTING BALLOONS

DRUG ELUTING BALLOONS

In.Pact Falcon™ Paclitaxel-Eluting Coronary Balloon Catheter

GENERAL CHARACTERISTICS

- Supplied sterile; items per box: 1

PRODUCT DESCRIPTION

The balloon's unique FreePac coating combines urea and paclitaxel molecules into a compound that provides increased drug solubility and optimal diffusion into the vessel wall, short-term drug delivery and continued antirestenotic protection.

FEATURES

- Paclitaxel drug
- Urea drug carrier
- Falcon™ Bravo semi-compliant balloon

GUIDE CATHETERS

CORONARY
GUIDE CATHETER FAMILY

LAUNCHER™

- Balanced guide for stable and consistent performance
- Workhorse construction suitable for a variety of anatomies and takeoffs
- Flexible distal segment for manipulation if case requires
- Large 6F I.D. (0.071"). allows for increased contrast flow for enhanced visualization
- Multiple guide catheter platforms provide options for guide engagement

SHERPA NX™ ACTIVE

- Soft distal segment for active engagement with soft tip and advanced material liner for consistent low-friction device passage
- Distal segment allows for manipulation of the catheter to obtain stable position
- Distal segment can reshape in anatomy
- Large I.D. allows for enhanced contrast flow and better visualization

SHERPA NX™ BALANCED

- Balanced guide for stable consistent performance with soft tip and advanced HDPE liner for smooth, low-friction device passage
- Workhorse construction suitable for a variety of anatomies and takeoffs
- Flexible distal segment for manipulation if case requires
- Supportive secondary curve for increased backup support and curve retention
- Large ID for maximum contrast flow and absolute visualization

1. SH available on all curves. **2.** Custom built curves also available.
The curve recommendations on this sheet are not intended to replace patient specific clinical judgement.
Caution: Federal (USA) law restricts these devices to sale by or on the order of a licensed healthcare practioner.

CORONARY
GUIDE CATHETER FAMILY

ZUMA 2™

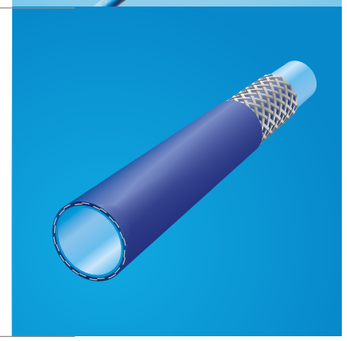
- Soft, flexible distal segment for atraumatic engagement
- Soft tip polymer construction to minimize vessel trauma

ZUMA™

- Supportive stiff guide for passive use
- Available sizes: 6F - 9F

UNIQUE FULL WALL TECHNOLOGY

- Encapsulated flat wire braid enables thinner, robust walls without compromising support or retention
- Designed for large lumens and enhanced flexibility without loss of support



CORONARY
GUIDE CATHETER FAMILY

Femoral approach

COMMON ANATOMIES

Three Types of Ostial Takeoffs (Can occur in right or left arteries)

Three Types of Aortic Roots

LEFT CURVES

Normal Left Takeoffs

NORMAL aortic root
Standard: JL 4.0
Specialty: EBU 3.75, EBU 4.0, JCL 4.0

NARROW aortic root
Standard: JL 3.5
Specialty: EBU 3.5, JCL 3.5

DILATED aortic root
Standard: JL 4.5
Specialty: EBU 4.5, JCL 4.5

Superior Left Takeoffs

NORMAL aortic root
Standard: JL 4.0
Specialty: EBU 3.5, Champ 3.0

NARROW aortic root
Standard: JL 3.5
Specialty: EBU 3.0, Champ 2.5

DILATED aortic root
Standard: JL 4.5
Specialty: EBU 4.5, Champ 3.5

Inferior Left Takeoffs

NORMAL aortic root
Standard: JL 4.0
Specialty: EBU 3.75, EBU 4.0

NARROW aortic root
Standard: J L 3.5
Specialty: EBU 3.5

DILATED aortic root
Standard: JL 4.5
Specialty: EBU 4.5

Normal Takeoffs and Short Left Mains

NORMAL aortic root
sl 4.0, SAL 2.0

NARROW aortic root
sl 3.5, SAL 1.0

DILATED aortic root
sl 4.5, SAL 2.5

RIGHT CURVES

Normal Right Takeoffs

NORMAL aortic root
Standard: JR 4.0, RMHS II
Specialty: Champ™ 1.5, RBU 4.0, JCR 4.0

NARROW aortic root
Standard: JR 3.5
Specialty: Champ 1.5, RBU 3.5, JCR 3.5

DILATED aortic root
Standard: JR 4.5
Specialty: Champ 2.0, JCR 4.5

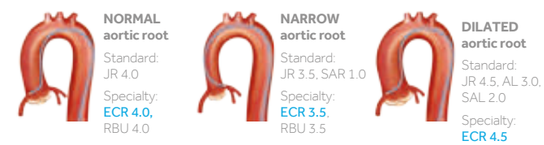
Superior Shepherd's Crook Right Takeoffs

NORMAL aortic root
Standard: SCR 3.5, HS II
Specialty: MAC 3.5 Champ 1.5

NARROW aortic root
Standard: SCR 4.0, HS I
Specialty: MAC 3.0 Champ 1.0

DILATED aortic root
Standard: SCR 5.0, HS III
Specialty: Champ 1.5

Inferior Right Takeoffs



NORMAL aortic root
Standard: JR 4.0
Specialty: ECR 4.0, RBU 4.0

NARROW aortic root
Standard: JR 3.5, SAR 1.0
Specialty: ECR 3.5, RBU 3.5

DILATED aortic root
Standard: JR 4.5, AL 3.0, SAL 2.0
Specialty: ECR 4.5

Normal Takeoffs and Proximal Lesions in the RCA

Standard: RCB, HS II
Specialty: Champ 1.5

IMA TO LAD
Standard: IMA 90 cm
Specialty: Champ 0.5

CORONARY
GUIDE CATHETER FAMILY

Curve Selection
Transradial approach

EBU EXTRA BACKUP
Patented curve design for left coronary arteries
Sizing:
JL35 = EBU35
JL40 = EBU35
JL50 = EBU40

