

## TEST REPORT IEC 61010-1

# Safety requirements for electrical equipment for measurement, control, and laboratory use Part 1: General requirements

Report Number. ....: SUES240700098601

 Date of issue
 2024-08-23

 Total number of pages
 84 pages

Name of Testing Laboratory SGS-CSTC Standards Technical Services Co.,Ltd. Suzhou Branch

preparing the Report....:

Applicant's name ...... KDS INSTUMENT(KUNSHAN)CO., LTD

Address ....... The 2<sup>nd</sup> Building, NO.155 Huayuan Road Zhangpu Town, Kunshan

City, Jiangsu Province, China.

Test specification:

**Standard.....:** IEC 61010-1:2010, AMD1:2016

Test procedure .....: SGS-CSTC

Non-standard test method .....: N/A

TRF template used .....: IECEE OD-2020-F1:2020, Ed.1.3

Test Report Form No. .....: IEC61010\_1P

Test Report Form(s) Originator ....: VDE Prüf- und Zertifizierungsinstitut GmbH

Master TRF.....: 2021-04-12

#### **Summary of testing:**

The sample(s) tested complies with the requirements of IEC 61010-1:2010, AMD1:2016 and EN 61010-1:2010+A1:2019.

Unless otherwise specified. the EUT with model BE-72 was selected as representative model for full testing.

Maximum normal load: Connect the ammeter in series into the circuit, and the current flowing through the ammeter is 5A.

Tma = 55 °C (declared by manufacturer)

K-type thermocouple used for temperature measurement.

Marking for BE-72

| KDSI             | CE 🗵   |
|------------------|--|
| Product:         | Panel Meter  |
| Model:           | BE-72  |
| Range:           | AC5A   |
| Manufactured By: | KDS INSTRUMENT(KUNSHAN)CO.,LTD.  |
| Address:         | No. 155 Huayuan Road, Zhangpu Town<br>Kunshan City, Jiangsu Province,China |

#### Remark:

- 1) The Height of CE/UKCA logo shall not be less than 5 mm; Height of WEEE logo shall not be less than 7 mm;
- 2) As declared by the applicant, the importer (and manufacturer, if it is different)'s name, registered trade name or registered trade mark and the postal address will be marked on the products before being placed on the market. The contact details shall be in a language easily understood by end-users and market surveillance authorities.
- 3) The marking plates for other models are of the same pattern except for model name.

| Test item particulars:   |  |
|--|--|
| Type of item   | Measurement  |
| Description of equipment function  | The product is an ammeter which is used to measure the current value in the circuit. |
| Connection to MAINS supply   | Not directly connect to mains  |
| Overvoltage category   |  |
| POLLUTION DEGREE   | 2  |
| Means of protection  | Not classified   |
| Environmental conditions   | Extended (Specify): -25°C to 55 °C; Less than 95% Rh                                 |
| For use in wet locations   | No   |
| Equipment mobility   | Fixed  |
| Operating conditions   | Continuous   |
| Overall size of equipment (W x D x H)  | 72 mm x 72 mm x 36 mm  |
| Mass of equipment (kg)   | 0,088 kg   |
| Marked degree of protection to IEC 60529   | IPX0   |
| Possible test case verdicts:   |  |
| - Test case does not apply to the test object:   | N/A (Not Applicable)   |
| - Test object does meet the requirement:   | P (Pass)   |
| - Test object does not meet the requirement:   | F (Fail)   |

|--------|--------------------|--|-----------------|---------|--|
| Clause | Requirement + Test |  | Result - Remark | Verdict |  |
|        | •                  |  |                 |         |  |

