Product introduction

Features:

- With cuff and without cuff.
- Made of medical grade PVC.
- There are both high-volume low air pressure and low volume high air pressure.
- Suitable for neonate, infant, child and Adult.
- Size: 2.0mm 2.5mm 3.0mm 3.5mm 4.0mm 4.5mm 5.0mm 5.5mm 6.0mm 6.5mm 7.0mm 7.5mm 8.0mm 8.5mm 9.0mm 9.5mm 10.0mm

Reinforced Endotracheal Tube

Features:

- With cuff and without cuff.
- Made of medical grade PVC.
- There are both high-volume low air pressure and low volume high air pressure.
- Suitable for neonate, infant, child and Adult.
- Spiral reinforcement minimizes crushing or kinking.
- Size: 2.0mm 2.5mm 3.0mm 3.5mm 4.0mm 4.5mm 5.0mm 5.5mm 6.0mm 6.5mm 7.0mm 7.5mm 8.0mm 8.5mm 9.0mm 9.5mm 10.0mm

ET Tube with Suction Lumen

Features:

- Reinforced and ordinary.
- This product can do continuous suction of subglottic secretions, reducing the effect of exogenous infection and incidence of VAP. It can be cushioning and connecting breathing circuit at the same time.
- Size: 5.0mm 5.5mm 6.0mm 6.5mm 7.0mm 7.5mm 8.0mm 8.5mm 9.0mm

Endotracheal Tube (Oral/Nasal)

Oral

Features:

- Ordinary and reinforced.
- With cuff and without cuff.

Size (ID):

2.5mm 3.0mm
3.5mm 4.0mm
4.5mm 5.0mm
5.5mm 6.0mm
6.5mm 7.0mm
7.5mm 8.0mm
8.5mm 9.0mm

Nasal

Double Cuffed Endotracheal Tube

Double Cuffed

Double Cuffed Inside And Outside

Features:

Double cuffed to prevent accidental rupture.

Double Lumen Endobronchial Intubation

Features:

This product is used for surgical operation, for the insertion of left or right bronchus to confirm the airway of left or right lung.

Size: 28#-41#

Tracheostomy Tube

Without Cuffed

Features:

- Applicable to tracheotomy.
- With cuff and without cuff.

Size (ID):

3.0mm 3.5mm 4.0mm
4.5mm 5.0mm 5.5mm
6.0mm 6.5mm 7.0mm
7.5mm 8.0mm 8.5mm
9.0mm 9.5mm 10.0mm

With Cuffed

Preformed Tracheostomy Tube

Reinforced Cuffed

Reinforced With aspiration lumen

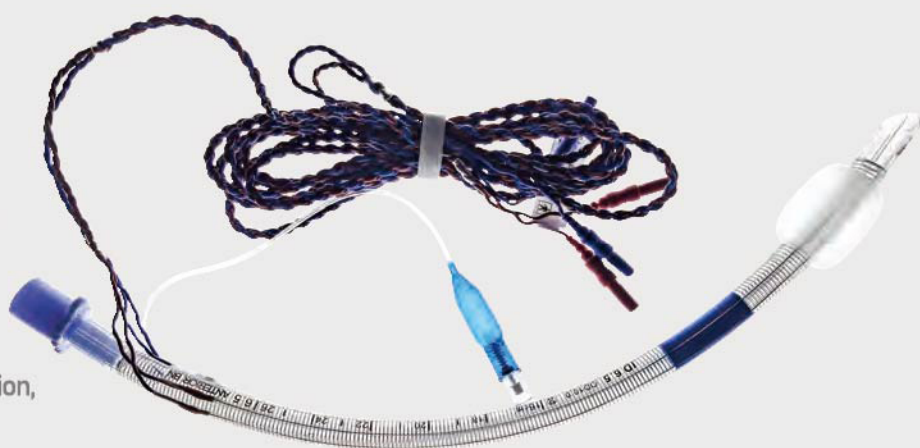

With aspiration lumen

Nerve-monitoring Endotracheal Tube

Features:

- The connecting part of the electrode is easier to touch and the operation time is shortened.
- Hidden electrode slot design, make the tube body more smooth, Beneficial to intubation operation, reduce friction injury.

Intubating Stylet

Iron

Aluminium

Features: In-built iron or aluminum rod, wrapped with clear PVC.

Size: 6Fr 10Fr 12Fr 14Fr

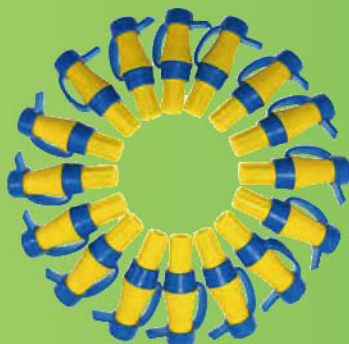

Endobronchial Tube Accessories

Check Valve

Endobronchial Tube connector

Balloon

Silicone Laryngeal Mask

Features:

- Made of medical-grade silicone.
- The color for the cuff can be customized.
- Both with and without aperture bars are available.
- Smooth connecting. Very High Quality.
- Reduces irritation to the patient consistent with the throat contour.

Size : 1# 1.5# 2# 2.5# 3# 4# 5#

Guedel Airway

Features:

- Made of medical grade PVC.
- Color coded for easy identification of sizes.

Size:

40mm 50mm 60mm 70mm 80mm 90mm 100mm 110mm 120mm

Nasogastric Tube

Features:

- Made from non-toxic, non-irritant soft PVCThree.

Size (ID) :

3.0mm 3.5mm 4.0mm 4.5mm 5.0mm 5.5mm
6.0mm 6.5mm 7.0mm 7.5mm 8.0mm 8.5mm
9.0mm

PVC Laryngeal Mask

Features:

- Made of medical-grade, soft and smooth cuff.
- The Kit with syringe and lubricant is ready for use.
- Both with and without aperture bars are available.
- Color-coded pilot balloon for easy size identification.

Size : 1# 1.5# 2# 2.5# 3# 4# 5#
