IDENTIFICATION SHEET OF BIOCIDAL PRODUCT INFORMATION ON OXYPY

Name of the firm responsible for placement on the market : OXY'PHARM

Commercial name of the product : OXYPY

Name of the manufacturer : AIREL (sister company)

Physical form of the product : Ready for use milky solution, neutral scent

Biocide Product group: 3

Biocide Product type: TP18

Category of users: Professional use

Target organisms: flying and crawling insects as well as acarids (including scabies)

Intended use of the product

Ready-to-use solution, intended for treatment against flying and crawling insects as well as acarids (including scabies), to be used with devices designed according to the Nocospray/Nocomax system or for local application with a trigger spray.

Use method and dosage

Apply 1ml/m³ every 4 weeks. During treatment, keep the space closed and do not enter it. Treatment must take place in the absence of humans or with the use of adequate protection, as mentioned in the Safety Data Sheet. Two hours after the spraying is concluded, air the space for 10 minutes.

Shelf life

If stored and used as per the prescriptions and in its original packaging, the product is stable for 2 years from the manufacturing date.

Use opened and re-sealed recipients within 2 months.

Information on disposal

Dispose of packaging according to local regulations. Do not reuse empty recipients.

Do not dispose of leftovers by throwing them into sewage or water bodies.

Sale sizes : 1L and 20L