JR
Standard right coronary artery curve
Sizing:
Same as femoral approach

JL
Standard left coronary artery curve with open primary curve
Sizing:
Downsize the curve by 0.5 mm from what is used for femoral approach

AL
Left coronary artery curve designed for maximum backup support with secondary curve seated firmly in aortic root
Sizing:
Same as femoral

AR (AMPLATZ RIGHT)
Right coronary artery curve providing maximum backup support with secondary curve seated firmly in aortic root
Sizing:
Same as femoral

AL20
Designed for left coronary artery. Provides backup support with secondary curve seated firmly in aortic root
Sizing:
Same as femoral approach

MULTIPURPOSE – MB1/MP2
Gentle curve design provides ease of engagement for lateral to inferiororiented arteries
Sizing:
One size fits all

MRADIAL
Designed for left and right coronary artery engagement. Provides excellent support from contralateral wall and aortic root leverage
Sizing:
One size fits all

MAC
Multi-aortic curve for left or right coronary artery
Sizing:
Lateral takeoff and small root-MAC30. Superior takeoff and small root-MAC35/40. Superior takeoff and large root-MAC40. Lateral and large root-MAC35/40

MAC3030
Universal guide for left and right coronary artery engagement
Sizing:
One size fits all

ERADL
Delivers excellent backup support and easy engagement
Sizing:
Easy Radial Left for standard size aorta. Easy Radial Left Long Tip for enlarged aorta. Easy Radial Left Short. Tip for narrowed aorta

ERADR
Excellent backup support and easy engagement
Sizing:
Easy Radial Right for standard size aorta. Easy Radial Short Tip for narrowed aorta

RRAD
Designed for both lateral and superior-oriented right coronary arteries. Modification of the MRADIAL curve. Provides good support from contralateral wall
Sizing:
One size fits all

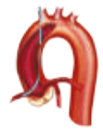
LARA
Provides excellent support from aortic root leverage and contralateral wall
Sizing:
One size fits all with Judkins-like engagement

ALR12
Designed for right coronary artery. Provides maximum backup support with secondary curve seated firmly in aortic root
Sizing:
One size fits all

MRESS
Designed for right coronary artery. Provides excellent support from contralateral wall and aortic root leverage
Sizing:
One size fits all

HOCKEY STICK
Multipurpose curve is easy to engage for right coronary artery. Gentle primary curve and long distal tip for device delivery
Sizing:
Available in HSI for <3.5 cm aortic roots and HSII for 3.5–4.0 cm aortic roots RMHSII (Relaxed Modified HSII) has a relaxed primary curve

PAPA
Designed for left and right coronary arteries with contralateral wall support, and also available in PAPA 1, which has an angled tip
Sizing:
One size fits all



MULTIPURPOSE SHORT TIP
Standard curve for right coronary artery and may be helpful for inferior takeoffs
Engagement Recommendations:
Use a gentle clockwise rotation technique similar to the Judkins Right coronary approach and the MAC Pullback may be required to carefully engage the artery
Sizing:
Same as femoral approach

CURVE ABBREVIATION KEY

ERAD = Easy Radial
EBU = Extra Backup
HS = Hockey Stick
LCB = Left Coronary Bypass
MAC = Multi-aortic Curve
NOTO = No Torque Right
RBU = Right Backup
RCB = Right Coronary Bypass
RMHS = Relaxed Modified Hockey Stick
SAL = Short Amplatz Left
SL = Short Left

NOTE: Curves in BLUE text indicate type of curve used in illustration.

Note: SH available on all curves

CORONARY
GUIDE CATHETERS

Launcher™ Guide Catheter
Left Coronary Curve

GENERAL CHARACTERISTICS

- Supplied sterile Items per box: 1
- Label colour: 5F: Grey, 6F: Green, 7F: Orange, 8F: Blue
- Lumen inner diameter: 5F = 0.058", 6F = 0.071", 7F = 0.081", 8F = 0.090"

PRODUCT DESCRIPTION

Full-Wall Technology construction provides kink resistance and stable torque control; large ID allows for increased contrast flow for enhanced visualization. Vest-Tech Nylon outer jacket provides excellent hub to tip radiopacity.

FEATURES

- Custom lengths and custom curve program available
- Over 230 specialty curves available
- SH available on all curves

INTERVENTIONAL GUIDEWIRES

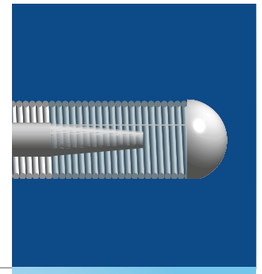
GUIDEWIRE FAMILY

Medtronic offers a wide array of guidewires
to support different clinical needs

ZINGER™

Stainless steel workhorse guidewire

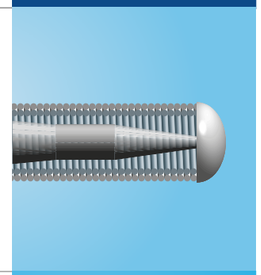
- When you need steerability and torque control
- Stainless steel core wire provides torque transmission for advanced steerability and control. Available in a range of support levels for a variety of clinical situations: light, marker, medium and support.



INTUITION™

Advanced workhorse guidewire

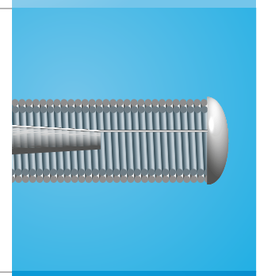
- Confidently cross your more challenging workhorse cases
- Torque performance and one-gram tip weight give you precision and confidence during your more difficult workhorse cases. Accu-Core Technology provides torque and improved crossability.



COUGAR™

Nitinol workhorse guidewire

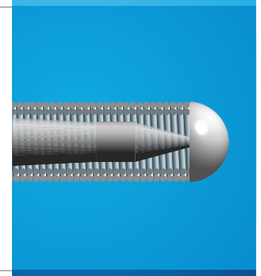
- When you need trackability for distal and tortuous access
- Nitinol core wire provides steerability and support through tortuous anatomy and for multivessel treatment. Double coil tip is soft and atraumatic for shape retention.



