

O-Insights™ MQTT Plugin

Overview:

The O-Insights MQTT Plugin facilitates seamless data exchange between Milestone XProtect VMS, and MQTT Brokers.

With support for MQTT protocol up to version 5, users can publish topics for alarms and events, enabling external systems to subscribe to these topics and create alarms in XProtect.

This integration enhances interoperability, streamlines communication, and improves response efficiency for security events, strengthening the overall functionality of both systems.

Minimum Server Requirements

CPU:

Intel® Core™ i5 or higher

RAM:

8GB, 16GB or more for large systems

Network:

Ethernet 100 Mbit or better

Hard Disk:

10 GB or more free

Operating system:

Microsoft® Windows® 10 Pro (64 bit) or Higher

Microsoft® Windows® Server 2016 (64 bit) or Higher

Milestone Version:

Milestone 2023 R2 or higher – All Editions

Type of Application

Milestone XProtect Plugin

Installs On

Plugin on XProtect Smart Client
Driver service on Management Server
