

## LETTER OF CONFIRMATION

To Whom It May Concern.

We, AS Chemi-Pharm, confirm that our product **Chemisept Med** has full bactericidal activity and is intended for professional use in **medical area**.

According to EN 14885:2018, stated in clause 4.3.2.2 "Hygienic handrub" and clause 4.3.2.4 "Surgical handrub and handwash", the obligatory standard to prove the bactericidal activity of the disinfectants and antiseptics in the **medical field** is EN 13727.

EN 1040 standard is a test for the evaluation of **basic** bactericidal activity of chemical disinfectants and antiseptics for industrial and domestic disinfection purposes.

In conclusion, considering bactericidal activity in the medical area, EN 13727 is proven to be more relevant than EN 1040.

Yours sincerely,  
Sander Piiskop