PROVIA™

Crossing guidewire

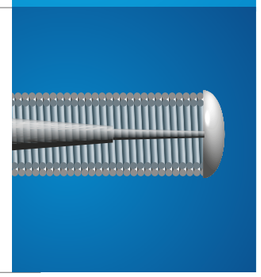
- Designed to cross your most demanding lesions
- Available in a wide range of weights and lengths. Accu-Core Technology offers torque performance, tactile feel, improved lesion penetration and a 1-mm nonhydrophilic tip.



THUNDER™

Extra-support guidewire

- When you need extra support
- Stainless steel, core-to-tip design provides torque, tip control and steering for situations requiring extra support.



INTERVENTIONAL GUIDEWIRES

Zinger™ Light
Stainless steel workhorse guidewire

GENERAL CHARACTERISTICS

• Supplied sterile • Items per box: 5

PRODUCT DESCRIPTION

The Zinger™ line of guidewires is the latest advancement in highly trackable guidewires with excellent torque control.

- Available with Pro/Pel™ silicone coating or Hydro-Track™ hydrophilic coating for more treatment strategies.
- Zinger™ is available in various support levels as well as a marker version to meet your preference and clinical challenge.
- 2-cm radiopaque tip for visibility.
- Zinger™ Light is a highly trackable light support guidewire with floppy tip for tortuous anatomy.

INTERVENTIONAL GUIDEWIRES

Zinger™ Marker
Stainless steel workhorse guidewire

GENERAL CHARACTERISTICS

- Supplied sterile
- Items per box: 5

PRODUCT DESCRIPTION

The Zinger™ line of guidewires is the latest advancement in highly trackable guidewires with excellent torque control.

- The Hydro-track hydrophylic coating offers optimal lubricity and durability.
- Zinger™ is available in various support levels as well as a marker version to meet your preference and clinical challenge.
- Zinger™ Marker is a light support guidewire with two radiopaque markers for reference measure of vessels and lesions.

Zinger™ Medium
Stainless steel workhorse guidewire

GENERAL CHARACTERISTICS

- Supplied sterile
- Items per box: 5

PRODUCT DESCRIPTION

The Zinger™ line of guidewires is the latest advancement in highly trackable guidewires with excellent torque control.

- The Hydro-track hydrophylic coating offers optimal lubricity and durability.
- Zinger™ is available in various support levels as well as a marker version to meet your preference and clinical challenge.
- Zinger™ Medium is a medium weight "workhorse" wire, ideal for general use in varied anatomy.

INTERVENTIONAL GUIDEWIRES

Thunder™
Extra-Support guidewire

GENERAL CHARACTERISTICS

• Supplied sterile • Items per box: 5 • Label color: Silver

PRODUCT DESCRIPTION

The Thunder™ Guidewire has a stainless steel core-to-tip design which provides enhanced support and stability while maintaining excellent torque characteristics with precise tip control and steering.

- 11 cm transition zone (rail) which provides support for accurate device placement
- Available in Pro/Pel Silicone coating for track ability and smooth device delivery
- 3 cm Radiopaque Tip for visibility

ASPIRATION CATHETERS

ASPIRATION CATHETERS

Export Advance™

GENERAL CHARACTERISTICS

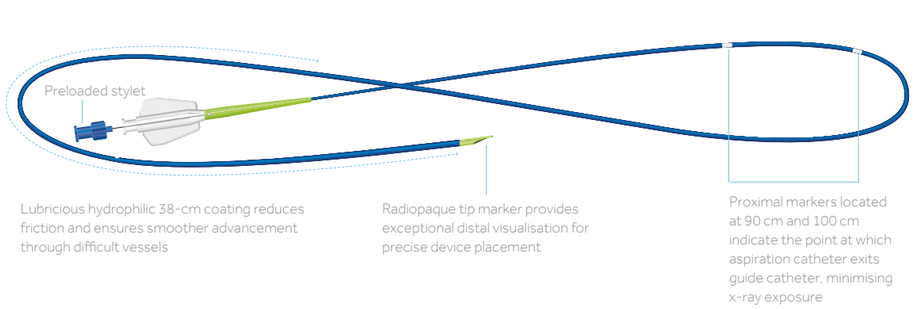
• Supplied sterile • Items per box: 1 • Includes two syringes, one filter cup and extension line with stopcock.

PRODUCT DESCRIPTION

The Export Advance™ aspiration catheter features a preloaded stylet and manual locking syringe to remove embolic material throughout the arterial system.

FEATURES

- Full Wall Variable Braiding Technology shaft construction
- Preloaded stylet
- Buddy wire compatibility
- Large extraction lumen (0.044" proximal; 0.043" distal)
- Soft, short, forward-facing tip



TECHNICAL INFORMATION

Distal O.D. (in.)	0.067
Lumen I.D. (in.)	0.043 (distal), 0.044 (proximal)
Length (cm)	140
Braiding	Variable, hub to tip
Tip design	Soft, short, beveled tip
Coating	Hydrophilic (38 cm)
Syringe (cc)	2 x 30
Product code	ADVANCECE

ASPIRATION CATHETERS

Export™ AP

GENERAL CHARACTERISTICS

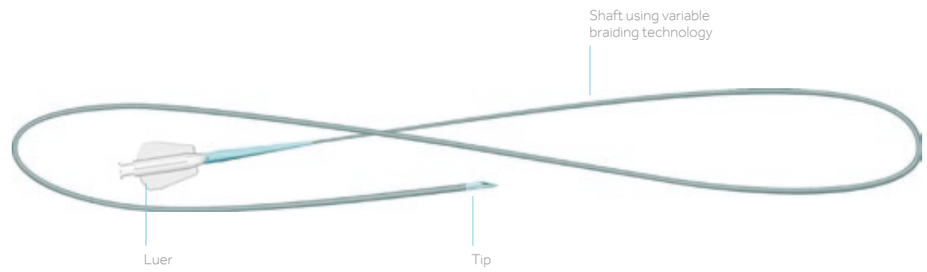
• Supplied sterile • Items per box: 1 • Includes two syringes, one filter cup and extension line with stopcock.

PRODUCT DESCRIPTION

The Export™ AP aspiration catheter uses a manual locking syringe to remove embolic material throughout the arterial system.