| 4         | TESTS   |                               |     |
|-----------|---|-------------------------------|-----|
| 4.4       | Testing in SINGLE FAULT CONDITIONS                          |                               | Р   |
| 4.4.1     | Fault tests   | (see Form A.1)                | Р   |
| 4.4.2     | Application of SINGLE FAULT CONDITIONS                      |                               | Р   |
| 4.4.2.1   | SINGLE FAULT CONDITIONS not covered by 4.4.2.2 to 4.4.2.14  | (see Form A.1)                | Р   |
| 4.4.2.2   | PROTECTIVE IMPEDANCE  |                               | N/A |
| 4.4.2.3   | PROTECTIVE CONDUCTOR  | (see Form A.6)                | N/A |
| 4.4.2.4   | Equipment or parts for short-term or intermittent operation |                               | N/A |
| 4.4.2.5   | Motors  |                               | _   |
|           | - stopped while fully energized                             |                               | N/A |
|           | - prevented from starting                                   |                               | N/A |
|           | - one phase interrupted (multi-phase)                       |                               | N/A |
| 4.4.2.6   | Capacitors  |                               | N/A |
| 4.4.2.7   | MAINS transformers  |                               | N/A |
| 4.4.2.7.2 | Short circuit   | (see Form A.39)               | N/A |
| 4.4.2.7.3 | Overload  | (see Forms A.26B and A.40)    | N/A |
| 4.4.2.8   | Outputs   |                               | N/A |
| 4.4.2.9   | Equipment for more than one supply                          |                               | N/A |
| 4.4.2.10  | Cooling   | (see Form A.26A)              | _   |
|           | – air holes closed  |                               | N/A |
|           | - fans stopped  |                               | N/A |
|           | - coolant stopped   |                               | N/A |
|           | - loss of cooling liquid                                    |                               | N/A |
| 4.4.2.11  | Heating devices   |                               | _   |
|           | - timer overridden  |                               | N/A |
|           | - temperature controller overridden                         |                               | N/A |
| 4.4.2.12  | Insulation between circuits and parts                       |                               | N/A |
| 4.4.2.13  | Interlocks  |                               | N/A |
| 4.4.2.14  | Voltage selectors   |                               | N/A |
| 4.4.3     | Duration of tests   | (see Form A.1)                |     |
| 4.4.4     | Conformity after application of fault conditions            | (see Forms A.1, A.6 and A.18) | Р   |

| 5     | MARKING AND DOCUMENTATION |  | Р |
|-------|---------------------------|--|---|
| 5.1   | Marking                   |  | Р |
| 5.1.1 | General                   |  | Р |

|        | IEC 61010-1  |   |              |
|--------|--|---|--------------|
| Clause | Requirement + Test   | Result - Remark                                 | Verdict      |
|        |  |   |              |
|        | Required equipment markings  |   |              |
|        | Visible from the exterior; or  |   | P            |
|        | Visible after removing cover or opening door                                 |   | N/A          |
|        | Visible after removal from a rack or panel                                   |   | N/A          |
|        | Not put on parts which can be removed by an operator                         |   | Р            |
|        | Letter symbols (IEC 60027) used  |   | Р            |
|        | Graphic symbols of Table 1 used  |   | Р            |
| 5.1.2  | Identification   |   | Р            |
|        | Equipment is identified by:  |   | _            |
|        | a) Manufacturer's or supplier's name or trademark                            | Trade mark was provided on the marking label.   | Р            |
|        | b) Model number, name or other means   | Model number was provided on the marking plate. | Р            |
|        | Manufacturing location identified  |   | N/A          |
| 5.1.3  | MAINS supply   |   | Р            |
|        | Equipment is marked as follows:  |   | _            |
|        | a) Nature of supply:   |   | _            |
|        | a.c. RATED MAINS frequency or range of frequencies:                          |   | _            |
|        | 2) d.c. with symbol 1:   | See copy of marking plate                       | <del>_</del> |
|        | b) RATED supply voltage(s) or range:   | See copy of marking plate                       | _            |
|        | c) Max. RATED power (W or VA) or input current:                              | See copy of marking plate                       | _            |
|        | The marked value not less than 90 % of the maximum value                     | (see Form A.2)                                  | Р            |
|        | If more than one voltage range:  |   | _            |
|        | Separate values marked; or   |   | N/A          |
|        | Values differ by less than 20 %  | (see Form A.2)                                  | N/A          |
|        | d) OPERATOR-set for different RATED supply voltages:                         | ,   | _            |
|        | Indicates the equipment set voltage  |   | N/A          |
|        | PORTABLE EQUIPMENT indication is visible from the exterior                   |   | N/A          |
|        | Changing the setting changes the indication                                  |   | N/A          |
|        | e) Accessory MAINS socket-outlets accepting standard MAINS plugs are marked: |   | _            |
|        | With the voltage if it is different from the MAINS supply voltage            |   | _            |
|        | For use only with specific equipment   |   | N/A          |
|        | If not marked for specific equipment it is marked with:                      |   | _            |

