Company Profile

## Company Profile

Zhejiang QL Biotech Co., Ltd is a company that focuses on producing and researching diagnostic reagents. Their management and R&D team have over 20 years of experience in product development and production within the IVD industry. The company's primary products include infectious disease products, cardiac marker detection products, DOA products, and tumor marker products.

Zhejiang QL Biotech Co., Ltd has 9,000 square meters manufacturing area and the clean area is nearly 700 square meters, with an annual 100 million tests production capacity. The company continuously provides product support and technical services for both domestic and foreign enterprises. We have already obtained ISO13485 quality system certificate and CE certificate for more than 100 product categories.

It has always been our mission to make every effort to build a high-quality product and technical service chain for all customers!

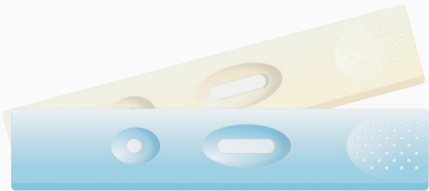

**Placenta growth factor/Soluble Fms-like tyrosine kinase-1  
Detection Kit (PE, Immunofluorescence method)**

This product is used for the quantitative detection of placental growthfactor (PlGF) and soluble fms-like tyrosine kinase-1 (sFlt-1) in the serum of pregnant women. Through the ratio of the two, it can assist the risk prediction of preeclampsia in pregnant women.