FEATURES

- Full Wall Variable Braiding Technology shaft construction
- Extended hydlophilic coating (40 cm)
- Forward-facing atraumatic tip



TECHNICAL INFORMATION

Lumen I.D. (in.)	0.043
Lumen O.D. (in.)	0.068
Guide catheter compatibility (in.)	6F (min ID 0.070)
Guide wire compatibility (in.)	0.014
Delivery System	Rapid Exchange
Length (cm)	140
Radio-opaque marker	1.5 mm from distal tip
Product code	EXPORTAPCE

ASPIRATION
CATHETERS

Export™ 7 F

GENERAL CHARACTERISTICS

- Supplied sterile.
- Includes two syringes and two filters.

PRODUCT DESCRIPTION

The Export™ Aspiration Catheter uses a manual locking syringe to remove embolic material throughout the arterial system. Export™ 7 French delivers double the aspiration power.

FEATURES

- Distal lumen (in.) 0.050
- Lumen O.D. (in) 0.078
- Guide catheter compatibility (in.) 7F (min ID 0.080)

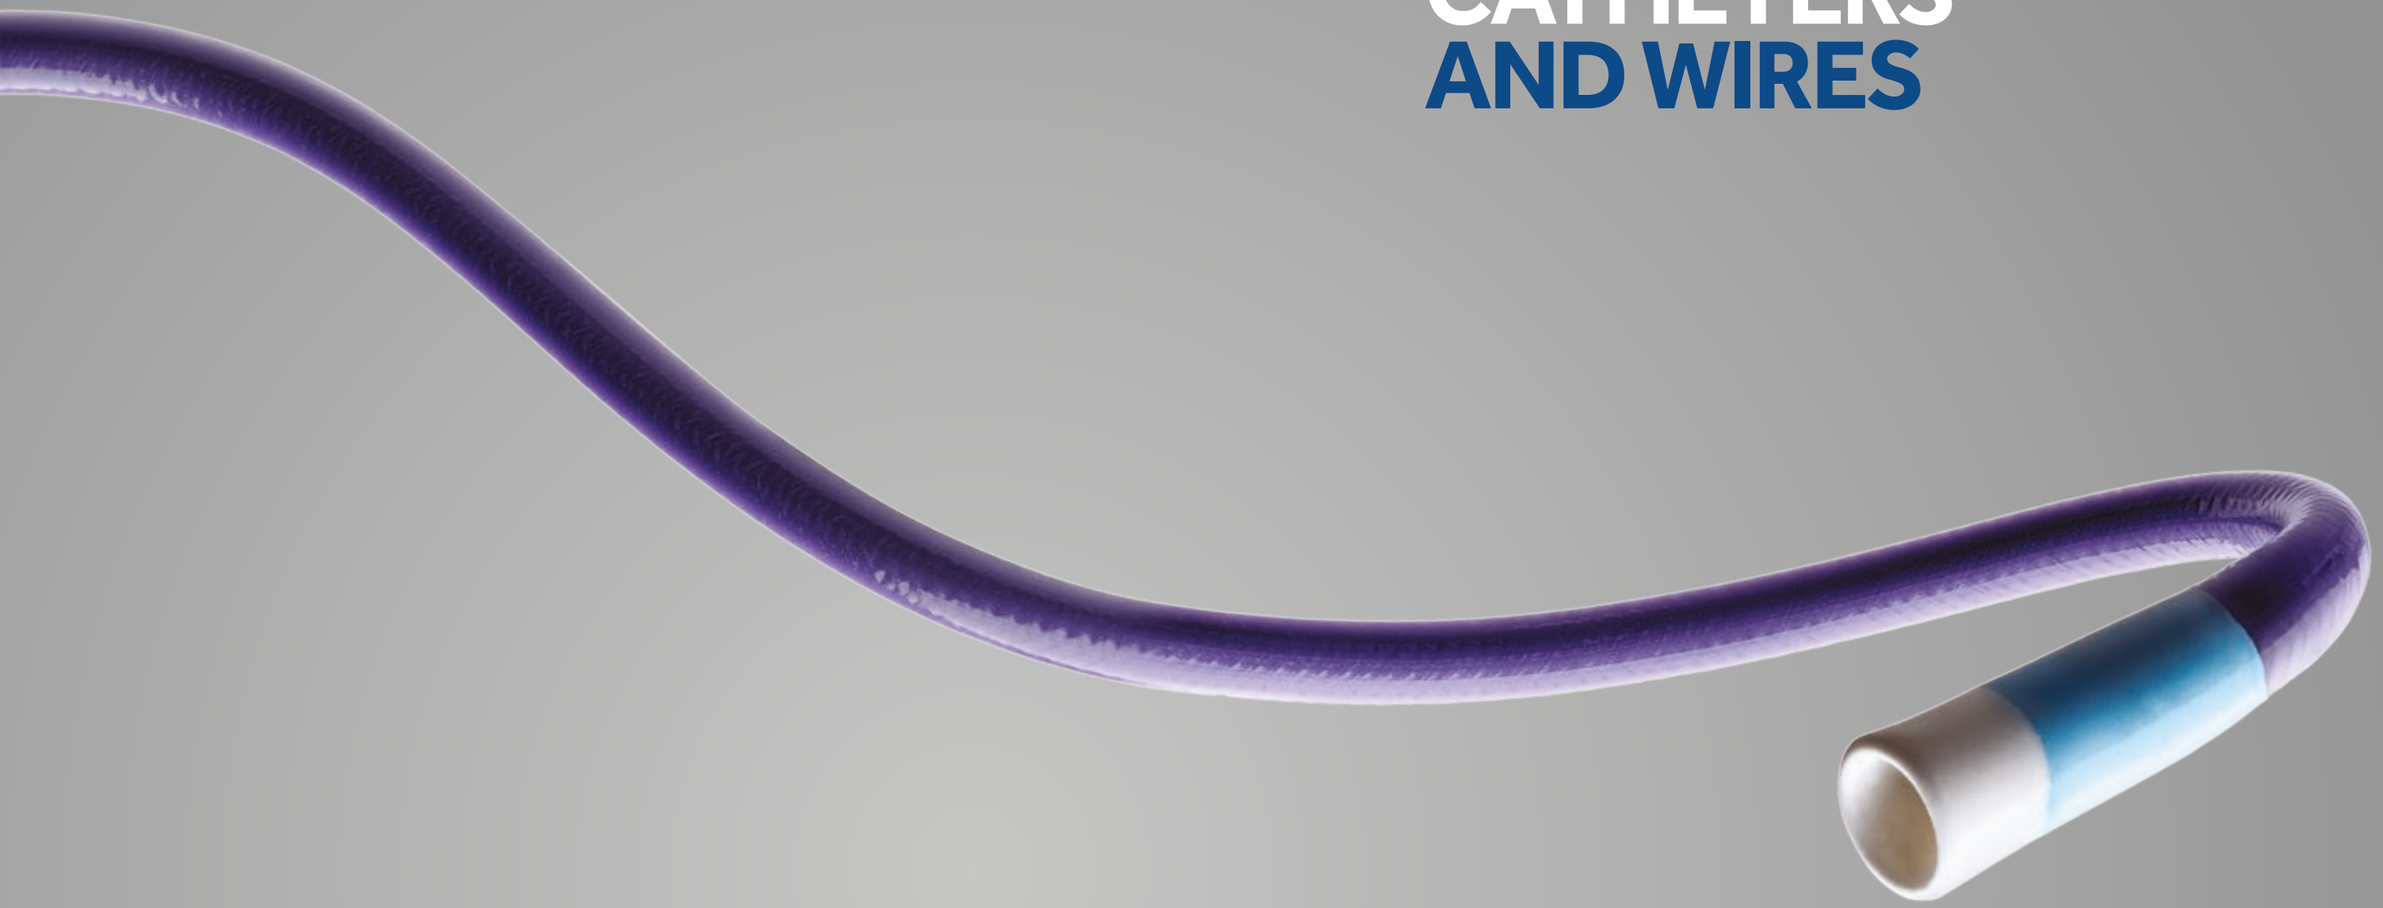
ANGIOGRAPHIC CATHETERS AND WIRES



CORONARY DIAGNOSTIC CATHETERS

DxTerity™

PRODUCT DESCRIPTION

Features Full-Wall Technology: a proprietary extrusion process that melts layers together to form a solid shaft. This construction process is applied from hub to tip, providing the DxTerity diagnostic catheter with superior torque and lubricity for precise manipulation and enhanced deliverability.

PRODUCT FEATURES

Enhanced deliverability:
- InSlide™ polymer additive for superior lubricity to reduce friction and enhance deliverability

Precise manipulation:
- Unique, ergonomic, winged hub design for easy manipulation
- Double-braid wire applied from hub to tip enhances strength, torque and kink resistance

Excellent image quality:
- Soft, atraumatic radiopaque tip allows for increased visibility
- Large lumen enables high flow of contrast media to increase visualization

Broad catheter portfolio:
- Optimized for both radial and femoral procedures
- Wide range of shapes and sizes
- Includes expanded offerings of long (125 cm) lengths

Universal Radial Curve Selection

UNIVERSAL RADIAL CURVES

TRApease curve
Relaxed secondary curve allows for easy engagement of the coronary artery ostia. Includes additional tertiary curve for additional support.

TRAnsformer curve
Provides excellent support from the ortic root and offers more reach to engage thcoronary artery ostia.

TRActive curve
30-degree soft tip after the primary curve, allowing it to engage the coronary artery ostia.

TRAcker curve
Provides excellent support from the contrateral wall and aortic root leverage.

ANGIOGRAPHIC CATHETERS

Sones™ Woven Coronary Catheters
Curve Style C Positrol™ Nylon Core

GENERAL CHARACTERISTICS

- Supplied sterile.
- Maximum guidewire: 7F, 7.5F & 8F Standard: 0.035"; 7F & 8F Hi-Flow: 0.038"
- Items per box: 10
- All tips taper to 5.5F

PRODUCT DESCRIPTION

