USE OF THIRD PARTIES SUPPLIES

Please take notice that the cartridges embedded in the Neopost headsets for franking machines have been selected and developed to ensure their compliance with Neopost Products.

Neopost IJ-80 uses a printing technology granted to Neopost under a specific patent license. Under this license, Neopost is authorised to procure cartridges and included them into the headsets specifically designed for franking machine use.

Only Neopost genuine supplies have been tested and validated by Neopost quality department to fit adequately into Neopost equipment, not to damage any part thereof and to be fully functional with Neopost products.

Neopost Franking Machines have received homologations as a whole, including the printing engine, the printing technology and ink cartridges. Use of outsourced parts which haven't been included in the certification process may void the certification.

Neopost may not be responsible for any failures in the franking machine caused by the use of parts which Neopost.