| IEC 61010-1 |  |  |         |  |
|-------------|--|--|---------|--|
| Clause      | Requirement + Test   | Result - Remark                                | Verdict |  |
|             | The maximum RATED current or power; or   |  | Р       |  |
|             | Symbol 14 with full details in the documentation   |  | Р       |  |
| 5.1.4       | Fuses  |  | N/A     |  |
|             | OPERATOR replaceable fuse marking (see also 5.4.5):  |  | _       |  |
| 5.1.5       | TERMINALS, connections and operating devices   |  | Р       |  |
| 5.1.5.1     | General  |  | Р       |  |
|             | Where necessary for safety, indication of purpose of TERMINALS, connectors, controls and indicators marked | Equipment is marked with necessary information | Р       |  |
|             | If insufficient space, symbol 14 used  |  | N/A     |  |
|             | Push-buttons and actuators of emergency stop devices and indicators:                                       |  | _       |  |
|             | - used only to indicate a warning of danger; or  |  | N/A     |  |
|             | - the need for urgent action   |  | N/A     |  |
|             | - coloured red   |  | N/A     |  |
|             | - coded as specified in IEC 60073  |  | N/A     |  |
|             | Supplementary means of coding provided, if meaning of colour relates (see IEC 60073):                      |  | _       |  |
|             | - to safety of persons; or   |  | N/A     |  |
|             | - safety of the environment  |  | N/A     |  |
| 5.1.5.2     | TERMINALS  |  | _       |  |
|             | MAINS supply TERMINAL identified   |  | Р       |  |
|             | Other TERMINAL marking:  |  | _       |  |
|             | a) FUNCTIONAL EARTH TERMINALS marked with symbol 5   |  | N/A     |  |
|             | b) PROTECTIVE CONDUCTOR TERMINALS:   |  | _       |  |
|             | Symbol 6 is placed close to or on the TERMINAL; or   |  | N/A     |  |
|             | Part of appliance inlet  |  | N/A     |  |
|             | c) TERMINALS of circuits (symbol 7 used)   |  | N/A     |  |
|             | d) HAZARDOUS LIVE TERMINALS supplied from the interior   |  | N/A     |  |
|             | Standard MAINS socket outlet used; or  |  | N/A     |  |
|             | RATINGS marked; or   |  | N/A     |  |
|             | Symbol 14 used   |  | N/A     |  |
| 5.1.6       | Switches and circuit-breakers  |  | N/A     |  |
|             | If disconnecting device, off position clearly marked   |  | N/A     |  |
|             | If push-button used as power supply switch:  |  | _       |  |

|        | IEC 61010-1  |   |         |
|--------|--|---|---------|
| Clause | Requirement + Test   | Result - Remark                                     | Verdict |
|        | - Symbol 9 and 15 used for on-position   |   | N/A     |
|        | Symbol 10 and 16 used for off-position   |   | N/A     |
|        | - Pair of symbols 9, 15 and 10, 16 close together  |   | N/A     |
| 5.1.7  | Equipment protected by DOUBLE INSULATION or REINFORCED INSULATION  |   | N/A     |
|        | Protected throughout (symbol 11 used)  |   | N/A     |
|        | Only partially protected (symbol 11 not used)  |   | N/A     |
| 5.1.8  | Field-wiring TERMINAL boxes  |   | N/A     |
|        | If TERMINAL or ENCLOSURE exceeds 60 °C:  | (see Form A.26A)                                    | _       |
|        | Cable temperature RATING marked:   |   | _       |
|        | Marking visible before and during connection or beside TERMINAL  |   | N/A     |
| 5.2    | Warning markings   |   | Р       |
|        | Visible when ready for NORMAL USE  |   | Р       |
|        | Are near or on applicable parts  |   | Р       |
|        | Symbols and text correct dimensions and colour:  |   | _       |
|        | Symbols min 2,75 mm and text 1,5 mm high and contrasting in colour with background                         |   | Р       |
|        | b) Symbols and text moulded, stamped or engraved in material min. 2,0 mm high and                          |   | N/A     |
|        | 0,5 mm depth or raised if not contrasting in colour  |   | N/A     |
|        | If necessary marked with symbol 14, or   |   | N/A     |
|        | Additional symbols such as symbol 12, 13 or 17 used to indicate the nature of HAZARD                       |   | N/A     |
|        | Statement to place equipment in a safe state before access by using a tool to HAZARDOUS parts is permitted |   | N/A     |
| 5.3    | Durability of markings   |   | Р       |
|        | The required markings remain clear and legible in NORMAL USE   | (see Form A.3)                                      | Р       |
| 5.4    | Documentation  |   | Р       |
| 5.4.1  | General  | Sufficient information provided in the user manual. | Р       |
|        | Equipment is accompanied by documentation for safety purposes for OPERATOR or RESPONSIBLE BODY             |   | Р       |
|        | Safety documentation for service personnel authorized by the manufacturer                                  |   | Р       |
|        | Documentation necessary for safe operation is provided in printed media or                                 |   | Р       |
|        | in electronic media if available at any time   |   | N/A     |