The Sones™ coronary catheter was developed with F. Mason Sones, MD, to meet the evolving clinical needs of the brachial angiographer.

Two Unique Design Features:

- The woven core provides excellent torque control.
- The tapered tip easily adapts to anatomical variations.

Medtronic supplies a variety of catheter constructions and curve style tips as illustrated.

ANGIOGRAPHIC CATHETERS

NIH
Woven Coronary catheters High-Volume

GENERAL CHARACTERISTICS

▪ Supplied sterile. ▪ Items per box: 10 ▪ Nylon core ▪ Closed end ▪ Six sideholes ▪ Thin-wall construction

PRODUCT DESCRIPTION

The NIH catheter is designed with a thin wall and nylon core construction to provide maximum flow rates and catheter stability.

The flexible tip makes positioning in the cardiopulmonary system easier. This catheter is used to visualize the aorta, ventricles, pulmonary vasculature and the great veins.

ANGIOGRAPHIC CATHETERS

Lehman™ Ventriculography
Woven Coronary catheters High-Volume

GENERAL CHARACTERISTICS

▪ Supplied sterile. ▪ Items per box: 10 ▪ Closed end ▪ Four sideholes ▪ Thin-wall construction

PRODUCT DESCRIPTION

J.S. Lehman, MD, developed the Lehman™ ventriculography catheter. This catheter is specifically designed to be placed easily into the left ventricle via the aorta. The flexible, tapered distal tip is slightly curved to assist passage through the aortic valve and to sit freely in the contour of the left ventricle.

The location of the four sideholes enables the angiographer to record proximal aortic pressures without removing the tip from the aortic valve. This catheter provides excellent flow rates and catheter stability due to its thin-wall construction.

LEHMAN™ VENTRICULOGRAPHY

ANGIOGRAPHIC CATHETERS

Gensini™ Catheter
Woven Coronary Catheters High-Volume

GENERAL CHARACTERISTICS

• Supplied sterile. • Items per box: 10 • Open end • Six sideholes • Thin-wall construction

PRODUCT DESCRIPTION

Goffredo G. Gensini, MD, is responsible for the first designed catheter with an open end hole. This catheter has a tapered tip that fits securely over a guidewire for percutaneous introduction.

The six sideholes and thin-wall construction provide maximum flow rates. The catheter is used for aortic, ventricular, pulmonary, and large-venous contrast studies.

ANGIOGRAPHIC CATHETERS

Gensini™ Catheter
Woven Coronary catheters General Purpose and Transvalvular

GENERAL CHARACTERISTICS

• Supplied sterile. • Items per box: 10 • Open end • No sideholes • Standard wall construction

PRODUCT DESCRIPTION

Designed by Andre Cournand, MD, in 1939, the Cournand™ Catheter was the first to be manufactured specifically for use in the heart. The gradually curved tip facilitates easy access to the right heart. The Cournand™ catheter is used for blood sampling and pressure measurements.

