

Radifocus™ Introducer II for radial access

Introducer Sheath

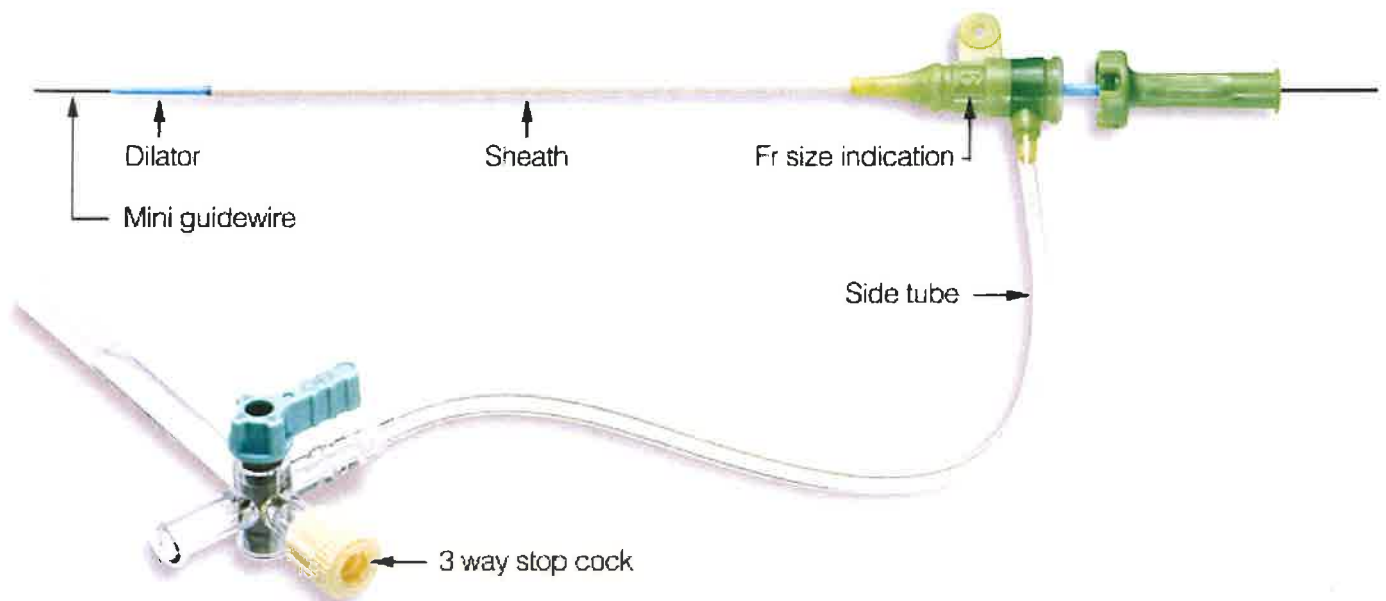

On this page: Description Characteristics General specifications Item specifications

Description

Being a pioneer and a leader in vascular access, Terumo's goal is to offer a complete solution for transradial interventions with devices that minimize patient stress and optimize transradial procedures.

Characteristics

- Dilator is tapered to each guidewire to minimize vessel trauma
- Terumo cross-cut valve maintains uncompromised haemostasis to avoid bleeding and air aspiration
- Thin radiopaque sheath with anti-kinking sleeve: for easy catheter handling
- Snap-on/click-off dilator to prevent dilator back-out during insertion and allows one-hand unlocking
- Micro puncture metallic entry needle with short bevel (22G / 21G / 20G) equals to mini guidewire

Sheath length	7 cm and 10 cm
Mini guidewire	Spring Straight 0.018" (0.46 mm), 0.021" (0.53 mm) and 0.025" (0.64 mm) 45 cm
Entry needle	For RT-R codes : metallic entry needle - 22G x 1 3/8" (0.7 x 35 mm), 21G x 1 3/8" (0.8 x 35 mm), 20G x 1 3/8" (0.9 x 35 mm) For RS*R codes : metallic entry needle -22G x 1 2/5" (0.7 x 35 mm), 21G x 1 2/5" (0.8 x 35 mm), 20G x 1 2/5" (0.9 x 35 mm)
Guidewire compatibility	0.018" (0.46 mm), 0.021" (0.53 mm) and 0.025" (0.64 mm)
Packaging	Tray
Dilator internal tip diameter	equals mini guidewire external diameter
Kit content	Sheath, dilator, spring mini guidewire and metallic entry needle