|        | IEC 61010-1   |   |         |  |
|--------|---|---|---------|--|
| Clause | Requirement + Test  | Result - Remark   | Verdict |  |
|        | Documentation includes:   | Sufficient information provided in the user manual, see below for details | _       |  |
|        | a) Intended use   |   | Р       |  |
|        | b) Technical specification  |   | Р       |  |
|        | c) Name and address of manufacturer or supplier   |   | Р       |  |
|        | d) Information specified in 5.4.2 to 5.4.6  |   | Р       |  |
|        | e) Information to mitigate residual RISK (see also subclause 17)  |   | Р       |  |
|        | f) Accessories for safe operation of the equipment specified  |   | Р       |  |
|        | g) Guidance provided to check correct function of the equipment, if incorrect reading may cause a HAZARD from harmful or corrosive substances of HAZARDOUS live parts |   | Р       |  |
|        | h) Instructions for lifting and carrying  |   | N/A     |  |
|        | Warning statements and a clear explanation of warning symbols:  |   | _       |  |
|        | - provided in the documentation; or   |   | N/A     |  |
|        | - information is marked on the equipment  |   | N/A     |  |
| 5.4.2  | Equipment RATINGS   |   | Р       |  |
|        | Documentation includes:   | Sufficient information provided in the user manual, see below for details | _       |  |

- NOTE 1 Test fingers and pins are to be applied without force unless a force is specified (see 6.2.2)

  NOTE 2 Special consideration should be given to inadequate insulation and high voltage parts (see 6.2)

  NOTE 3 Parts are considered to be ACCESSIBLE if they could be touched in the absence of any covering which is not considered to provide suitable insulation (see 6.4).
- NOTE 4 Capacitance test may be required (see Form A.5).
- NOTE 5 The determination methods are:

  V = visual; R = rigid test finger; J = jointed test finger; P3 = pin 3 mm diameter; P4 = pin 4 mm diameter.

NOTE 1 - tm = measured temperature

tc = tm corrected (tm-ta+ 45 °C or max. rated

ambient)

t<sub>max</sub> = maximum permitted temperature

NOTE 2 - see also 14.1 with reference to component operating conditions

NOTE 3 - Record values for NORMAL CONDITION and / or SINGLE FAULT CONDITION in this Form use additional form if necessary

NOTE 4 - see Form 1.6 bit in the condition of the condition

Supplementary information:

Rated ambient: 55°C.

Voltage tests can be carried out once after performing the tests of clause 8 and clause 11. However, if voltage tests are carried out separately after each set of tests, two forms can be used.

NOTE -  $t_m$  = measured temperature

 $t_c = t_m \text{ corrected } (t_m - t_a + 40 \text{ °C or max. RATED ambient})$ 

 $t_{\text{max}}$  = maximum permitted temperature

Conformity is checked by applying 5 positive and 5 negative impulses with the applicable impulse withstand voltage, spaced up to 1 min apart, from a hybrid impulse generator (see IEC 61180-1).