The general construction of these catheters consists of a woven outer core and a high-density polyurethane coating.

ANGIOGRAPHIC CATHETERS

Lehman™ Catheter
Woven Coronary catheters General Purpose and Transvalvular

GENERAL CHARACTERISTICS

• Supplied sterile. • Items per box: 10 • Open end • No sideholes • Thin-wall construction

PRODUCT DESCRIPTION

J.S. Lehman, MD, designed a catheter for right heart studies similar to the Cournand™ catheter. However, the Lehman™ catheter has a thin-wall construction that maximizes catheter flexibility and flow rates.

The general construction of these catheters consists of a woven outer core and a high-density polyurethane coating.

ANGIOGRAPHIC CATHETERS

Goodale-Lubin™ Catheter
Woven Coronary catheters General Purpose and Transvalvular

GENERAL CHARACTERISTICS

• Supplied sterile. • Items per box: 10 • Open end • Two laterally opposed sideholes. • Thin-wall or standard-wall construction.

PRODUCT DESCRIPTION

The general construction of these catheters consists of a woven outer core and a high-density polyurethane coating.

Walter T. Goodale, MD, and Martin Lubin, MD, developed standard-wall and thin-wall catheters similar to the Cournand™ and Lehman™ catheters in construction and tip curve.

The additional feature of the Goodale-Lubin™ catheter is the two laterally opposed sideholes just proximal to the tip for improved disbursement of contrast during right heart angiography.

ANGIOGRAPHIC WIRES

PTFE-Coated Guidewires: Fixed Core
Straight Tip

GENERAL CHARACTERISTICS

▪ Supplied sterile. ▪ Packaged in coiled hoops. ▪ Items per box: 10

PRODUCT DESCRIPTION

This design has a gradually tapered core that minimizes trauma to the vessel. Angiography guidewires come with a PTFE coating applied over the entire core, enabling free movement and a smooth sliding action.

A unique 'J' tip configuration is available on the fixed core wires. This 'J' tip can be "fingertip-straightened" from virtually any point of the wire shaft. This built-in convenience eliminates the need for a 'J' straightening tool for wire loading.

Medtronic offers a variety of tip configurations, sizes and styles. The two most common tip configurations are straight and 'J'. Medtronic guidewires are available in a range of diameters and are compatible with the minimal needle sizes noted in the table.

RADIAL INTRODUCERS

InTRAkit™ Access Kit

GENERAL CHARACTERISTICS

- Items per box: 5
- Supplied sterile

PRODUCT DESCRIPTION

InTRAkit™ access kit delivers excellent components for the transradial approach:

- IV catheter and micropuncture needles feature sharp tips for easy insertion
- Needle hubs offer excellent flashback visualization and excellent grip
- Mini-guidewire options include stainless steel, nitinol, or plastic- jacketed — all with atraumatic tips
- Tapered design ensures a smooth dilator-to-sheath transition
- Hydrophilic coating for enhanced lubricity
- Sheath provides excellent kink resistance

INTERVENTIONAL ACCESSORIES

INTERVENTIONAL ACCESSORIES

TRAcelet™ Hemostasis Device

GENERAL CHARACTERISTICS

- Items per box: 5
- Supplied sterile

PRODUCT DESCRIPTION

- The TRAcelet™ compression device is an innovative solution for simplified pressure control.
- Its dual-compression balloon system uniformly delivers pressure to the access site to stop bleeding, while maintaining radial artery patency.
- In the cath lab: use the syringe provided with the TRAcelet™ compression device for pressure optimization.
- In the recovery area: use the dial-based system for controlled pressure adjustments without the need for a syringe.

PEDIATRIC AND TRANSSEPTAL PRODUCTS

PEDIATRIC PRODUCTS

Lehman™ Catheter
Pediatric Woven Coronary Catheters

GENERAL CHARACTERISTICS

• Supplied sterile. • Items per box: 10 • Maximum guidewire equals minimum tip I.D. • Closed end.
• Thin-wall construction.

PRODUCT DESCRIPTION

J.S. Lehman, MD, developed the Lehman™ ventriculography catheter. This catheter is specifically designed to be placed easily into the left ventricle via the aorta. The flexible, tapered distal tip is slightly curved to assist passage through the aortic valve and to sit freely in the contour of the left ventricle. This catheter provides excellent flow rates and catheter stability due to its thin-wall construction.

LEHMAN™ CATHETER

PEDIATRIC PRODUCTS

Goodale-Lubin™ Catheter
Pediatric Woven Coronary Catheters

GENERAL CHARACTERISTICS

• Supplied sterile. • Items per box: 10 • Maximum guidewire equals minimum tip I.D. • Open end.
• Two laterally opposed sideholes. • Thin-wall or standard-wall construction.

PRODUCT DESCRIPTION

Walter T. Goodale, MD, and Martin Lubin, MD, developed standard-wall and thin-wall catheters similar to the Cournand™ and Lehman™ catheters in construction and tip curve.

The additional feature of the Goodale-Lubin™ catheter is the two laterally opposed sideholes just proximal to the tip for improved disbursement of contrast during right heart angiography.

Gensini™ Percutaneous Catheter
Pediatric Woven Coronary Catheters

GENERAL CHARACTERISTICS

• Supplied sterile. • Items per box: 10 • Maximum guidewire equals minimum tip I.D. • Open end.
• Six sideholes· • Thin-wall construction.

PRODUCT DESCRIPTION

Goffredo G. Gensini, MD, is responsible for the first designed catheter with an open end hole. This catheter has a tapered tip that fits securely over a guidewire for percutaneous introduction.

The six sideholes and thin-wall construction provide maximum flow rates. The catheter is used for aortic, ventricular, pulmonary and large-venous contrast studies.

NIH
Pediatric Woven NIH Catheters

GENERAL CHARACTERISTICS

• Supplied sterile. • Items per box: 10 • Maximum guidewire equals minimum tip I.D. • Nylon core.
• Closed end. • Six sideholes. • Thin-wall construction.

PRODUCT DESCRIPTION

The NIH (National Institutes of Health) catheter is designed with a thin wall and nylon core construction to provide maximum flow rates and catheter stability.

