## Autoclavable Single Channel High Temperature-Resistant Accurate Fixed Adjustable Pipette

Single channel Pipette, also called pipette gun, is a measuring tool that can transfer liquid from the original container to another container within a certain range.It is widely used in biology, chemistry, Medical diagnosis and Laboratory testing etc.

### **Product Description:**

Single channel Pipette, also called pipette gun, is a measuring tool that can transfer liquid from the original container to another container within a certain range.It is widely used in biology, chemistry, Medical diagnosis and Laboratory testing etc.

### **Product Features:**

【Volume】 : This Pipette has two types, Fixed or Adjustable volume, a variety of ranges can be selected, you can choose according to your application.

Fixed volume: 1ul,2ul,5ul,10ul,20ul,30ul,50ul,100ul,200ul,500ul,1000ul,5000ul,10000ul etc

Adjustable volume: 0.1-2.5ul,0.5-10ul,5-50ul,50-200ul,200-1000ul, 1000-5000ul, 2-10ml etc

【Tolerable temperature】 : Resistant to high temperature, the whole product can be autoclaved and high temperature disinfection.

【Lightweight and Ergonomic】 : Ergonomic design provides excellent operating experience

Lightweight handle design, Large display window allows for easy volume identification

【Highly accuracy】 : Every pipette is tested to ensure precision and accuracy. If the volume during use is not accurate, you can re-calibrate.

【Simple maintenance】 : Easy calibration and maintenance

### **Product Specification:**

Item	Volume	Type	Packing unit
6015001	1 ul	Fixed	Independent packing
6015002	2 ul		
6015003	2.5 ul		
6015004	5 ul		
6015005	7 ul		
6015006	10 ul		
6015007	15 ul		
6015008	20 ul		
6015009	25 ul		
6015010	30ul		
6015011	40ul		
6015012	50ul		
6015013	75 ul		
6015014	80 ul		
6015015	100 ul		
6015016	200 ul		
6015017	250 ul		
6015018	500 ul		
6015019	1000 ul

6015020	2000 ul		
6015021	2500 ul		
6015022	5000 ul		
6015023	10000 ul		

Item	Volume range	Increment	Type	Packing Unit
6015024	0.1-2.5 ul	0.05 $\mu$ l	Adjustable	Independent packing
6015025	0.5-10 ul	0.1 $\mu$ l		
6015026	2-10 ul	0.5 $\mu$ l		
6015027	5-50 ul	0.5 $\mu$ l		
6015028	10-100 ul	1 $\mu$ l		
6015029	20-200ul	1 $\mu$ l		
6015030	50-200 ul	1 $\mu$ l		
6015031	100-1000 ul	5 $\mu$ l		
6015032	200-1000 ul	5 $\mu$ l		
6015033	1000-5000 ul	50 $\mu$ l		
6015034	2-10ml	0.1ml		

## Product Details:

## Packaging Details

One piece in independent packing, then suitable quantity in cartons.

Single package size: 33X13X5 cm

Single gross weight: 0.300 kg

Also can customize package as per your request.

## Standing pipette rack

Standing pipette rack, can be applied to any specifications of pipette, pipette storage, convenient use of laboratory personnel, can be placed in different environments pipette shelf, single hole, porous, adjustable, quantitative pipette can be very convenient on the vertical pipette shelf.

### **Introduction :**

Standing pipette rack, can be applied to any specifications of pipette, pipette storage, convenient use of laboratory personnel, can be placed in different environments pipette shelf, single hole, porous, adjustable, quantitative pipette can be very convenient on the vertical pipette shelf.

### **Feature:**

1. Color : Withe
2. Material: Plastic
3. Packing: 48\*42\*45cm, 20pcs/ctn
4. Application: It is used for storing pipettes in laboratory and convenient for placing pipettes.

Name	Material	Color	Packing	Carton Size (cm)	Weight (kg)
Pipette rack	Plastic	White,blue	20pcs/ctn	48*42*45cm	14.7KG

## Advantage:

1. Pipette bracket adopts strict technological process, suitable for a variety of work occasions, its use can effectively stable, convenient use of pipette, can be suspended at the same time and multi-channel pipette.;
2. Pipette bracket has an anti-skid stable base for easy cleaning;
3. Can be mounted almost all brands of pipettes;
4. Upper center with a handle, easy to move or turn the frame;
5. The pipette is permanently attached to the surface of the support and is made of polycarbonate.
6. The pipette bracket can be placed with multiple single-channel pipettes (below 1000ul specifications). There are two discharge brackets, the front row bracket is lower than the back row bracket, and the front and back two discharge brackets are placed in each other's position, so that the user can clearly see all the pipettes placed on the bracket.