The flexible tip makes positioning in the cardiopulmonary system easier. This catheter is used to visualize the aorta, ventricles, pulmonary vasculature and the great veins.

The flexible tip makes positioning in the cardiopulmonary system easier. This catheter is used to visualize the aorta, ventricle, pulmonary vasculature and the great veins.

GENERAL CHARACTERISTICS

• Supplied sterile. • tems per box: 5 • Maximum guidewire equals minimum tip I.D. • Closed end.
• Six sideholes • Thin-wall construction.

PRODUCT DESCRIPTION

This thin-walled catheter is designed to provide maximum flow and flexibility. The catheter can be used for aortic, ventricular, pulmonary and large-vein contrast studies.

Band width: 1 mm.

Two marker bands 1 cm apart +- 1/2 mm (leading edge to leading edge).

PEDIATRIC NIH WITH CARDIO-MARKER IMAGE BANDS

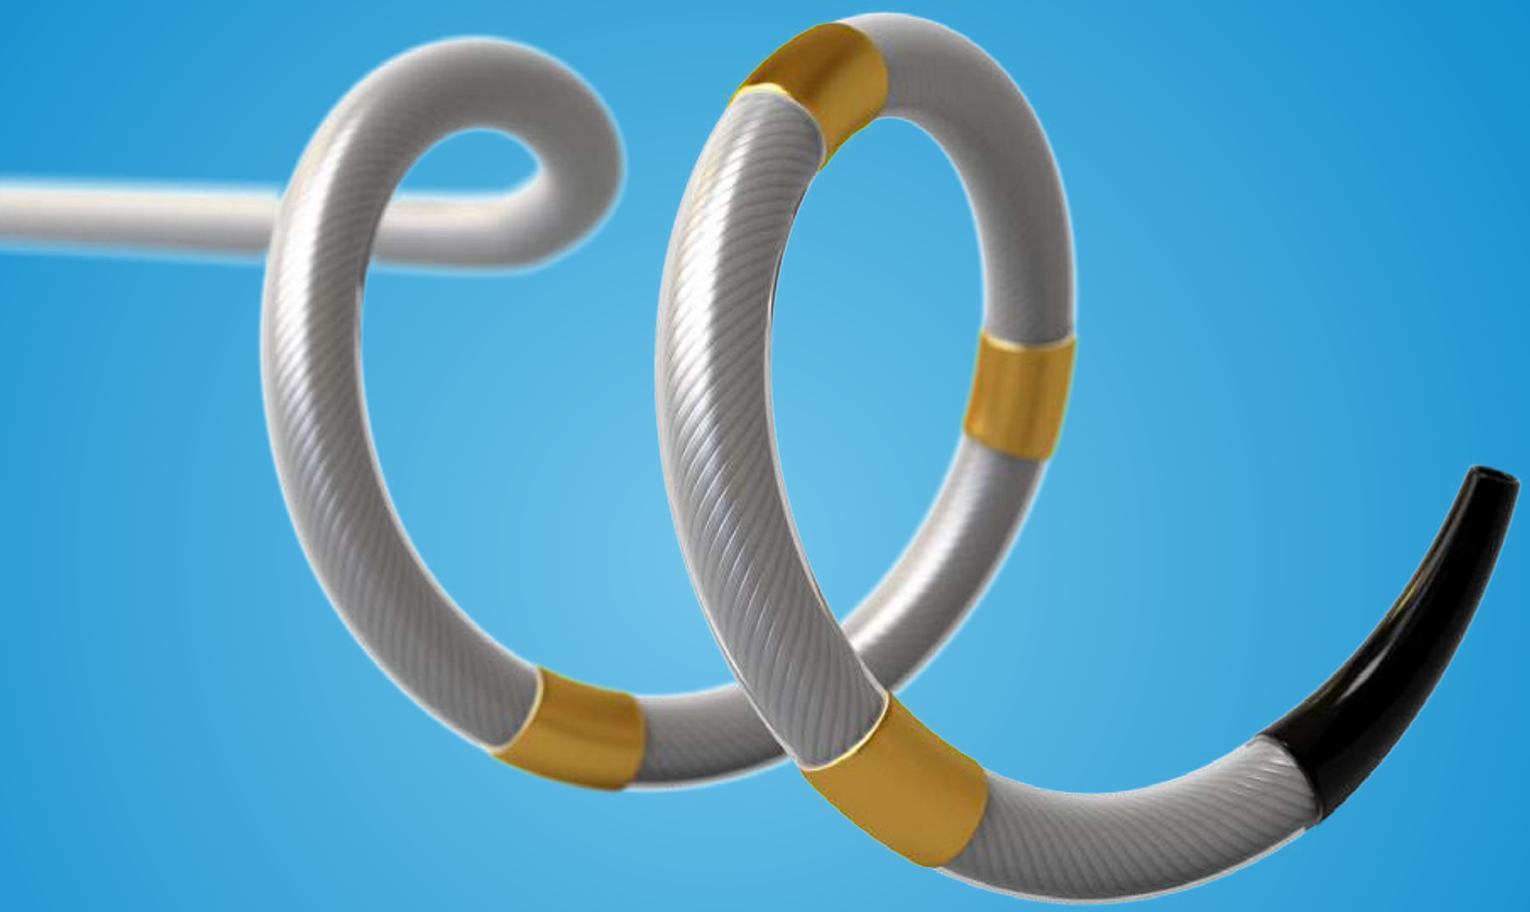
RENAL DENERVATION CATHETERS



RENAL DENERVATION

Symplicity Spyral™ Multi-Electrode Renal Denervation Catheter

GENERAL CHARACTERISTICS

• Supplied sterile • Items per box: 1 • Label color: Orange.

PRODUCT DESCRIPTION

The Symplicity Spyral™ Multi-Electrode Catheter offers an improved renal denervation procedure. Consistent four-quadrant ablation pattern, self-expanding helical design conforms to a wide range of artery shapes and sizes (3-8mm) and a low 6F guide catheter compatibility, delivered over a standard 0.014" guidewire with rapid exchange system.

ORDERING CHART

CATALOG NUMBER	PRODUCT
RDN016	Symplicity Spyral™ Catheter
RDN017	Symplicity G3™ Generator, supplied standard with remote control
RDN019	Cart, Symplicity G3™ Generator Component
RDN012	Replacement foot switch
PRT075-XX	Replacement power cable (country-specific) (Contact Medtronic representative for catalog number)

Symplicity Spyral™

Multi-Electrode Renal Denervation Catheter

TECHNICAL SPECIFICATIONS

As a recognised leader in renal denervation innovation, we partner with industry experts who share our commitment to fighting hypertension and sustaining health. Our Symplicity Spyral™ catheter and Symplicity G3™ generator offer a sophisticated multi-electrode helical solution that smoothly moves through vessels and conforms naturally to a broad range of patient anatomies. Four electrodes deliver radiofrequency (RF) energy simultaneously to the treatment site over a 0.014" guidewire, providing exceptional delivery with reduced procedural time.

PRODUCT DESCRIPTION

The Symplicity Spyral™ catheter consists of:

- Catheter: 6 F guide catheter-compatible
- Electrodes: 4 RF monopolar, gold, radio-opaque, 1.50-mm length
- Thermocouple: T-type
- Tip marker: Platinum/Iridium alloy
- Handle: injection molded
- Integrated extension cable for connection with the Symplicity G3™ generator

MATERIALS

HANDLE	■ ABS, thermoplastic elastomer overmold
CATHETER	■ Proximal shaft: polyether block amide laminated over stainless steel ■ Intermediate shaft: polyether block amide with braided stainless steel ■ Distal electrode array jacket: thermoplastic urethane ■ Tip: thermoplastic urethane ■ Guidewire lumen: high-density polyethlene liner ■ Spiral shaping element: nickel/titanium ■ Guidewire loading tool: thermoplastic vulcanisates
THERMOCOUPLE	■ T-type

SIZES

CATHETER	■ 117-cm length-compatible with 100 cm or shorter guide catheters ■ 6 F guide catheter-compatible ■ 0.054" maximum profile

PERFORMANCE

CATHETER	■ RX design compatible with 0.014" guidewire ■ Guidewire retraction used to deploy the spiral electrode array ■ RX joint: 30 cm from distal tip ■ Vessel diameter treatment range: 3–8 mm ■ Four independently controlled RF monopolar gold electrodes, spaced 6.5 mm apart ■ Treatment length: 17–21 mm if all electrodes are activated ■ Tip length: 5 mm ■ Tip marker: 1 mm proximal of distal tip ■ Femoral shaft marker: 55 cm from distal tip
STERILISATION PROCESS	■ E-beam and 10^{-6} SAL
SHELF LIFE	■ 1 year
LATEX	■ Not present
PHTHALATE	■ Not present
ANIMAL SUBSTANCE	■ Not present

Refer to the *Instructions for Use (IFU)* for full product information.

BARD PERIPHERAL VASCULAR

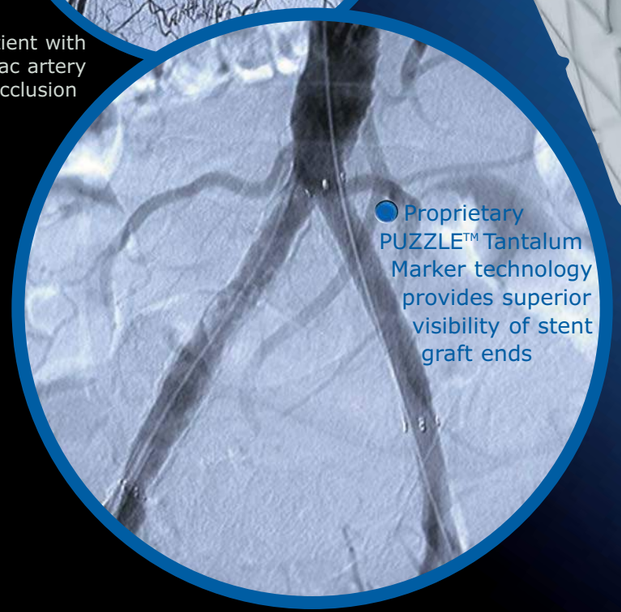
fluency® plus

VASCULAR STENT GRAFT



Patient with iliac artery occlusion

After implantation of a FLUENCY® Plus Vascular Stent Graft (8 mm diameter/40 mm length)

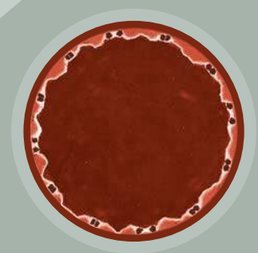
- The **FLUENCY® Plus** Stent Graft consists of a self-expanding Nitinol skeleton, encapsulated with two ultrathin layers of ePTFE
- The luminal surface of the ePTFE is impregnated with Carbon
- Highly radiopaque PUZZLE™ Tantalum Markers provide superior fluoroscopic visualization during the entire Stent Graft placement procedure
- The excellent radial expansion force and the 2mm flared bare Stent Graft ends minimize the risk of dislocation
- Minimal Stent Graft foreshortening during deployment further contributes to placement accuracy
- **FLUENCY® Plus** Stent Grafts are MRI safe and compatible
- Proprietary PUZZLE™ Tantalum Marker technology provides superior visibility of stent graft ends

Continuing the innovation, the **FLUENCY® Plus** Stent Graft now features the **BARD S.A.F.E.®*** DELIVERY SYSTEM including the unique catheter tip, which is formed from the outer sheath. During deployment the new tip disappears from the distal end of the deployment system. During the retraction there is no tip visible on the inner catheter. The tip of the **BARD S.A.F.E.®*** DELIVERY SYSTEM is retracted as part of the outer sheath.

This proprietary delivery system technology features a multifunction braided catheter with optimal balance between shaft **Pushability** and progressive **Flexibility** at the catheter tip, providing excellent **Trackability** to the target lesion site.

- Unique Catheter Tip Design
- Multifunctional Braided Catheter
- Low profile 8F, 9F and 10F delivery systems reduce trauma to the patient

- The soft and atraumatic tip is tapered to fit 0.035 in guide wires
- The "tipless inner catheter" reduces the risk of catheter entanglement post stent graft deployment
- A radiopaque marker band is integrated into the outer sheath and moves towards the handle during stent graft deployment substantially contributing to placement control



Cross section of 8 mm diameter FLUENCY® Plus Vascular Stent Graft at 1 mm oversizing *(in-vitro)*
